PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, SECOND SESSION

## SENATE—*Tuesday, April 11, 1978*

*(Legislative day of Monday, February 6, 1978)*

The Senate met at 11:30 a.m., on the expiration of the recess, in executive session, and was called to order by Hon. MURIEL HUMPHREY, a Senator from the the State of Minnesota.

### PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Let us pray:

Almighty God, ever present about us and in us, may we have a vivid sense of Thy real presence with us this day. Forgive us if we behold the beauty and wonder of the world about us having no thought of the Maker. And if the stirrings of the spirit acknowledge Thee in nature help us to understand Thou art more than nature. May we rejoice in the mystery of Thy creation with eyes to read the signposts of history and ears to hear Thy guiding voice.

O Lord, have regard for this Nation and all its leaders in this hour of the hard decision. When we are strong but unsure, mighty but hesitant, we need Thee every hour, lest we stray from Thee. Anoint us with Thy spirit that we may now and always choose Thy will as our will, Thy way as our way, Thy peace as our peace. Lock our fortunes to Thy purposes that we may rise with courage to be a blessing to the world, through Him who came to set men free. Amen.

### APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
*Washington, D.C., April 11, 1978.*

*To the Senate:*

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable MURIEL HUMPHREY, a Senator from the State of Minnesota, to perform the duties of the Chair.

JAMES O. EASTLAND,
*President pro tempore.*

Mrs. HUMPHREY thereupon assumed the chair as Acting President pro tempore.

### RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia is recognized.

### TUG FORK RIVER VALLEY

Mr. ROBERT C. BYRD. Madam President, the citizens, residents, property owners, and taxpayers of the Tug Fork River Valley in southern West Virginia have for more than 30 years been subjected to periodic flooding in the Tug Fork Basin of the Big Sandy River.

About 800 of those citizens are in the Capitol today, and they are petitioning Congress to waive the benefit-cost ratio as a requirement for flood protection measures in the Tug Fork River Valley.

The two West Virginia Senators, the two Kentucky Senators, and Representatives from the areas involved in both States, NICK RAHALL and CARL PERKINS, have met with the people who have come up from southern West Virginia and parts of Kentucky and have received their petition, and their resolution.

I ask unanimous consent to print in the RECORD a petition that has been presented by these people together with my prepared statement which I made to the group earlier today.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PETITION

Whereas, the citizens, residents, property owners and taxpayers of the Tug River Valley have for more than thirty (30) years been subjected to periodic flooding in the Tug Fork Basin of the Big Sandy River; and,

Whereas, the United States Army Corps of Engineers has for more than forty (40) years, at the expenditure of millions upon millions of dollars, made studies concerning the implementation of flood control projects within the Tug River Basin; and,

Whereas, to date, there has been constructed a partial flood wall around the City of Williamson business district and a flood wall around the Williamson Appalachian Regional Hospital situated in South Williamson, Kentucky; and,

Whereas, the flood wall in the City of Williamson was inadequate to protect said business district in that the water crested approximately eight (8) feet over the top of said wall and that the entire business districts of Iaeger, Matewan and Williamson, West Virginia, were destroyed, and that thousands of residences in both West Virginia and Kentucky were likewise damaged or destroyed by the April 5, 1977, flood; and

Whereas, the Tug Valley Chamber of Commerce, as the coordinating group for flood protection, has for more than twenty (20) years urged the Corps of Engineers and members of Congress to implement a worthwhile flood protection project for the benefit of the residents of the Tug Fork of the Big Sandy River; and,

Whereas, after the expenditure of millions and millions of dollars, there is no adequate protection for said Valley; and,

Whereas, in the last thirty-two (32) years, in twenty-six (26) of those years the river has reached a crest exceeding the flood level in the City of Williamson, wherein gauges are maintained to measure the height of said Tug Fork River; and,

Whereas, the Corps of Engineers has indicated in meeting after meeting that it is only authorized to do that which Congress by legislation authorizes it to do with funding; and,

Whereas, it has become obvious to the citizens and residents that the Corps of Engineers only requests authorization for those projects which it feels will meet either the prior wishes of the Congressional delegations representing the affected areas or those which would not appear to be excessive in cost; and,

Whereas, as a result of the actions of the Corps of Engineers and the Congress, for more than thirty (30) years virtually nothing has been accomplished other than to make an additional study, and after the expenditure of several hundred thousands of dollars, to announce that the project being studied is not feasible due to failure to meet the benefit-cost ratio required by Federal legislation; and,

Whereas, for more than twenty (20) years there has been a cry for flood protection in the Tug Fork Valley, which pleas have gone unheeded; yet in other parts of the country Corps of Engineers projects are forced down the throats of citizens, including an area in northern West Virginia which has had no major flood problem, yet an area which is flood prone is left unprotected; and,

Whereas, it is inconceivable to the citizens of this Valley that our neighboring citizens in the Guyan River Valley and the Levisa Fork Valley have mainstream dam projects which will afford them almost 100 percent protection from mainstream flooding; and,

Whereas, as a result of three (3) disaster declarations by the President of the United States, namely January, 1957, March, 1963, and April, 1977, the Federal Government has expended millions and millions of dollars in flood related expenses in the nature of recovery efforts and has lost millions of dollars in tax revenues from businesses and individuals who suffered casualty losses due to said floods and loss of income from said floods; and,

Whereas, in excess of 11 percent of the coal mined in the United States must pass through or originate in the Tug Fork Valley, it is inconceivable that said Valley would be left unprotected when its natural resources are vital to the well-being of the country as a whole; and,

Whereas, hundreds of millions of dollars of the money of the Federal Treasury are expended throughout the world with no criteria such as the benefit-cost ratio being involved; and,

Whereas, it is obvious that in order for any appreciable flood protection to be afforded the citizens, residents and taxpayers of the Tug River and its tributaries, the benefit-cost ratio must be eliminated from the criteria required for Corps of Engineers' flood protection projects; and,

Whereas, in the construction of the R. D. Bailey Dam on the Guyan River in southern West Virginia, the cost overruns have far exceeded the benefit-cost ratio, and we further believe that the same is true of the Fishtrap Reservoir on the Levisa Fork;

Now, therefore, be it resolved that the Congress of the United States:

1. Immediately enact the necessary legislation to eliminate the benefit-cost ratio criteria from flood control projects on the Tug Fork of the Big Sandy River.

2. Immediately appropriate sufficient monies to dredge and snag the Tug Fork River and its major tributaries in both West Virginia and Kentucky.

3. Authorize the Corps of Engineers to proceed with the immediate implementation of its Plan V (the Matewan cut-off) of its comprehensive study of the Tug Fork.

4. Immediately authorize the Corps of Engineers to update its surveys of the Lower Knox Creek and the Panther Creek Reservoirs to enable a funding authorization for immediate implementation of those projects when said studies have been completed.

5. Authorize an immediate study of a mainstream flood protection dam on Tug River with the ultimate goal to implement said mainstream dam to fully protect the citizens, residents, property owners and taxpayers of the Tug Fork Valley.

Respectfully submitted by the Tug Valley Chamber of Commerce on behalf of the citizens, residents, property owners and taxpayers of the Tug Fork Valley of southern West Virginia and eastern Kentucky, this 11th day of April, 1978, at the nation's capitol in Washington, D.C.

STATEMENT OF SENATOR ROBERT C. BYRD

I want to welcome each of you to Washington.

Each and every day we see marches in the streets and demonstrators on the steps of the Capitol building. They come from all walks of life, and many have legitimate concerns.

But not one—in my way of thinking—has suffered the continous misfortunes and frustrations of those West Virginians and Kentuckians living along the banks of the Tug and Levisa Forks of the Big Sandy River. No, not one.

So, I am happy today that we were able to arrange the travel accommodations to Washington so your voices, as well as ours, can be heard.

Every time it rains in this city my thoughts go to the Tug Fork Valley. I wonder if it is pouring in West Virginia, and if the Tug Fork is out of its banks again.

You say: Senator Byrd, you are Majority Leader of the United States Senate. You say, Senator Randolph, you are the powerful chairman of the Senate Public Works Committee. You reason: Surely, these men can provide flood protection in our valley.

Well, I am not going to apologize today for what we can not accomplish. I am merely going to say that Robert Byrd and Jennings Randolph and Nick Rahall will do their very best—that we will continue to do all we can do.

We are in positions of leadership, but we were provided with no magic wands. We have, to some extent, the power of persuasion. But you can believe me, if talk were all that was needed, the Tug Fork would be as tame as your water faucets.

The Senate and House are composed of 535 Members, and in every region, every State, every city, every hamlet, there are specific problems that exemptions from Federal laws, and the infusion of millions of dollars would help alleviate.

This is our problem, and it is a real one. Because each case is considered a "special case" to people in specific areas, there is a near immovable rock of reluctance to any digression from fiscal policies such as the cost-benefit ratio.

In spite of this, your Congressional delegation is working hard to get this exemption for flood protection in the Tug Fork Valley. I believe we will succeed in the Senate.

I believe, and I know this is the feeling of Sen. Randolph, that your problem is the most special of all the special cases. You are living in the midst of an energy gold mine, and your sweat will ease this country's most pressing problem. Your businesses are needed to feed and clothe the Nation's most important civilian army—the coal miners.

Today, your Congressional delegation has brought together most of the Federal officials who are important in getting permanent flood protection.

We want them to hear your message as they have heard ours. Your voices are effective, and by working together, it is my hope we will accomplish our goal.

The ACTING PRESIDENT pro tempore. The Senator from Tennessee.

Mr. BAKER. Madam President, I thank the Chair. I have no requirement for my time and no request for the time under the order previously entered.

I yield it back.

Mr. ROBERT C. BYRD. Madam President, I do have need for my remaining time.

## THE CALENDAR

Mr. ROBERT C. BYRD. Madam President, as in legislative session, I ask unanimous consent that the Senate proceed to the consideration of Calendar Orders Nos. 667 and 668.

Mr. BAKER. Madam President, reserving the right to object, and I shall not object, I advise the majority leader that these Calendar items, Nos. 667 and 668, have been cleared on this side. We have no objection to their immediate consideration and passage.

## AMERICAN LEGION

The bill (S. 2424) to amend the act incorporating the American Legion so as to redefine eligibility for membership therein, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 2424

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That section 5 of the Act entitled "An Act to incorporate the American Legion", approved September 16, 1919 (41 Stat. 285; 36 U.S.C. 45), is hereby amended to read as follows:

"SEC. 5. No person shall be a member of this corporation unless he has served in the naval or military services of the United States at some time during any of the following periods: April 6, 1917, to November 11, 1918; December 7, 1941, to December 31, 1946; June 25, 1950, to January 31, 1955; August 5, 1964, to May 7, 1975; all dates inclusive, or who, being a citizen of the United States at the time of entry therein, served in the military or naval service of any of the governments associated with the United States during said wars or hostilities: *Provided, however*, That such person shall have an honorable discharge or separation from such service or continues to serve honorably after any of the aforesaid terminal dates.".

Mr. ROBERT C. BYRD. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–726), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

S. 2424 would amend the Federal charter of the American Legion in order that membership eligibility dates will conform with eligibility dates for veterans' benefits for the Vietnam war era.

STATEMENT

Senator Bayh made the following remarks upon introduction of S. 2424.

Mr. President, today I am introducing legislation which will make a simple yet important change in the present American Legion charter in order that membership eligibility dates will coincide with eligibility dates for veterans benefits for the Vietnam era. During the 59th national convention of the American Legion held in Denver, Colo., from August 23–25, 1977, a resolution was adopted by the Legionnaires present to broaden the Vietnam-era eligibility period from August 5, 1964, through May 7, 1975. At the present time, August 15, 1973, marks the cutoff date for membership.

As my colleagues know, the American Legion plays an important role in promoting the spirit of community mindedness and public service wherever a Legion post is found. Of particular note is the Legion's sponsorship of annual statewide and national seminars where high school youth are able to learn more about government at the local, State, and national levels. Boys and girls' State and Nation activities also give young people the opportunity to participate in actual elections. Such exercises provide better understanding of the workings of our democracy which will be useful to these young people as future community leaders.

Mr. President, this is just one of the many valuable community functions provided by the Legion. Clearly, by extending the eligibility dates for Vietnam-era veterans to become Legionnaires, we will also be enhancing the ability of the Legion to pursue these activities through the additional memberships of those who have already served their country honorably.

## NATIONAL ARCHITECTURAL BARRIER AWARENESS WEEK

The joint resolution (H.J. Res. 578) authorizing the President to proclaim the third week of May of 1978 and 1979 as "National Architectural Barrier Awareness Week" was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Madam President, I move to reconsider the vote by which the resolution was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-727), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

House Joint Resolution 578 would designate the period of the third week of May 1978 as "National Architectural Barrier Awareness Week," calling upon the people of the United States to observe such week with appropriate activities.

STATEMENT

The Architectural Barriers Act of 1968 (Public Law 94-480) committed the Government to remove all physical barriers from Federal buildings. The National Architectural and Transportation Compliance Board was created by the 1973 Rehabilitation Services Act and was given responsibility of enforcing compliance with Public Law 94-480. In April 1977, the Secretary of HEW issued regulations implementing the Rehabilitation Services Act by requiring all buildings constructed, significantly altered, or leased with Federal funds to be barrier free.

The Tax Reform Act of 1976 also recognized the plight of the handicapped by allowing a maximum $25,000 tax deduction for businesses who make facilities fully accessible to the handicapped. The deduction is available through 1979.

The dates specified in the bill also correspond to the week selected by the Easter Seals Society for observing National Handicapped Awareness Week throughout the country.

## ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business, as in legislative session, for not to extend beyond the hour of 12 noon with statements therein limited to 5 minutes each.

(Routine morning business transacted and additional statements submitted are printed later in today's RECORD.)

## RECESS UNTIL 12 NOON

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the Senate stand in recess until the hour of 12 noon today.

There being no objection, the Senate, in executive session, at 11:36 a.m., recessed until 12 noon; whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. ALLEN).

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

## THE PANAMA CANAL TREATY

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of Executive N, 95th Congress, 1st Session, Calendar No. 2, which the clerk will state.

The second assistant legislative clerk read as follows:

Executive N, 95th Congress, 1st Session, the Panama Canal Treaty.

The Senate resumed the consideration of the treaty.

AMENDMENT NO. 100

The PRESIDING OFFICER. The pending question is the amendment by the distinguished Senator from North Carolina (Mr. HELMS) which the clerk will state.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an amendment numbered 100.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Before the first sentence of paragraph 2, of article IV, insert the subparagraph designation "(a)".

"(b)(1) When in the performance of official duties, the vessels and aircraft operated by or for the United States Forces may move freely through Panamanian air space and waters without impediment.

"(2) Similarly, the vehicles, equipment, and personnel of the United States Forces may, when in the performance of official duties, move freely in the Republic of Panama without impediment.".

The PRESIDING OFFICER. Time for debate on this amendment is limited to 1 hour, to be divided equally between the distinguished Senator from North Carolina (Mr. HELMS) and the distinguished Senator from Maryland (Mr. SARBANES).

Who yields time?

Mr. HELMS. Mr. President, I yield myself such time as I may require.

(Mr. HASKELL assumed the chair.)

Mr. HELMS. Mr. President, when one looks at the map of the proposed defense installations and canal installations that would be adopted under this treaty, the most striking feature is that the various installations are not contiguous. The appearance of the map has been described by some as resembling Swiss cheese; others have referred to it as "the Balkanization" of Panama. In any case, what you see are a series of separate compartments, dedicated to different uses, and having a different status.

We have, for example, some areas designated as "canal operating area," others as "canal operating areas which will revert to Panama during the life of the treaty," "areas subject to separate bilateral agreement," "defense site," "military area of coordination which will revert to Panama during the life of the treaty," "military area of coordination during the life of the treaty," and "area" of civil coordination (housing)."

Not only are all of these areas separate and distinct, but some of them are entirely surrounded by areas of Panamanian jurisdiction. It is evident that there will be many occasions when U.S. military vehicles and personnel must intrude on Panamanian territory simply to gain access to areas which are dedicated to our use during the life of the treaty. In case of an emergency, of course, we would have to take military action to defend these sites; but even if there were no military emergency, our military personnel would have to pass through areas of Panamanian jurisdiction simply in the performance of routine official duties.

In either case, an unfriendly Government of Panama, or leftist agitators could attempt to raise the issue of U.S. military forces supposedly violating the territorial integrity of Panama.

And why could they raise this issue? They could raise such an issue because incredibly the treaty itself does not provide any specific rights of access to our various civil and military installations on the isthmus. That is really extraordinary when you think about it. Here we have widely separate installations some of them of critical importance without any clear treaty right to have access to them.

Now what does the treaty provide?

The treaty provides first of all that the United States of America and the Republic of Panama commit themselves to protect and defend the Panama Canal. Is that a general writ of authority to move within Panamanian jurisdiction? Maybe yes, and maybe no, depending upon how you interpret it. There is no specificity as to how this commitment may be implemented.

Second, the treaty provides that each party shall act, in accordance with its constitutional processes, to meet the danger resulting from an armed attack or other actions which threaten the security of the Panama Canal or of ships transiting it. Is that a general writ of authority to move within Panamanian jurisdiction? No it is not, for it is operative only in times of a "threat," that is, times of emergency. What happens to the rest of the time? Suppose the United States determines through its constitutional processes that Panama is the threat to the security of the canal, and Panama, through its constitutional processes decides that the United States is the threat. What happens then? Either the United States violates Panamanian internal processes and affairs, or the United States gets out.

What else does the treaty provide? It also provides that, "for the duration of this treaty, the United States of America shall have primary responsibility to protect and defend the canal." But what is the canal? Does the term "canal" include the semaphore fields, isolated from canal operating areas and other

defense sites? Does the term "canal" include electrical generation plants and potable water plants that are isolated from the canal operating areas? The treaty is silent.

Is there anything in the treaty that provides for access to our installations? The only hint of such rights is in the following sentence of article IV, paragraph 2:

> The rights of the United States of America to station, train, and move military forces within the Republic of Panama are described in the Agreement in Implementation of this Article, signed this date.

This is the only sentence, Mr. President, the only sentence which even suggests that we have rights of access; but it does not specify what those rights are. There are no treaty guarantees, Mr. President.

Instead, we have to turn to the agreement in implementation of article IV. Now, when we turn to the implementation agreement, it takes a long time to find anything at all that might be interpreted as permitting access to United States and canal installations by U.S. military forces. Where is that section? It appears to be that it is in article XV of the implementation agreement, an article devoted to "Movement, Licenses and Registration of Vessels, Aircraft, and Vehicles." In short, it is an article devoted to such administrative technicalities as drivers' licenses, automobile license tags, pilots' licenses, and so forth.

Here is how our right of access across Panamanian territory is provided, if it is provided at all. Section (1) (a) of article XV says:

> When in the performance of official duties, the vessels and aircraft operated by or for the United States Forces may move freely through Panamanian air space and waters, without the obligation of payment of taxes, tolls, landing or pier charges or other charges to the Republic of Panama, and without any other impediment.

Now in this language, the operative verb, "move freely" is modified by the phrase "without the obligation of payment of taxes, tolls, landing or pier charges, and so forth." The whole context is one of taxes and licenses. The implication is that "freely" means "free of taxes" and other administrative regulations. It does not amount to a clear-cut grant of authority for the United States to move through Panamanian territory to have access to our bases.

Nor can we depend upon the tag-phrase "and without any other impediment." Clearly the context is still administrative regulation. It does not amount to a full-fledged treaty commitment to allow the United States to have access to our own bases. It has nothing to do with need for a fundamental right of access. Of course, there should be no administrative restrictions; but we need a fundamental right of access.

I hope I need not remind the Senate of the problems of access that we had in Berlin—problems that would have led to full-fledged warfare were it not for the nuclear superiority that we fortunately had at that time. We had fundamental rights of access to Berlin, rights which were denied by the Soviet occupying forces in East Germany. We stood up for our rights. We were prepared to send a convoy of tanks down the access highway to assert our treaty rights. But it was not necessary, because the Soviets knew that we did have the right, and that we were prepared to back it up.

But, Mr. President, the question is this: Could we have asserted our rights if those rights had been stated in the form that we did not need license plates on our tanks? Or that our military vehicles did not have to pay tolls on the autobahn? Mr. President, this provision in the implementation agreement is trivial. It does not go to the real issue at all. It does not go to the fundamental rights of access.

Now the language relating to ships and aircraft that I have just quoted is paralleled in section (2) by similar language referring to "vehicles and equipment." They also may not be taxed and need not pay tolls. They are even exempt from mechanical inspection; they do not have to exhibit a 6-month inspection sticker on their windshields. But nowhere does it mention the rights of U.S. military personnel to move in Panamanian territory. What happens if we want to march the infantry from one installation to another "in the performance of official duties"? Does our right exist only in our unilateral interpretation of our "primary responsibility to protect and defend the canal" as in article IV of the treaty? Is that a clearcut right to defend all of our installations, or only the "canal"?

I need not remind the Senate that this treaty does not define the word "canal." The Neutrality Treaty, on the other hand, defines it as follows:

> "Canal" includes the existing Panama Canal, the entrances thereto and the territorial seas of the Republic of Panama adjacent thereto, as defined on the map annexed hereto (Annex B).

Annex B shows only the entrances and territorial seas of the canal, not the operating areas. So we really do not know whether or not we have the right to move U.S. military forces to protect installations that are not directly associated with the "canal."

Would Panama ever contest our right to move personnel, vehicles, and aircraft across Panamanian territory in the course of the performance of official duties? Obviously, Mr. President, I do not know, and no Member of the Senate can predict. But what happens if our right is contested? That is the question. We can do nothing if Panama contests a basic right, except to assert force against Panama's sovereignty.

Moreover, it is not at all unlikely that controversy would arise over the movement of military personnel and vehicles through Panamanian territory. The controversy, in fact, is bound to arise. In fact, it has already arisen with regard to the DeConcini reservation. In the documents circulated at the United Nations, the Panamanian Ambassador to the U.N., and the communique from the Panamanian Foreign Minister takes particular exception to the interpretation of the distinguished Senator from Arizona that military operations may be necessary in the case of labor unrest and strikes, the actions of an unfriendly government, or political upheavals.

Suppose U.S. military forces are reinforced at the various installations operated by the United States in the case of domestic upheaval in Panama? Suppose, even, that no action is taken; just the movement of troops and military vehicles? Is that covered by the implementation agreement which says that they do not have to be licensed? If the Panamanians are already taking official action to protest the DeConcini reservation now, before the Panama Canal Treaty is passed, is it not likely that they will attempt to deny any interpretation of an executive agreement that gives U.S. military forces the right to move freely without paying taxes as authority to conduct military operations or reinforcements?

If we are going to have military forces in Panama for 22 years, if our bases are going to have any value there whatsoever, we must have proper military logisistics and communication among our bases, and clear authority to position military forces to protect all U.S. installations. That is all this amendment proposes.

If the Panamanians are really sincere that the United States will be available for protection of the canal, there is no possible way that they can deny the United States the treaty right to move freely in Panamanian territory among our installations. If they are going to object to this amendment, if they are going to reject these treaties over something so fundamental, so basic to the purpose of the treaties, then these treaties are not worth very much at all. In fact they are meaningless. They provide no protection.

I do not think that Dictator Torrijos would dare to raise objections to something that is so simple on the surface. It would undermine the validity of all their good intentions, and it would frustrate any workable relationship between our two countries.

Mr. President, I ask unanimous consent that the memorandum and annex of the Panamanian Ambassador to the United Nations, and the communique issued by the Ministry of Foreign Affairs on March 27 be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

IMPLEMENTATION OF THE DECLARATION ON THE STRENGTHENING OF INTERNATIONAL SECURITY

Letter dated 28 March 1978 from the Permanent Representative of Panama to the United Nations addressed to the Secretary-General:

I have the honour to send you herewith the note verbale from this mission dated 28 March 1978, together with the following documents:

(a) Resolution of ratification of the Treaty concerning the permanent neutrality of the Panama Canal, adopted by the United States Senate on 16 March 1978 (see appendix I):

(b) Statement by Senator Dennis DeConcini (see appendix II);

(c) Statement by Senator Edward Kennedy (see appendix III);

(d) Communique from the Ministry of Foreign Affairs of Panama, issued on 27 March 1978 (see appendix IV).

In compliance with instructions from my Government, I request you to have the note verbale and the above-mentioned documents distributed as documents of the General Assembly under item 50 of the preliminary list.

JORGE E. ILLUECA,
*Ambassador, Permanent Representative.*

---

ANNEX: NOTE VERBALE DATED 28 MARCH 1978 FROM THE PERMANENT REPRESENTATIVE OF PANAMA TO THE UNITED NATIONS ADDRESSED TO THE SECRETARY-GENERAL

The Permanent Representative of the Republic of Panama to the United Nations presents his compliments to the Secretary-General of the United Nations and has the honour to inform him that His Excellency Brigadier General Omar Torrijos Herrera, Head of Government of the Republic of Panama, has addressed a letter to the Heads of State and Heads of Government of the States members of the international community.

General Torrijos's letter and the documents enclosed make reference to the vote which took place on 16 March 1978 at the United States Senate on the Resolution of Ratification of the Treaty concerning the Permanent Neutrality of the Panama Canal. In this resolution, approval to the ratification was granted subject to a number of amendments, conditions, reservations and understandings, inserting among them a pre-condition to American acceptance of the Neutrality Treaty, known as the "DeConcini Amendment" (see clause (b)(1) in the attached clipping of the United States CONGRESSIONAL RECORD, vol. 124, No. 38, pp. 7187–7188 (appendix I)).

According to its proponent, the "DeConcini Amendment" is intended to give to the United States of America the unilateral and perpetual right to "take military action on Panamanian soil without the consent of the Panamanian Government", pretending that said amendment must be construed to permit the United States to intervene in Panama in the event of labour unrest, strikes, a slowdown, or under any other pretext labeled as interference with Canal operations (see text of Senator Dennis DeConcini's statement before the United States Senate on 16 March 1978 inserted in the attached clipping of the United States CONGRESSIONAL RECORD, vol. 124, No. 38, pp. 7147–7148 (appendix II)).

Not only does the amendment make no reference to the regime of neutrality, but, as stated by Senator Edward Kennedy, who opposed the DeConcini Amendment, "Panama has waited 75 years since its independence to end American occupation of its heartland. It must wait another 22 years before it achieves full control over its national territory." Now Panama is asked, in Kennedy's words, "to accept an amendment which has the ring of military interventionism—not just during this century, but for all time" (see text of Senator Edward Kennedys statement before the United States Senate on 16 March 1978 inserted in the attached clipping of the United States CONGRESSIONAL RECORD, vol. 124, No. 38, p. S3824 (appendix III) and the attached text of the communique of the Panamanian Ministry of Foreign Relations, dated 27 March 1978 (appendix IV)).

Since the Treaty provides for accession by all States to the Protocol whereby the signatories would adhere to the objectives of the Neutrality Treaty and agree to respect the regime of neutrality, the Panamanian Head of Government has considered it his duty to address this letter to the Heads of State or Heads of Government of the States members of the international community that in so many instances have offered their solidarity and support to the Panamanian nation in its long struggle to reach a peaceful solution to the Panama Canal question based on the recognition of her sovereignty over the totality of its national territory.

---

APPENDIX IC: COMMUNIQUE FROM THE MINISTRY OF FOREIGN AFFAIRS OF PANAMA, ISSUED ON 27 MARCH 1978

In our communiqué issued on 16 March, we expressed the decision of the Government not to issue any statement regarding what the Senate had agreed to in relation to the Treaty concerning the permanent neutrality and operation of the Panama Canal. We gave as the reason for such a decision the fact that the Panamanian people had approved two treaties, that is to say, the Neutrality Treaty and the Treaty on the Panama Canal. Until the Senate decides the fate of the latter, it will not have responded to the decolonization programme approved by the Panamanian people.

We also stated in the above-mentioned communiqué that the Government as a whole would study the conditions under which the Senate had given its advice and consent to the Neutrality Treaty and those that it might attach to a decision on the Treaty on the Panama Canal. We have begun that process. But inasmuch as the liberation process is a national undertaking and since, before taking any decision, each citizen must have full knowledge of all the understandings of the Senate regarding the treaties, the Ministry of Foreign Affairs has deemed it appropriate to publish the text of the Senate resolution concerning the Neutrality Treaty without waiting for the official text to be delivered to us through the usual channels.

We are living a crucial moment in our history. Now, more than ever, our country demands from its sons serenity, dignity and a sense of national unity.

Panama sees its future with the serenity of a country engaged in an irreversible process of decolonization.

We must remember that only the peoples that love freedom can be free. Panama has opted for its definitive freedom. In this process we have the decisive support of the peoples of the whole world, as was seen from the session of the Security Council held in Panama in March 1973. On that occasion the world, faced with the veto of the United States delegation, vetoed the United States for not removing the causes of the conflict engendered by the presence of a foreign Government within Panamanian territory.

We recommend to our fellow citizens to study objectively the documents published today in Spanish and English, so that they might assist the Government in taking the most patriotic decision which, as stated by General Omar Torrijos Herrera, Head of the Government of Panama, will be taken within the framework of a great national consensus.

Mr. HELMS. Mr. President, I urge adoption of the amendment and I reserve the remainder of my time. I thank the Chair.

Mr. SARBANES. Mr. President, I rise in opposition to the amendment. This matter was among many other discussed with the Department of Defense in the course of the consideration of the treaty provisions in the hearings that were held by the Senate Committee on Foreign Relations. The Defense Department was of the conclusion, which I share with them, that the treaty and the agreement in implementation of article IV of the treaty and the annex thereto fully and adequately protect the rights of movement and access by United States forces.

In fact, it can be argued, I think cogently, that an effort to develop this right, as it were, within these documents really raises the concern or the danger of movement and access by U.S. forces. of a derogation of rather broadly stated U.S. rights of use of defense sites and of movement with respect to such sites. That is an important sort of legal concept, but I think one that is a valid one. Lawyers may differ on its application, but I think the concept is a valid one. When you have broad statements and then you seek to make specific statements, you run the danger of derogation from the broad grant of authority that may be provided for.

The distinguished Senator from North Carolina quoted the language with respect to the rights of movement, concerning movement when in the performance of official duties with respect to vessels or aircraft, or without any other impediment, and also that dealt with air and water movements, and also vehicle and equipment movements, again in the performance of official duties.

There is no assertion of movement rights unrelated to official duties. It seems to me that is an obvious and appropriate limitation. So there is no assertion in that regard.

But in respect to the performance of the official duties, the right to undertake movement without the obligation, there is a specific provision with respect to the taxing and licensing and an additional provision that goes on to say, "without any other impediment."

Now, we are given the unconditional right to use the defense sites and, of course, appropriate use of this would require, when in pursuance of the performance of official duties, that we have the right of access to the defense sites.

The basic problem or difficulty I have with the Senator's amendment runs to this question of trying to specify certain rights which I think are fully and adequately covered in the agreement, raising a question that it constitutes a limitation with respect to the extended scope of the rights that we are given in the statement of implementation to implement the provisions of the treaty.

It might well be construed as supporting a more narrow interpretation of the U.S. rights in other portions of the agreement than would otherwise be the case.

Of course, most of what I have said has been developed in an exchange with the Department of Defense which, of course, has a very keen and vital interest

in these treaties, both the Panama Canal Treaty which we are now considering and the Neutrality Treaty which we approved on March 16, by a vote of 68 to 32.

I think, as many people realize, the Department of Defense was very much involved in the negotiation process with respect to these treaties. In fact, a general officer representing the Department of Defense participated in full on the negotiating team, and General Dolvin was a very integral part of the American team of negotiators with respect to arriving at the provisions that we have been reviewing over these many weeks here in the Senate concerning the Panama Canal treaties.

Since there will be a continuing American military presence in Panama until the end of the century and then, of course, beyond that there will not be such a continuing military presence, although the United States and Panama joining together in that period after the end of the century have reached agreement that each of them shall be able to take action to maintain the regime of neutrality and to maintain the neutrality of the canal and the right of safe passage for ships through the canal. So, of course, the Department of Defense may have a continuing interest after the year 2000. They will not have a continuing presence in Panama after the year 2000.

Between now and the year 2000, their rights, of course, are spelled out in the Panama Canal Treaty and in the agreements which implement that treaty which, of course, have been reached between the two parties and have been submitted to the Senate as documents associated with the Panama Canal treaties.

I have been quoting, to some extent, from those documents and also putting forth the position which the Department of Defense has reached concerning these provisions, concerning their rights under these provisions, and concerning the amendment which the distinguished Senator from North Carolina has presented to the Senate.

Implementation, of course, has been very carefully worked out as a matter of negotiations between the parties.

The question that was raised about noncontiguous military areas, bases and training areas, has been fully dealt with by the provision in terms of the operational elements that are necessary and, obviously, this is a matter to which the Department of Defense gave great and careful attention.

The question of operational element has been met by the provision that we are entitled to movement between such facilities when in the performance of official duties.

That applies, of course, both to vehicles and equipment; that is, land movement and also air and water movement, where it can take place without impediment in the furtherance of the performance of official duties.

Accordingly, I anticipate and, very frankly, Mr. President, see no problem in this area.

I think the matter which is raised by the distinguished Senator from North Carolina was given very careful and thorough attention by our negotiators, and particularly by those members of the negotiating team who represented the Department of Defense and the Joint Chiefs of Staff, and that the treaty and the associated documents with the treaty fully and satisfactorily deal with this matter.

Therefore, I oppose the amendment of the Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the Senator from Maryland for his comments on the amendment.

Inasmuch as the leadership has made clear that it will not permit any amendment to this treaty, I am not optimistic as to the pending amendment. I am, however, heartened by the statement of the Senator from Maryland, if I understood him, that he agrees with the thrust of the amendment, and that its intent is essential. The Senator further contends, if I understand him, that this matter is taken care of in the implementation agreement and in the treaty itself. I find no language that clearly does that, but I am heartened by the legislative history that the distinguished Senator made.

All that notwithstanding, this is such an important, fundamental right, that I wonder what the objection is to spelling it out? The Senator from North Carolina can think of no objection to doing that. In fact, it is essential.

This is the point the Senator from North Carolina would make to his friend from Maryland: We have noncontiguous installations and military bases; and insofar as I have been able to find, the only reference in the treaty text to this right comes under the section relating to whether we will have to put license plates on our tanks and trucks. Obviously, the treaty and the implementation agreement are not adequate in this regard.

I hope the Senate will approve the amendment, although I must say that I do not have a great deal of optimism on that score. However, in this instance, as in others, I feel that it is essential that the Senate confront this defect—and I perceive it to be a defect—in the treaty.

I say to the Senator from Maryland that it is now 12:31, and we have a 1-hour limitation. I would be glad to yield back the remainder of my time, if he is willing to do so, and we can have a vote on the amendment.

Mr. SARBANES. Mr. President, I am quite happy to do that, but I think an order was entered that there would not be a vote until 2 o'clock. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. SARBANES. I assume, in view of that order, that some Members of the Senate have made commitments elsewhere.

Perhaps we could set this amendment aside and go on to the next amendment, if the Senator wants to do that.

Mr. HELMS. In that case, I ask unanimous consent, first, that it be in order for me to ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. The Senator has that right.

Mr. HELMS. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. HELMS. Mr. President, I suggest the absence of a quorum, during which time I will see if we can round up some Senators to get the yeas and nays.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, is the Senator from North Carolina correct in his understanding that the pending amendment is now being laid aside, in order that I can call up a second amendment, or is unanimous consent in that regard necessary?

The PRESIDING OFFICER. A unanimous-consent order was entered yesterday to that effect, so the Senator's amendment could be set aside and other amendments taken up.

UP AMENDMENT NO. 20

Mr. HELMS. I thank the Chair. I send an unprinted amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. Helms) proposes an unprinted amendment numbered 20.

Mr. HELMS. Mr. President, I have unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of paragraph 3 of article IV add the following undesignated paragraph: "Nothing in this paragraph prevents the military forces of the Republic of Panama or of the United States of America from conducting such separate military planning, exercises, or operations as each Party deems necessary to protect and defend the Canal."

Mr. HELMS. I yield myself such time as I may require.

Mr. President, the central defense concept in the Panama Canal Treaty is the concept of "combined defense." Indeed, were is not for the concept of "combined defense" it is probable that the Department of Defense would never have agreed to the treaty.

It is a matter of historical record that the Joint Chiefs of Staff and the Department of Defense had continuously maintained that all the land in the Canal Zone was necessary to the defense of the canal; and that it would, indeed, be impossible to defend the canal under any new treaty unless the entire zone would be, in effect, a military reservation once the United States surrendered its sovereign rights.

This was the official DOD position until the fall of 1975. It is not difficult to understand why DOD maintained that position. It is only commonsense. One does not have to be a great military strategist or tactician to see that the most effective way to secure an installation is to secure all the components of the installation, as well as a reasonable buffer zone around each component. This was, in fact, the basic reasoning behind the creation of the Canal Zone in the first place. I doubt that any special studies or analyses were conducted to come to that conclusion; it was simply a deeply ingrained concept in defense that everyone took for granted. Once the decision had been made that a U.S. canal had to be fortified to protect its neutrality, the concept of a zone around it came naturally.

Until 1975, no one ever questioned the concept that if the United States were to defend the canal our military forces must have a reasonable area in which to exercise unilateral defense judgments.

It was the Department of State, however, that objected to the unitary zone defense concept. The State Department negotiators found that the treaty negotiations had virtually collapsed. The Panamanians, for reasons of excessive nationalistic pride, insisted on the elimination of the Canal Zone for domestic political reasons. Rather than press the Panamanians on a point that was critical to the United States, the negotiators developed the idea of "combined defense," wherein the Canal Zone would be eliminated and a fiction created that United States and Panamanian military forces would defend the canal together, with the zone itself under Panamanian control. So the State Department negotiators then began to negotiate with the Defense Department, rather than with the Panamanians.

In mid-1975, a position paper embodying a conceptual "combined defense" was prepared and presented to the Panamanians. As was inevitable, that paper was leaked in Panama. Later, the Senator from North Carolina made a lengthy analysis of its fallacies and reprinted the paper in the CONGRESSIONAL RECORD. For those who may be interested in that 1975 analysis, my statement was reprinted in the hearings of the Separation of Powers Subcommittee, page 197, which I believe is on every Senator's desk. I do not know for certain who was the author of the conceptual paper, but some who are close to the State Department have said that it was Mr. Morey Bell, who at that time was prominent on the U.S. negotiating team. At any rate, Ambassador Bunker later admitted to the press that the conceptual paper was authentic.

The fallacies of the combined defense concept are so obvious that it is hardly necessary to mention them; yet perhaps they should be laid on the record. First, there is absolutely no comparison between the force structure and training level of the United States and Panamanian military forces. Panama does not even have a navy or an air force. Of the 8,000 members of the National Guard, about 6,000 do not have professional military training. They serve as policemen, and not very well trained policemen at that.

Secondly, the Panamanian forces do not have sophisticated equipment, the training to use sophisticated equipment, or the budgetary resources to support sophisticated equipment. Any combined defense arrangements on that level would be ridiculous.

Thirdly, the only level where there could be true participation would be in the Combined Defense Board. But participation in the Board by Panamanians would turn the Board into a forum for anti-U.S. propaganda, into a device to put pressure on U.S. defense decisions, and into a medium for learning the details of secret U.S. defense plans. Although Panamanian military forces would be too weak to oppose United States military plans, it would be very easy to bring propaganda to bear, to mobilize civilians in demonstrations, or—to take the most adverse case—to call upon nations antagonistic to the United States to assist them in sabotage, military operations, or concerted international pressure.

Finally, the physical elimination of a zone defense around the canal would make it far more vulnerable to sabotage, terrorism, and controversies over our rights of defense. We are buying trouble, Mr. President, unless we take note of this glaring defect in this treaty, and correct it.

As I understand the State Department's arguments at the time, if it is possible to understand the State Department's arguments at any time, the combined defense concept was necessary for political reasons; that is, as a concession to Panama to get the negotiations started again, and to involve Panama in the defense of the canal, giving the Government of Panama itself a stake in the defense problems. Indeed, it was argued that, in the event of guerrilla warfare, it was better to have the Panamanian National Guard shoot at Panamanian rioters or terrorists, than to have U.S. soldiers do the shooting. This argument, of course, is specious. There is no guarantee whatsoever that Panamanian troops ever would return the fire of Panamanian snipers or Panamanian terrorists. It is at best a pious hope.

What is clear, however, is that the change in defense concepts was not made for military reasons; it was made for political reasons, with the military requirements downgraded severely. The State Department's attempt to rationalize the use of Panamanian troops in hot engagements belongs more to sociological or psychological theory than to military strategy. As a result, our military intelligence could be opened to enemies or opponents, and the actual physical characteristics of defending the canal are severely hampered by loss of a territorial base for defense.

In October, 1975, Deputy Secretary of Defense William P. Clements and General George Brown went to the Canal Zone and to Panama to review the situation. They met with General Torrijos. When they came back to the United States 2 days later, they announced that they had reversed their position, and now favored the treaty. After 11 years, the Pentagon had dropped its requirement for a unitary defense command and zone. Military spokesmen implied that the "combined defense" concept was invented on the spot by the Deputy Secretary and the Chairman of the Joint Chiefs; but in fact, it had already been conceived in the U.S. State Department and presented to the Panamanians.

Mr. President, the following is important:

When Secretary Clements came before the Armed Services Committee this year, he added a new dimension to the basis for his decision to reverse the Pentagon's position. He explained that he had negotiated a security clause with General Torrijos that gave the United States a unilateral right to take whatever military steps would be necessary to defend the canal. That language is now familiar to us all; the Senator from North Carolina offered it as an amendment to the Neutrality Treaty, although the Senate in its dubious wisdom on that subject turned it down.

Nevertheless, it is clear that Secretary Clements attempted to make a trade-off with the State Department. He abandoned the unitary zone defense concept not for military reasons—not on the basis of what's best for national defense—but for political reasons. In return, he tried to salvage the military situation by insisting upon a unilateral right of military operations.

But he lost it all because in this way, the Pentagon was mousetrapped by the State Department into abandoning what is best for the defense of this Nation, which should be the foremost and primary concern of this Senate. To break loose the Pentagon roadblock, the State Department agreed to a security clause with the unilateral right of intervention; but some time after the Carter administration took over, the security clause was dropped, it was abandoned. It is not surprising, therefore, that when Secretary Clements learned of this double dealing, he immediately withdrew his support of the treaties, and he vigorously emphasized that in his appearance before the Armed Services Committee this year.

So now we are stuck with the combined defense concept. If one reads the text of article IV quite carefully, one finds that the treaty is silent on the right of the United States to do planning, training, or operations without the participation of Panama. The treaty does not say that we cannot do planning, training, or conduct operations by ourselves; but neither does it say that we can. It speaks only of combined operations.

The Anglo-Saxon legal tradition is far more flexible than Latin American systems. Our judicial interpreters are accustomed to supplying whatever is necessary to understand the law; but Panama, like most other countries, depends upon

code law. If a right is not stated positively in the law, it cannot be assumed.

Thus, in paragraph 1, we see that the United States and Panama commit themselves to protect and defend the canal. At best, it is ambivalent on the right of the United States to act without the participation and consent of Panama.

It says that each party shall act to meet the danger resulting from an armed attack; but it does not say that either can act independently.

In paragraph 2, it says that the United States shall have the primary responsibility to protect and defend the canal. But where there is a primary responsibility, there is also a secondary responsibility. If there is any implication in the phrase "primary responsibility" the implication is that the U.S. right is neither exclusive nor independent.

In paragraph 3, it says that both parties shall establish a combined Board comprised of an equal number of senior military representatives. This standard of equality is directly at odds with the delegation of "primary responsibility" to the United States.

These representatives shall be charged by their respective governments with consulting and cooperating on all—I repeat, all—matters pertaining to the protection and defense of the canal, and with planning for actions to be taken in concert for that purpose. The word "all" clearly demands that there be no defense matters over which there is not consultation and cooperation. Clearly, not even intelligence information or contingency defense plans could be kept secret legally from the Panamanians.

The absurdity of this situation cannot be explained away. If we knew, for example, that high officials of the National Guard were cooperating with terrorists, we would be legally obligated to inform those very officials. If we had plans for the defense of the canal under a scenario where the National Guard itself attacked the canal, we would be obliged to hand over those plans to the attackers. The language of the treaty demands that the representatives "shall" consult—not "may consult," but "shall consult"—on actions to be taken in concert for that purpose. Is the phrase "to be taken in concert for that purpose" a limitation or a description? If it is a limitation, then there can be no other type of actions allowable, except actions taken in concert.

Now we come to another very interesting and ambiguous sentence:

Such combined protection and defense arrangements shall not inhibit the identity or lines of authority of the armed forces of the United States of America or of the Republic of Panama.

What does this sentence mean? Does this sentence mean that the United States can conduct separate planning, exercises, or operations? I do not see how it can be given that interpretation. All that this sentence says is that the command structure shall not be merged into one unit. The command structures preserve their own identity, but the protection and defense arrangements are still "combined." There is no reference to any other kind of defense activity except combined activity.

Finally, it says that the Combined Board shall provide for coordination and cooperation concerning such matters as:

(a) The preparation of contingency plans for the protection and defense of the Canal based upon the cooperative efforts of the armed forces of both Parties.

Again, this is a positive injunction that contingency plans are to be based upon cooperative effort.

(b) The planning and conduct of combined military exercises.

Once more, the Board is charged with both planning and conduct of combined military exercises; no other type is mentioned.

(c) The conduct of United States and Panamanian military operations with respect to the protection and defense of the Canal.

This clause is apparently the result of sloppy drafting, since it merely repeats the preceding clause (b), leaving out the "planning." Instead of mentioning "combined military exercises" it refers to "United States and Panamanian military operations." While there might be a slight distinction between "exercise" and "operations," if the word "operations" is taken in the sense of actual war as opposed to training, there still remains the confusion of "United States and Panamanian" being substituted for "combined." Are they the same thing? Or is there an attempt here to imply that there are two types of operations, namely, United States operations and Panamanian operations? If that is meant to imply separate operations, the implication fails, because everything mentioned here is under the control of the Combined Board.

So I think we are clearly faced with a serious ambiguity. If the treaty is silent on separate operations, does that mean that separate operations are allowed? Or does it mean that they are not allowed? We cannot afford to take the chance.

So the pending amendment is short and simple and, I hope, to the point:

Nothing in this paragraph prevents the military forces of the Republic of Panama or of the United States of America from conducting such separate military planning, exercises, or operations as each Party deems necessary to protect and defend the Canal.

How on Earth can anyone object to that, Mr. President? The single sentence of this amendment will clear up the ambiguity. It will give us the authority for all the routine, ordinary military exercises and planning that we must do, with or without the participation of Panama. And of course, if we do need to conduct actual operations without Panama's cooperation, we will be able to do so on sound legal grounds.

Mr. President, I urge the adoption of the amendment, and I reserve the remainder of my time.

Mr. ALLEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. Mr. President, the administration and the leadership in the Senate have had full control over these treaties and their wording ever since the negotiations were completed between the Panamanian negotiators and the U.S. negotiators.

Every single amendment that has been accepted, whether it be an amendment to the treaty or a reservation or a condition or what, has had the approval of the administration and the leadership. So if the wording of the DeConcini reservation or the amendment to the resolution of Ratification has caused consternation in Panama, then there is no one to blame except the administration and the leadership because they have had life and death control over every single amendment that has been offered here on the floor of the Senate.

They have had upward of 60 Senators who have supported them on practically every measure—I believe there were only 58 on one particular amendment—and they have had full control of what has gone into this treaty.

Mr. President, I am not going to speak in an attitude of "I told you so," but I believe the difficulties come about with respect to the Neutrality Treaty, or I prefer to call it the defense treaty, because it did give us and does give us certain defense rights in the canal after the year 2000. That treaty was considered first here in the Senate, even though the President had submitted them in the reverse order, which was the logical order.

I tried here on the floor of the Senate—other Senators tried—to get this order of consideration of these treaties reversed because we should have considered first the question of whether we should give the canal away before we considered how we should defend it starting in the year 2000.

Our pleas fell on deaf ears, and to raise the point before the Senate I made a motion to reverse the order of consideration, go back to the logical order of considering, first, whether we give the canal away before we worry about defending it in the year 2000.

That motion received only 30 votes of Senators, and has more or less constituted the hard core of those who are seeking to improve these treaties by amendment.

The leadership said "No, we want to consider the Neutrality Treaty first." I warned, and other Senators warned, that this order of consideration would cause many Senators, who wished to vote for the Neutrality Treaty or the defense treaty, to be unable to do so because in the order in which they were submitted they were part and parcel of one big issue, the Panama Canal Treaty issue.

As a result, there were 32 votes cast against the Neutrality Treaty. I stated here on the floor that if the order were reversed, I would have looked for upward of 99 Senators to vote for the Neutrality Treaty, because the only difference was the extent to which we would be allowed to defend the canal. And I believe that is true.

That being true, Mr. President, if we had considered the Panama Canal Treaty first, and had agreed to give the canal away, as that treaty provides, then there would have been no opposition whatsoever—or perhaps I had better say no opposition of any moment—because I would have looked for some 90 to 99 or perhaps even 100 Senators to have voted for the Neutrality Treaty after the basic issue had been determined. Then it would not have been necessary, Mr. President, to accept the DeConcini amendment in order to get Mr. DECONCINI's vote. The treaty would have been approved well-nigh by acclamation.

But the leadership insisted on handling the defense treaty first, and look what has happened. They got up to the last day and they did not have enough votes to pass the Neutrality Treaty, and this provision, the DeConcini amendment, which says that notwithstanding any other provision of this or any other treaty—or that treaty; I believe it limited it to that one—the United States has a right to take whatever means might be necessary to keep the canal open, including military action.

Yes, that is a departure from the language of the leadership amendment, because the leadership amendment had three loopholes inserted by the dictator through the memorandum with the President which later became the leadership amendment, and that paragraph inserted by the dictator said that in our efforts to defend the canal, we should not interfere with the internal affairs of Panama, we should not interfere with their territorial interests, and we should not interfere with the independence of Panama. It had those three conditions. The DeConcini amendment does not have those.

(Mr. HODGES assumed the chair.)

Mr. ALLEN. So, Mr. President, they have got themselves in somewhat of a bad box. They have got dictator Torrijos in an extremely bad box. It looks as though he is in bad shape either way he goes; not that I object to that, but that is the situation he finds himself in. He has the option, Mr. President, to accept these treaties on his own, as head of state, in which event I believe that the strong opposition in Panama to these treaties would result in dictator Torrijos being thrown out of office; or his other alternative is to submit the matter to a vote by the people of Panama, and in that event it is my judgment that the one-third of the Panamanians who voted against it when the matter was first submitted would swell to well over a majority vote against the treaties; and I believe that would probably result in Dictator Torrijos being deposed.

Mr. President, I see shades of 1903 in these treaties and the manner of procedure with respect to them. The treaty of 1903 that has been denounced on this floor so often—just the other day the distinguished Senator from Idaho (Mr. CHURCH) dusted off the old contention that if the new government, the revolutionary government of Panama, had not signed that 1903 treaty with the United States, they would have faced a Colombian firing squad. But they overlook the fact that in 1955 another treaty was entered into between Panama and the United States confirming these rights that the United States has.

But in 1903 the United States dealt with a revolutionary government, not elected by the people. In 1978 we deal with a dictatorial government not elected by the people. The 1903 treaty was not approved by the people of Panama, and that has been a bone in their craw ever since, that they did not have an opportunity to pass upon the treaty; even though there seemed to be great joy and acclaim for the treaty when it was entered into, they kept making the contention that the treaty was not approved by the people, and we have now another situation where the treaty apparently is not to be approved by the people.

"Oh," they say, "they had a plebiscite." Yes, but we did not see the protests against the treaty as originally submitted. It has now been amended by the DeConcini amendment, so it is not the same treaty. The Panamanians say the Neutrality Treaty as it now stands, as it has already been approved, is an affront to their national dignity and sovereignty.

So that we will not have a repetition of the discord that has existed, the protesting against the treaty that has existed ever since 1903—do we want to go through that again? We are supposed to be in control of the canal for the next 22 years. If the people do not get an opportunity to vote on this new treaty, will they not protest that this treaty was rammed down their throats without their approval, and will not that be cause for protests, demonstrations, riots, and possibly sabotage of the canal?

If we are not to learn from the lessons of history, we are certainly destined to make the same mistakes again, and it looks as though we are going down that same road.

I suggested the other day, and I have submitted, an amendment that will be acted upon before the final vote on the resolution of ratification requiring that before these treaties go into effect they must be approved by the people of Panama in a plebiscite called for the purpose of ascertaining the national will with respect to the treaties.

That is necessary in my judgment, Mr. President, to lay the matter to rest. We see protestation down in Panama, including burning the President of the United States in effigy, all because they feel that we are ramming a treaty down their throats without any voice by them to pass upon the treaty as amended, without any voice on the part of the people to say whether they approve of this or not; and the leadership has expressed its opposition to letting the people of Panama speak on this subject.

Mr. President, I believe that is a very shortsighted policy indeed if we ram an unpopular treaty down the throats of the people of Panama without giving them an opportunity to say what their opinion is.

We are dealing with a dictator there and not the people of Panama. The only way we can find out their will with respect to this amended treaty is to ask them, and to ask them in the form of a plebiscite. We will forever rue the day that we do not ascertain the Panamanian national will.

By the way, I noticed the Dictator Torrijos declared an extended Easter holiday in the schools in Panama because he is afraid of student reaction to these treaties. There would be a reaction because they do not want this treaty as now written.

I am convinced that the people of the United States do not want the treaty. The people of Panama obviously do not want the treaty. Dictator Torrijos has written some 115 nations protesting what the Senate has done in the DeConcini amendment, laying the groundwork to cut the ground out from under the DeConcini amendment, to say that it is meaningless in international law.

What are we to do? We have full control over the treaties at this time. Why should we insist on the Panamanians taking something they do not want? They say we have to do something about the DeConcini amendment. How is it to be done? They say we are going to pass an amendment, a reservation, a resolution, or something, indicating that we do not mean what we said when we passed the DeConcini amendment.

Is that fair? Will anybody attach any credibility to a treaty of the United States again if we approve a treaty saying one thing and then in the ensuing weeks pass something that cuts the ground out from under the meaning of the first treaty?

Also, Mr. President, there are some three votes in the Senate which were determined by the administration and the leadership taking the DeConcini amendment. Had they not taken the DeConcini amendment, had the leadership not given its blessing to the DeConcini amendment, this first treaty would have been defeated because it passed with only one vote to spare.

Mr. President, would it be fair to the Senators who voted for the treaty because the DeConcini amendment was adopted to try to say now, in the second treaty, that we did not mean what the DeConcini amendment says?

That amendment was studied by the President, by his attorneys, by the State Department, by their attorneys, by Mr. DECONCINI, and by the Panamanians. Why was not a protest made then? I recognize that the dictator, on March 15, wrote the President. The letters have been put into the RECORD, both being dated March 15. The dictator in his letter expressed alarm at the reservations which he understood were on the way. The President reassured him on March 15 that they would not interfere with the spirit of the agreement that he and the dictator had entered into.

But that does not seem to be the case.

They regard this first treaty as an affront to their sovereignty because it gives the United States the unilateral right to take whatever action is necessary to keep the canal open. I favor the DeConcini amendment. That is the way it should be. I am not in favor of backing up on it.

Mr. President, those of us who sought to improve these treaties, if they are to be agreed to, are not responsible for the administration being in the predicament that it is now in because, as I say, they have had full control over every single word that has gone into these treaties since they were first submitted to the Senate by the President.

So if they find themselves in an untenable position, a position of insisting that Panama take something it does not want, they have themselves to blame, not the opposition.

Mr. President, I do not believe it would be in the interest of good feelings here in the Senate if an effort is made by the administration and the leadership to dilute the provisions of the DeConcini amendment, to make it say less than what it now says. I know they can write an amendment they can get a majority of the Senate to support. But getting that done and then trying to get the treaty agreed to by two-thirds majority in the Senate is where the difficulty would come, in my judgment. It would make a mockery of the compact entered into between the President—all of this is common knowledge; I am not disclosing anything that is not known by every Senator and the public media—it would make a mockery of the agreement made by the President and Mr. DECONCINI and two other Senators who agreed to support the first treaty if the DeConcini amendment was accepted.

The President agreed to accept it. The leadership agreed to accept it. The leadership gave its blessings to the DeConcini amendment. Now they come forward, as the distinguished Senator from Idaho (Mr. CHURCH) said on yesterday, because something has to be done; we are not going to abandon our policy of nonintervention, no matter what the DeConcini amendment says.

How is that going to be done? Do we pass an amendment saying that the DeConcini amendment is not to be taken at face value, that it means something else?

Let us consider that. As I say, they can get a majority of the Senate to agree to any amendment that they say will extricate them from this difficult situation. I say the Senate has acted in good faith. The Senate has accepted the DeConcini amendment. We made our bed and we will sleep in it. Let us not try to toy with it. Let us not try to go back on an agreement which was made in order to get these treaties passed.

Let us consider the practical aspect. The DeConcini amendment actually goes into effect in the year 2000. It is a reservation to the neutrality treaty in article V, which starts in the year 2000:

> Nothing in this treaty—

Which includes article V—

> shall preclude Panama and the United States from making in accordance with their respective constitutional processes . . .

I believe that is the Nunn reservation, which has not been brought into this argument.

The DeConcini reservation reads like this—

> subject to the condition, to be included in the instrument of ratification of the Treaty to be exchanged with the Republic of Panama, that, notwithstanding the provisions of Article V—

That is the one that starts in the year 2000—

> or any other provisions of the Treaty, if the Canal is closed, or its operations are interfered with, the United States of America and the Republic of Panama shall each independently have the right to take such steps as it deems necessary, in accordance with its constitutional processes, including the use of military force in Panama, to reopen the Canal or restore the operations of the Canal, as the case may be.

That is the provision that Panama is objecting to, because they say that that interferes with their sovereignty, is a direct threat to their sovereignty. I can see their position, but I do not feel that they should be alarmed at that, because the United States does not want to take any steps that are not absolutely necessary to keep the canal open. I do not regard it as a threat to their sovereignty, but they do.

Unquestionably, it would give us the right to send military forces into Panama at such time as we deem it is necessary to keep the canal open, and we would have to interfere to some extent in their internal affairs and would have to land on Panamanian ground and operate from Panamanian ground. That would not have been permitted under the leadership amendment, but it is permitted under the DeConcini amendment, and that is what they do not like. It is quite obvious that opinion in Panama has shifted and that the people are opposed to the treaties.

The treaty we are debating now expires with this century. It expires at the close of December 31, 1999. From a practical point of view, if we wanted to go back on the pledge to take the DeConcini amendment as worded and get the first treaty passed, if we are willing to go back on that and try to water it down in this treaty, let us see how that is going to be done. This treaty expires with this century. The DeConcini amendment starts at the end of this century. So how in the world, in a treaty ending in this century, are we going to dilute the provisions of an amendment that does not even go into effect until next century? By the time that Neutrality Treaty goes into effect, the Panama Canal Treaty will be dead. It will be functus officio, it will have already performed its function. It will go out of existence.

Whatever we say in the Panama Canal Treaty cannot have any force and effect on a treaty or a provision of a treaty that does not go into effect until after the first treaty, the Panama Canal Treaty, goes out of effect. It would have no further effect. So even if the leadership is inclined to ram an amendment through—which I believe they can do. I am not discounting the power of the leadership. I think enough Senators would march to their drumbeat and pass any amendment that they say would extricate us from this difficulty.

But can it be done? Should it be done? Should we go back on the commitments on the first treaty to gain its passage? If we try to do that, Mr. President, I feel confident that there will be not two, not four, but more Senators who will desert the ranks of the supporters of these treaties and vote against the second treaty, which would also kill the first treaty that was acted upon.

Mr. President, I cannot fail to point out that the order in which the leadership required the Senate to consider these treaties is directly responsible for the necessity arising to accept the DeConcini amendment in order to pass the Neutrality Treaty. Had the Panama Canal Treaty been considered first, then there would have been no need of a trade with the distinguished Senator from Arizona (Mr. DECONCINI). They would have had votes and votes to spare. It was this strategem that the leadership adopted that is directly responsible for the tremendous complication now arising from the DeConcini amendment.

All the opponents of the treaties have been able to do is seek to strengthen the treaties. If we are to have treaties, I would like to have them as strong as they can be in giving the U.S. defense rights in Panama and protecting the interests of the U.S. taxpayers.

In seeking to improve the treaty, I am not seeking to defeat the treaty by amendments, because I can think of only one amendment that I would be willing to support and thereafter support the treaty. I am not trying to kill the treaties by amendment. I just want to strengthen the treaties. If they are agreed to, let them protect our right to defend the canal. Let them protect the right of the taxpayers of the United States not to be saddled with hundreds of millions of dollars in payments in addition to giving the canal away.

Mr. President, I want to say again that much has been said about how the opposition to these treaties have spoken with regard to Panama and the right of the Panamanians. They have made it appear that they are the good guys in this effort and the opponents are maligning the Panamanians.

That is far from being the truth, far from being correct.

If any remarks have been leveled by the Senator from Alabama at any person in Panama, it has been at the dictator who has had his way with respect to these treaties up to the time of the DeConcini amendment and then he was assured it was not going to interfere with the spirit of the agreement made between the President and the dictator.

I have leveled criticism at dictator Torrijos' despotic regime and I have pointed out that this $100 million a year that he is going to receive under these treaties, he or his one-man government will receive under these treaties, will be enough to keep his despotic regime in business.

I have leveled criticism at dictator Torrijos, but not to the Panamanian people. I have stood from the very start and I stand now and urge the leadership to get in line. I want to see the Panamanian people consent to this treaty. I do not want to see us negotiate just with the Panamanian dictator. I want to see a compact between the American people acting through their duly constituted representatives in the U.S. Senate. I want to see the American people have a compact with the Panamanian people.

Taking action short of that is going to leave the way open for controversy for the next 22 years because the Panamanian people are going to resent, and properly so, that we did not give them a right to say what was thought about the treaties as they were amended in the Senate.

That condition and that complaint is going to exist for the next 22 years. We could solve it very simply, Mr. President, by agreeing to the amendment that I plan to offer to require a plebiscite in Panama, to get their approval or their disapproval of these treaties. I am hopeful that enough Senators will recognize the need for that to agree to the amendment which I do plan to offer.

Mr. President, just because this treaty before us is defeated, which, of course, has the effect of defeating the Neutrality Treaty as well, does not mean that all negotiations with Panama have been broken off. Far from it.

It would merely pave the way for additional negotiations. Those negotiations would take place and, possibly, the negotiators would not make as many mistakes as they made before. Possibly, the leadership would not stonewall against amendments.

How much better it would have been, Mr. President, if we came in here and had the right to shape these treaties according to the wishes of the Senate and that the leadership had not stonewalled against these amendments and demanded that they be rubber stamped.

They made one fatal mistake in departing from that policy, and that is agreeing to the DeConcini reservation. They thought, Mr. President, and it is quite obvious that that is not working out that way, the leadership obviously thought, "Well, if we don't allow any amendments, we can get by by allowing reservations to the Resolution of Ratification." Reservations by way of amendment, not to the treaty, they did not permit that, but they thought they could permit amendments to the Resolution of Ratification and that the dictator could ratify those without ever submitting it to the people and there would be no problem.

But the leadership has had the policy for the last 2 months of not allowing any amendments to these treaties—other, of course, and this is understood, than the two leadership amendments that were agreed to and that Mr. Torrijos said he could accept.

The reason he could accept it is because this memorandum was written pretty well at his order, as I pointed out a minute ago, because it had three conditions attached to any intervention by us in defense of the canal: The fact we would not interfere with their internal affairs, we would not interfere with their territorial boundaries, and that we would not seek to end their independence.

So, Mr. President, I hope that this treaty will be defeated and thereby cause the defeat of the Neutrality Treaty so that we can get back to negotiating a treaty that will be acceptable to the people of the United States as well as being acceptable to the people of Panama.

The distinguished majority leader last evening was suggesting that no matter what amendments were adopted to the treaty, I still would not vote for the treaty. Well, I have stated here on the floor and I have stated throughout my State that I am not quibbling about the matter of raising the annuity that we pay Panama each year. It is frightfully low, it ought to be changed. If the treaties are defeated, this figure should be changed, because we pay Panama some $2.3 million a year.

I would be willing, Mr. President, to agree to an amendment and then vote for the treaty if it provided that the United States would retain our ownership of the canal and the property in the Panama Canal Zone, that we would continue in perpetuity to operate and maintain and defend the canal, but that we would, in view of Panama's great need for money, raise this annuity tenfold or even twentyfold.

I would not object to seeing Panama receive $50 million. That is not the point.

The point is our resistance to pressure around the world, our retreat around the world, our lack of will to survive as a great world power. That is what is involved in the Panama Canal Treaties more than disposing of the property. It is the fact that it is a trend that exists in this country to give away our very substance and to retreat from any confrontation that we receive around the world.

I can confidently predict—confident to my way of thinking, at least—that Guantanamo, our great naval base in Cuba, will be the next thing to topple if we do agree to these treaties.

If we had the option of sending the treaty back to the Foreign Relations Committee for study, I would be willing to do that, though I do not know how much good a study by the Foreign Relations Committee would do, in all frankness, because the treaty was before the Foreign Relations Committee for months and they saw nothing in the treaty, apparently, that needed amending. At least they offered no committee amendment and did recommend, not as committee amendments, the leadeship amendments that were floated around at that time.

Of course, the strategy there was not to have them come out as a committee amendment, but allow members on the floor to sign up as cosponsors. I was one of the Senators. I see the distinguished gentleman from North Carolina, and I believe he was one of the cosponsors of the leadership amendment.

It was stated that they were improvements over the treaty as regards the right to defend the canal and I thought they must be real fine amendments because for several weeks before the two leaders agreed that they were going to support the treaties, they said this amendment—I do not believe they called it the leadership amendment at that time. I may even have coined that phrase. At any rate, they did not have the leadership amendment when they agreed on that. They said, "This will solve the problem. We can vote for the treaty with the leadership amendment. We cannot vote for it without the leadership amendment."

They said, in effect, "The leadership amendment is so good that it makes the treaty so good that it should not be amended at all, and we are going to resist any further amendment."

That is the situation we have at this time. We have agreed to vote on the 18th of April, so I do not think that a motion to recommit the treaty to the Foreign Relations Committee would be in order. Possibly we can work that out by unanimous consent, because it occurs to me that the supporters of the treaty are in an untenable position. They have a treaty that apparently is not approved at either end of the line.

Mr. SARBANES. Mr. President, will the Senator yield for a moment?

Mr. ALLEN. I will yield for not to exceed 2 minutes.

Mr. SARBANES. Before the Senator spends a great deal of time and energy on working out a unanimous-consent request to recommit the treaties, I want to assure the Senator that I would be constrained to object to such a request. I know that it will come as a surprise to the Senator. But if he was seriously proposing to embark on devoting a lot of time and energy to investigating that possibility, I want to lay it at rest.

Mr. ALLEN. It would not take much time, I assure the Senator. I could draw up such a motion in 30 seconds.

Mr. SARBANES. I want to save even that 30 seconds for the Senator.

Mr. ALLEN. We have consumed even more than that in our brief colloquy.

I admire the distinguished Senator from Maryland very much for the fine job he has done in pushing these treaties up to the very point of a final vote on next Tuesday. He has been steadfast in his advocacy of the treaties. His study and his knowledge of the contents of the treaties and their implication are most impressive. I have enjoyed our exchanges from time to time and our friendly rivalry on the floor. I have great admiration for the distinguished Senator from Maryland (Mr. SARBANES). He has shown great qualities of leadership and

of study and analysis and resourcefulness.

I must say, Mr. President, that such qualities are much in need when it is necessary to espouse a treaty of this sort which, as I see it, is so much against the best interests of the people of the United States, from an economic standpoint and from a military standpoint.

Mr. President, one of the leading arguments that has been made with respect to these treaties is that they are absolutely necessary in order to avoid sabotage and to avoid demonstrations, to avoid riots in Panama. How does that argument tie up with the situation that we see existing in Panama at this time?

The President—excuse me; I used the wrong word, I assure you—the dictator of Panama declared a lengthy Easter recess so the students would not be at their schools to protest against the approval by the U.S. Senate and the prospective approval by Panama of this treaty. Demonstrations are taking place in Panama. I do not know whether the dictator has them under control yet or not. But if they are demonstrating and are now burning the President of the United States in effigy, in Panama, think what they are going to do when the U.S. Senate releases all control over these treaties. So it is act now, Mr. President, or not at all.

It is a strange situation that the advent of the treaties that are scheduled to prevent rioting and demonstration has actually set off riots and demonstrations. Apparently, the only way we are going to please the Panamanians is to defeat these treaties and send them back to the negotiating table.

I hope that a monetary payment to Panama and leaving conditions as is with respect to the operation, defense, and maintenance of the canal would be a proper alternative to this treaty, under which we give away the canal, pay Panama to take it, and then end up—without the DeConcini amendment—with inadequate rights to defend the canal.

I hope that no effort will be made on the floor of the Senate to undercut in this treaty the DeConcini amendment to the other treaty. We realize what the leadership can do, if it wishes, under the rule. I hope this does not occur, and I do not believe it will occur. If they would wait until the time to go out of the Committee of the Whole, which is at the close of business Thursday, if they plan to proceed with an amendment to undercut the DeConcini amendment, I hope they will not wait until the last, when there can be no debate on their "dilute DeConcini amendment," and I hope they will not wait until the last, when we get to the Resolution of Ratification, which is supposed to be voted on by 6 o'clock next Tuesday. But beyond that time, amendments will be in order, and they will be voted on without debate.

So I hope the leaders will not wait, if they plan to go this route, until all time for debate has ended; because I seriously doubt that they would want to face the other Senators on the floor with an amendment that would seek to undercut the DeConcini amendment. If they plan to go that route, I hope they will offer their amendment at such time as adequate debate can be held with respect to the amendment.

Mr. President, we are getting to the end of the road. We see the end in sight. I believe this debate has been constructive. It has been helpful. It has given an opportunity for various viewpoints to arise and for an opportunity to discuss them. It has been healthy that there has been a national debate and that National Public Radio has carried these debates throughout the country. They have rendered a fine service in this regard, and I certainly commend them for the fine results of their coverage.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. CHURCH. Mr. President, I would like to yield time to the able Senator from Maryland (Mr. SARBANES) to address the amendments that are now pending. He has had the benefit of hearing the entire discussion, and I think he is in the best position to oppose the amendments for the proponents of the treaty.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield for that purpose.

Mr. SARBANES. Mr. President, first, I say to the distinguished Senator from Alabama that, as always, I have enjoyed listening to him; and I do try to listen carefully to his statements, as he fully appreciates, I think.

Usually, we save the peroration of flogging the leadership until the end of the day, when, with predictable regularity, it will in fact occur, and the leadership will be taken out to the woodshed and administered an appropriate spanking by the distinguished Senator from Alabama.

And as he has noted on occasions it has brought the majority leader from his office, where he is listening to this illuminating debate on the public radio, to respond. But I noticed today that we apparently now have moved from flogging the leadership only in the evening to also flogging them at noon, and I assume if we start to come in early we will begin to flog the leadership in the morning as well.

So I take it that the admonition which the leadership should draw from the distinguished Senator's comments is that they should perhaps begin to anticipate a flogging morning, noon, and night.

Second, the distinguished Senator from Alabama said that obviously the leadership had full control over everything that happened and wherever we we may now be with respect to these treaties it is their responsibility and their responsibility alone.

I would not want the distinguished Senator from Alabama to not have his share of the credit for the situation, and I think we would have to recognize that the influence which the able Senator from Alabama has been able to exercise in setting the boundaries within which this treaty can be considered has been very significant. The distinguished Senator has really set up the barriers, one might almost refer to them, Mr. President, as the stone walls surrounding the consideration of this treaty, and in a very skillful way—and I say that as a term of admiration for the Senator's skill—he keeps wanting to move in those stone walls, he keeps moving them in, the stone walls that he has erected around this treaty he keeps moving in so that eventually there will not be sufficient space enclosed within his stone walls so that there will be a sufficient basis for an agreement between us and the Republic of Panama so that at the end of this process the stone walls having been moved in closer and closer, the amount of space left is insufficient to provide the basis for a treaty agreement between the United States of America and the Republic of Panama.

And then, of course, if that were to happen the objective of the Senator from Alabama, which he has never in any way concealed, in fact which he has clearly laid out and which has been his position consistently, as I understand it, ever since he came to the Senate, at least since October of 1971, will have been reached which is that there should not be a new treaty, at least one that reaches in any substantive way to the matters considered here.

Finally, of course, the very distinguished Senator has expressed a considerable concern for the Panamanian people. It is his intention, as I understand it, to propose an amendment that would require Panama to hold a plebiscite.

By what right, reason, logic, or consideration for the sensibilities of others the U.S. Senate should impose and dictate to the Panamanian people that kind of condition or restriction escapes me. I should have thought that we have to do our responsibilities and it is up to Panama and the Panamanian people to carry forward their responsibilities.

It, of course, has been stated that there would be a reaction in Panama that the Panamanian people do not want this treaty. In fact, I daresay it has even been suggested in the course of the Senator's comments that they ought not to want this treaty and they ought to be upset about it. Of course, then the next step is if they do get upset about it then we ought not to have the treaty, because we do not want to approve a treaty about which the Panamanians are going to be angry. So 1 minute we say to the Panamanians over the radio:

> You ought to be angry about this treaty. You ought to look at this treaty and you ought to be angry.

That, in effect, is the advice which the distinguished Senator from Alabama gives to the Panamanian people. And then he turns to the Senate, having raised the ire and the anger of the Panamanian people and says to the Senate, "We cannot approve treaties about which the Panamanian people will be angry."

I admire the eternal consistency and logic of the Senator's statement. It is

what is known as a self-fulfilling prophesy. It is the closed circle.

But before one ought to take it with great seriousness I think it ought to be underscored that the distinguished Senator from Alabama joined in sponsoring the resolution in the last Congress about which he had a colloquy with the majority leader last night, and the majority leader, of course, indicated that he does not any longer share the position in that resolution, but it is my understanding that the distinguished Senator from Alabama continues to adhere to that resolution, which amongst other things stated—this was the position embodied in the resolution and the one that I think it ought to be appreciated opponents of this treaty including the distinguished Senator from Alabama continue to adhere to—that—

The Government of the United States should maintain its sovereign rights and jurisdictions over the canal and zone and should in no way cede, dilute, forfeit, negotiate, or transfer any of these sovereign rights.

As I recall in yesterday's debate the Senator from Alabama said something about as far as the Panamanian people are concerned, he wanted them to have their sovereignty back, but, of course, in this resolution which he has sponsored and supported and the positions he generally has taken on the floor, and which were just reiterated with respect to simply increasing the annuity payment, his position has been that there should be no ceding, diluting, forfeiting, negotiating or transferring of any of these sovereign rights.

So that on the question of sovereignty it is clear that the distinguished Senator from Alabama for all the concern that has been expressed with respect to the Panamanian people, as distinguished from the Panamanian Government, is not prepared to deal with that very fundamental, basic question of sovereignty that these treaties address themselves to.

Mr. President, I hope that there is an appreciation of the skill of the Senator from Alabama and of the fact of these stone walls, which he has erected around this treaty and which he seeks day-by-day to move in closer and closer and closer together, so that in the end there will not be contained within the stone walls, that he has erected, a sufficient basis for the agreement between the United States and Panama which is his objective. It is his stated objective.

The Senator has never concealed the fact that that is his stated objective, and the Senator's view of an arrangement that should be negotiated obviously does not even begin to deal with the very fundamental questions of sovereignty and jurisdiction which are so important in resolving the longstanding dispute between our country and the Republic of Panama.

Mr. CHURCH. Mr. President, I thank the able Senator from Maryland for his remarks.

The hour of 2 o'clock having arrived——

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, under the previous order, the question recurs on amendment No. 100 offered by the Senator from North Carolina (Mr. HELMS). All time has expired.

Mr. CHURCH addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho (Mr. CHURCH).

Mr. CHURCH. I move to lay the amendment on the table, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. LAXALT addressed the Chair.

The PRESIDING OFFICER. The Senator from Nevada (Mr. LAXALT).

Mr. LAXALT. Mr. President, I think it is agreeable to all concerned that we have back-to-back votes on each of the amendments under consideration.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. LAXALT. Surely.

Mr. SARBANES. Because of the way the debate developed we did not have time to respond at all to the second Helms amendment. I think we should do that briefly.

I would be prepared to enter into a unanimous-consent request that the vote with respect to the second Helms amendment occur at 2:30, with 15 minutes after the conclusion of this vote divided 5 minutes to the Senator from North Carolina and 10 minutes to this side. We would make our statement and he could respond, and I think that would accommodate us.

Mr. LAXALT. Mr. President, that is perfectly agreeable with us.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The question is on agreeing to the motion of the Senator from Idaho to lay on the table the amendment of the Senator from North Carolina. The clerk will call the roll on amendment No. 100.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mr. ANDERSON), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Maine (Mr. MUSKIE), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. ANDERSON), the Senator from Michigan (Mr. RIEGLE), and the Senator from Minnesota (Mrs. HUMPHREY) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BARTLETT), the Senator from California (Mr. HAYAKAWA), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

The result was announced—yeas 64, nays 28, as follows:

[Rollcall Vote No. 88 Exec.]

YEAS—64

| | | |
|---|---|---|
| Abourezk | Byrd, Harry F., Jr. | Cranston |
| Baker | Byrd, Robert C. | Culver |
| Bayh | Case | Danforth |
| Bellmon | Chafee | DeConcini |

NOT VOTING—8

| | | |
|---|---|---|
| Anderson | Hollings | Muskie |
| Bartlett | Humphrey | Riegle |
| Hayakawa | Mathias | |

So the motion to lay Mr. HELM'S amendment No. 100 on the table was agreed to.

Mr. SARBANES. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. CHURCH. I move to lay that motion on the table.

The PRESIDING OFFICER (Mr. ABOUREZK). The question is on agreeing to the motion to lay on the table.

The motion to lay on the table was agreed to.

Mr. SARBANES. Mr. President, for the information of Members of the Senate who are present, there will be another vote no later than 15 minutes from now, and hopefully somewhat sooner than that, on the second Helms amendment. There is a unanimous-consent agreement which was previously entered into. So that Members can plan their activities, I thought it would be helpful to let them know that.

Mr. President, I would like to address myself to the Helms amendment just briefly. I yield myself 5 minutes.

The PRESIDING OFFICER. Will the Senator suspend? The amendment has not yet been called up.

UP AMENDMENT NO. 20

The PRESIDING OFFICER. Under the previous order, unprinted amendment No. 20 is the pending amendment. There are 10 minutes allowed to the Senator from Idaho (Mr. CHURCH), or his designee, and 5 minutes to the Senator from North Carolina (Mr. HELMS). The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 20.

At the end of paragraph 3 of article IV, add the following undesignated paragraph:

"Nothing in this paragraph prevents the military forces of the Republic of Panama or of the United States of America from conducting such separate military planning, exercises, or operations as each Party deems necessary to protect and defend the Canal.".

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, the Helms amendment suggests there is

some difficulty or ambiguity about our right to take separate action in carrying out the U.S. military duties with respect to defending the canal in the period between now and the end of the century, or the period specifically covered by the Panama Canal Treaty.

The treaty provisions in article IV are quite clear with respect to the American right and the Panamanian right, that each party shall act in accordance with its constitutional processes to meet the danger resulting from an armed attack or other actions which threaten the security of the Panama Canal or ships transitting it.

That is the first point.

The second point is that the Neutrality Treaty, which we adopted 68 to utterly unnecessary. Any Senator with Panama Canal Treaty. There is a misconception on the part of many that it only takes effect after the year 2000. It in fact takes effect simultaneously with the Panama Canal Treaty, namely, 6 months after the instruments of ratification are exchanged. It is only certain limited provisions in the Neutrality Treaty which take effect after the end of the century. So all of the provisions are there in terms of our right to take action to maintain the regime of neutrality, and specifically the provision embodied in the amendment offered by Senators ROBERT C. BYRD and BAKER and an overwhelming majority of the Members of the body, which states:

Each of the two countries shall, in accordance with their respective constitutional processes, defend the canal against any threat to the regime of neutrality, and consequently shall have the right to act against any aggression or threat directed against the Canal or against the peaceful transit of vessels through the Canal.

That provision takes effect at the same time as the Panama Canal Treaty, not after the year 2000. It takes effect at the same time.

Second, the Panama Canal Treaty provides that for its duration the United States of America shall have primary responsibility to protect and defend the canal. We have the primary responsibility to protect and defend the canal.

In article IV it is provided that there shall be a combined board of United States and Panamanian representatives to facilitate the participation and cooperation of the armed forces of both parties in the protection and defense of the canal.

But that article then goes on and in explicit terms states:

Such combined protection and defense arrangements shall not inhibit the identity or lines of authority of the armed forces of the United States of America or the Republic of Panama.

So the identity of our lines of authority are in no way inhibited. Our primary responsibility to maintain the defense of the canal is clearly stated. The balance of the provisions of article IV spell out that what we are establishing is a cooperative arrangement, but that we are not losing, precluding, or compromising our own right to take the action we deem necessary in order to defend the canal.

General McAuliffe, who is the head of the Southern Command stationed in the Canal Zone currently, discussed this matter of the role of the combined board in testimony before the committee, of which the distinguished Senator from North Carolina is a member.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. SARBANES. I yield myself an additional 3 minutes.

Concerning the Senator's contention that somehow the combined board compromises either the integrity of the lines of authority of the American command or our ability to take action in order to meet our primary responsibility for the defense of the canal, General McAuliffe stated the following, on page 88 of the hearing record:

General MCAULIFFE. The Combined Board. Senator, is a coordinating and cooperative element, composed of an equal number of United States and Panamanian officers. Its purposes is to address the coordination of activities relating to the combined defense, to examine defense plans and the like and, of course, certain of the training aspects that are related to that.

The Board does not have any decision power; it is simply a forum for the exchange of proposals and the coordination of matters affecting these forces.

As I did indicate earlier today, Senator, this Board, in my mind, epitomizes the kind of cooperative relationship that we are trying to achieve with the Panamanian forces, to draw them closer together with the United States forces and so as to assure that by the end of the treaty period those forces are able to go off on their own and do a decent job in defending that canal.

On the other side of the coin, I must say that these cooperative arrangements are beneficial to us in that they are designed and, I believe, will help to improve our ability to defend the canal in the treaty years up to the year 2000. However, if for one reason or another that arrangement does not work, the United States still has the obligation of primary responsibility, that is to say, of defense of the canal, and would not be precluded from acting unilaterally in that period if necessary.

Mr. President, I submit that this spells out what is embodied clearly in the treaty arrangement. This is a cooperative arrangement. It is an effort to develop cooperation. But, nevertheless, the U.S. command authority is not impeded, not intruded upon. We have the primary responsibility to defend the canal. We have the right to take whatever action is necessary in order to accomplish that. Therefore, we would be able to respond as was deemed necessary. For those reasons, I oppose the amendment offered by the Senator from North Carolina.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HELMS. Mr. President, may I ask the time situation?

The PRESIDING OFFICER. The Senator from North Carolina has 5 minutes; 2 minutes for the Senator from Maryland.

Mr. HELMS. I thank the Chair. I yield my remaining 5 minutes to the distinguished Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in support of the unprinted amendment No. 20, offered by the distinguished senior Senator from North Carolina (Mr. HELMS).

This amendment is essential in that it provides that U.S. defense forces in the Republic of Panama for purposes of defending the canal may conduct military operations separately from those of the Republic of Panama if it deems necessary.

Under the pending treaty, a joint defense force is established and all military training, duties and exercises are to be conducted jointly.

This amendment would merely give U.S. forces the right to act independently in defense of the canal if we deem it necessary. There may be steps which our military leaders feel are needed that the Panamanians may find objectionable.

Mr. President, little notice has been taken in the Senate that the military forces of this country, once Panama becomes sovereign—6 months after ratification—are governed by a combined board.

This Board has an equal number of military representatives from the two countries and in the event of a disagreement, would be locked in a tie vote. These representatives are charged with consulting and cooperating on "all matters pertaining to the protection and defense of the canal."

This arrangement leads one to the understanding that all military actions taken in Panama once Panama becomes sovereign shall be taken only if agreed to by this Combined Board.

Mr. President, the Senate must not forget that if this treaty is approved, Panama will become sovereign in all parts of the old zone in 6 months. Once sovereign, Panama becomes the judge of all issues not explicitly spelled out in the treaties.

If we are to avoid trouble and disputes, defend the canal as we deem proper, and create the relations the treaties attempt to achieve, this amendment should be approved by the Senate.

I thank the distinguished Senator.

The PRESIDING OFFICER. Who yields time?

Mr. CHURCH. Mr. President, as the able Senator from Maryland explained, we oppose the amendment as being utterly unnecessary. There is nothing in paragraph 3 of article IV of the treaty which prevents the United States of America from conducting such separate military planning exercises or operations as the United States deems necessary. Both Panama and the United States could conduct such operations separately, or they could, if they chose, conduct those operations jointly, depending upon which better achieves the objective of adequately defending the canal.

The amendment is superfluous and utterly unnecessary. Any Senator with any question in his mind can ascertain that fact simply by reading the provisions of the treaty. On that basis, we oppose the amendment. I move to lay the amendment on the table and ask for the yeas and nays.

The PRESIDING OFFICER. The time has not expired yet.

Mr. CHURCH. I yield back the remainder of my time.

The PRESIDING OFFICER. Does the

Senator from North Carolina yield back his time?

Mr. HELMS. Yes, Mr. President, I yield back my time.

The PRESIDING OFFICER. All time is yielded back.

Mr. CHURCH. I move to lay the amendment on the table. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the amendment on the table. The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Minnesota (Mr. ANDERSON), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Maine (Mr. MUSKIE), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. ANDERSON) and the Senator from Michigan (Mr. RIEGLE) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BARTLETT), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

The result was announced—yeas 66, nays 28, as follows:

[Rollcall Vote No. 89 Exec.]

YEAS—66

| | | |
|---|---|---|
| Abourezk | Hatfield, | Morgan |
| Baker | Mark O. | Moynihan |
| Bayh | Hatfield, | Nelson |
| Bellmon | Paul G. | Nunn |
| Bentsen | Hathaway | Packwood |
| Biden | Hayakawa | Pearson |

| Domenici | Lugar | Young |
| Eastland | McClure | |

NOT VOTING—6

| | | |
|---|---|---|
| Anderson | Hollings | Muskie |
| Bartlett | Mathias | Riegle |

So the motion to lay Mr. HELM'S amendment No. 20 on the table was agreed to.

Mr. SARBANES. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. CHURCH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 21

Mr. HELMS. Mr. President, I send to the desk an unprinted amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 21.

Mr. HELMS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of article IV, add the following: "6. Any nuclear armament of the United States of America which is mobile or tactical in nature, or which is installed on a military aircraft or vessel of war of the United States of America, and which armament is transported through the former Canal Zone, shall not be considered as emplaced in the territory of the Republic of Panama in violation of the obligations of the United States of America under Article 2 of the Additional Protocol II to the Treaty for the Prohibition of Nuclear Weapons in Latin America or of the obligations of the Republic of Panama under such Treaty.".

Mr. HELMS. Mr. President, so that we might consider a time agreement on this amendment, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that there be a time limitation on this amendment of 40 minutes, equally divided, with Mr. CHURCH in charge of the time in opposition to the amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Who yields time?

Mr. HELMS. I yield myself 10 minutes.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. Mr. President, a number of our distinguished colleagues have made an analogy between treaties and contracts. That is a reasonable analogy. A treaty is like a contract; and like a contract, you have to read the fine print.

In paragraph of article IV, the treaty says that the use of areas and installations and the legal status of the armed forces of the United States of America in the Republic of Panama shall be governed by the agreement in implementation of article IV. So if you want to find out what our rights really are, you have to turn to the implementation agreement. Unfortunately, there has been little debate about the implementation agreements because they are not before the Senate.

However, if you look in article VI of the implementation agreement—not to be confused with article IV of the treaty itself—there is an astonishing paragraph. Paragraph 6 says:

Since the Republic of Panama is a signatory to the Latin American Denuclearization Treaty . . ., the United States shall emplace no type of nuclear armament on Panamanian territory.

This is interesting for several reasons. First of all, it is interesting for sloppy drafting. There is no such thing as "the Latin American Denuclearization Treaty." The correct title is the "Treaty for the Prohibition of Nuclear Weapons in Latin America." Perhaps the wrong title is given so that anyone who is trying to find out what that treaty is will not be able to find it and give up.

However, I did find it; and I also found out that the word "emplace," as used in paragraph 6, does not appear anywhere in the Treaty for the Prohibition of Nuclear Weapons in Latin America. That treaty speaks of "the receipt, storage, installation, deployment, and any form of possession of any nuclear weapons." But it does not use the word "emplace," and we have no way of telling what the word "emplace" means under the treaty. So the corollary is that we do not know what "emplace" means in paragraph 6, either.

Second, paragraph 6 is interesting in that it goes directly counter to the thrust and intent of the Treaty for the Prohibition of Nuclear Weapons in Latin America. For that treaty only prohibits Panama from having nuclear weapons in Panamanian territory; it does not prohibit the United States from having nuclear weapons in Panamanian territory. In fact, the intent of that treaty, as explained to the Senate by the President of the United States, the Secretary of State, and the chairman of the Foreign Relations Committee was to allow nonnuclear states to give permission to nuclear states for the transit and shipment of nuclear weapons through nonnuclear territory.

The treaty was signed by Panama and other Latin America countries on April 1, 1968. Only Latin American countries, all of which were nonnuclear, were permitted to sign. Nuclear states, however, were permitted to sign the protocols.

The United States is an adherent to Protocol II. It was transmitted to the Senate by President Nixon on August 13, 1970. He said at that time:

I recommend that the Senate give early and favorable consideration to Additional Protocol II and give its advice and consent to ratification, subject to the statement which accompanies the report of the Secretary of State. That statement, which is similar to the one made by the United States at the time of our signature, expresses our understanding concerning territories and territorial status, transit and transport privileges, non-use of nuclear weapons, and the definition of "nuclear weapon."

The President's reference to "our understanding concerning territories" is very important in the present case, because "territory" as used in that treaty includes "territorial seas," and Panama

claims everything within 200 miles of her shores as her "territorial seas." Thus even if we had nuclear submarines within 200 miles of Panama, Panama could charge us with violations, holding canal operations as hostage.

The letter of Secretary of State Rogers said:

The negotiating history of the Treaty makes it clear that these prohibitions do not affect transit and transport privileges of non-Contracting Parties. This fact is reflected in the statement which accompanied United States signature of Protocol II, and which, it is proposed, should accompany our ratification thereof. In that statement, the United States takes note of the Preparatory Commission's interpretation of the Treaty, as set forth in the Final Act, that, governed by the principles and rules of international law, each of the Contracting Parties retains exclusive power and legal competence, unaffected by the terms of the Treaty, to grant or deny non-Contracting parties transit and transport privileges.

The Foreign Relations Committee voted 13 to 0 to order the protocol reported with additional understandings developed by the committee. In his report, the then chairman of that committee, Mr. Fulbright, said:

In the course of the Committee's hearings executive branch witnesses proposed another modification of the statement to present a more explicit formulation of the U.S. understanding of the basis for territorial claims. The principal provisions of the revised statement, which is incorporated in the form of a declaration in the resolution of advice and consent, are as follows:

(1) U.S. ratification cannot be construed as an acceptance by the United States of the unilaterally asserted boundary claims of the parties to the treaty (e.g., territorial seas).

(2) U.S. military transit and transport privileges will not be affected by ratification.

(3) The pledge not to use nuclear weapons against a contracting party would not prohibit a U.S. nuclear response in the event of an armed attack by a party with the assistance of a nuclear-weapon state.

Mr. President, it is perfectly clear from these documents that there is nothing in the so-called Denuclearization Treaty that would prevent Panama from giving permission to the United States to transport nuclear weapons in Panamanian territory or territorial seas. Yet, paragraph 6 uses the word "since":

Since the Republic of Panama is a signatory to the Latin American Denuclearization Treaty, the United States shall emplace no type of nuclear armament on Panamanian territory.

Plainly, there is no causal relation whatsoever to Panama's being a signatory. Panama is free to allow or to disallow the right of transit or transport to the United States. The Denuclearization Treaty is no restraint on Panama at all. I think Panama should take positive steps to grant us such permission.

Now what does the word "emplace" mean? Is it the same as "deploy"? Does it mean a permanent installation, or does it mean any temporary placement?

Of course, it is true that the Neutrality Treaty entitles vessels of war and auxiliary vessels to transit the canal irrespective of armament. But does the general principle override the specific exception in paragraph 6 of the implementation agreement's article IV? Or is it the other way around?

Moreover, it is not just a question of transit through the canal. There is the question of transit through Panamanian waters, as I have said earlier, waters which may reach as far as 200 miles and which may not be included in the definition of "canal" in the Neutrality Treaty.

Moreover, there is the problem of the status of nuclear armament on U.S. bases in Panama. If tactical nuclear weapons are aboard U.S. military aircraft that land at Howard Air Force Base, are they considered to be "emplaced"? Suppose they are brought to Howard in one aircraft and transferred to another; is that "emplaced"? Suppose they are stored at U.S. bases; is that "emplaced"? How long can they be stored before they are "emplaced"?

Since it is our obligation to assume "primary responsibility" to defend the Panama Canal, we ought to see to it that we have authority to transport any type of nuclear armament on any vehicle or launch platform—through the canal, the territorial seas adjacent thereto, or on our military bases in Panama. Panama has full authority to give us that permission, and we should insist that she give us that authority.

So, Mr. President, the pending amendment would add a new paragraph, also No. 6, to the end of article IV of the treaty.

The PRESIDING OFFICER (Mr. McGOVERN). The Senator's 10 minutes have expired.

Mr. HELMS. I yield myself 3 more minutes, Mr. President, and I thank the Chair. Paragraph 6 reads as follows:

6. Any nuclear armament of the United States of America which is mobile or tactical in nature, or which is installed on a military aircraft or vessel of war of the United States of America, and which armament is transported through the former Canal Zone, shall not be considered as emplaced in the territory of the Republic of Panama in violation of the obligations of the United States of America under Article 2 of the Additional Protocol II to the Treaty for the Prohibition of Nuclear Weapons in Latin America or of the obligations of the Republic of Panama under such Treaty.

Mr. President, I ask unanimous consent that the complete texts of the letter of President Nixon and of Secretary Rogers, and the report of Senator Fulbright, along with the resolution of ratification of Protocol II of the Treaty for the Prohibition of Nuclear Weapons in Latin America, be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ADDITIONAL PROTOCOL II TO THE TREATY FOR THE PROHIBITION OF NUCLEAR WEAPONS IN LATIN AMERICA

LETTER OF TRANSMITTAL

THE WHITE HOUSE,
*August 13, 1970.*

*To the Senate of the United States:*

I transmit herewith Additional Protocol II to the Treaty for the Prohibition of Nuclear Weapons in Latin America, with a view to receiving the advice and consent of the Senate to its ratification. The Additional Protocol was signed on behalf of the United States on April 1, 1968.

For the information of the Senate, I transmit also the report by the Secretary of State with respect to the Protocol and a copy of the Treaty to which it relates.

The Treaty for the Prohibition of Nuclear Weapons in Latin America, done at Mexico City February 14, 1967, is the first successful attempt to create a nuclear free zone in a populated region of the world. The Treaty is limited to states located in the Latin American region and is already in force among 16 Latin American nations.

Additional Protocol II is designed for nuclear-weapon states, which are not eligible to sign the Treaty itself. It calls upon them to respect the denuclearized status of Latin America, not to contribute to violation of the Treaty, and not to use or threaten to use nuclear weapons against the Treaty parties.

It is in the best interests of the United States to assume these obligations toward the Latin American countries bound by the Treaty. By creating this nuclear-free zone the nations of Latin America have made an important contribution to peace and security in the Western Hemisphere. Ratification by the United States of Additional Protocol II would not only indicate our support for the Latin American nuclear-free zone but would reinforce our other arms control efforts such as the Non-Proliferation Treaty.

I recommend that the Senate give early and favorable consideration to Additional Protocol II and give its advice and consent to ratification, subject to the statement which accompanies the report of the Secretary of State. That statement, which is similar to the one made by the United States at the time of signature, expresses our understanding concerning territories and territorial claims, transit and transport privileges, non-use of nuclear weapons, and the definition of "nuclear weapon". The statement also reaffirms our willingness to make available nuclear explosion services for peaceful purposes on a nondiscriminatory basis under appropriate international arrangements.

RICHARD NIXON.

LETTER OF SUBMITTAL

DEPARTMENT OF STATE,
*Washington, July 16, 1970.*

THE PRESIDENT,
*The White House.*

THE PRESIDENT: I have the honor to submit to you, with the recommendation that it be transmitted to the Senate for its advice and consent to ratification, Additional Protocol II, signed on April 1, 1968 on behalf of the United States of America, to the Treaty for the Prohibition of Nuclear Weapons in Latin America. The Treaty itself is not open for signature to states that are located outside Latin America, and such states are not eligible for membership in, or bound by the decisions of, the regional organization established to implement the Treaty.

Additional Protocol II to the Treaty is specifically designed for adherence by nuclear-weapon states that are willing to undertake to respect the express aims and provisions of the Treaty, not to contribute to its violation in the territories to which it applies, and not to use or threaten to use nuclear weapons against the states parties to the Treaty. The United Kingdom has signed and ratified the Protocol. The obligations which states assume upon ratification of the Protocol derive from both the provisions of the Protocol and the provisions of the Treaty itself.

The Treaty for the Prohibition of Nuclear Weapons in Latin America is the culmination of a regional effort to keep Latin America free of nuclear weapons. A Joint Declaration on the subject was issued by Bolivia,

Brazil, Chile, Ecuador, and Mexico on April 29, 1963. This effort was welcomed and encouraged by a resolution adopted by the United Nations General Assembly on November 27, 1963. After several years of international negotiations, including consideration of comments by the United States, the Treaty was opened for signature on February 14, 1967. The United States has expressed its support for the Treaty not only by signing Additional Protocol II, but also in public statements made by President Johnson and Vice President Humphrey, by our representatives in the Eighteen Nation Disarmament Committee and the United Nations General Assembly, and by United States votes for resolutions of the General Assembly in 1967 and 1968 commending the Treaty and calling upon those eligible to sign and ratify Protocol II to do so.

The Treaty has been signed by all Latin American states except Cuba (whose present government has indicated that it does not intend to sign) and Guyana (whose eligibility to sign is in dispute). It is currently in force for 16 of these states, and a new regional organization has been established to implement it.

The basic understanding of the Contracting Parties (defined in Article 2 as the states for which the Treaty is in force) are set forth in Article 1. They are (a) to use exclusively for peaceful purposes the nuclear material and facilities which are under their jurisdiction; (b) to prohibit and prevent in their respective territories the testing, use, manufacture, production or acquisition by any means whatsoever of any nuclear weapons; (c) to prohibit and prevent in their respective territories the receipt, storage, installation, deployment and any form of possession of nuclear weapons by the Contracting Parties themselves, by anyone on their behalf, or in any other way; and (d) to refrain from engaging in, encouraging or authorizing directly or indirectly, or in any way participating in the testing, use, manufacture, production, possession or control of any nuclear weapon.

The negotiating history of the Treaty makes it clear that these prohibitions do not affect transit and transport privileges of non-Contracting Parties. This fact is reflected in the statement which accompanied United States signature of Protocol II and which, it is proposed, should accompany our ratification thereof. In that statement the United States "takes note of the Preparatory Commission's interpretation of the Treaty, as set forth in the Final Act, that, governed by the principles and rules of international law, each of the Contracting Parties retains exclusive power and legal competence, unaffected by the terms of the Treaty, to grant or deny non-Contracting Parties transit and transport privileges."

The United States statement makes clear also that, as regards the undertakings in Article 3 of Protocol II not to use or threaten to use nuclear weapons against the Treaty parties, this country would have to consider that an armed attack by a Contracting Party to the Treaty, in which it was assisted by a nuclear-weapon state, would be incompatible with that Party's corresponding obligations under Article 1 of the Treaty.

Article 3 of the Treaty defines "territory" to include the territorial sea, air space and any other space over which the state exercises sovereignty in accordance with its own legislation. The statement of the United States makes clear our understanding that the Treaty and its protocols have no effect upon the international status of territorial claims.

Article 4 of the Treaty defines the zone of application of the Treaty as "the whole of the territories for which the Treaty is in force". The article also makes provision for a broader zone of application within the Western Hemisphere, including international waters, upon the fulfillment of *all* of a number of conditions, one of which is United States ratification of Protocol I to the Treaty. Protocol I calls upon states to apply the status of denuclearization in territories for which they are internationally responsible within the Treaty zone. The United States has not signed Protocol I, and the United Kingdom is the only nuclear-weapon state that has to date become a party to this Protocol.

Article 5 of the Treaty defines nuclear weapons. It excludes an instrument that may be used for the transport or propulsion of a nuclear explosive device if it is separable from the device itself and not an indivisible part thereof. But it includes any device which is capable of releasing nuclear energy in an uncontrolled manner and which has a group of characteristics that are appropriate for use for warlike purposes. This definition is particularly significant in connection with Article 18 of the Treaty, which deals with peaceful uses of nuclear explosions. Paragraph 1 of that article provides that the Contracting Parties may carry out explosions of nuclear devices for peaceful purposes, or collaborate with third parties for the same purposes, *provided* they do so in accordance with the provisions of Article 18 and the other articles of the Treaty, particularly Articles 1 and 5. Paragraph 4 of Article 18 specifically permits the Contracting Parties to accept the collaboration of third parties for such purposes.

The statement which accompanied signature by the United States of Additional Protocol II, made the following comments on the definition of "nuclear weapon" in Article 5:

"The United States wishes to point out again the fact that the technology of making nuclear explosive devices for peaceful purposes is indistinguishable from the technology of making nuclear weapons and the fact that nuclear weapons and nuclear explosive devices for peaceful purposes are both capable of releasing nuclear energy in an uncontrolled manner and have the common group of characteristics of large amounts of energy generated instantaneously from a compact source. Therefore we understand the definition contained in Article 5 of the Treaty as necessarily encompassing all nuclear explosive devices. It is our understanding that Articles 1 and 5 restrict accordingly the activities of the Contracting Parties under paragraph 1 of Article 18.

"The United States further notes that paragraph 4 of Article 18 of the treaty permits, and that United States adherence to Protocol II will not prevent, collaboration by the United States with Contracting Parties for the purpose of carrying out explosions of nuclear devices for peaceful purposes in a manner consistent with our policy of not contributing to the proliferation of nuclear weapons capabilities. In this connection, the United States reaffirms its willingness to make available nuclear explosion services for peaceful purposes on a nondiscriminatory basis under appropriate international arrangements and to join other nuclear weapon States in a commitment to do so."

Subsequent to the making of this statement, the United States in fact joined in such a commitment in the Nuclear Non-Proliferation Treaty, which entered into force on March 5, 1970. Accordingly, it is proposed that when used in connection with our ratification of Additional Protocol II the last sentence of this statement be updated to read as follows:

"In this connection, the United States calls attention to Article V of the Nuclear Non-Proliferation Treaty, under which it joined in an undertaking to take appropriate measures to ensure that potential benefits of peaceful applications of nuclear explosions would be made available to non-nuclear-weapon states party to that treaty, and reaffirms its willingness to extend such undertaking, on the same basis, to states precluded by the present treaty from manufacturing or acquiring any nuclear explosive devices."

Neither the Treaty nor our adherence to Additional Protocol II would present any bar to the use by the United States of nuclear explosions for excavation of a new Atlantic-Pacific interoceanic canal with the consent of the party in whose territory such excavation took place, although it would have to be consistent with other treaty obligations, including the Limited Test Ban Treaty. But the Treaty for the Prohibition of Nuclear Weapons in Latin America would require certain procedures to be followed in connection with such a project. These include (a) advance notification to the International Atomic Energy Agency, containing the information specified in paragraph 2 of Article 18, and (b) observation as provided in paragraph 3 of that article, by representatives of the International Atomic Energy Agency and of the new regional organization established to implement the Treaty.

Articles 6–11 of the Treaty are not of direct interest to the United States, since they relate to meetings of the signatories and the organization and procedures of the regional "Agency for the Prohibition of Nuclear Weapons in Latin America" (the Spanish acronym for which is OPANAL). The first meeting of this organization was held in Mexico City September 2–9, 1969, and was attended by a United States observer. Article 7 of the Treaty provides that "Only the Contracting Parties shall be affected by its decisions."

Articles 12–16 of the Treaty establish a control system for the purpose of verifying compliance with the obligations entered into by the Contracting Parties in accordance with Article 1. Article 13 requires the Contracting Parties to enter into agreements with the International Atomic Energy Agency for the application for its safeguards to their nuclear activities.

I enclose a copy of the Treaty and Additional Protocol I, which I suggest be transmitted to the Senate for its information in connection with consideration of Protocol II. Also enclosed is a copy of the statement which I propose be made an integral part of United States ratification of Protocol II.

I believe that ratification of Additional Protocol II to the Latin American Nuclear Free Zone Treaty would complement our other efforts to prevent the proliferation of nuclear weapons.

Respectfully submitted.

WILLIAM P. ROGERS.

---

ADDITIONAL PROTOCOL II

The undersigned Plenipotentiaries, furnished with full powers by their respective Governments,

Convinced that the Treaty for the Prohibition of Nuclear Weapons in Latin America, negotiated and signed in accordance with the recommendations of the General Assembly of the United Nations in Resolution 1911 (XVIII) of 27 November 1963, represents an important step towards ensuring the non-proliferation of nuclear weapons.

Aware that the non-proliferation of nuclear weapons is not an end in itself but, rather, a means of achieving general and complete disarmament at a later stage, and

Desiring to contribute, so far as lies in their power, towards ending the armaments race, especially in the field of nuclear weapons, and towards promoting and strengthening a world at peace, based on mutual respect and sovereign equality of States,

Have agreed as follows:

Article 1. The statute of denuclearization of Latin America in respect of warlike pur-

poses, as defined, delimited and set forth in the Treaty for the Prohibition of Nuclear Weapons in Latin America of which this instrument is an annex, shall be fully respected by the Parties to this Protocol in all its express aims and provisions.

Article 2. The Governments represented by the undersigned Plenipotentiaries undertake, therefore, not to contribute in any way to the performance of acts involving a violation of the obligations of article 1 of the Treaty in the territories to which the Treaty applies in accordance with article 4 thereof.

Article 3. The Governments represented by the undersigned Plenipotentiaries also undertake not to use or threaten to use nuclear weapons against the Contracting Parties of the Treaty for the Prohibition of Nuclear Weapons in Latin America.

Article 4. The duration of this Protocol shall be the same as that of the Treaty for the Prohibition of Nuclear Weapons in Latin America of which this Protocol is an annex, and the definitions of territory and nuclear weapons set forth in articles 3 and 5 of the Treaty shall be applicable to this Protocol, as well as the provisions regarding ratification, reservations, denunciation, authentic texts and registration contained in articles 26, 27, 30 and 31 of the Treaty.

Article 5. This Protocol shall enter into force, for the States which have ratified it, on the date of the deposit of their respective instruments of ratification.

In witness whereof, the undersigned Plenipotentiaries, having deposited their full powers, found to be in good and due form, hereby sign this Additional Protocol on behalf of their respective Governments.

---

PROPOSED STATEMENT ON RATIFICATION BY THE UNITED STATES OF AMERICA OF ADDITIONAL PROTOCOL II TO THE TREATY FOR THE PROHIBITION OF NUCLEAR WEAPONS IN LATIN AMERICA

I

The United States understands that the Treaty and its Protocols have no effect upon the international status of territorial claims.

The United States takes note of the Preparatory Commission's interpretation of the Treaty, as set forth in the Final Act, that, governed by the principles and rules of international law, each of the Contracting Parties retains exclusive power and legal competence, unaffected by the terms of the Treaty, to grant or deny non-Contracting Parties transit and transport privileges.

As regards the undertaking in Article 3 of Protocol II not to use or threaten to use nuclear weapons against the Contracting Parties, the United States would have to consider than an armed attack by a Contracting Party, in which it was assisted by a nuclear-weapon state, would be incompatible with the Contracting Party's corresponding obligations under Article 1 of the Treaty.

II

The United States wishes to point out again the fact that the technology of making nuclear exposive devices for peaceful purposes is indistinguishable from the technology of making nuclear weapons and the fact that nuclear weapons and nuclear explosive devices for peaceful purposes are both capable of releasing nuclear energy in an uncontrolled manner and have the common group of characteristics of large amounts of energy generated instantaneously from a compact source. Therefore we understand the definition contained in Article 5 of the Treaty as necessarily encompassing all nuclear explosive devices. It is our understanding that Articles 1 and 5 restrict accordingly the activities of the Contracting Parties under paragraph 1 of Article 18.

The United States further notes that paragraph 4 of Article 18 of the Treaty permits, and that United States adherence to Protocol II will not prevent, collaboration by the United States with Contracting Parties for the purpose of carrying out explosions of nuclear devices for peaceful purposes in a manner consistent with our policy of not contributing to the proliferation of nuclear weapons capabilities. In this connection, the United States calls attention to Article V of the Nuclear Non-Proliferation Treaty, under which it joined in an undertaking to take appropriate measures to ensure that potential benefits of peaceful applications of nuclear explosions would be made available to non-nuclear-weapon states party to that treaty, and reaffirms its willingness to extend such undertaking, on the same basis, to states precluded by the present treaty from manufacturing or acquiring any nuclear explosive device.

III

The United States also wishes to state that, although not required by Protocol II, it will act with respect to such territories of Protocol I adherents as are within the geographical area defined in paragraph 2 of Article 4 of the Treaty in the same manner as Protocol II requires it to act with respect to the territories of Contracting Parties.

---

ADDITIONAL PROTOCOL II TO THE LATIN AMERICAN NUCLEAR FREE ZONE TREATY

Mr. Fulbright, from the Committee on Foreign Relations, submitted the following report (To accompany Ex. H., 91st Cong., second sess.).

The Committee on Foreign Relations, to which was referred the Additional Protocol II to the Treaty for the Prohibition of Nuclear Weapons in Latin America, signed at Mexico City on April 1, 1968, having considered the same, reports favorably thereon with understandings and declarations and recommends that the Senate give its advice and consent to ratification thereof with the understandings and declarations in the resolution of ratification which is printed at the conclusion of this report.

BACKGROUND

This protocol and the treaty to which it pertains, the Treaty for the Prohibition of Nuclear Weapons in Latin America (described briefly in the last paragraph of this section), are the result of the work of the "Preparatory Commission for the Denuclearization of Latin America" which met in Mexico City between March, 1965 and February, 1967. The United States was not a member of the Commission but sent observers to all but one of its sessions. On February 14, 1967 the treaty and its two protocols were opened for signature. The United States signed Additional Protocol II with an accompanying statement on April 1, 1968, at Mexico City. (The United States has not signed and does not presently plan to sign Protocol I.) More than two years later, on August 13, 1970, it was submitted to the Senate for advice and consent to ratification.

According to the executive branch, the delay in signature and submission of the protocol to the Senate was occasioned by a desire to see whether the treaty would be "widely accepted by the parties" and by a desire to test the United States interpretation of the treaty and the protocol in actual practice with the parties over an extended period. An initial hearing on the protocol was held by the Committee on September 22, 1970, and a second, and final, hearing on February 23, 1971.

PURPOSE

Protocol II was designed expressly for signature by states possessing nuclear weapons and wishing to associate themselves with the objectives of the treaty. By adhering to this protocol the United States commits itself, subject to its clarifying interpretations, to respect the aims and provisions of the treaty, not to contribute to its violation, and not to use or threaten to use nuclear weapons against the Latin American states for which the treaty is in force.

The treaty itself, which only Latin American nations may sign, commits the contracting parties to use nuclear materials and facilities under their jurisdiction only for peaceful purposes. It prohibits contracting parties from producing, testing, or possessing nuclear weapons in their territories. In addition it forbids the receipt, deployment or installation of any nuclear weapons in the territories of the parties. Compliance with the treaty is to be assured through the International Atomic Energy Agency safeguards system and by special inspections conducted by the "Agency for the Prohibition of Nuclear Weapons in Latin America," an international body established under the provisions of the treaty.

*Main provisions of protocol*

Articles 1 and 2 of Additional Protocol II obligate the United States to respect the express aims and provisions of the treaty, and not to contribute in any way to the performance of acts involving a violation of the obligations of Article I of the treaty in the territories to which the treaty applies in accordance with Article 4 thereof.

Article 3 contains an undertaking "not to use or threaten to use nuclear weapons against the Contracting Parties of the Treaty." The treaty defines contracting parties as "those for whom the Treaty is in force" and thus the term does not include parties to either of the protocols.

Article 4 of the protocol incorporates a number of the provisions of the treaty by reference. It provides that the duration of the protocol shall be the same as that of the treaty, and that the provisions of Article 30 on denunciation shall be applicable to the protocol. Article 30 of the treaty provides that it may be denounced "if, in the opinion of the denouncing state, there have arisen or may arise circumstances connected with the content of this Treaty or of the annexed Additional Protocols I and II which affect its supreme interests or the peace and security of one or more Contracting Parties," and goes on to provide that denunciation shall take effect 3 months after notification. Article 4 of the protocol also provides that the definitions of "territory" and "nuclear weapons" as set forth in Articles 3 and 5 of the treaty shall be applicable to this protocol. In addition, Article 4 of the protocol states that the "provisions regarding ratification, reservations, * * * authentic texts and registration contained in * * * the treaty" should be applicable to the protocol.

Article 5 of Protocol II provides that the protocol shall enter into force for each adherent on the date it deposits its instrument of ratification.

UNDERSTANDINGS AND DECLARATIONS

In his letter of transmittal the President requested that the Senate give its advice and consent to ratification, subject to certain understanding set forth in a statement accompanying the report of the Secretary of State. This statement was similar to that which accompanied the United States signature of the protocol but contained revised language reflecting the entry in force of the Nuclear Non-Proliferation Treaty which occurred subsequent to U.S. signature of the protocol. In the course of the Committee's hearings executive branch witnesses proposed another modification of the statement to present a more explicit formulation of the U.S. understanding of the basis for territorial claims. The principal provisions of the revised statement, which is incorporated in the form of a declaration in the resolution of advice and consent, are as follows:

(1) U.S. ratification cannot be construed as an acceptance by the United States of the unilaterally asserted territorial boundary claims of the parties to the treaty (e.g., territorial seas).

(2) U.S. military transit and transport privileges will not be affected by ratification.

(3) The pledge not to use nuclear weapons against a contracting party would not prohibit a U.S. nuclear response in the event of an armed attack by a party with the assistance of a nuclear weapon state.

(4) Contracting parties are prohibited from acquiring nuclear explosives for peaceful purposes, but the United States could carry out nuclear explosions for peaceful purposes on their behalf and reaffirms its willingness to do so on the same terms as under the Nuclear Non-Proliferation Treaty.

(5) The United States will act with respect to Latin American territories of Protocol I adherents just as Protocol II would require us to act with regard to contracting parties.

COMMITTEE ACTION AND RECOMMENDATIONS

The Committee on Foreign Relations held public hearings on the protocol on September 22, 1970. At that time testimony was heard from Mr. Charles A. Meyers, Assistant Secretary of State for Inter-American Affairs, Mr. James F. Leonard, Assistant Director, U.S. Arms Control and Disarmament Agency, Mr. Charles Van Doren, Deputy General Counsel, U.S. Arms Control and Disarmament Agency, and Rear Admiral William E. Lemos, Director, Policy Plans, Office of the Assistant Secretary of Defense. Completion of the hearings was then delayed pending the appearance before the Committee of Admiral Thomas E. Moorer, Chairman of the Joint Chiefs of Staff. On February 23, 1971, Admiral Moorer testified in support of the protocol. The record of these two hearings has been published as a separate document for the information of the Senate. On March 30, 1971, the Committee, by a vote of 13–0, ordered the protocol reported favorably to the Senate subject to the understanding discussed above. Those members voting in the affirmative were Senators Fulbright, Sparkman, Church, Symington, Pell, McGee, Muskie, Spong, Aiken, Cooper, Javits, Scott, and Pearson.

The Committee is not aware of any opposition to the protocol.

TEXT OF RESOLUTION OF RATIFICATION

*Resolved, (two-thirds of the Senators present concurring therein)*, That the Senate advise and consent to the ratification of Additional Protocol II to the Treaty for the Prohibition of Nuclear Weapons in Latin America, signed at Mexico City on April 1, 1968 (Ex. H, 91–2), with the following understandings and declarations:

I

That the United States Government understands the reference in Article 3 of the treaty to "its own legislation" to relate only to such legislation as is compatible with the rules of international law and as involves an exercise of sovereignty consistent with those rules, and accordingly that ratification of Additional Protocol II by the United States Government could not be regarded as implying recognition, for the purpose of this treaty and its protocols, or any other purpose, of any legislation which did not, in the view of the United States, comply with the relevant rules of international law.

That the United States Government takes note of the Preparatory Commission's interpretation of the treaty, as set forth in the Final Act, that, governed by the principles and rules of international law, each of the contracting parties retains exclusive power and legal competence, unaffected by the terms of the treaty, to grant or deny non-contracting parties transit and transport privileges.

That as regards the undertaking in Article 3 of Protocol II not to use or threaten to use nuclear weapons against the Contracting Parties, the United States Government would have to consider that an armed attack by a Contracting Party, in which it was assisted by a nuclear-weapon state, would be incompatible with the Contracting Party's corresponding obligations under Article 1 of the treaty.

II

That the United States Government considers that the technology of making nuclear explosive devices for peaceful purposes is indistinguishable from the technology of making nuclear weapons, and that nuclear weapons and nuclear explosive devices for peaceful purposes are both capable of releasing nuclear energy in an uncontrolled manner and have the common group of characteristics of large amounts of energy generated instantaneously from a compact source. Therefore the United States Government understands the definition contained in Article 5 of the treaty as necessarily encompassing all nuclear explosive devices. It is also understood that Articles 1 and 5 restrict accordingly the activities of the contracting parties under paragraph 1 of Article 18.

That the United States Government understands that paragraph 4 of Article 18 of the treaty permits, and that United States adherence to Protocol II will not prevent, collaboration by the United States with contracting parties for the purpose of carrying out explosions of nuclear devices for peaceful purposes in a manner consistent with a policy of not contributing to the proliferation of nuclear weapons capabilities. In this connection, the United States Government notes Article V of the Treaty on the Non-Proliferation of Nuclear Weapons, under which it joined in an undertaking to take appropriate measures to ensure that potential benefits of peaceful applications of nuclear explosions would be made available to non-nuclear-weapon states party to that treaty, and reaffirms its willingness to extend such undertaking, on the same basis, to states precluded by the present treaty from manufacturing or acquiring any nuclear explosive device.

III

That the United States Government also declares that, although not required by Protocol II, it will act with respect to such territories of Protocol I adherents as are within the geographical area defined in paragraph 2 of Article 4 of the treaty in the same manner as Protocol II requires it to act with respect to the territories of contracting parties.

Mr. HELMS. Mr. President, I reserve the remainder of my time.

Mr. CHURCH addressed the Chair.

The PRESIDING OFFICER (Mr. HODGES). The Senator from Idaho (Mr. CHURCH).

Mr. CHURCH. Mr. President, this amendment addresses itself to a problem which does not exist.

Every treaty of this character needs implementing agreements between the parties. The implementing agreement entered into by the United States and the Republic of Panama which backs up the Panama Canal Treaty takes the form of an executive agreement, the full text of which already has been provided to the Senate and is public information.

Article IV of this executive agreement implementing the Panama Canal Treaty deals with American use of defense sites in Panama during the life of the treaty. Section 6 of article IV of the executive agreement reads as follows:

Since the Republic of Panama is a signatory to the Latin American denuclearization treaty the United States shall emplace no type of nuclear armament on Panamanian territory.

In the first place, Mr. President, it should be pointed out that our existing national policy is against the emplacement of nuclear weapons on Panamanian territory. The United States desires to do all it can to support the Latin American denuclearization treaty. It is manifestly in the U.S. national interest to support a treaty whereby other countries in this hemisphere agree to refrain from building or emplacing nuclear weapons on their territory.

Do we want this hemisphere filled with nuclear weapons harbored in every Latin American country? Obviously not.

For this reason, we have sought to do all we can not only to discourage Latin American governments from building lethal nuclear arsenals of their own, but also to discourage them from permitting any other nuclear power from emplacing nuclear weapons in their territory.

Are our memories so short that we already have forgotten the crisis that brought us to the brink of nuclear war when the Soviet Union placed nuclear weapons in Cuba?

So this provision merely reiterates existing national policy. As we do not wish Latin countries either to manufacture nuclear weapons or to permit other countries to emplace nuclear weapons in their territory, so we have refrained from emplacing American nuclear weapons in any part of Panama's territory.

That is one thing. I do not know who could argue with that proposition.

But that has nothing whatever to do with our right to move nuclear weapons through the canal. The provisions of the Neutrality Treaty, already ratified by the Senate, explicitly state the following, and I read from article VI, section 1, of the Neutrality Treaty:

In recognition of the important contributions of the United States of America and of the Republic of Panama to the construction, operation, maintenance, and protection and defense of the Canal, vessels of war and auxiliary vessels of those nations shall, notwithstanding any other provisions of this Treaty, be entitled to transit the Canal irrespective of their internal operation, means of propulsion, origin, destination, armament or cargo carried. Such vessels of war and auxiliary vessels will be entitled to transit the Canal expeditiously.

So this is an amendment without a reason. How could language possibly make it clearer? We retain the right to send nuclear-powered naval vessels and auxiliary ships or conventional powered naval vessels and auxiliary ships which may carry nuclear weapons through the canal. The treaty guarantees us that right.

Therefore, the amendment offered by the distinguished Senator from North Carolina is needless. Its only possible purpose would be to force some change in the text of the treaty which, in turn, could place the treaty in jeopardy, either by making it necessary to return again to the negotiating table or by necessitating another plebiscite in Panama.

So, Mr. President, no case has been made for this amendment to the treaty. There is no need for it. The adoption of the amendment could only have a mischievous effect upon the treaty itself, while the right of the United States to

transit nuclear-powered vessels or vessels contining nuclear armaments through the canal is expressly preserved in the text of the Neutrality Treaty already approved by the Senate.

Furthermore, by agreeing in this enabling legislation not to emplace nuclear weapons in Panama, the United States is simply carrying out an existing policy which manifestly serves the interests of protecting the lives of the people of the United States and, indeed, the survival of this Republic by helping to prevent the Western Hemisphere from becoming one gigantic arsenal of nuclear weapons.

For all of these reasons I hope that the Senate will resoundingly reject the amendment offered by the Senator from North Carolina.

Mr. President, I reserve the remainder of my time.

Mr. HELMS. Mr. President, will the Chair state the time situation, please?

The PRESIDING OFFICER (Mr. McGOVERN). The Senator from North Carolina has 9 minutes remaining; the Senator from Idaho has 10 minutes.

Mr. HELMS. Mr. President, I do not propose to use much of the remaining 9 minutes, and I will then be perfectly willing to yield back the remainder of my time when the able Senator from Idaho has made his further remarks, if any.

I would just point out the Senator is arguing against his own position in 1971. He saw the need in 1971 to reserve our rights of transit, as did the President of the United States, and the Secretary of State and, indeed, the then chairman of the Committee on Foreign Relations of that day, the distinguished Senator from Arkansas, Mr. Fulbright. Why should we foreclose that option today by a gratuitous paragraph in the implementation agreement?

We are talking about something very vital here. We are not talking about proliferation of nuclear weapons. I am sure the Senator from Idaho knows better than that. Nobody proposes that. The United States will continue to have control of any weapons we may wish to have in Panama. But regardless of any rhetoric against this amendment, the Senator from North Carolina contends it is absolutely essential if we are serious about protecting our rights and defending the Panama Canal—a responsibility we will be accepting until the year 2000 under the terms of this treaty; so I must reject most respectfully, but most emphatically, the contentions of the Senator from Idaho. If he will read his own position of 1971 he is bound to acknowledge that the Senator from North Carolina is correct. He thought we should reserve the right to have nuclear weapons in transit through nonnuclear territory in 1971; the Senator from North Carolina sees no reason why we should not reserve that right today.

Mr. CHURCH. Mr. President, nothing I have said today in any way contradicts any position I took in 1971, notwithstanding the assertions of the Senator from North Carolina to the contrary.

At that time the U.S. Senate was considering a treaty whereby the countries of Latin America agreed not to permit the emplacement of nuclear weapons on their territory. This was an objective devoutly sought by the United States.

The understanding of the Senate, which was attached to the instrument of ratification, merely made it clear that the provisions of the treaty did not in any way prohibit the United States from moving nuclear weapons through Panama or through any other country signing the treaty. Simply, we could move nuclear-powered vessels of the U.S. Navy or other vessels which might contain nuclear weapons through the Panama Canal.

Well, as I previously pointed out, the Neutrality Treaty that the Senate just recently ratified expressly gives the United States the right to move nuclear weapons or nuclear-powered vessels through the canal. So what is this amendment all about? There is nothing in it that the treaty does not already expressly provide.

Therefore, I can only conclude its objective is mischievous. I hope the Senate rejects it by an overwhelming vote.

Mr. President, I am now prepared to yield back the remainder of my time if the Senator from North Carolina will do likewise.

Mr. HELMS. Mr. President, I suggest the absence of a quorum, with the time equally divided or charged against me, either one.

Mr. CHURCH. If the Senator will withhold momentarily I withhold momentarily until the Senator from North Carolina decides whether he wishes to speak.

Mr. HELMS. I think we have discussed it adequately, Mr. President. I am prepared to yield back the remainder of my time.

Mr. CHURCH. I yield back the remainder of my time.

I move to table the amendment, and I call for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. CHURCH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I ask for the yeas and nays on the motion to lay on the table.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment (UP No. 21) of the Senator from North Carolina (Mr. HELMS). The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. MELCHER (after having voted in the negative). Mr. President, on this vote I have a pair with the Senator from Michigan (Mr. RIEGLE). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withdraw my vote.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Maine (Mr. MUSKIE), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. ANDERSON) would vote "yea."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BARTLETT), the Senator from Arizona (Mr. GOLDWATER), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

The result was announced—yeas 59, nays 32, as follows:

[Rollcall Vote No. 90 Exec.]

YEAS—59

So the motion to lay Mr. HELMS' UP amendment No. 21 on the table was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. SARBANES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Nevada.

AMENDMENT NO. 23

Mr. CANNON. Mr. President, I call up my amendment No. 23 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nevada (Mr. CANNON) proposes amendment numbered 23.

In the second sentence of paragraph 5 of Article III, strike out "ten million United States dollars ($10,000,000)" and insert in lieu thereof "five million United States dollars ($5,000,000)".

Mr. CANNON. Mr. President, I was privileged recently to chair the hearing in the Senate Armed Services Committee on the financial aspects of the proposed treaty. One of the aspects that struck me as being inequitable to the United States was the proposal to pay the Panamanians $10 million annually for services such as police and fire protection, street maintenance, lighting, cleaning, and garbage collection. What makes it inequitable is that the reimbursement is figured at U.S. pay scales rather than Panamanian rates which are less. In fact, it will cost the Panamanians, according to testimony that we received, less than $5 million a year for the first few years. So I have cut the assessment in half. I see no justification for paying more. A $5 million payment over expenses is unjustified.

I recognize that the treaty provides that every 3 years from the date that the treaty enters into force, the costs involved in furnishing said services shall be reexamined to determine whether adjustment of the annual payment should be made because of inflation and other relevant factors. This reexamination would eventually bring the cost in line with expenditures but would do nothing for the first 3 or more years after the treaty's ratification. This time period would witness the payment of a bonus of $15 million to Panama for no specific reason, under the treaty as it now reads.

In discussing this issue at the Armed Services hearing, the Comptroller General, Mr. Elmer Staats, said the Panama Canal Company estimated the cost to Panama would be $4.4 million. This is only one item of several excessive concessions. Much is made of the fact that it will come out of canal revenues and not U.S. appropriated funds. But these are dollars that in past years have been put back into canal maintenance and improvement or into the U.S. Treasury. So giving this amount to Panama will presumably increase U.S. financial support of canal operations and decrease input to the Treasury.

Apparently, some feel that the increased compensation is due Panama for indignities suffered and damage done to its sovereignty since 1903 and because its past annuities have been so small. If so, this view overlooks the fact that Panama will immediately receive about 65 percent of the land and water areas now comprising the Canal Zone and will later receive the canal itself and the entire physical plant it contains. Further, during the 22 years when increased compensation will be received, Panama will continue to enjoy the input to its economy of the millions of dollars flowing from the U.S. presence. In fact, Panama has profited outstandingly from the U.S. effort in the Canal Zone over the years, so anything suggestive of reparations is unwarranted. In my view, the United States is being very generous by turning over the Canal Zone initially and the entire canal later in the year 2000. I do believe we are too conciliatory at the negotiating table.

I think it might help to put the issue into focus by reviewing the other monetary considerations. Panama will receive 30 cens per ton transiting the canal; also, a fixed sum of $10 million per annum and an additional $10 million per year if canal traffic revenue permits. In addition, the U.S. pledges to arrange for an economic program of loans under existing statutory programs: up to $200 million in Export-Import Bank credits; up to $75 million in AID housing guarantees; and $200 million in Overseas Private Investment Corporation loan guarantees. This totals over $800 million. Also, Panama will receive up to $50 million in foreign military sales credits over a period of 10 years to assist in the canal's defense. The current annual payments by the United States to Panama is $2.3 million.

Now to discuss specifics.

General Parfitt, Governor of the Panama Canal Zone, warned that the canal operation may not be self-sustaining after 1984 under the terms of the treaties being considered. He said, in answer to questions from committee members, that the United States would be obliged to turn over the canal to Panama in the year 2000 free of liens and debts.

If there are outstanding debts, the U.S. Government will have to pay them when the canal passes into Panama's hands. The Governor said that after 1984, canal revenue probably will not support the operation of the canal or meet the U.S. obligation to pay Panama large sums of money from toll revenues.

In his estimation, this means there is a high probability that the United States will have to make up the differences between 1984 and 2000 from appropriated funds. And since the treaties require that the canal pass to Panama debt free, his testimony means that the United States would have to write off the millions of dollars owed to it by the Panama Canal Commission.

Accordingly, I feel the time to practice economy is now. Let us pay our fair share but not one cent more. Agreeing to a $5 million overpayment will not enhance our relations with Panama.

Mr. President, I refer the Members to the hearings before the Committee on Armed Services on page 331, where Senator THURMOND questioned General Parfitt concerning this payment by the Panama Canal Commission. The general stated as follows:

Governor PARFITT. That is intended to pay Panama for services provided in the canal operating area and in the coordinated housing areas. The specific services involved are police protection, fire protection, road and street maintenance, street lighting, garbage collection, traffic management, and street cleaning. These are essentially the services that are to be provided.

Senator THURMOND. Now what will be the actual payments to the public service workers?

Governor PARFITT. You mean what will Panama actually pay?

Senator THURMOND. Is it less than $10 million, the actual payments to the public service workers?

Governor PARFITT. We tried to——

Senator THURMOND. Panamanians don't make as much as U.S. employees in Panama so as not to disrupt their economic system.

Governor PARFITT. We tried to estimate what it would cost us in fiscal year 1979 to perform the services and we estimated about $10 million. We tried to estimate what the cost to Panama would be for similar services, and it is slightly less than half of that, primarily because of the rates they pay to their employees, particularly in the field of police protection, which is the biggest cost differential.

Again, Mr. President, Mr. Staats, who was requested on behalf of the Senate to review this matter with respect to costs, stated as follows:

Article III, Section 5 of the treaty provides that the Commission would pay the Republic of Panama $10 million a year for the costs involved in providing the following public services in the Canal operating and housing areas: police; fire protection; street maintenance, lighting and cleaning; traffic management and garbage collection.

The Panama Canal Company has estimated that it would cost the Republic of Panama about $4.4 million to provide the specified public services. If the Commission continued to provide these services, its estimated costs would be approximately $9.9 million. The difference is attributed to a lower cost of police services, if provided by Panama.

Mr. President, the treaty also provides that the costs involved in furnishing the services shall be re-examined after the first 3 years of the treaty and thereafter, the payment should be based on Panama's actual costs.

It is my contention, Mr. President, that that cost ought to be based on what it costs Panama the first 3 years, as well as the period after the first 3 years. That is precisely what this amendment would do.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Chair advises the Senator from Nevada that there is no time limit on this amendment.

The Senator from Idaho is recognized.

Mr. CHURCH. Mr. President, this is a matter about which reasonable men and women might differ. I think that the distinguished Senator from Nevada has made a good argument, based upon testimony taken in the Armed Services Committee. On the other hand, I think an equally good argument can be made for the $10 million figure.

The able Senator from Nevada gave us an accurate account of the oral testimony received by the Armed Services Committee on this question. Later, however, a series of written questions were propounded in an effort to get more detailed figures. One of those written questions, which appears at page 365 of the Committee on Armed Services hearings and to which the able Senator referred, reads as follows:

What is the estimated cost to the Panamanian government of providing the services designated in Article III, paragraph 5, for which the U.S. is to pay the annual fee of $10 million? As compared with Panama Canal Company cost?

In the first place, these costs are presently paid by the Panama Canal Company, an instrumentality of the United States. It is costing us approximately $10.2 million a year to provide services

which, under the terms of the treaty, the Government of Panama will assume and provide to the United States at a cost of $10 million a year.

So on the face of it, quite apart from the argument presented by the able Senator from Nevada, there is a modest saving to the United States. The terms of the treaty contemplate only a $10 million annual payment to Panama for the first 3 years. In other words, over that 3-year period we would be paying $600,000 less to the Government of Panama than it would cost us to provide the same services, based on our present costs.

Second, in response to this written question, let me read the following footnote:

[2] We expect that cost to Panama of public services will be something less than those paid by the Canal Zone Government and Panama Canal Company for the same services. This is primarily because labor costs in the Republic of Panama are less than those of the Canal Zone.

This is a fact that has been alluded to by the able Senator from Nevada. However, the footnote continues:

Other requirements such as maintenance, overhead and capital may be more expensive for Panama. Art. III of the treaty provides that the payment for these services will be readjusted for inflation and other relevant factors which, we would expect, would reflect the actual cost of services provided by Panama.

So I think it fair to say that although certain costs will be less, other costs may be more when the services are furnished by the Government of Panama.

Having said that, let me add that when I visited Panama with other members of the Foreign Relations Committee, I discussed with General Torrijos the special concern that many American citizens living in the zone and working for the Panama Canal Company expressed to me. What would happen when the Panamanian Government took over the policing of the zone and police protection was no longer afforded them by Americans?

I could understand that this would be a very sensitive matter and so I pursued it in my discussions with General Torrijos.

He said that he was aware of the sensitivities associated with transferring police jurisdiction from the United States to Panama as a part of restoring Panamanian jurisdiction over the zone. He emphasized that in order to make that transition as easy as possible he was going to insist upon special training for police officers hired by the Panamanian Government to work within the zone. That special training among other things would consist of language training in English and other courses to fully acquaint the police officers with the special conditions of life within the zone so that this transfer of authority would occasion a minimum of friction.

Mr. President, all of this will entail extra costs.

The startup costs for the Panamanian Government have not been considered in the argument presented by the Senator from Nevada. This is still another reason why I think it would be unwise to cut back the $10 million figure to $5 million.

With typical fairness, the Senator from Nevada acknowledged that after 3 years we will have sufficient experience to know what the actual costs are to the Panamanian Government to furnish these services. Then the treaty provides that adjustments will be made to reflect those actual costs, so no permanent subsidy will be written into this provision of the treaty.

All factors taken into account, it seems to me that the $10 million figure is not excessive. Some allowance must be made for the additional costs entailed in the start-up of these services and the special consideration that must be given to the adequate training of personnel by the Panamanian Government to avoid the human relations problems that might otherwise occur.

I think that the $10 million figure, therefore, serves the best interests of the Americans living in the Panama Canal Zone, is a reasonable figure given the circumstances, and that, in any case, it will be reviewed at the end of the 3-year period.

For these reasons, I think that it would be unwise to adopt the amendment offered by the Senator from Nevada, even though he has presented a perfectly good argument in support of it.

When we balance the arguments in favor against those opposed, it seems that the scales weight in favor of making no change in the text of the treaty.

I hope, therefore, that the Senate will see fit to table this amendment.

Mr. President, I have no further argument to make. I would be happy to withhold my motion so that the Senator from Nevada may complete his argument.

Mr. CANNON. I thank the Senator.

Mr. President, I would like to refer again to General Staats' testimony, and he was asked to review this. As a matter of fact the Comptroller General has had the responsibility for reviewing the situation of the Panama Canal Company for years on behalf of the Congress and reporting thereon.

He has made a very comprehensive review. As a matter of fact, he makes a lot of suggestions that have not been carried out yet, because General Staats said:

We believe that the treaty implementing legislation is the key determinant of the financial viability of the proposed Panama Canal Commission. Although this legislative package has not been presented, we will discuss some of the issues which should be considered with this legislation.

Then he goes on to outline a number of questions that have been and should have been raised.

Further on in his testimony, on page 371, he states as follows:

The treaty also does not contain specific provisions concerning the quality * * * $10 million a year or require a determination of the actual costs incurred by the Republic of Panama. After 3 years the treaty appears to relate payments to costs.

"The costs involved in furnishing said services shall be reexamined to determine whether adjustment of the annual payment should be made because of inflation and other relevant factors affecting the cost of such services."

The Department of State has said that an annual $10 million is reasonable compensation to Panama for the first 3 years of the treaty; but that, thereafter, the payment should be based on Panama's actual costs. The treaty documents, however, are silent on how these costs are to be calculated.

I point out, furthermore, that I do not believe that it is clear in the treaty that the costs would go back to the actual costs at the end of the 3-year period.

I read, accordingly, from article III, subparagraph 5:

The Panama Canal Commission shall pay the Republic of Panama the sum of 10 million United States dollars per annum for the foregoing services.

They say "per annum."

It is agreed that every 3 years from the date this treaty enters into force, the costs involved in furnishing such services shall be reexamined to determine whether adjustment of the annual payment should be made because of inflation and other relevant factors affecting the cost of such services.

That indicates that the costs probably could only go up about the $10 million, because there is a commitment to pay the $10 million annually and only the obligation to review, to determine whether adjustment should be made because of inflation. Inflation normally does not take a reverse position. It is going to remain constant or increase.

So it appears to me that we are going to be obligated, without any change, for at least $10 million, unless we get it back to the actual cost of the operation from the beginning.

Therefore, I hope the Senate will support this amendment. I think it would eliminate any possible misunderstanding later on; and we are likely to have all the factors as to how much costs are to be verified, as stated by Attorney General Staats, particularly when he says:

The treaty is not clear as to whether payments for the first 3 years are a flat of services to be provided by Panama. The implementing agreement for Article III of the treaty, however, does provide for the establishment of a United States-Panamanian Coordinating Committee for consultation and coordination on matters concerning the housing areas. This committee could possibly serve as a forum for resolution of any problems concerning the quality of public services. We believe that to avoid misunderstanding it is essential to establish standards for these services before they are assumed by Panama.

I think it is also important that we determine at this time in the treaty that the payments are to be for the actual costs of the service and not for a windfall.

Mr. President, I hope the Senate will support the amendment.

Mr. CHURCH. Mr. President, I wish to correct a statement I made earlier. I believe I said that it presently costs the United States $10.2 million a year for these services. I misread the figure.

Mr. CANNON. The amount is $9.9 million.

Mr. CHURCH. Yes, $9.9 million.

The Senator from Hawaii says he recalls my having said that, but I believe I was mistaken.

The fact is that it presently costs the United States nearly $10 million to provide these services, with existing trained personnel and equipment on hand. It

seems to me, therefore, not unreasonable to assume that it may very well cost the Panamanian Government at least as much, given the startup costs, the training costs, and the other special costs associated with the commencement of these services for the first time.

In his argument, the Senator refers to the provisions of section 5 of article III of the treaty, relating to canal operation and management. He read from that section the following language:

The Panama Canal Commission shall pay the Republic of Panama the sum of 10 million United States dollars per annum for the foregoing services.

Those are as follows: fire protection, street maintenance, street lighting, street cleaning, traffic management, and garbage collection.

It is agreed that every 3 years from the date that this treaty enters into force, the costs involved in furnishing said services shall be reexamined to determine whether adjustment of the annual payment should be made because of inflation and other relevant factors affecting the cost of such services.

The distinguished Senator from Nevada has read that sentence to mean that the costs can only go up. I must say that has been our general experience with the cost of services. But that sentence does not simply say that adjustments will be made because of inflation. It says the adjustments will be made because of inflation and "other relevant factors affecting the cost."

One of those relevant factors, of course, would be the general wage level paid by the Panamanian Government. If, in this case, the general wage level paid by the Panamanians is sufficiently less than the wage level paid by the American company, it may be true that costs to the Panamanian Government will be less than the costs to our own company. Then the language clearly provides for a downward adjustment, as well as an upward adjustment.

That being so, Mr. President, and since we are starting off by paying the Panamanians roughly what it costs us to furnish the same services, I think the provision in the treaty is reasonable and should not be changed. For this reason, I move to lay this amendment on the table, and I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. CULVER). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Nevada. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Maine (Mr. MUSKIE), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. ANDERSON), and the Senator from Michigan (Mr. RIEGLE) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BARTLETT) is necessarily absent.

The result was announced—yeas 52, nays 42, as follows:

[Rollcall Vote No. 91 Exec.]

YEAS—52

| | | |
|---|---|---|
| Baker | Gravel | Matsunaga |
| Bayh | Hart | McGovern |
| Bellmon | Haskell | Melcher |
| Bentsen | Hatfield, | Metzenbaum |
| Biden | Mark O. | Morgan |
| Bumpers | Hathaway | Moynihan |
| Byrd, Robert C. | Hayakawa | Nelson |
| Case | Heinz | Pearson |
| Chafee | Hodges | Pell |
| Chiles | Huddleston | Percy |
| Church | Humphrey | Ribicoff |
| Clark | Inouye | Sarbanes |

| Griffin | Randolph | |

NOT VOTING—6

| | | |
|---|---|---|
| Abourezk | Bartlett | Muskie |
| Anderson | Hollings | Riegle |

So the motion to lay on the table was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. SARBANES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Are there further amendments to article IV?

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senate will be in order. The Senator will suspend until the Senate is in order. The Senator will kindly suspend until the Senate is in order.

Are there further amendments to article IV?

ARTICLE V—PRINCIPLE OF NONINTERVENTION

The clerk will report article V.

The second assistant legislative clerk proceeded to read article V.

Mr. CHURCH. Mr. President, I move that further reading of the article be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The article is as follows:

ARTICLE V

PRINCIPLE OF NONINTERVENTION

Employees of the Panama Canal Commission, their dependents and designated contractors of the Panama Canal Commission, who are nationals of the United States of America, shall respect the laws of the Republic of Panama and shall abstain from any activity incompatible with the spirit of this Treaty. Accordingly, they shall abstain from any political activity in the Republic of Panama as well as from any intervention in the internal affairs of the Republic of Panama. The United States of America shall take all measures within its authority to ensure that the provisions of this Article are fulfilled.

Mr. CHURCH. Mr. President, I understand it is possible to obtain a unanimous-consent agreement to the next amendment, and I defer to the Senator from Utah.

Mr. HATCH. Mr. President, I would be happy to agree——

The PRESIDING OFFICER. Will the Senator kindly suspend. The Senate is not in order.

Mr. HATCH. On my unprinted amendment I would be happy to stipulate to a 20-minute time agreement equally divided between both sides.

UNANIMOUS-CONSENT AGREEMENT ON HATCH AMENDMENT

Mr. CHURCH. Mr. President, I propose a unanimous-consent agreement that there be a 20-minute time limit on the amendment offered by the Senator from Utah, the time to be equally divided between the Senator from Utah, the proponent of the amendment, and myself.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

UP AMENDMENT NO. 22

Mr. HATCH. Mr. President, I call up my unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The second assistant legislative clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes an unprinted amendment numbered 22:

At the end of the last sentence of Article V, add the following new paragraph:

"The Republic of Panama shall respect Freedom of Speech and Press, for both electronic and printed media, and shall abstain from any activity incompatible with the spirit of Freedom of Speech and Press. The Republic of Panama shall take all measures within its authority to ensure that the provisions of this Article are fulfilled.".

Mr. HATCH. Mr. President, the treaties now before us imply far more than the abandonment of an internationally vital waterway. For we are contracting an agreement, if it can be called that, considering the fact that neither party seems to be able to reach a consensus as to what the documents actually mean, with a government which seized power in Panama in 1968 and has yet to fulfill its 10-year promise to hold free elections.

The United States has been negotiating with a leader whose power rests upon his control of the Panamanian National Guard; a man who cannot afford to make any but the vaguest gestures toward restoring a semblance of the constitutional democracy he overthrew; a man whose promises of democratization, intended to placate Members of this body, have been nothing more than that—empty promises.

The amendment I am offering today addresses itself to a key element of this already amply documented issue of human rights violations in Panama, namely, freedom of the press. In a one-sided article (No. 5), which requires employees of the Panama Canal Commission to refrain from any activities that might be construed as interfering in

the internal affairs of Panama, my amendment simply seeks to require that Panama reciprocate respect for "the spirit of this treaty" by taking measures to insure the freedom of speech and press.

Since 1968, Mr. President, the Inter-American Press Association's annual report on freedom of the press in individual Western Hemisphere countries has found that in Panama "There is no freedom of the press." Although a modicum of press freedom was allowed long enough to give the appearance of authenticity to the plebiscite on the canal treaties, it is well established that both the press and radio are controlled in Panama by the Torrijos government. Media expressing independent views are faced with the prospects of censorship or confiscation, and prominent news personnel can receive harsh sanctions.

Five radio stations have been confiscated by the Government since the 1968 coup. Three of the country's five newspapers are under absolute Government control. The other two—La Estrella de Panama and the Star and Herald—are strictly self-censored by their editor, the Minister of Housing. In 1975, 111 Panamanians courageously signed a statement saying that without freedom of speech and assembly to discuss the canal treaty, the plebiscite on the pact "will be neither legitimate nor authentic." Since then, at least 15 of those who signed the statement have been expatriated, others have been incarcerated, and all of them have been slandered by the press and harassed by the Government. (See testimony of Mr. Winston Robles, Panamanian Committee for Human Rights, before a subcommittee of the Committee on Appropriations, House of Representatives, March 30, 1977.)

According to information compiled by the Panamanian Committee for Human Rights, General Torrijos has, on two different occasions, promised to rescind law 343 which contains the restrictions imposed on the Panamanian press. The committee reports that "on December 20, 1977, the Panama newspaper La Republica published the text of the proposed new law which would rescind Law 343. The draft of the new law addresses itself to the regulation of insult and slander" and "makes these acts criminal offenses," setting a range of prison terms and fines, and increasing the penalties if the slandered person is a public official. The committee additionally reports that the foreign press is also liable under the proposed new law, a law which apparently was drafted in response to the demands that freedom of press be restored. How can such a response, Mr. President, possibly be construed as an indication that General Torrijos is following through on his promises to lift the restrictions that govern his country's press? What evidence, Mr. President, does this body have which in any way supports the claims General Torrijos has made to Senators visiting in Panama that he will be taking steps to correct what remains a deplorable human rights situation?

The Panamanian Committee for Human Rights' analysis of the unfulfilled promises made by Torrijos was circulated by my distinguished colleague from Florida, Senator STONE. In his cover letter, Senator STONE states, "We have a priceless opportunity, while the ratification debates continue, to gain progress for human rights in Panama," and goes on to suggest that every Member of the Senate write to General Torrijos asking him to implement the promises he has made regarding those human rights. I agree with my distinguished colleague. The Senate does, at this very moment, have a priceless opportunity to gain progress for human rights in Panama. But I ask my friend from Florida, and I ask every Member of this body, does not the opportunity to amend the treaty itself constitute a far more concrete way to begin to correct the human rights situation in Panama? Writing letters is important, Mr. President, but would it not be far more effective to incorporate amendments which substantiate Torrijos' promise to restore the freedoms that are now denied every Panamanian? A reluctance to incorporate such amendments suggests to me that General Torrijos' promises were nothing more than a ploy to convince Senators to vote for these treaties, and that the Senate's desire to encourage reform in Panama is just as casual. My amendment specifically addresses itself to one facet of the human rights picture in Panama.

From the U.S. point of view, what will the absence of a free press in Panama mean to U.S. interests during the life of the treaty between now and the year 2000? Panama will be assuming responsibility for the maintenance and operation of an undeniably essential waterway, the continued use of which is of vital interest to all the nations of the world. It is crucial that the world community be kept informed of Panama's success in her greatly expanded role.

It is imperative that newsmen have full access to sources of information in the Canal Zone dealing with the implementation of the treaty. It is equally as important that the press be able to gather information relating directly to the implementation of the treaty without fear of reprisal from the Panamanian Government. These points can be guaranteed in only one way—through an agreement now between the United States and Panama that freedom of the press will be observed during the life of the treaty.

Such an amendment to the treaty now before the Senate is, granted, unusual. But the treaty itself is unusual, as it cedes a vital waterway and extremely valuable property to another country over the next 22 years. Unusually significant American and international interests are at stake. One way to determine if those interests are being protected, and the treaty's provisions honored, is to guarantee freedom of press in the Republic of Panama.

The treaty's provisions call for an intricate network of new relationships between the United States and Panama. The U.S. role in this new relationship is strictly governed by the terms of the treaty, but as can be seen in article 5, no demands are placed on Panama. The admonition to respect "the spirit of this treaty" is applied only to U.S. citizens. I would submit, Mr. President, that the observance of the spirit of the treaty applies to both of the contracting parties, and the adoption of this amendment would be a step toward restoring the mutuality of this agreement.

The language of the amendment reads as follows:

> The Republic of Panama shall respect Freedom of Speech and Press, for both electronic and printed media, and shall abstain from any activity incompatible with the spirit of Freedom of Speech and Press. The Republic of Panama shall take all measures within its authority to ensure that the provisions of this Articile are fulfilled.

The language is simple and straightforward, Mr. President. It contains no veiled intentions. Treaty proponents will probably claim that this amendment attempts to interfere with the internal affairs of Panama. I would suggest, however, that the internal affairs of Panama—that specter raised at every attempt to make this treaty a binding and meaningful document—cannot and must not be used as an excuse to exempt Panama from her expanded responsibilities with respect to the continued safe and efficient operation of the canal.

Events of recent days have revealed an increasing sensitivity on the part of Members of this body to criticism of the character of the Government in Panama. But how effective can these treaties be if promises regarding human rights made by the leader of that Government are conveniently forgotten? If the relationship between the United States and Panama is so tenuous as to forbid the guarantee of what can only be regarded as a fundamental freedom, then I have very little hope for the successful implementation of these agreements.

Mr. President I urge the adoption of this amendment, and ask unanimous consent that the annual reports of the Inter-American Press Association be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HATCH. I reserve the remainder of my time.

EXHIBIT 1

ANNUAL REPORTS OF THE INTER-AMERICAN PRESS ASSOCIATION (IAPA)

(Omar Torrijos Seized Power on October 11, 1968)

1969

*Panama*

There is no freedom of the press.

The condition under which the Panamanian government operates privately owned newspapers remains unchanged.

Costa Rican newspapers are not allowed to circulate in Panama and several editions of U.S. newspapers have been censored and kept out of circulation in the recent past.

The newspaper El Mundo of Panamá City suspended publication and has stated that it was doing so because it was not willing to subject itself to censorship.

Sr. Altamirano Duque, member of the family that owns La Estrella, of Panamá City, has been incarcerated since Dec. 28.

Dr. Gilberto Arias, publisher of several of the newspapers owned by the Arias family, now operated by government appointed editors, is in exile, now living in Puerto Rico.

1970

There is no freedom of the press.

Following the completion of the XI Central American and Caribbean Games staged here in Panama, Gen. Omar Torrijos, Commander of the National Guard, held a press conference on March 14 for the benefit of those correspondents visiting here. At this conference he made it clear that press restrictions in Panama "had been eased." This statement is self-explanatory and reveals openly that press freedom is not yet a reality in the Republic of Panama.

Here is a resume of existing conditions regarding constitutional rights:

On Nov. 5, the Resolutionary Government Junta announced the restoration of constitutional guarantees which had been suspended since the ouster of the Arnulfo Arias regime on Oct. 11, 1968 in a military coup.

Formal announcement of the decree restoring civil liberties was made by the Minister of the Presidency Juan Materno Vasquez. This was done following the television and radio broadcast of the mid-week National Lottery drawing, held for the first time in the City of Colon. The occasion marked the last activity into week-long commemoration of Panama's Independence Day.

The Minister who hails from the Province of Colon, said the action had been approved at the cabinet meeting of Oct. 31. He listed as being restored the constitutional provisions: safeguarding freedom from arrest of search without warrant, the right of habeas corpus, freedom of movement and of speech and the right to injunction.

Also restored was the right of peaceful and unarmed assembly, except in the two major cities of Panama and Colon.

Simultaneously, the government issued two stringent decrees governing press freedom and subversion—Decrees 342 and 343.

The decree dealing with public order defines subversion as:

Inciting to violence against the government by spoken or written word, including cartoons;

Engaging in or causing disturbances or damage to property at public meetings;

Inciting or organizing labor, student or general strikes which hamper public security services or cause damage to public or private property.

Taking up arms, singly or in groups, to carry out guerrilla warfare, or manufacturing or exploding bombs or petards, or setting fire to property, or contracting mercenaries, or introducing firearms into the country, or financing or organizing guerrilla uprisings;

Insulting or offending government officials, ranging from night Judge to the President and including the chiefs and staff officers of the National Guard;

Propagating, either orally or in writing, false reports in or outside the country aimed at "destroying" the government or disturbing public order or national security;

Engaging in propaganda in behalf of doctrines advocating crime or violence to achieve political, economic or social reforms;

Punishment for subversion is imprisonment ranging from one month to 15 years; plus confiscation of any land, air or water craft used by the offender. In cases involving damage to property, payment of indemnity also will be part of the penalty. Foreigners are subject to immediate deportation after serving their sentence.

The press decree requires the registration of owners of publishing, radio and television companies. It stiffens punishment for libel and slander providing for imprisonment ranging from $500 to $5000 upon conviction.

The press decree stipulates that every newspaper must have a responsible party as editor, that he should not be protected by immunity, should be an adult Panamanian and that he should enjoy full civil and political rights.

Under the new press decree, sending of libelous and slanderous material to foreign newspapers, radio and television stations will be subject to prosecution here in Panama, if the newspaper circulates locally or the broadcast or telecast is heard in Panama.

The Decree forbids publication of false news, or confidential documents, of slanted headlines, or private activities of individuals that may cause him moral damage, of references to physical or moral defects or domestic problems of individuals, of court records involving cases under investigation, of stories involving minors under 18 years of age.

Punishment for violations of any of those provisions ranges from imprisonment of 3 to 6 months or a fine of from $50.00 to $500.00 or both.

The press decree provides that the authors, editors, managers and owners at printing plants, publications, radio and television stations all will be liable to prosecution for any of the violations spell out in the decree.

1971

There is no freedom of the press. Conditions have grown worse since our last meeting in Santo Domingo. There is no newspaper which deviates from governmental opinion, and the information media are dominated by the Government.

1972

There is no freedom of the press.

1973

There is no freedom of the press in Panama.

1974

There is no freedom of the press. Among the newspapers published there, there is none that deviates from the official political line.

Mr. Luis Teófilo Núnez of "El Universal," Caracas, recalled that the newspapers belonging to the Arias family are still confiscated and that some members of the family remain in exile.

1975

There is no freedom of the press.

High government officials have repeatedly stated in the press that in Panama there is freedom of expression. This has been done in order to disprove the claims made by various sectors of public opinion to the effort that Panama is in need of a climate of public and individual liberties which will permit the unbiased discussion of the problems which affect the country, and, particularly of those related to the negotiations carried out between Panama and the United States regarding the signing of a new treaty.

This new instrument would subrogate the treaty of 1903, and would eliminate once and for all the perennial grounds of conflict between Panama and the United States that have existed since the Hay-Bunau Varilla treaty was signed.

The Centro de Estudios Nacionales, under the impression that official statements on the existence of freedom of the press in Panama were to be taken literally, decided to publish La Opinión Pública, a weekly publication. To this effect, it previously notified, as required by legal provisions in force, not only the Ministry of Government and Justice but the Municipality of the district of Panama as well. Such notification was made on the special form prepared by the respective authorities for this purpose, which covers all data to be furnished to these authorities in accordance with applicable legislation.

The first edition of La Opinión Pública was sheduled to appear on March 7 of this year. However, on the eve of publication, Mr. Lorenzo Sánchez Galán, a high official of the Ministry of Government and Justice, called the offices of Editorial Verdad—printers engaged by the Centro de Estudios Nacionales to do the printing of the weekly—and without any explanation of his actions, except that he acted "on direct instructions of the Ministry of Government and Justice," confiscated all the material already prepared for publication of La Opinión Pública.

Following the confiscation, Dr. Tomás H. Herrera, D.M., appointed director of the weekly, was called to the Ministry and informed of Resolution # 099 of March 5, 1975, through which the Ministry cancelled publication of La Opinión Pública alleging, without any legal basis, that the Centro de Estudios Nacionales had failed to accredit its legal status. Dr. Herrera was not informed of this resolution until March 10, 1975.

The resolution does not provide for or mention the confiscation of the weekly's material, which leads one to believe that it was the only and most expeditious way—although illegal as well—to prevent publication of the weekly. The legal regulations which cover the required notification to be made to the authorities in the case of the publication of newspapers, do not contain any provision establishing accreditation of the legal status of an association as one of the requisites of that notification whenever such notification is made by a juridical person.

The only legal provision in existence, relating to prove the existence of such organization, is Art. 296 of the Commercial Code according to which, it is necessary to present proof of the existence of an asscciation, whenever the subject under discussion, in any business or controversy is the existence of the association per se. Regarding the scope of the aforementioned article in the sense referred to—the Third Chamber of Administrative and Contentious Matters of the Supreme Court has already rendered its decision—it is evident that a simple notification proceeding such as the one under discussion, is not a business and even less a controversy requiring accreditation of the legal status of the Centro de Estudios Nacionales.

On the other hand, aside from the fact that the pretext adduced in the resolution of the Ministry of Government and Justice, in order to stop publication of La Opinión Pública has no legal basis, neither does, that same measure, that is, the stopping of the publication have any legal basis as well. Even if at the time the publication notification was made, one of the requirements specified by the law was in effect lacking—which was not the case in this instance neither the measure adopted by the resolution in question, authorized by a legal provision. In such case the only thing the law calls for is the imposition of a fine on the persons responsible for the omission but not stoppage of publication. Neither is the confiscation of a publication's material authorized by legal provisions, because the owner of that publication, a juridical person, failed to accredit its existence before the Ministry of Government and Justice.

The director of La Opinión Pública has made use of the resources offered by our juridical system. Without affecting those recourses and in order to settle the matter, thus avoiding the alternative that once those recourses are exhausted publication of the daily be postponed indefinitely, a certificate has been requested from the Public Registry, accrediting the existence of the Center. However, there are indications that since that registry is an agency of the Ministry of Government and Justice, it will not issue the certificate, thus making it impossible to fulfill the requirements set forth in the resolution in question.

The tale does not end there. The Bureau of Commerce of the Ministry of Commerce and Industry, through resolution No. 13 of March 10, 1975, and at the request of the Under Secretary of Government and Justice, on March 7 cancelled the commercial license which permitted the operation of Editorial Verdad.

The request of the aforementioned Under

Secretary, according to the resolution of the Bureau of Commerce, is based on "the proven fact that that association has repeatedly published subversive material" (the underscoring is ours). An attorney who is a member of the Centro de Estudios Nacionales called at the Ministry of Commerce and industry accompanied by the legal representative of Editorial Verdad with the purpose of looking at the dossier relating to the resolution in question. They were able to find out that such a dossier does not exist, or rather, that it consists of only two pages. One: the official communication from the Under Secretary of Government and Justice requesting cancellation of Editorial Verdad's commercial license. Two: the resolution ordering such cancellation.

Everything seems to indicate, if the truth does not contradict that possibility, that a subversion proceeding has been instituted in the Ministry of Government and Justice against the aforementioned publishing firm, and that such proceeding has already culminated, without the interested parties being aware of it, in a condemnatory resolution, which is being carried out at the request of the Under Secretary of Government and Justice. In the light of these occurrences one cannot but reach the conclusion that the cancellation of the license of Editorial Verdad is a reprisal on the part of the government for having agreed to publish La Opinion Pública. Further, this reprisal can be considered an official warning to other publishing firms that then aware of the risks they run if they engage in similar activities.

It could be that, the Centro de Estudios Nacionales could tomorrow obtain the lifting of the restriction which prevents the publication of La Opinión Pública. However, it could hardly do this since it is extremely difficult that any publishing firm would run the risk of being shut down.

From the foregoing it is evident that the actions of the government as regards La Opinión Pública, contradict most eloquently the statements made by high officials of the national government to the effect that there is freedom of the press in Panama.

Last year, the daily Quibo was also arbitrarily closed by the National Guard of Panama, and his own, Ramón Jiménez, arrested by that body. Several weeks ago the government closed down a radio of Colón, managed by Mr. Navas. At present, Panamanian journalists who have not been "absorbed" by the government are fearful of publishing news which may embarrass the administration. However, even more fearful than the journalists, are the owners of social information media because if they should publish something that may be strong enough to be considered a criticism against the government, their publishing firms may be closed down.

In conclusion, if one is to judge from the fact that the government did not allow publication of the newspapers Quibo in January 1974 and of La Opinión Pública on March 7, and by the case of the radio station of Colón, it can easily be inferred that Panamá does not enjoy freedom of the press.

1976

(Williamsburg Conference)

There is no freedom of the press. Newspapers continue to operate under the direct or indirect control of the Government or under strict supervision.

There is no freedom of the press.

(Aruba Conference)

All the newspapers function under the direct control of the government or the strict supervision of the authorities.

A letter addressed by the directors of the Federation of the Chambers of Commerce of Central America to the President of Panama, Mr. Demetrio Lakas, was not published in any of the news media. The letter requested the government to repatriate seventeen businessmen and impresarios who were deported without explanation or just cause.

1977

(Cartagena Conference)

The situation of Panama's press has changed little in the last six months. Three of the five newspapers continue under absolute government control, published by "Editora Renovación S.A." The other two newspapers "La Estrella de Panamá" and "The Star and Herald", belonging to the Duque family, are subject to strict self-censorship by their editor, the Minister of Housing. The only change that has taken place in "Editora Renovación" is the disappearance of "El Panamá América" and "The Panamá American", which were replaced by a bilingual nwespaper "La República".

(Santo Domingo Conference)

Freedom of expression has not existed in Panama since 1968.

Expression of dissident opinions is considered a misdemeanor under decrees 342 and 343.

No independent publication has been permitted to be published. The newspapers "Quibo" in 1974 and "Opinión Pública" in 1975 were prohibited from publication even before the first edition reached the streets.

Since 1968, many journalists have been imprisoned and deported. A special mention should be made of the Leopoldo Aragon case, in which a Panamanian journalist was imprisoned and tortured for an entire year and then deported to Sweden. There he immolated himself a month ago as a protest against the violation of human rights in Panama and against the signing of the canal treaty.

Recently in Panama a certain degree of freedom of the press has been permitted, carefully given out in small doses, to give the appearance of authenticity to the plebescite on the Panama Canal treaties.

Mr. CHURCH. Mr. President, this is the kind of amendment that could only be offered in the Senate of the United States. It undertakes to prescribe for Panama the law that shall apply there with respect to freedom of speech and freedom of the press.

Mr. President, what would we think if the Republic of Panama sought to amend this treaty to prescribe that we in the United States must free the Wilmington 10? Or what would we think if Panama undertook to amend the treaty to insist that we ratify the equal rights amendment? Or what would we think if Panama required that the U.S. Senate approve the Genocide Treaty? And that treaty, incidentally, was first proposed by the United States and has since been approved by more than 80 other sovereign governments, while the Senate has refused even to reach a vote on consenting to that treaty.

Or what would we think if the Panamanians attached a condition that we first must conclude an agreement with the Soviet Union on nuclear arms control? Clearly the survival of the entire human race may depend upon progress in that field; and the human race, of course, includes the Panamanians as well as citizens of the United States.

Such proposals as those would be scoffed at and scorned in the U.S. Senate as an arrogant infringement of our right to govern ourselves.

Yet we seem to have no compunction whatever to impose our terms on other countries. How long can we live so blindly by the double standard? When do we begin to show some sensitivity toward the legitimate feelings of people who live in other lands?

Mr. President, I wish that the world had been made safe for democracy as a result of the First World War, but it was not.

I wish that most nations in the world were free and the people within them enjoying free speech and freedom of the press, the great blessings which we enjoy in this Republic. But the truth of the matter is that most people in most places most of the time, from the beginning of recorded history, have lived under some form of tryranny.

We have to live in the world as we find it because it is within our power neither to control the internal laws of other countries, nor to establish the system under which other people live. We have problems enough keeping America free without undertaking to prescribe the conditions of freedom for other nations.

Mr. HATCH. Will the Senator yield?

Mr. CHURCH. No, I will not yield at this time. If I have time when I have completed my remarks, I will yield.

Now let us suppose, Mr. President, that we were to take this amendment, which the Senator from Utah says we should impose upon the people of Panama, and apply it to other governments in the world with which we are closely allied.

Take Taiwan, for example. We have a formal defense treaty with Taiwan. Does anyone believe that freedom of speech and freedom of the press exist in Taiwan? Has anyone ever suggested that we impose that condition upon Taiwan as a quid pro quo in connection with the mutual security treaty we have with that country?

Take South Korea, which we are formally pledged to defend and in which we keep a substantial American Army. Is there anyone who would seriously contend that there is freedom of speech or freedom of the press in South Korea. Is there anyone who would seek to attach such a condition to the present American treaty with that country?

Take the Rio Pact in this hemisphere, if we want to come closer to home. Under the terms of the Rio Pact the United States has assumed a mutual defense obligation with all of the countries of Latin America. Is there freedom of speech and freedom of the press in Brazil, in Argentina, in Paraguay, in Chile? Is there freedom of the press and freedom of speech in Nicaragua, in El Salvador, in Honduras?

Would the Senator from Utah suggest that as a condition to our security arrangements with these countries we impose a requirement that they establish freedom of speech and freedom of the press as we know it in the United States?

Obviously, Mr. President, this is an impossible amendment. I wish that the world were a different place in which everyone could enjoy the freedoms we know in this country. But that is not the world we live in and we must deal with the world as we find it.

On that basis, Mr. President, I am prepared to move to table the amendment.

Mr. HATCH. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator from Utah has 3 minutes remaining.

Mr. HATCH. Mr. President, I yield 2 minutes to the distinguished Senator from Texas.

Mr. TOWER. I thank my distinguished friend from Utah.

The Senator from Idaho has raised some specific questions. What if the Panamanians were to impose certain conditions on the requirement for freedom, for example, the passage of the ERA, the conclusion of the SALT agreement? Then I think we should say to the Panamanians they can take the treaty and do with it what they will. In fact, we are in Panama by right. Not because we are being compelled to do so but out of the goodness of our hearts, we are surrendering the Panama Canal to them. I think under those circumstances we enjoy a peculiar right to impose certain conditions that we would not accept under other circumstances if, indeed, the treaty to be concluded were of no benefit to us but only to the benefit of the other party to the treaty.

We are not doing this to benefit the United States. We are not doing it even to benefit all of the major maritime nations of the world. We are doing it because we have some naive notion that we should feel some sense of guilt or self-recrimination over having liberated that country at one time and exacted a very small price of a Canal Zone through which we have operated a canal to their benefit and to the benefit of every maritime nation in the world. The notion that somehow this will automatically create a generation of good will in this hemisphere will not come to pass.

The PRESIDING OFFICER. The time of the Senator has expired. The Senator from Utah has 1 minute remaining.

Mr. HATCH. Mr. President, I ask unanimous consent that there be an additional 2 minutes granted both sides.

The PRESIDING OFFICER. Is there objection?

Mr. McCLURE. Reserving the right to object, there are a number of us who are supposed to be at the White House at 5 o'clock.

Mr. HATCH. I will withdraw my request.

Mr. President, I never thought I would see the distinguished Senator from Idaho arguing that freedom of the press would be scoffed at in Panama or throughout the world, or that this would be such a terrible thing to ask of our Panamanian friends, especially since Mr. Torrijos promised it and said he would do it. What is wrong with freedom of the press? I could hardly believe it when the distinguished Senator from Idaho stood here and said that we would never interfere with any other nation, why were we doing it here? What about South Africa? What about Rhodesia? What about all over the world? What about the human rights policy of this administration, which is supposed to be so good?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. CHURCH. Mr. President, how much time remains to the Senator from Idaho.

The PRESIDING OFFICER. The Senator from Idaho has 6 minutes remaining.

Mr. CHURCH. Mr. President, these treaties are based upon principles of justice for both sides. So I have hopes that the approval of these treaties may lead to an era of better understanding and of friendlier relations between the United States and Panama. And if that is the case, we may see the growth of freedom in Panama again. Already there have been moves in this direction, which I applaud.

The suggestion that I might see something wrong with free speech or freedom of the press is simply too silly to warrant a response.

The only way that freedom will grow in Panama is through the efforts of Panamanians. There is no way we can confer freedom on them. That is something they must win for themselves If good relations between the United States and Panama exist between now and the end of the century, based upon a treaty that both sides regard as just, then the influence of the United States in the direction of greater freedom in Panama will be felt and will prove effective. The worst way for anyone seriously interested in advancing the cause of freedom in a foreign land is to impose that as a condition in this treaty, for it would have just the opposite effect.

I move to lay the amendment on the table. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to lay the amendment on the table. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from Kentucky (Mr. FORD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New York (Mr. MOYNIHAN), the Senator from Maine (Mr. MUSKIE), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE), and the Senator from Minnesota (Mr. ANDERSON), would each vote "yea."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BARTLETT) is necessarily absent.

The result was announced—yeas 62, nays 29, as follows:

[Rollcall Vote No. 92 Exec.]

So the motion to lay Mr. HATCH's UP amendment No. 22 on the table was agreed to.

Mr. SARBANES. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. LAXALT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Mr. METZENBAUM). Are there further amendments to article V?

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I thank the Chair.

UP AMENDMENT NO. 23 (SUBSEQUENTLY NUMBERED AMENDMENT NO. 102)

Mr. HELMS. Mr. President, I send to the desk an unprinted amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

Mr. HELMS. May we have order in the Senate, Mr. President?

The PRESIDING OFFICER. The Senator will suspend until such time as there is order in the Senate. Members of the Senate will return to their seats.

Would Members of the Senate be kind enough to terminate their conversations on the floor of the Senate?

Will Members of the Senate be good enough to make it possible for the clerk to state the Senator from North Carolina's amendment?

The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment number 23.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Amend article V to read as follows:

"ARTICLE V

*"Guarantee of Civil Rights*

"1. The Republic of Panama agrees that any person born before the date of entry into force of this Treaty in the Canal Zone who is a citizen of the United States of America under the immigration and nationality laws of the United States of America is not a national or citizen of the Republic of Panama.

"2. Employees of the Panama Canal Commission and their dependents and designated contractors of the Panama Canal Commission, who are nationals of the United States of America, and members of United States Armed Forces or of the civilian component thereof, and their dependents, and designated contractors of the United States Armed Forces, who are nationals of the United States of America, shall respect the laws of the Republic of Panama and shall have their civil and human rights respected by the Republic of Panama.

"3. Such employees, dependents, contractors, and members who have resided continuously in the former Canal Zone for a period of five years before the date of entry into force of this Treaty shall be considered for purposes of the immigration and nationality laws of the United States of America, as having been lawfully admitted for permanent residence to the United States of America at the beginning of such period.

"4. Such employees, dependents, contractors, and members who are citizens of the United States of America or are permanent residents of the United States of America under paragraph 3 and are prosecuted by authorities of the Republic of Panama shall be entitled to the following procedural guarantees:

"(a) To a prompt and speedy trial.

"(b) To be informed, in advance of trial, of the specific charge or charges made against him.

"(c) To be confronted with and to be allowed to cross-examine the witnesses against him.

"(d) To have evidence and witnesses in his favor presented. The authorities shall submit such evidence and call the witnesses if they are within the Republic of Panama.

"(e) To have legal representation of his own choice for his defense during all investigative and judicial phases from the time of submission to questioning and throughout the entire proceedings; or, if he indicates he lacks funds for his defense, to be defended by the appropriate public defender.

"(f) To have the services of a competent interpreter if he considers it necessary.

"(g) To communicate with a representative of the Government of the United States and to have such a representative present, as an observer, at his trial.

"(h) Not to be held guilty on account of any act or omission which did not constitute a criminal offense under the law of the Republic of Panama at the time it was committed.

"(i) To be present at his trial which shall be public. However, without prejudice to the procedural guarantees in this Article, person whose presence is not necessary may be excluded, if the court so decides for reasons of public orders or morality.

"(j) In his proceedings to have the total burden of proof laden upon the Public Prosecutor or the prosecution.

"(k) To have the court consider only voluntary confessions and evidence properly obtained in accordance with the requirements of the law.

"(l) Not to be compelled to testify against or otherwise incriminate himself.

"(m) Not to be required to stand trial if he is not physically or mentally fit to stand trial and participate in his defense.

"(n) Not to be tried or punished more than once for the same offense.

"(o) To have the right to appeal a conviction or sentence.

"(p) To have credited to any sentence for confinement his entire period of pretrial custody.

"(g) Not to be subject to the application of martial law or trial by military courts or special tribunals.

"(r) To enjoy all other guarantees and rights provided for in the Constitution, Judicial Code and other laws of the Republic of Panama.".

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. HELMS. I yield.

Mr. ROBERT C. BYRD. Will the Senator agree that no vote occur in relation to the pending amendment prior to 6:15 p.m. today? That is approximately 1 hour from now.

I ask this because there are Members on both sides of the aisle who are conferring on the energy package at this moment; and if a vote were to occur within the next hour, it would be inconvenient for them.

Mr. HELMS. I understand. I would be perfectly willing to set a time definite, at any time that is convenient to the majority leader and other Senators. So if the majority leader wants to specify a time for a vote, that will be satisfactory to me.

Mr. ROBERT C. BYRD. The Senator's courtesy is characteristic of him. I think if we simply agree that there will be no vote on this amendment or in relation to it before 6:15 p.m. today, this will relieve our situation, and at that point we can decide.

Mr. HELMS. That is perfectly agreeable to me.

Mr. ROBERT C. BYRD. I thank the Senator.

ARTICLE V—"GUARANTEE OF CIVIL RIGHTS"

Mr. HELMS. Mr. President, the Canal Zone is not a mere strip of land between the Atlantic and the Pacific; nor is the Panama Canal simply an engineering and technological toy. At the heart of the canal operation is people—many of whom have dedicated their lives and careers to the proper functioning of the canal. Therefore, when the Senate talks about turning over the Panama Canal to Panama, we must not forget that the canal in itself is just a hunk of concrete and machinery. That is all that would be turned over. But in point of fact, the canal, as we know it today, is in reality a living organism, a superbly functioning operation that involved the intimate cooperation of two nations and literally thousands of people.

Nor do the canal operations involve only the transit of ships. The transit of ships is the ultimate purpose; but these transits are in turn supported by a wide variety of auxiliary operations essential to the proper functioning of the transit purpose. These support operations range from continuous overhaul of locks machinery, to constant dredging operations, to scrupulous sanitation procedures, to support facilities for vessels in transit and waiting for transit, to support facilities for the employees themselves.

The operation of the canal has always been planned on the basis of cooperation between the United States and Panama. Without the assistance of thousands of Panamanians, the canal could not exist, could not function continuously, could not maintain itself and its procedures in proper order. On the other hand it was always the United States policy to maintain U.S. citizens in key technical, management, and security positions so that the United States would always have the latent capability to operate the canal in an emergency situation.

I think that it is to the credit of the Panamanian employees that they have always shown a loyalty to the canal operation, and a dedication that transcends national interest. During the 1964 riots, for example, many of them stayed on the job for the duration, sleeping on cots in the Canal Zone. Nevertheless, no man can be expected to owe ultimate allegiance to a foreign nation; it is not fair to make such a demand. Therefore, the U.S. citizen force served not only to supply technical and management expertise not available in the Panamanian population; it also served to ensure that the United States would retain control of the canal in case of the development of adverse circumstances.

The control of the canal, therefore, is very closely related to the level of the U.S. presence in the canal operation. Obviously, not all of the U.S. citizen employees are vital to the canal's mission, it is probably not even possible to state precisely what level constitutes control. The fact is that today the Canal Company has a contingency plan to operate the canal without Panamanians if that were necessary. It is a plan that doubtless involves many emergency-type assignments, overtime, long hours, and perhaps even some impairment of service. Human beings can bear up under such circumstances for a while. The smaller the number of reinforcements available, the shorter the time that emergency procedures can be followed without breakdown. Somewhere in the psychological makeup of human communities there exists a "tipping point" where the vitality of the community seems to ebb and for reasons that go beyond mere numbers, the community begins to disintegrate.

Mr. President, the U.S. citizen employees in the Canal Zone come from all walks of life. They are a cross section of the American population. They are in many ways extraordinary Americans—extraordinary for their dedication and their sense of duty; but in their origins and occupations they are like ordinary Americans everywhere. You do not find the snobbery of the Foreign Service, or the elitist preoccupations of the academic crowd among them. What you find is good, old-fashioned American patriotism, and pride in a job well done.

Mr. President, I shall put in the RECORD at this time a breakdown of the occupations of U.S. citizen employees of the Canal Zone.

This, in essence, states that the blue collar occupations are 638; technical and administration, 1,565; top management, 12; special categories, 1,180, including 507 teachers, 208 canal pilots, and 202 police officers.

By law, certain of these positions are designated as "security positions." This

term means that the occupants must be persons who owe allegiance to the United States. The law does not by any means imply that Panamanians are disloyal or untrustworthy. It is simply a statement of fact that U.S. control of the canal depends upon having U.S. citizens in key jobs. At the present time, there are 567 security positions, broken down as follows:

Positions designated by law, 6; access to classified defense information, 137; certain police and fire positions, 158; essential to ensure operations continuity, 266, for a total of 567.

As a matter of practical fact, however, the United States must have a far greater number of U.S. citizen employees than merely the 567 in security positions if the United States is to control the canal in any practical manner. The proposed Panama Canal Commission has a Board which the United States will control by a 5–4 majority; but the United States can never be sure that the policies laid down by the Board will be carried out unless we have sufficient managerial control and technical expertise to carry them out to our satisfaction. Unless we have, for example, canal pilots and lock technicians loyal to the United States, we do not have control of the canal.

THE REORGANIZATION OF THE CANAL AGENCY

In this regard, it is important to understand what will happen to the canal agency as a result of the changes imposed upon it by the treaty. As a result of the divestiture of many employee and canal user support functions, the size of the agency will be drastically reduced. These changes will come about the first year; by the end of the third year, the United States will no longer have practical control of day-to-day operations, if the estimates of the Panama Canal Company are correct.

Most people have the idea that the departure of U.S. citizens, by attrition, will make more jobs available for Panamanians. This has been advertised widely in Panama by Mr. Torrijos. Unfortunately, that idea is totally incorrect. The Panama Canal Company has prepared a treaty implementation plan studying every job in the agency, and evaluating whether or not that job will be eliminated by treaty. The results will surprise many.

I have distributed to every Senator's desk a color chart which graphically illustrates the force structure of the canal organization as proposed under the 1979 budget of the Panama Canal Company—without the treaty—and as compared with the planned force structure imposed by treaty changes in fiscal year 1979 and the 3 subsequent fiscal years.

In so far as the treaty requires the canal agency to divest itself of operations which are auxiliary to actual canal transit, a smaller work force is required. Because there will be fewer operations under control of U.S. agencies, our ability to maintain overall quality control of operations will be greatly lessened. The number of U.S. citizen employees will be reduced both numerically and proportionately in the smaller canal agency; functionally, therefore, it is doubtful that the United States could retain operational control in the face of a Panamanian walk-out.

PANAMANIAN EMPLOYEES—CUT 41.1 PERCENT

Mr. President, the myth, and I emphasize the word "myth," that Panamanians will have more jobs when the U.S. citizens leave does not accord with reality. Of the 10,574 Panamanians planned to be employed under the 1979 budget—without treaty—4,379 will be separated from the canal agency, a reduction of 41.1 percent the first year. In 1980, the Panamanian force level of 6,195 will decline slightly to 6,075, at which point it levels out to the year 1982. It is impossible to make accurate projections after 1982.

Of the 4,379 Panamanian employees to be separated, the vast majority face an uncertain future, to say the least. The Governor of the Canal Zone, Governor Parfitt, has testified before this Congress that about 1,500 Panamanians will have their jobs discontinued without any assurance that a similar job will be created in the private sector. Some estimates of unemployment in the cities of Panama run as high as 20 percent, I might say parenthetically.

Approximately 1,900 job slots will be transferred to Government of Panama agencies. Under article X of the treaty, Panama will retain the present incumbents of those slots only "to the maximum extent feasible." In a government where cronyism and patronage are endemic, the present incumbents of those jobs read that phrase as a threat to their jobs, which pay about three times as much as similar jobs in Panama.

Moreover, it will be difficult for the Government of Panama to maintain a pay scale in those agencies which is so far out of line with the pay scale in other Panamanian Government agencies. In any case, the United States would have no way to enforce a generous interpretation of article X's provisions on behalf of the Panamanian employees of a Panamanian Government agency.

Another 1,450 Panamanians will be transferred to other U.S. Government agencies in Panama; but those jobs, mainly in schools and hospitals, are dependent upon the presence of large numbers of U.S. citizens and military. They would be endangered by any large-scale pullout of U.S. employees or troops.

U.S. CITIZEN EMPLOYEES—CUT 74.6 PERCENT

Although the provision of article X which requires a cutback in the level of U.S. citizen employees by 20 percent within 5 years has been criticized by some as excessive, the chart on Senators' desks at this moment shows that the requirement considerably understates the planned cutbacks. The canal agency will reduce U.S. citizen employees from 3,994 to 2,270 in fiscal year 1979, a reduction of 43.7 percent the first year. By 1982, the U.S. citizen force will be reduced to 1,982, a reduction of 49.6 percent. But Governor Parfitt has testified before the Armed Services Committee that he expects fully half of the U.S. citizen employees whose jobs are not abolished to choose early retirement or voluntary separation within 3 years. If this happens, then the present U.S. citizen work force will be reduced—and this is a disturbing figure—74.6 percent within 3 years.

Three hundred and fifty others will have no job whatsoever—a figure, incidentally, of nearly 10 percent—while 250 others will be required to leave Panama to be transferred to other U.S. Government agencies in the continental United States. Altogether, there will be about 1,600 fewer U.S. citizens in Panama, the majority of them essential to the canal operations. This is what amounts to a "control gap" of enormous proportions.

In addition, another 1,050 Canal Company employees will be transferred to Department of Defense installations in Panama, mainly to schools and hospitals. Of course, the need for these jobs will also decrease as the main U.S. citizen work force declines.

Mr. President, at the risk of belaboring the statistics of this matter—and the statistics cannot logically or properly be ignored—if the statistics for both Panamanian and U.S. citizen employees are combined, the overall reduction in the size of the canal agency which is painfully obvious. Under the 1979 budget—without the treaty—there are 14,518 employees of both nationalities. By 1982, 6,463 employees will have been separated, for a force level of 8,055. This will be a total reduction of 44.5 percent by 1982.

Mr. President, I ask unanimous consent that three tables I have prepared, summarizing these statistics, showing the major job categories of reductions, as well as the official Panama Canal Company figures, be printed in the RECORD at this point.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE I.—MAJOR CATEGORIES OF JOB REDUCTIONS FOR PANAMANIANS

| Major reductions | 1979 budget | 1979 treaties | Reduction |
|---|---|---|---|
| General repair, storehouse, engineering and maintenance | 1,417 | 1,285 | 132 |
| Marine terminals | 1,500 | | 1,500 |
| Retail | 1,235 | | 1,225 |
| Railroad | 134 | | 134 |
| Motor transport | 426 | 345 | 81 |
| Grounds, custodial | 726 | 444 | 282 |
| Education | 282 | 4 | 278 |
| Hospitals | 892 | | 892 |
| Public health | 176 | 112 | 64 |
| Total jobs eliminated | | | 4,599 |
| New jobs created (estimated) | | | 220 |
| Net jobs lost | | | 4,379 |

TABLE II.—MAJOR CATEGORIES OF JOB REDUCTIONS FOR U.S. CITIZENS

| Major reductions | 1979 budget | 1979 treaties | Reduction |
|---|---|---|---|
| General repair, storehouse, engineering and maintenance | 398 | 347 | 51 |
| Marine terminals | 64 | | 64 |
| Retail and Food | 118 | | 118 |
| Railroad | 43 | | 43 |
| Customs and immigration | 65 | 7 | 58 |
| Postal | 69 | 3 | 63 |
| Police | 245 | 177 | 68 |
| Education | 734 | 4 | 730 |
| Hospitals | 396 | | 396 |
| Miscellaneous | 83 | | 83 |
| Total jobs eliminated | | | 1,674 |

Source: Panama Canal Company, statement of operations, Feb. 1, 1978.
Note: Estimate of U.S. citizens force upon entry into force, Oct. 1, 1978:

Mr. HELMS. Mr. President, I repeat: The treaty calls for a reduction of U.S. citizen employees of 20 percent in 5 years; but the actual situation as projected by the Governor and the Panama Canal Company anticipates a reduction 74.6 percent in 3 years. This amounts to a mass exodus of experience and skills. It is doubtful whether the canal can continue to operate with high efficiency with such massive reductions. For the fact is that the Panama Canal is unique as a canal. Experience gained elsewhere cannot be transferred immediately to the Panama Canal. It takes on-the-job training, often for years, to acquire the experience and skills necessary, even when an individual already has technical training. Persons lost through normal attrition can be replaced. But if half of those necessary to canal operations leave within a year or two, there will be no one to train the newcomers—whether the replacements are Panamanian or from some other country.

CANAL PILOTS IRREPLACEABLE

The canal pilots, for example, are irreplaceable. As of December 31, there were 209 qualified canal pilots, of which 203 were operational. I might explain six pilots hold administrative posts. But pilots hold different grade qualifications; the bigger the ship, the more experience is required to qualify. At the present time, there are 98 pilots who hold unlimited papers. These are precisely the most experienced and the most vital, for about half the ships going through the canal today require a pilot with unlimited papers—many of them two to four pilots.

Yet, according to the Panama Canal Company, 71 pilots will be eligible for early retirement. Not surprisingly, those eligible for early retirement are those who have the most experience.

It takes, I am told at least 8 years to train a pilot, and candidates must be shipmasters with experience on many vessels. Nor can pilots be brought from other canals or ports, because their skills are not transferable to the narrow waterways and special conditions of the Panama Canal. No other canal, for example, requires skills in both freshwater and seawater, where ships have different buoyancy.

Moreover, there is the difficulty of attracting new candidates. Although Panama Canal pilot salaries appear to be high, they are not high measured by world standards for men with their scarce qualifications. Moreover, there is an exceptionally high demand at the present time for shipmasters. It is a painfully slow process to recruit 2 or 3 new pilots, much less 71.

I point out the attrition in pilots has already begun. Two pilots—neither yet eligible for early retirement—have already left to become shipmasters; another, the former head of the pilots' association who testified last year that the treaty would have little impact on pilots, is already working in Corpus Christi, Tex.

I apologize for the length to which I have gone into the pilots' situation but I felt it necessary to illustrate what is happening throughout the canal agency. The pilots are the most vital to the operations; but a similar case can be made out for tugboat operators, lock operators, dredging supervisors, and so forth. The list of vital occupations is long; if these experienced employees leave, canal operations and efficiency will deteriorate beyond control.

FEAR OF REPRESSION

Is the case overstated? On the contrary, I have taken pains to understate the case. I have used nothing except the official planning figures and the statements of Governor Parfitt. He said that 50 percent of those whose jobs were not abolished would leave. But a poll of U.S. citizens recently indicated that 69 percent would leave.

Why do U.S. citizens plan to leave, some of whom have never known any other home? Is it because of some vague fear of the unknown, or prejudice against the Panamanian people? On the contrary, it is because of what they already know about the Torrijos dictatorship. Indeed, about 20 percent of the U.S. citizen employees are married to Panamanians. It is precisely such employees who often are the most vociferous against the Panamanian Government. They are more keenly aware of what has happened to their relatives and friends in Panama. They know why the former group of U.S. permanent residents in Panama, a group that numbered 10,000 before Torrijos, has dwindled to about 1,000.

What the U.S. citizen employees fear most is the repression of the Panamanian Government, and, in particular, the brutal methods of the national guard. This repression is not something that can be covered up. The Washington Post recently headlined an interview with Col. Manuel A. Noriega, head of the Panamanian G–2, as "The Name That Strikes Instant Terror." As everyone knows, the Washington Post is no friend to treaty opponents. Nor is the reporter, Sally Quinn, known for her right-wing extremism.

Mr. President, I ask unanimous consent that the article by Sally Quinn be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HELMS. The U.S. citizen employees have had too much personal experience with brutality, authoritarian methods, deprivation of civil rights, and harassment from the Panamanian Government to expect anything different if the treaty is ratified.

The Panama Canal Treaty, by surrendering the exercise of U.S. sovereignty in the zone, will deprive U.S. citizens living there of the protections of the U.S. Constitution, the impartiality of the U.S. judicial system, the protection of U.S. laws, and the security of U.S. police. Anyone who attempts to maintain that the Panamanian equivalent institutions are really equivalent simply does not know the facts.

The U.S. citizens, however, knows the facts. Bill Wright of United Features Syndicate has written a perceptive article about their fears after on-the-spot interviews. Mr. President I ask unanimous consent that his article be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

THE OMINOUS IMPLICATIONS OF ARTICLE V

Mr. HELMS. Moreover, if the U.S. citizen employees have any doubt about what is in store for them, those doubts are dispelled by a reading of article V. Of all the unnecessary and overdrawn concessions in this treaty, article V is the most iggnominious of all. Nothing more clearly represents the intense desire of the Department of State to obsequiously surrender legitimate American interests, and kowtow to the vengeance of a dictator.

For article V amounts to a bill of attainder against the U.S. citizens now living in the Canal Zone. In article V, the United States not only conspires to deprive U.S. citizens of their civil rights, but also meekly agrees to enforce the edicts of the Panamanian dictator with every measure at its command.

Article V says that U.S. citizen employees "shall respect the laws of the Republic of Panama." Mr. President, it is an insult to the U.S. citizens to imply that they will not obey the law. I do not know of another treaty with a foreign nation in which the United States stoops so low as to undertake to make its citizens obey the law. I would think that it goes without saying the U.S. citizens will obey the law no matter what country they are in. And there is no evidence that U.S. citizens have not been obeying the law when they are in Panama.

There is plenty of evidence that the Panamanian dictator and his family have not been obeying Panamanian law—that they have been engaged in corruption, drug-trafficking, prostitution, smuggling, and other activities characteristic of gangsters—but there is no evidence that U.S. citizen employees of the canal agency are engaged in wholesale infractions of Panamanian law. What we need is a treaty saying that the dictator will obey the law.

Then article V says that U.S. citizen employees "shall abstain from any activity incompatible with the spirit of the Treaty." What does that mean, "the spirit of the Treaty." Maybe the State Department knows what that means; the State Department understands the spirit of surrender, the spirit of giveaway, the spirit demeaning oneself before the world. If that is what "the spirit of the Treaty" means, the State Department is very well equipped to interpret it.

But if "the spirit of the Treaty" means that U.S. citizens give up their rights to criticize a U.S. Government agency, namely, the Panama Canal Commission; or to criticize Panamanian officials who might be working against U.S. interests; or, for example, to petition Congress with their grievances—if that is what "spirit of the Treaty" means, then their civil rights will be abridged. In short, "the spirit of the Treaty" means anything the Panamanians say it means, or anything the U.S. Ambassador, as representative of the State Department, says it means.

Mr. President, this is not government by laws when we oblige our citizens to respect anything so vague and unconstitutional as a "spirit of the Treaty."

Moreover, the article goes on to say that the employees "shall abstain from any political activity in the Republic of Panama as well as from any intervention in the internal affairs of the Republic of Panama." That is an extraordinary sentence, Mr. President. There is no evidence that U.S. citizen employees have been engaging in political activity in the Republic of Panama. In fact, there is no evidence that Panamanians have been engaging in political activity, because the dictator has banned political activity.

Now it is true that U.S. citizen employees have been campaigning against the treaties. But that is their right to do so. If the State Department disagrees, then the State Department is apparently unaware that we do not live in a dictatorship. Perhaps the treaty negotiators have been consorting with dictatorships for so long that they have forgotten what a free country is like; otherwise they would never have agreed to such a provision. Or perhaps the State Department is just looking ahead to the period after ratification and wants some authority to take action against U.S. citizens if they disagree with the State Department's manner of implementing the treaty.

That is obvious in the next sentence, and I quote:

> The United States of America shall take all measures within its authority to ensure that the provisions of this Article are fulfilled.

This sentence empowers the State Department to take measures against any U.S. citizen employee who displeases the whims of the dictator. This sentence inevitably will have a chilling effect not only upon the political rights of free expression which belong to U.S. citizens, but also upon all their actions and conduct during the course of their work. They know that they will be watched carefully both by Panamanian informers and State Department informers to see whether they are conforming to "the spirit of the Treaty." They know that their decisions, for example, in promoting or not promoting Panamanians in their department will have important repercussions. A casual remark against the dictator may bring them into disfavor, or even dismissal. The whole morale of the canal organization will be sapped by this dangerous and unprecedented provision.

This whole article, article V, is both dangerous and unnecessary. It is of absolutely no benefit to the United States; it is a total concession to Panamanian spite. It is noteworthy that it did not appear in the July 10 draft of the treaty. Apparently, it was put in after the so-called blackmail incident over which there has been so much discussion. This article, more than anything else, will trigger the mass exodus of U.S. citizens, with their experience and skill so necessary to the control and efficient operation of the canal.

DUAL CITIZENS

What can be done to stem the tide? It is probably impossible to restore fully the confidence of U.S. citizens in Panamanian law and justice. But there are certain steps that can be taken to reassure U.S. citizens that the United States will stand up for their interests. The first step is to delete the obnoxious provisions of article V so that the United States itself does not become the enforcer of the dictator's mandates.

One of the most serious grievances among U.S. citizens employees is the claim of Panama upon their children. Since 1975, Panama has asserted that anyone born in the Canal Zone is a Panamanian national, whatever the wishes of the person involved. After several weeks of discussions, the State Department caved in and accepted that assertion unilaterally with no basis in law or constitutional theory. It was nothing other than an abject, pretreaty concession to Panama, against the best interests of U.S. citizens.

The practical effect is that about 80 percent of the dependents in the Canal Zone fall into this category, as well as some adults who are second and third generation Zonians. Panama claims that these "dual nationals" are subject to Panamanian law and the Panamanian constitution. So far, the most harassment has come whenever these "dual nationals" have attempted to leave Panama. Panama has insisted that children of U.S. citizens, for example, must have Panamanian identity papers and exit passes to leave Panama.

U.S. citizens fear that when Panama takes jurisdiction over the zone, Panama will also claim jurisdiction over their children, requiring them to attend Panamanian schools, or to participate in "students' brigades." In recent years, the curriculum of Panamanian schools has been reorganized on Marxist principles, using textbooks prepared in Cuba.

Article 3 of the 1972 Panamanian Constitution defines the territory of Panama as comprising the entire area between Colombia and Costa Rica, including by implication, the Canal Zone. Article 9

defines all those born in Panamanian territory as Panamanian nationals. Article 13 asserts that Panamanian nationality acquired by birth "cannot be lost, but its express or implied renunciation shall suspend citizenship"; that is, one's civil and political rights. Article 120 provides for the law to set penalties for those who seek to renounce citizenship. Article 15 says the Panamanian nationals within the territory of the Republic are subject to the constitution and law.

Unless this "dual national" problem is solved, we cannot reasonably expect U.S. citizens to remain under Torrijos regime dictatorship with their children. They are too concerned about the future and the welfare of their children to stay there. Accordingly the treaty must be amended so that U.S. citizens who are dual nationals must be considered as having exclusive U.S. citizenship.

ENGISH-SPEAKING BLACKS IN THE CANAL ZONE

Another problem, similar to the previous one, is the plight of the English-speaking black people living in the Canal Zone. There are 1,309 canal employees who are descendants of the original West Indies workers who were brought in to build the canal. By an unfair exclusion in U.S. law they were never permitted to become U.S. citizens. Technically, they qualify as U.S. noncitizen nationals, since they were born in territory under U.S. jurisdiction. Under our law, a U.S. noncitizen national owes permanent allegiance to the United States.

However, Panama in recent years has claimed them as Panamanian citizens on the same theory that she claim dependents of U.S. citizens as Panamanian nationals. The English-speaking blacks have little interest in being Panamanian citizens. They have always demonstrated an historic allegiance to the United States. They have always lived in the Canal Zone, where they have enjoyed higher standards of wages, housing, education, and civil services than they would have had in Panama.

Although efforts to eliminate racial discrimination in the Canal Zone have paralleled similar changes in attitude in the continental United States, the English-speaking blacks in Panama still face severe racial and other discriminations in Panama because of the language barrier, their loyalty to the United States, and envy because of their jobs and living standards. Once the treaty goes into effect, they would become prime candidates for losing their jobs and their housing to the extent that the Republic of Panama controls either.

The just solution is to allow the English-speaking blacks to petition for U.S. citizenship. But this cannot be done by legislation alone, because of Panama's insistence upon "dual citizenship." It must be done by treaty, or it will not be done at all.

The simplest way is to declare that non-U.S. citizens who have resided in the Canal Zone for 5 years or more have been legally admitted to the United States for permanent residence as of the beginning of the 5-year period. Thus they would fulfill the requirements of our naturalization law, and could petition the U.S. Court of Balboa for citizenship. In point of fact, they have actually lived on U.S. territory all their lives anyway; moreover, they have been working for a U.S. Government corporation. There are no other non-U.S. citizen residents of the Canal Zone. In addition to the 1309 employees, I might add that there are 3,800 dependents.

A BILL OF RIGHTS

Finally, all U.S. citizens fear Panama's commitment to protect their civil rights. Even at best, Panama's civil rights guarantees are far inferior to those in the United States. In execution, their standards fall far short of promise. That is why U.S. citizen employees are deeply concerned by the lack of any commitment by Panama in the treaty to guarantee their civil rights. In fact, article V goes just to the contrary. Instead of Panama committing to protect their rights, article V commits the United States to abridge their rights.

Now it is true that Panama and the United States have agreed upon a set of 18 procedural guarantees for those who are prosecuted by Panamanian authorities. But this agreement has been given the lowest possible visibility. It is not in the treaty. It is not in the implementation agreement. It is the annex to the implementation agreement—Annex C, to be specific.

In other words, it appears as though every attempt has been made to downplay the importance of this bill of rights, inadequate though it is. Yet if it is going to provide the necessary reassurance to the U.S. citizen employees in the Canal Zone, the employees have got to be convinced that Panama has a strong commitment to those procedural guarantees. They will not believe in Panama's will to fulfill these guarantees unless Panama gives it the highest international status of an agreement.

Clearly, this bill of rights has to be on the treaty level. Nothing else is sufficient. If Panama is really serious about giving those guarantees, Panama cannot and will not object to something she ostensibly has already agreed upon.

Mr. President, the pending amendment corrects these three problems in an attempt to reassure U.S. citizen employees that they will receive fair treatment. Without positive evidence from the United States and Panama that the employee's rights will be protected, we cannot expect to retain the expertise so imperative to controlling the canal and keeping it running efficiently.

EXHIBIT 1

THE NAME THAT STRIKES INSTANT TERROR

(By Sally Quinn)

In Panama there is one person whose name often evokes immediate terror. It is not Omar Torrijos.

It is Noriega. Col. Manuel A. Noriega.

Noriega is the chief of intelligence, G–2. The head of La Guardia Nacional. That would be like being head of the CIA, the FBI, the Department of Defense and the Police Department all at once. Which means he has all the troops. Which means he has the power. Which means that both President Lakas and Omar Torrijos are said to be not completely at ease with the situation. Because if Noriega wanted to overthrow the government he probably could.

President Lakas will say, "Noriega's nothing but a G–2. Nobody loves the G–2, not even his wife. His business is to stick his nose in other people's lives. I don't fear him. And I don't think General Torrijos fears him."

But there seems to be a note of uncertainty in his voice.

The interview with Noriega is set for 2:30. He is late. One is led to his "private sitting room" in the National Guard headquarters building through an endless maze of tiny offices, each stationed with crew-cut uniformed guards.

The sitting room is tiny, windowless. It looks more like what one would expect of Hugh Hefner's office than the head of the Panamanian National Guard.

It is lit softly by a lamp in the corner. Thick brown shag rugs cushion the floor. Several deep, comfortable, brown leather sofas line the walls. There is a rather ornate mirrored bar with various kinds of whiskey, wine, liqueurs.

In the center of the room a glass coffee table displays a collection of porcelain frogs. The hi-fi is playing sensuous jazz, ballads and pop rock. The walls are lined with kitsch oil paintings of wretched children's faces—all with huge tears pouring down their faces.

His female "assistant," Marcela Toson, appears and offers tea. She is a buxom, jolly, bouncing young woman, more hostess and traveling companion, as she describes it, than anything else.

An hour goes by. Suddenly there is the sound of clicking heels, then salutes. The colonel is coming.

The door pops open, enter Col. Manuel Noriega. He has gone home to change out of his uniform. For the interview he has chosen a lacy Guaya bera (shirt), tight-fitting slacks, leather boots. His wavy hair is slicked back and he reeks of perfume. He is a slight, wiry man. The high cheekbones and narrow eyes, the swarthy, pock-marked complexion give him a rather Mongolian look.

"Well," he says, grinning proudly and throwing open his arms to show himself off, "do I look like a monster?"

A FEMINIST PATRIOT

In Panama there is a women's group that meets about once a week called the "Union Patriotica Feminia." They are women in their 30s, who all may have different political ideologies but who are devoted to one purpose—to work against the Torrijos government. So far, of the 50 or 60 members, two have been jailed, two exiled.

One of the members is Alma Robles, 38, who was arrested by the G–2 last year and kept in jail for nine days without charges, before released.

Robles is the daughter of the late Rogelio Robles, former political deputy to the assembly and was married until recently to an American. An elegant dresser with a gentle manner, she is starting a boutique in Panama City.

Two years ago she was just another housewife minding her own business.

But then in January 1975 her brother Winston and Ivan, both lawyers, were arrested and exiled.

"There was a big group arrested at that time," she says, "bankers, businessmen, radio station owners. They were all taken, one by one, from their offices and homes one morning. It was a big scandal. According to the government they had been in 'subversive activities,' which means critical of the government."

According to Robles: "Nobody knew where the exiles were taken. In fact, they were taken to the airport. They were undressed, searched, their belongings confiscated. They weren't allowed to talk to each other. Then they were put on a plane and taken to Guayaquil (Ecuador). They had done nothing but belong to political groups who met and

criticized the government. What the government did was a stupid move.

"This finally," she says, "became an international scandal." Finally members of the assembly got so angry at the government that one stood up and said "Panama has spent so much to build an international reputation and now in one week you have ruined it."

"You know," says Robles, shaking her head in scorn, "that's the thing about this government. They are so stupid. They don't define themselves. They aren't left or right. So how can we be against them? We're not against their ideology. We're against their methods."

THE YOUNGEST COLONEL

There are seven colonels in the Panamanian National Guard. "I am the youngest of all the colonels," says Manuel Noreiga. "I am only 38."

He is very matter of fact, too, about how he got to be where he is. "My family," he says, "was originally Colombian. I went to the Instituto Nacional. All the people who come from there fight for their liberty and their sovereignty. It is called the Eagle's Nest. Then I went to Peru to the Military School De Chorrios."

Noriega became friends with Omar Torrijos when he came back from Peru and joined the National Guard. But their friendship was cemented when Torrijos, returning from Mexico after a brief coup against him, entered Panama through the province of Chirriqui where Noriega was in charge. Noriega and his troops defended him. Now Noriega is the head of the National Guard, despite being the "youngest of all the colonels."

PUBLIC RELATIONS

At first during the interview Noriega seems quite nervous. He is perspiring as he talks, and he leans forward on the leather sofa, trying earnestly to convey each point, to convince.

"My major function," he says, "is the security of the people so that they can sleep, that they can circulate, that they can live without fear, that they won't be kidnapped, to prevent terrorist attempts. . . ." he pauses, then sits back. "Well, I think that is enough."

Noriega is aware that a lot of people don't see it that way, that many Panamanians are terrified of him and that most of the Zonians live in fear that the treaties will be ratified and they will come under Panamanian police jurisdiction.

"I know," he says, almost with pleasure, "that I have an image problem. Mine is a position that doesn't attract sympathy. But somebody must do this job. And it's a normal position in all of the armies of the world. In Panama there is only one force that has control. That's my job. But I believe that in the U.S. they paint my role as larger than it is."

Noriega is aware that he is going to have a real PR problem when he takes over jurisdiction of the Canal Zone.

"Gen. Torrijos has plans to integrate all the Zone police to work with the National Guard at the beginning," he says. "Our policy will not be one of repression.

"Our G-3," he says, "has a special psychological program to adapt to the minds of the Zonians. Zonians are different from Americans, you know. They have much different minds than the Americans. This plan is made for Zonians."

Noriega defines the Zonians' fear of him and the National Guard as "a psychological problem. They live separately away from us on an island. They don't know any Panamanians or how they think. They look at Panamanians as people apart from them as if they were from another country."

He gets annoyed when asked about allegations of abuses of power and whether the Zonians have legitimate grounds for fear.

He bristles. "All these horror stories are false."

"Isn't it true that one principle of the laws of North America is that the proof is on the accuser and not the accused?"

He looks triumphant. "I would like to know," he demands, "one real thing that happened."

THE ROBLES ENCOUNTER

"We were at dinner at the house of a friend of mine," says Alma Robles. "It was September 1976. A lawyer friend of my brothers, Eusebio Marchosky, and his wife Blanca, offered to give me a ride home and also offered to take Fulvia Morales.

"It was about 11 o'clock at night as we were driving home when suddenly a large unmarked car with four men in plain clothes passed us, then pulled in front of us and forced us to stop. Four men got out and told us we'd have to come with them to the police department. Even though they were in plain clothes we knew who they were. They had *Guardia* crew cuts."

According to Robles:

She and her three friends were taken to the police department, then locked in an empty room with bright lights. Each was made to stand facing a corner for hours. Finally, the three women were taken to a detention cell.

"I had almost fainted by that time," says Robles, "standing there all that time. We weren't allowed to move or even touch the wall. When they finally took us to the women's cell it was horrible.

"It was filthy, full of vomit and cockroaches and prostitutes sitting on the floor in the filth."

The next day they were taken again to the room where they saw Marchosky who, she says, obviously had been beaten. Later the police separated them, and interrogated Alma Robles for four hours.

They sent her back into the cell and for five days she stayed there, incommunicado. Only later did she learn that Marchosky had been exiled, put on a plane to Miami. His wife was released.

Alma Robles implored an officer to let her have some toilet articles, to notify her husband and family, to tell her what the charges against her were.

"The major, who was scared, told me that I was not under his orders. That I was under Noriega's orders. And he said he had been told I had lost all my rights."

Meanwhile her husband had been going to various police headquarters searching vainly for a trace of her until her photograph appeared in the paper with a pile of "stolen" clothes, saying she had been arrested for theft. Finally, her husband contacted a relative of hers who was a friend of President Lakas's wife. She talked to her husband; he called Torrijos and had Alma Robles released—nine days after her arrest.

She was taken by guard to the Presidential Palace, where she was greeted by President Lakas.

"He looked ashamed," she says. "He said, 'Do me a favor and go into the bathroom and clean up. My secretary will lend you cosmetics. I don't want your husband to see you like this.'

"He told me," says Robles, "that he had called Torrijos and said 'Whether she is guilty or not, if we come to the point where we have to fight women in such a way we ought to give up the whole damn thing."

ONE FOR THE FILES

"Alma Robles, huh,' says Noriega, his face falling. "Alma Robles. Huuummmmmmm. Oh yes, Alma Robles. I think I remember her case."

He calls out to an aide who is standing just outside the door. There is a rapid-fire discussion of the case as he dismisses the aide with the instruction, "Get me the Alma Robles file.

"You see," he says, leaning over confidentially to fill the silence before his aide returns, "there is no rule for jailing or exiling. But many times people prefer to leave the country rather than follow the laws or to confront the rules of justice."

The aide rushes in with a massive file of papers and gives it to Noriega.

"Ah ha!" he cries gleefully. "You see, look at that. See how thick it is." And he throws the file up in the air, then catches it with grimace. "It weighs a lot," he says beaming. "It's 68 pages, see here, look. Sixty-eight pages of charges. Now I have the answer for you."

He sits back, now seeming more relaxed than he has been during the whole interview. "In this time," he explains, "there were various people who were trying to make an economic sabotage of the government. Alma Robles was using her house for plotting the economic overthrow of the government. And it was a problem for us for over two years. Well, you can see the complications.

"Also, like trying to provoke mercenaries to plan terrorist activities. But you must understand this is hard for me because she is a woman. But she was used by the group which wanted to make this economic over throw."

He grows very serious, very sincere.

"Since 1968 (the revolution) the Guardia has been good because it has served the majority of the population. But not of the economic and political interests. So the U.S. does not have to do anything, does not have to worry about us. Because we have been good."

FEAR AND LOATHING

"We are all afraid," says Alma Robles. "Let's face it. It would be foolhardy not to be. But we shouldn't be influenced by our fear. We should try to control it and do something. We're not subversive. We are trying to get more people in Panama to overcome their fear, to talk more openly, to come to meetings. We're taking advantage of the lull in the last few months since they want the treaties ratified. We do have a little freedom to meet publicly, to talk on the radio. A lot of people have taken courage to see others meeting. We don't have that much time left. The majority of people are against the government. But now they can show it."

THE MONSTER'S CAVE

Manuel Noriega is not too happy with the direction the conversation has taken. He gets up and points to a door. "Here," he says, "let me show you my office."

He leads the way into a large room with fake stone walls painted in a cave-like pattern. The stereo is playing much louder in this room, Panamanian pop rock music. There is an enormous mural of Noriega parachuting out of an airplane. There are photographs of him and Torrijos around the room. A huge banquet table with ornate carved chairs dominates the office. It is piled high with bottles of liquor and boxes of candy. "This," he says, "is the monster's cave." Curled up in a cushy leather chair is a very pretty, buxom, young Panamanian woman in tight-fitting jeans and another, perched on the edge of the chair at the table and dressed similarly. "And, these," grins Noriega, "are my secretaries."

He obviously wants to change the subject to a lighter vein. Hobbies.

"Well," he says. "I like to read, like to divert myself, I jog five miles every day and I like to dance." Then with a leer, "There are other things I like to do but I don't want you to put that in the paper.

"I collect art. I love paintings of children. And women too," he says with a laugh. "I'm a Buddhist. I started studying Buddhism four

years ago. And I have a black belt in judo, I'm a vegetarian, too.

"For philosophical reasons," he says, "I don't believe men should eat the flesh of other animals.

"So you see," he says triumphantly," "I can't possibly be a monster eating up the Zonians."

---

EXHIBIT 2

THE PANAMA CANAL: THE UNTOLD STORY

(By William F. Wright)

ABOARD OVERSEAS ALASKA, PANAMA CANAL.—Capt. Peter Bolton steps nimbly from a motor launch and hauls his 6-foot frame up a precarious rope ladder to the deck of the Overseas Alaska. A red and white flag flutters up the ship's halyard, signaling to all that a pilot is on board.

Bolton, 55, one of an elite band of mariners who maneuver ships through the Panama Canal, is making his 3,000th transit of the waterway.

He sees change as surely as he knows every twist and turn along the 50-mile-long canal. And he doesn't like it. Later, as we near the final stages of our journey from the Pacific to the Atlantic, Bolton will say with as much resignation as defiance: "We have to accept that there will always be change in this world. However, I must say I will always be opposed to the idea of turning the canal over to Panama."

It is a sentiment heard repeatedly in our journey.

The trip will point up an irony all but lost in the debate over the new Panama Canal treaties: the very agreements that insure the continued efficient operation of the waterway may do just the opposite. They have not anticipated the reaction of the pilots, tugboat captains, lockmasters and other key U.S. canal personnel who may leave before Panamanians can be trained to replace them.

Canal officials fear that the departure of a significant number of essential employees could cripple the waterway far more effectively than a hand-grenade in a critical part of machinery.

Bolton, pushing such thoughts aside, makes his way to the bridge. It is 5 a.m. Capt. Stetson Turner, the ship's skipper, greets him with a handshake and turns over control of the vessel. Bolton is now in command until the tanker leaves Canal Zone waters.

The American-registered Overseas Alaska is the closest thing to a supertanker that can transit the canal. Its beam (width) is 105 feet. The canal locks are 110 feet wide, allowing a clearance of a scant two and a half feet on each side. The 48,000 tons of crude oil from Alaska's North Slope Field force the Overseas Alaska to sit so low in the water that at times less than a foot of clearance is between our keel and the concrete floor of the lock chambers.

As we approach the canal's Pacific entrance, three more pilots climb aboard to help guide the big ship through the locks.

Two tugs maneuver the mammoth tanker into the jaws off Miraflores Locks, the first set of concrete and water stairways which will ultimately lift us 85 feet over the Continental Divide and down again—from sea level to sea level.

The early morning sunlight bathes the locks, highlighting the Panamanian and American flags flying side by side. But, for all appearances, this is an American canal. Bicentennial colors are everywhere: on tugboats, dredges and the workhorses of the canal, the electric locomotive "mules" that haul ships through the locks. Bolton leaves no doubt as to where he stands. As he guides the big ship into the first lock chamber, he dons a terrycloth hat with bold red, white and blue stripes.

As Bolton releases the two tugs, they respond with farewell whistle toots. For Vic Faulkner, captain of one of the tugs and head of the local tugboat union, it may be more than just a passing goodbye. Faulkner voices a concern we are to hear often during the transit:

"If the Panamanian National Guard is given control over the Canal Zone, I think it's a foregone conclusion that in a relatively short time the 'gringos' (Americans) will be gone. They're animals. They're not very well educated. They have no tolerance."

The 8,000-member Guard, Panama's combined military and police force, is scheduled to assume responsibility for law and order in the Canal Zone 30 months after the new treaties come into force. The prospect horrifies many Americans in the Zone, where a U.S. police force has maintained law and order since canal construction days.

Maj. Gen. Harold R. Parfitt, governor of the Canal Zone, acknowledges that the Zonians' concern over the National Guard issue is the most crucial question facing the canal organization.

"If their worst fears materialize and our key canal employees leave, we will have extreme difficulty in continuing to operate the canal in an efficient manner," the governor says. Gordon Frick, personnel director for the canal organization, puts it more bluntly: "If there is any semblance of harassment—any overt moves against individuals—I think a large number of people would quit and we would go down the drain."

A spokesman for the Panamanian National Guard say the Zonian's fears are unfounded. "Law-abiding persons need have no concern," he said.

Vic Faulkner says that unless Zonians get firm U.S. assurances that they and their families will be protected under the treaties, they may stage a "job action" similar to the one which closed the canal down for five days in 1976.

Faulkner voices another concern: Panamanians already employed by the canal organization—75 percent of the total workforce—may be replaced by supporters of Panama's military government.

Faulkner says two members of the Panamanian National Guard already have been assigned to be trained as tugboat captains, bypassing more qualified Panamanians already employed on the tug.

"It's a phony political cram-it-down-the-gringos'-throat operation that is not fair to Panamanians or Americans alike," he says. He says he and other tugboat captains have devised a simple way of dealing with the situation: "We don't allow them into the wheelhouse."

One of the new trainees, Samuel Jimenez, 27, acknowledges that he served as an officer aboard a Panamanian National Guard patrol boat, but says he is now a civilian. He complains that the American tugboat masters "won't let me do anything but listen to the radio."

7:08 a.m.—Bolton brings our ship to an abrupt halt just outside the first lock chamber. There is a delay that annoys the normally mild-mannered Bolton. One of the Panamanian "mule" operators is late for work. For a waterway that handles an average 40 transits a day, time is everything.

"With a big ship like this you can't just stop and start like that," Bolton says, snapping his fingers.

On shore, "Don Gifford, a lockmaster who has worked for the canal organization for 32 years, says the incident helps make his point that the waterway will deteriorate under Panamanian control.

"We have our joke here in the Zone: "Are you going to go on gringo time or Panama time?' Gringo time means you'll be on time. Panama time means you might be several hours late.

"We Americans feel that if we miss a train or bus, it's our fault. Panamanians say that the bus left me."

Gifford's opinion, shared by many Zone Americans, seems to spring from early canal construction days, when many Panamanians refused to have anything to do with building the waterway, forcing the United States to import workers from the West Indies. A Panamanian Ministry of Labor spokesman says, "Panamanians never had the feeling they had any real say-so in the canal operation, so, naturally, they have never had the same attitude towards working on the canal as the Americans did."

7:28 a.m.—The tardy mule operator arrives and we inch into the first lock chamber. Cables from the electric locomotives are attached to the vessel. Mules and ship strain together against the water pressure bottled up in the lock.

As the ship shudders to a stop in the chamber, the gate behind us closes. Water from the chamber ahead and above us flows into ours by the simple expedient of gravity. We begin to rise.

Gifford "walks" our ship into the next lock chamber. He says it won't be long before he leaves the Canal Zone for good. "As soon as the Canal Zone police are done away with, I'm gone. My children are grown up and living in the states. My wife died a few years ago. There's nothing to keep me here."

8:30 a.m.—The second and last lock chamber at Miraflores lifts us to Miraflores Lake, 54 feet above sea level. I go below to the officer's mess.

The talk returns to the canal treaties and to the danger of turning over law and order responsibilities to Panama's National Guard.

"I think that anybody who doesn't have concern about how they're going to be treated by the 'Guardia Nacional' is living in a false world," says Capt. George Markham, one of our bow pilots. "When the Canal Zone goes, I think they're going to bend over backward to make us realize they are in charge."

Capt. Peter Crowell, our other bow pilot, relates how members of the Guard beat him with truncheons at Panama's Tocumen Airport recently when he refused to sign a letter to President Carter supporting the canal treaties.

Canal officials say adverse publicity surrounding the National Guard contributes to the difficulty in attracting new pilot recruits. Another is pay. Panama Canal pilots average $44,000 a year, while Mississippi River Pilots earn between $60,000 and $70,000 a year.

Another source of discontent among older pilots is the lowering of qualifications for new members of the pilot force, once considered the aristocracy of the 10,500 U.S. civilian residents of the Canal Zone.

"When they reduce the qualifications, they take away some of the glamour of the job," Markham says.

We enter and clear Pedro Migue Locks, the second set of concrete and water steps, and at 10 a.m. we enter Gaillard Cut.

Markham, not needed at his bow post at this point, breaks away for coffee in the officers' mess. He launches into a topic often broached by Americans working along the waterway: the importance of the Panama Canal.

"I don't agree with those who say the canal is not important to our economy. And anybody who thinks that when Panama takes over they are not going to jack up the rates (tolls) still believes in the tooth fairy."

Donald G. Schmidt, economist for the canal organization, said the new canal treaties will probably mean an early toll increase of between 25 and 35 percent. This would add between $9,750 and $13,650 to the $39,000 toll the Overseas Alaska paid to transit the canal.

"In the absence of pipelines that would bring Alaska oil to the U.S. East Coast," added Schmidt, "the canal remains the only practical, and certainly the cheapest, route."

And the waterway's importance will grow.

Some 550 tankers carrying 13 million tons of Alaska crude oil to the East Coast are expected to transit the canal. This is only a fraction of the 125 million tons of cargo expected through the waterway in fiscal 1978. And the canal, now handling an average of 40 ships a day, still has at least 25 years to go before it attains its projected capacity of 55 transits a day.

Markham turns his attention to the military value of the canal.

"I think it is vital to our national defense. Without it we just wouldn't be able to deploy our forces in various parts of the world to meet emergencies as we are able to do now." He notes that the only American warships not able to transit the canal are the Navy's 13 biggest aircraft carriers.

A recent study prepared by Edmund J. Gannon, a defense analyst for the U.S. Library of Congress, concluded that the canal's value in the deployment of U.S. forces in various parts of the world will actually be greater in the year 2000—when Panama will assume full control of the waterway under the new treaties—than it is now. The study said this is because the Navy is expected to cut back its larger warships in favor of smaller ones able to transit the canal.

11:15 a.m.—We leave the narrow cut and steam into huge, man-made Gatun Lake, a world of emerald-green water, dense jungle and primeval rainforests that will takes us to the final set of locks on the Atlantic side.

Two tugs join us to nudge our ship into the final set of locks linking the lake to the Caribbean. For Glenn Slaathaug, skipper of one of the tugs, it may be one of his last jobs on the canal.

Slaathaug, 42, is preparing to leave the Canal Zone for good. There is one problem: his wife, Sue, refuses to go through Panama's Tocumen Airport.

Slaathaug claims he was severely beaten with rubber truncheons when he was taken into custody by the Panamanian National Guard at the airport last November 19. The National Guard acknowledged the beating, when he arrived at the airport from leave but says Slaathaug was drunk and disorderly in the United States, and the beating was the only way to subdue him.

Slaathaug says he was only "slightly inebriated" and did nothing to justify the beating. Canal Zone Gov. Parfitt told us that while Slaathaug apparently was guilty of "improper conduct" at the airport, the National Guard "appears to have used excess force" in dealing with the situation.

Vic Faulkner, head of the local tugboat union, sharply criticized the governor and the Carter administration for not protesting the incident. "Excess use of force, I'll say! They literally beat the crap out of him. He was so afraid that he soiled his pants." Color photographs which Faulkner says were taken of Slaathaug shortly after the incident showed what appeared to be extensive welts on his legs, back and abdomen.

An aide of Sen. Robert Dole, R.-Kan., an opponent of the canal treaties, told a Canal Zone civic council meeting that a U.S. State Department official's response was that "if you knew all the details you would probably feel he got exactly what he deserved."

(In Washington, a State Department spokesman declined comment on grounds that the Privacy Act prevented him from discussing the incident without Slaathaug's permission.)

Whatever the facts, Sue Slaathaug says she is "ready to go" back to the United States.

"I'm not going to live under that kind of terror—that kind of fear. The only thing is, I'm scared to death of going through that airport. I'll be damned if I'm taking myself and my three children back through there. They probably have my husband's number from here to next week."

1:40 a.m.—The Overseas Alaska is approaching the waterway's final set of locks which will lower us to the Caribbean. The Caribbean Sea sparks under clear-blue skies. But Bolton sees clouds on the horizon: the new canal treaties.

Bolton again turns his thoughts to the transfer of the Canal Zone to Panama and the introduction of the Panamanian National Guard.

"There is definitely an anti-American attitude on the part of the National Guard," he says. "My understanding is that this is being taught to them." He cites a CBS television documentary showing members of the National Guard training to the chant: "Yanqui go home!"

Glenn Heath, a veteran control house operator at Gatun Locks, says he and most of the canal's other American control house operators have decided to do just that.

"My wife refuses—the word is refuses—to live here with the Guardia Nacional in our communities. A 'Guardia' is a person who has no high regard for human life. They have been trained to kill, rather than protect, the average individual."

What also concerns Bolton and his fellow American workers is that Panama will assume responsibility for much of the Zone's sanitation. Willard S. Sweeney, chief of the canal organization's Sanitation Division, said he can understand the concern.

"They ask 'Will malaria come back? Will we have more rats, more scorpions?' The answer is, I'm not quite sure. It depends on how much Panama lives up to its responsibilities."

Sweeney said only one case of malaria has been recorded in the Canal Zone in the last five years. He said Panama has about 8,000 cases a year.

Bolton noted that the United States maintained sanitation in Panama until 1951, when the Panamanians demanded and received responsibility for the job "as a matter of national pride."

"We gave them new garbage trucks. Within three years they were idle because of lack of maintenance. The city became a pesthole."

Bolton said the Panamanian attitude towards maintenance bodes ill for the 64-year-old canal still operating with much of its original machinery.

"The Panamanian people simply do not have the same discipline we do. They are inclined to put things off until manana. Because of this, when they get full control of the canal, maintenance will fall to the point where there will be major delays to shipping."

A spokesman for Panama's Ministry of Labor said that to acquire the ability to maintain the canal at its present level of efficiency, "all we need is time and training."

Low morale among the canal's U.S. employees has undermined the job dedication that has long been a tradition since canal construction days.

"We have a piece of equipment that requires 15 hours to fix. The Panamanian is not quite sure how to do it. So the American, until recently, stepped in and did the job. Well, now the American is fed up. He's tired of training his replacement."

Heath says that 90 percent of American house control operators—the men who operate the vital lock machinery—have decided to leave. The result, he says, is that the canal will "slowly grind to a halt."

Capt. Bolton expresses a final sentiment, saying he doesn't care if it sounds like "motherhood and apple pie."

"It does make me proud as an American to be part of such an efficient operation. The canal has been described as the seventh wonder of the world. I believe it is and it seems a shame that it may deteriorate."

If Bolton has strong sentiments about the canal, Charles Brathwaite has bittersweet memories. Brathwaite, 81, is one of a dwindling band of survivors of the army of West Indians imported to help dig the canal.

We find him in a tacky, one-room dwelling in one of Panama City's worst slum districts. He invites us in, sits in a rickety rocking chair and recalls conditions under which he worked as a 16-year-old hauling bags of concrete mix to Gatun Locks.

"They were very rough. You got to be very careful. You slip on a scaffold and tumble down and you either dead or lose limbs or something or other. (According to canal records, 5,609 West Indian blacks died from disease and accidents during construction of the canal. American dead numbered some 350.)

"Wages were so small that I had to work for 16 cents an hour."

Brathwaite, clad in a tattered undershirt and faded blue pants, draws a $230 monthly pension from the U.S. government.

"I'm thankful for what I'm getting, but I should be getting more," he says. He turns aside questions about the rigid caste society that subjected Canal Zone blacks to widespread discrimination during construction days and for many years after. "I'm drawing a little pension, I got to say God Bless America."

3:15 p.m.—A simple but clever bit of bathtub hydraulic propels us from the last chamber of Gatun Locks. As the final gate opens ahead of us, water is dumped from the chamber behind and above us. The sudden buildup of pressure in the chamber drives us forward.

Our journey from the Pacific to the Atlantic has taken nine hours and 15 minutes. Capt. Bolton and the three other pilots shake hands with the skipper and board a launch for shore. We are headed for the open sea. Behind us we leave a waterway troubled at the prosepct of change.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina. The Senator from Maryland.

Mr. SARBANES. Mr. President, I first wish to address some of these numbers that the Senator has used. In doing that, I wish to quote directly from responses that were given by Governor Parfitt, the head of the Panama Canal Company and the Canal Zone Government.

I think we should understand at the moment there are two American entities in the Canal Zone. One is the Panama Canal Company, which operates the canal, and, in addition to operating the canal, carries on a number of other functions, which, in this country, would be functions carried on by private enterprise. It is a Government agency. It is an instance in which this Government agency carries on activities with commercial shops, bowling alleys, food production, and so forth, which, in this country, would be carried on by private enterprise, and indeed, in the Republic of Panama would be carried on by private enterprise.

In addition, there is the Canal Zone Government which carries out in this zone, over which the United States exercises jurisdiction, governmental activities comparable to what a municipality would carry out in this country, or what is carried out in the Republic of Panama by the public services of Panama in Panama City or in other localities.

Governor Parfitt is the head of those two entities, the Panama Canal Company and the Conal Zone Government. These questions were put to him and these were his responses.

Planning estimates of number of present employees (broken down into U.S. citizens and non-U.S. citizens) whose jobs will be discontinued and who are expected to be placed with other U.S. Government employment in Panama.

The response to that was:

There are approximately 2,600 full time permanent positions in functions that will be transferred to other U.S. Government agencies in Panama. Currently there are 2,500 employees in these positions, of which 1,050 are U.S. citizens and 1,450 are non-U.S. citizens. In addition, there are 250 (160 U.S. and 90 non-U.S.) temporary and part-time employees in these functions most of whom do not have transfer rights.

Those are the 250 temporary part-time employees without transfer rights.

Some of these employees may be hired by the Government agency that assumes responsibility for these functions.

It is important, in that regard, to appreciate that what is happening is that some of these functions are being transferred from the Canal Zone Government, when we cease to operate the Canal Zone Government, to other U.S. agencies which will carry forward these functions. In many instances they are being transferred to the Department of Defense. Examples of that would be schools, people who would be responsible for teaching functions, and hospitals or the furnish ing of medical care.

So in response to the question, "Planning estimates of the number of present employees whose jobs would be discontinued and who are expected to be placed with other Government employment in Panama," the answer to that is "2,600 full-time positions in functions that will be transferred to other U.S. Government agencies in Panama."

The next question:

Planning estimates of number of U.S. citizen employees expected to be transferred to U.S. Government employment outside of Panama.

The answer was:

Of the 700 U.S. citizen employees whose jobs will not be continued in the Panama Canal Commission and who will not be transferred with their functions to other U.S. Government agencies in Panama, we estimate that approximately 250 will transfer to other U.S. Government employment outside of Panama. We estimate that 100 additional U.S. citizen employees will be selected to fill vacancies within the Panama Canal Commission (vacancies arising from voluntary retirements and normal attrition).

What is important to understand here is that there are now two entities, the Panama Canal Company and the Canal Zone Government. If these treaties take effect, there will be a Panama Canal Commission, which will assume many of the functions now carried out by the Panama Canal Company. The Canal Zone Government, functioning as a government, as it were, in Panama will cease to exist in governmental functions. Many functions will be assumed by Panama, and many other governmental functions now being carried out by the Canal Zone Government will be assumed with respect to American citizens and their dependents by other agencies of the U.S. Government, primarily by the Department of Defense.

So in the end, according to Governor Parfitt, when all of these transitions are accomplished, and so forth, there will only be 700 U.S. citizen employees whose jobs will not be continued in the Panama Canal Commission and who will not be transferred with their functions to other U.S. Government agencies in Panama.

In other words, with all of these U.S. citizen employees either their jobs will be continued in the Panama Canal Commission, which is the agency which will be responsible for operating and maintaining the canal—or they will be transferred with their functions to other U.S. Government agencies in Panama. That is the case for all but 700.

Mr. HELMS. I apologize for interrupting the Senator, and if he would rather proceed, I will wait. He is quoting the responses of Governor Parfitt to questions I asked Governor Parfitt. I appreciate his using the figures that I obtained from Governor Parfitt. I was wondering why the Senator omitted question 6 when he was going down the list of responses.

Mr. SARBANES. I have not gotten to question 6 yet. I intend to include question 6.

Mr. HELMS. I apologize. I thought the Senator had already gone to question 7 when he referred to the planning estimates——

Mr. SARBANES. I am on question 4. I will say to the Senator I intend to go ahead and read. I see the point he wants to make and I intend to put that one on the RECORD as well.

Mr. HELMS. I thank the Senator.

Mr. SARBANES. At the moment I am on question 4 of the questions which were submitted. They were submitted by letter from the distinguished Senator from North Carolina, detailed questions, which, of course, I believe in many ways is the best way to get the most thought-through and carefully worked out response. These were the responses which came back from Governor Parfitt.

Of the 700 U.S. citizen employees whose jobs will not be continued in the Panama Canal Commission and who will not be transferred with their functions to other U.S. Government agencies in Panama,

In other words, all but 700 will either continue with their jobs, which will be carried over into the Panama Canal Commission, or they will be transferred with their function to some other U.S. Government agency in Panama.

Of the 700, he then goes on and says:

we estimate that approximately 250 will transfer to other U.S. Government employment outside of Panama. We estimate that 100 additional U.S. citizen employees will be selected to fill vacancies within the Panama Canal Commission, vacancies arising from voluntary retirements and normal attrition.

Then the next question, question No. 5:

Planning estimates of the number of U.S. citizens not expected to find U.S. Government employment either in Panama or elsewhere.

The answer:

We estimate the remaining 350 U.S. citizen employees whose jobs will not be continued with the Panama Canal Commission will not find U.S. Government employment either in Panama or elsewhere. Of this group we estimate that approximately 50 to 75 percent will be eligible for early retirement.

So, if we take that very large figure of U.S. employees that was earlier put out, up in the thousands, I think it is important to appreciate from the question and the responses here—questions propounded by the distinguished Senator from North Carolina and the responses from Governor Parfitt—that, while the initial figure we are talking about is thousands, we then find, after it has all been analyzed very carefully, that the number is 700 U.S. citizen employees whose jobs will not be continued in the Panama Canal Commission or will not be transferred to other U.S. Government agencies in Panama. Now, of those 700, it is estimated that 250 of the 700 will transfer to other U.S. Government employment outside of Panama; 250 of that 700, which then reduces that number to 450.

Governor Parfitt then estimated that 100 additional U.S. citizen employees would be selected to fill vacancies within the Panama Canal Commission, vacancies arising from voluntary retirements and normal attrition.

That then leaves us with a figure of 350 U.S. citizen employees. With respect to them, he said:

We estimate the remaining 350 U.S. citizen employees whose jobs will not be continued with the Panama Canal Commission will not find U.S. Government employment either in Panama or elsewhere. Of this group we estimate that approximately 50 to 75 percent will be eligible for early retirement.

In other words, of the remaining 350, one-half to three-quarters of them would be eligible for early retirement.

Of course, the final provisions with respect to early retirement can be established by the Congress, because it is a matter within our control and we can deal with that through legislation. By the same token, we can also deal through legislation, or actually, the executive branch of our Government can deal with it as a matter of policy, with the question of job opportunities back in this country with respect to employees. So the number that we are really, in the end, talking about, in view of the estimates, is, I think, a less significant proportion than perhaps the impression one may have gained.

Continuing with the questions:

Question 6. Planning estimates of number of U.S. citizen employees whose jobs are not discontinued by Treaty, but are expected to choose early retirement or voluntary separation within three years.

The Governor's answer to that was:

Of the anticipated 2,000 U.S. citizen employees whose jobs would remain with the Panama Canal Commission, we estimate approximtaely 1,000 would apply for, and choose, early retirement or voluntary separation within three years.

He then went on to question seven—I am going to come back in a second to discuss that answer.

Question 7. Planning estimates of number of Panamanian employees whose jobs are expected to become the responsibility of the Republic of Panama.

Before I go on to the non-U.S. citizens, let me go back to talking about the U.S. citizens. There is an interesting question here, and I recognize that question. That is, will U.S. citizen employees of the Panama Canal Company currently, whose jobs would continue to be available to them with the Panama Canal Commission, stay in those jobs? The Governor has estimated here a figure of 50 percent. That is an estimate, and that is, of course, the best that anyone can do. It is an important question in a number of respects.

These are people who now have that option available to them. The opportunity is there for them if they choose to utilize it. So they are not in a position of not having the opportunity. This is really an estimate of people who may choose not to use the opportunity.

Then, of course, the question becomes, if they withdraw, as it were, precipitately from the work force, what will that do to the standard of the work force and the ability to carry on the functions of the canal? It is an important question. I have a couple of responses to it.

First of all, the thrust of the question has varying weight depending on the nature of the position that one is talking about. There could be some positions in which a lot of people would decide to take early voluntary retirement or voluntary separation. That would be their choice, and it would not make a big difference in terms of the work force, because they could be easily replaced, either by Panamanians or with other employees, American employees, who had jobs that were going to be phased out who would be entitled to move into these positions. It becomes more of a problem when we talk about highly skilled positions. The Senator from North Carolina made reference to the pilots, and that is a highly skilled position.

On the other hand, it is a well-compensated position. Like any other job, a good deal of the attraction of the job is influenced by the remuneration that goes with the job. So there is the opportunity, I think, if you have a serious problem, particularly in those highly skilled positions, to adjust the salaries accordingly in order to hold on to personnel if that becomes a problem.

Second, while the treaty foresees, over the course of the century, moving to a Panamanian work force for operating and maintaining the canal, although it protects those that are there, it also allows or permits recruitment outside of Panama for certain special skills that may not be available within the Republic of Panama. In other words, if a job becomes open at a level that does not require specialized skills, highly trained skills, and—well, let me put it this way: If a job became open, you would have to look to Panama first. But if they did not have the training and the skills required to fill that job, you could recruit outside of Panama.

Therefore, you are entitled, with these very highly skilled positions we are talking about—and the numbers are small in those positions. I think most people would concede that. The number of pilots, for example, I think is 210 or 212 pilots now working for the Panama Canal Company. If that skill is not available under the treaty, there is a specific provision that allows recruitment to take place outside of Panama. That is located in article X, section 2(a) of the treaty, which provides that:

The United States of America shall establish an employment policy for the Panama Canal Commission that shall generally limit the recruitment of personnel outside the Republic of Panama to persons possessing requisite skills and qualifications which are not available in the Republic of Panama.

ORDER FOR VOTE TO OCCUR AT 7:15 P.M. TODAY

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. SARBANES. I yield.

Mr. ROBERT C. BYRD. Mr. President, I ask unanmious consent that the vote occur in relation to this amendment at 7:15 p.m. today.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. SARBANES. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. McGOVERN). Without objection, it is so ordered.

AMERICAN BUSINESS LEADERS IN PANAMA FAVOR TREATIES

Mr. McGOVERN. Mr. President, American business leaders living and working in the Republic of Panama are overwhelmingly in favor of the ratification of the Panama Canal treaties. The views of these business leaders are typified by the comments of Mr. Edward Abbot before the Detroit Economic Club. Mr. Abbot is the Ford dealer in Panama and has lived in Panama for over 30 years. I urge my colleagues to examine Mr. Abbot's remarks, and I ask unanimous consent that his speech as it was reprinted in La Republica be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. McGOVERN. Mr. President, in an interview also in La Republica, Mr. Abbot addresses the concerns of some Zonians about living under the jurisdiction of Panama. It is very interesting to note that Mr. Abbot's conclusion based on his long personal and business relationships with Panama is that these fears are unfounded. I ask unanimous consent that this interview appear at this point in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

EXHIBIT 1

CANAL TREATY TO ATTRACT NEW INVESTMENTS IN PANAMA

Edward (Ed) Abbott, an American who has been in business in Panama for the past 29 years, late in January addressed the Detroit Economic Club as a member of a five-man "truth squad" from the Isthmus which explained the Panamanian side of the Panama Canal Treaty question to audiences in various U.S. cities.

He was named to the squad by the Panama Government as a qualified representative of U.S. businessmen here.

The full text of Abbott's address follows:

Ladies and gentlemen: My name is Ed Abbott. It is quite an honor to address such a distinguished group as yourselves.

I grew up in Detroit and went to Cooley High School and attended Wayne University. Since 1945 I have lived in Panama as a private businessman and have worked with the Panamanian people for these 29 years as the Ford dealer in Panama. My experience has been that the government has always been just in its dealings with management and labor and has treated both sides with the same equitable consideration. There are approximately 6,000 U.S. families who are integrated and living in the country of Panama and I am reflecting the opinions and speaking for this group.

The private sector has always been concerned with the economic and commercial relations between the United States and Panama. The pending Panama Canal Treaty is certainly a strong influence on the business community and the attraction of new investments in Panama.

This treaty will create a strong climate of stability and the country of Panama will at last have control over its principal natural resource, after a gradual transfer of management in accordance with the terms and agreements of the new treaties.

This will enhance U.S.-Latin American relations as well as all of the Third World nations and certainly will strengthen the national interests and create an image of understanding and fair dealing with our proven allies and friends.

During this transfer of administration the rights of the 3,000 U.S. citizens who work and reside in the Canal Zone have been fully protected. The treaty which has been signed by President Carter and General Torrijos—on behalf of the people of Panama—clearly guarantees these Americans their jobs and salary levels until retirement. The process of integrating into the Panamanian economy for the present U.S. workers in the Zone will be an easy and almost automatic process—as the operation of the Canal is slowly assumed by the Panama government the present housing facilities would not be physically changed—but only the administration would change. We have a good example of this which already took place in Panama.

About 12 years ago the U.S. government returned a tract of land within the city of Colón on the Atlantic side of the Canal, in accordance with a previous agreement.

When the Panama government assumed administration of this housing area, the land and housing was offered to private citizens who were now able to own their own houses. These people built up a respectable middle class community, which has proved to be a good investment. There are absolutely no restrictions on foreigners owning their own property in Panama and the registration of deeds and ownership is patterned after and is similar to our system here in the United States.

Under the new treaty most of the present residential sections in the Canal Zone will become available for private ownership and it follows that the same U.S. citizens may

elect to purchase their housing which was not possible before because all housing was furnished by the U.S. government, and if an employee either U.S. or Panamanian was terminated, he or she had to return to the U.S. or Panama, as the case may be.

Residence in the Canal Zone is limited only to the people who work there. Separate housing is provided for the U.S. citizens apart from the Panamanian employees who live in the Canal Zone and naturally this separation did not foster a program of integration.

Panama's geographical location and favorable business laws offer an excellent opportunity for future investments in this country and Panama welcomes foreign investment and participation concerning the vital interests of the United States in reference to the defense of the Panama Canal, we Americans have been informed by our military advisors that the defense of the actual Canal against an insurgent and Viet Nam type of warfare would indeed be very difficult and expensive unless the surrounding country was friendly. These treaties clearly state that the U.S. has the right and obligation to defend the waterway against any threat that could jeopardize clear passage of any vessel after the year 2000 when the Panama government has assumed full management of the waterway. At the present time the U.S. military presence in Panama is only tolerated and indeed criticized by most of our Latin American neighbors throughout the continent. Since the military action that took place on Jan. 9, 1964, the United States has recognized a need for a fair treaty with the Republic of Panama and during Henry Kissinger's visit when he was Secretary of State, expressed their intent in writing to sign an equitable treaty with Panama, to end one of the last colonial enclaves that still exist in this modern world.

After all these years the Panamanian people at last are realizing their just aspirations and it would indeed be disastrous to not ratify this treaty at this time. Panama has the support of not only Latin America but the whole world has supported Panama's struggle to obtain jurisdiction over their territory and the United States would severely damage their relations and image throughout Latin America and the Third World.

The U.S. would appear to act irresponsibly in the eyes of their Western allies by not ratifying a treaty that gives us the right to defend the Canal against any threat from any source.

The United States urged Great Britain to return the control of the Suez Canal and is presently supporting the people of Africa who are struggling to obtain a majority control over their country. If these treaties are not ratified, then the United States will be placed in a position where they have constantly supported and recognized smaller independent countries rights against larger and oppressive regimes and the rest of the world is now expecting them to adhere to the same policy of freedom for independent nations to pursue their own Democratic goals.

---

EXHIBIT 2

FEAR OF LIVING UNDER RP JURISDICTION "UNFOUNDED"

(By J. J. Harrison)

A long-time U.S.-citizen resident of the Isthmus today branded as "grossly unfounded" the fear some Canal Zone Americans have over the possibility of living under Panama Government jurisdiction.

The assertion came from Edward (Ed) Abbott, born in Grand Rapids, Mich., some 60 years ago, but who has called Panama City, Panama, home since 1949, or for the past 29 years.

"We (U.S. citizens) have always been treated justly and with consideration and are fully integrated—and accepted—into the economic and social lifestream of Panama," said businessman Abbott in an exclusive interview with La Republica-English.

He said he was reflecting the opinion and speaking for the 6000 U.S. citizens living in Panama.

"Take it from me," the businessman said, "I am in an excellent position to know Panama and its people". He added that he is the "only Gringo" working shoulder-to-shoulder with his 202 Panamanian employes.

Abbott, also well known as an active civilian airplane pilot, commented on the rights, under the Torrijos-Carter treaties, of the approximately 3000 U.S. citizens currently employed in the Panama Canal Zone.

"The new treaties," he declared, "clearly guarantee these Americans their jobs and salary levels, until retirement".

Declaring that the process of integration into the Panamanian economy would be an easy and almost automatic one for these U.S. citizens, Abbott pointed out that the new treaties would not only afford them the opportunity of purchasing their own homes.

"They would also receive better facilities for entering into commercial activities just the same as so many of their 6000 countrymen have, from one end of the republic to the other," Abbott said.

He noted with "much satisfaction" that during the nine years of the Revolutionary Government, while the treaty has been an issue, "there have never been any overly serious incidents that have adversely affected the private sector in Panama."

He said Panama is one of the few nations that has consistently been free of terrorism and has enjoyed a secure atmosphere for its own citizens, and foreign residents here, alike.

Late in January, Abbott was a member of a five-man "truth squad" which visited various large U.S. cities giving Panama's side on the controversial treaties which will provide this country with complete jurisdiction over all its territory by the year 2000.

Abbott, who on that mission represented U.S. businessmen based in Panama, was accompanied by Panamanian Ambassador to Washington Gabriel Lewis Galindo, who headed the squad; Planning and Economic Policy Minister Nicolas Ardito Barletta, Treaty Negotiator Carlos Lopez Guevara and Eduardo Ferrer Morgan, the Embassy's economic advisor who served as truth squad coordinator.

The full text of Abbott's talk before the Detroit Economic Club, during the January trip, will be printed in Monday's edition of La Republica-English.

The Detroit Economic Club is regarded as one of the strongest groups of economic leaders in the United States.

ORDER FOR VOTE ON HELMS AMENDMENT TO OCCUR AT 11 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a vote occur in relation to the pending amendment by Mr. HELMS at 11 o'clock tomorrow morning.

The PRESIDING OFFICER (Mr. METZENBAUM). Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. There will be no further rollcall votes today.

---

## ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that statements during morning business be allowed, that they be limited to 5 minutes each, that the period not extend beyond 30 minutes, and that the morning business be as in legislative session.

The PRESIDING OFFICER (Mr. PAUL G. HATFIELD). Without objection, it is so ordered.

---

## MESSAGES FROM THE HOUSE

At 2:20 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House agrees to the amendments of the Senate to the bill (H.R. 6693) to amend the Child Abuse Prevention and Treatment Act to extend the authorization of appropriations contained in such act, and for other purposes, with amendments, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the following bills in which it requests the concurrence of the Senate:

H.R. 10732. An act to authorize appropriations to carry out the Fishery Conservation and Management Act of 1976 during fiscal years 1979, 1980, and 1981;

H.R. 10882. An act to authorize appropriations to carry out conservation programs on military reservations and public lands during fiscal years 1979, 1980, and 1981; and

H.R. 10884. An act to authorize appropriations to the Council on Environmental Quality for fiscal years 1979, 1980, and 1981.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 549. A concurrent resolution praising the United States delegation to the Belgrade meeting of the Conference on Security and Cooperation in Europe for its efforts on behalf of human rights, and urging the President to continue to express United States opposition to repressive actions and to violations of basic human rights which are contrary to the Helsinki accords.

---

At 5:14 p.m., a message from the House of Representatives delivered by Mr. Hackney, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 9179) to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 7700. An act to amend title 39, United States Code, to ensure the continuation of public services performed by the United States Postal Service, and for other purposes;

H.R. 10730. An act to authorize appropriations to carry out the Marine Mammal Protection Act of 1972 during fiscal years 1979, 1980, and 1981; and

H.R. 10878. An act to extend until October 1, 1981, the voluntary insurance program provided by section 7 of the Fishermen's Protective Act of 1967, and for other purposes.

## HOUSE BILLS AND CONCURRENT RESOLUTION REFERRED

The following bills were each read by their titles and referred as indicated:

H.R. 7700. An act to amend title 39, United States Code, to ensure the continuation of public services performed by the United States Postal Service, and for other purposes; to the Committee on Governmental Affairs.

H.R. 10730. An act to authorize appropriations to carry out the Marine Mammal Protection Act of 1972 during fiscal years 1979, 1980, and 1981; to the Committee on Commerce, Science, and Transportation.

H.R. 10878. An act to extend until October 1, 1981, the voluntary insurance program provided by section 7 of the Fishermen's Protective Act of 1967, and for other purposes; to the Committee on Commerce, Science, and Transportation.

H.R. 10732. An act to authorize appropriations to carry out the Fishery Conservation and Management Act of 1976 during fiscal years 1979, 1980, and 1981; to the Committee on Commerce, Science, and Transportation.

H.R. 10882. An act to authorize appropriations to carry out conservation programs on military reservations and public lands during fiscal years 1979, 1980, and 1981; to the Committee on Environment and Public Works.

H.R. 10884. An act to authorize appropriations to the Council on Environmental Quality for fiscal years 1979, 1980, and 1981; to the Committee on Environment and Public Works.

The following concurrent resolution was read by its title and referred as indicated:

H. Con. Res. 549. A concurrent resolution praising the United States delegation to the Belgrade meeting of the Conference on Security and Cooperation in Europe for its efforts on behalf of human rights, and urging the President to continue to express United States opposition to repressive actions and to violations of basic human rights which are contrary to the Helsinki Accords; to the Committee on Foreign Relations.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JACKSON, from the Committee on Energy and Natural Resources, with an amendment:

S. 743. A bill to provide for the protection of franchised distributors and retailers of motor fuel; to encourage conservation by requiring that information regarding the octane rating of automotive gasoline be disclosed to consumers; and to prevent deterioration of competition in gasoline marketing (together with minority and additional views) (Rept. No. 95–732).

By Mr. EASTLAND, from the Committee on the Judiciary: Special Report on Immigration (Rept. No. 95–733). Annual Report on Criminal Laws and Procedure (Rept. No. 95–734).

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations:

David D. Newsom, of California, to be Under Secretary of State for Political Affairs.

Robert J. Sugarman, of Pennsylvania, to be a Commissioner on the part of the United States on the International Joint Commission, United States and Canada.

(The nominations from the Committee on Foreign Relations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

● Mr. CANNON. Mr. President, from the Committee on Commerce, Science, and Transportation, I report favorably sundry nominations in the Coast Guard which have previously appeared in the CONGRESSIONAL RECORD and, to save the expense of printing them on the Executive Calendar, I ask unanimous consent that they lie on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.●

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of March 27, 1978, at the end of the Senate proceedings.)

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. ALLEN:

S. 2872. A bill to amend the Internal Revenue Code of 1954, as amended, so as to exempt subsistence allowances of law enforcement officers of the United States from Federal income taxes; to the Committee on Finance.

By Mr. INOUYE (for himself and Mr. CANNON):

S. 2873. A bill to provide for the regulation of rates or charges by certain State-owned carriers in the foreign commerce of the United States, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 2874. A bill to amend the Foreign Trade Zones Act to increase the use of foreign trade zones in exporting, and for other purposes; to the Committee on Finance.

By Mr. HATHAWAY:

S. 2875. A bill to amend title XX of the Social Security Act to provide for service program planning and assessment; to the Committee on Finance.

By Mr. ABOUREZK:

S. 2876. A bill to provide for increases in appropriations ceilings for development ceilings, land acquisition for boundary changes in certain units of the National Park System, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. HATHAWAY:

S. 2877. A bill entitled the Education Fiscal Assistance Act of 1978; to the Committee on Finance.

By Mr. MAGNUSON (for himself and Mr. INOUYE):

S. 2878. A bill to amend the Central, Western, and South Pacific Fisheries Development Act to increase the appropriation authorization through fiscal year 1982, to expand the U.S. fisheries development effort, and to cooperate in the formation and research of the South Pacific Regional Fishery Agency, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. JAVITS (for himself, Mr. WILLIAMS, Mr. SCHWEIKER, Mr. RANDOLPH, Mr. CHAFEE, and Mr. DOLE):

S. 2879. A bill to amend the Public Health Service Act to establish a Commission on National Primary Health Care Needs; to establish hospital-affiliated primary care centers; to establish research and demonstration projects for primary care; to continue the assistance to community health centers, migrant health centers, and the National Health Service Corps; and for other purposes; to the Committee on Human Resources.

By Mr. NELSON:

S. 2880. A bill to provide that future Federal employees will be covered by social security and may elect not to be covered by the applicable Federal employees retirement system, that current Federal employees may elect to be covered by social security and if they so elect may elect to discontinue being covered by a retirement system for Federal employees and have retirement credits under any such system transferred to social security; to the Committee on Finance.

S. 2881. A bill to provide for the actuarial soundness of the Civil Service Retirement and Disability Fund through a financing plan which will be fair and equitable to Federal employees and to the taxpayers; to the Committee on Governmental Affairs.

By Mr. HELMS:

S. 2882. A bill to provide that comparability pay increases shall apply to Members of Congress in any year only if the cost-of-living index for the preceding 12-month period has not increased by more than 2 percent; to the Committee on Governmental Affairs.

By Mr. CURTIS:

S.J. Res. 126. A joint resolution to authorize the President to proclaim the month of May 1978 as "National Car Care Month"; to the Committee on the Judiciary.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. INOUYE (for himself and Mr. CANNON):

S. 2873. A bill to provide for the regulation of rates or charges by certain state-owned carriers in the foreign commerce of the United States, and for other purposes; to the Committee on Commerce, Science, and Transportation.

OCEAN SHIPPING ACT OF 1978

● Mr. INOUYE. Mr. President, in August 1977, the Maritime Administration issued a report entitled "Expansion of the Soviet Merchant Marine into the U.S. Maritime Trades." In response to the growing trade penetration in the United States by the Soviet merchant fleet, the MarAd report attempts to analyze and monitor the policies of the Soviet merchant marine, and to forecast its future development.

Among other things, the MarAd report found that:

In 1971, Soviet participation in U.S. liner ocean-borne foreign trade was 160,000 tons valued at $38 million, representing, by tonnage, 0.4 percent of the total U.S. liner trade. In 1976, this participation was 7–8 times greater: preliminary information shows that the Soviets carried 1,434,000 tons valued at $1.7 billion, representing, by tonnage, 2.9 percent of the total U.S. liner trade.

The report concludes since 1971 the Soviet Merchant Marine has substantially increased both its liner service and the carriage of liner cargoes in the U.S. trades. However, it said, this trade penetration is largely successful because of the practice of rate cutting.

The Soviet's rate-cutting practices in our liner trades led Time magazine in an article in its December 5, 1977, edition to inquire, "Piracy or Profit on the High Seas?"

Russian ships can and do quote rates as low as 50 percent below U.S. conference rates because they operate outside the conference system and do not operate for profit but rather from a directed national policy intended, among other things, to earn foreign currency to assist in the balance of payments and to assist in the expansion of Soviet policy throughout the world.

According to the Federal Maritime Commission, Soviet penetration in U.S. liner trades in 1976 was the heaviest in tonnage terms on:

(1) Trade Route 7—U.S. North Atlantic/W. Germany—13.1 percent.
(2) Trade Route 8—U.S. North Atlantic/Netherlands, Belgium—3.7 percent.
(3) Trade Route 10—U.S. North Atlantic/Med. Black Sea, Portugal, Spain, Morocco and Azores (U.S.S.R. ports excluded—2.9 percent.
(4) Trade Route 17—U.S. Atlantic, Gulf and Pacific/Indonesia, Malaysia, and Singapore—5.4 percent.
(5) Trade Route 21—U.S. Gulf/U.K., Ireland, Continental Europe (North of Portugal), (U.S.S.R. ports excluded)—2.7 percent.
(6) Trade Route 29—U.S. Pacific, Hawaii and Alaska/Far East—5.6 percent.

And, data for the first 9 months of 1977, shows significant penetration by the Soviets on 7 of the 16 routes where they have the largest tonnage penetration. The 1977 data show the following penetration levels:

(1) Trade Route 7—12.3 percent.
(2) Trade Route 8—4.1 percent.
(3) Trade Route 10—4.0 percent.
(4) Trade Route 17—10.1 percent.
(5) Trade Route 21—3.6 percent.
(6) Trade Route 22—11.6 percent.
(7) Trade Route 29—6.4 percent.

A comparison of some rates of record will, I believe, illustrate the predatory practices of the Soviets; and explain why their rate of penetration has been so dramatic.

According to one source, in 1973, in the United States/Japan trade, the rates of United States, Japanese and conference members third flag carriers on TV sets, toys and bicycles were $45, $42, and $36 respectively.

In early 1973, a Soviet-owned line—Far Eastern Steamship Co. (FESCO)—which had been operating for about 6 months in the Japan/United States trade, cut the eastbound rates to $38.25, $33 and $31 or respectively 15 percent, 21.4 percent, and 13.8 percent below the applicable rate of conference carriers. The national carriers then reduced their rates to a level which was about 3 or 4 percent above the FESCO rates.

Six days later FESCO slashed its electronics rate by yet another 12 percent to a level 15 percent below the reduced rate of the national lines.

In United States/West German trade, national flag and conference carriers established rates on eastbound movements as follows:

Tobacco—$75.75, rags—$70, plastic sheets—$55, asphalt shingles—$58.50. The undercutting rates of the Soviets, respectively: $56, $55.64, $39.75, and $38.75 or from 20.4 percent to 33.8 percent below the existing level.

More recent examples of trade penetration tactics by Soviet carriers are in the Australian and Central American trades. According to the FMC, in the U.S. Atlantic and Gulf/Australia trade, FESCO minibridge rates averaged some 10 to 13 percent below the rates of ACE lines, which also offers independent minibridge service in this trade.

In a similar comparison of all-water rates between the U.S. Pacific coast and Australia, FESCO's rates likewise averaged some 22 to 25 percent below those of the conference.

In the New Orleans/Central American trade, the Soviets have recently announced the inauguration of a service at rates below those of competing carriers and equal to those of carriers serving the much shorter route between Miami and Central America. Since the inland distance to New Orleans for much of this cargo is significantly shorter, the carriers from Miami will be forced to reduce rates or face the loss of this cargo. The best information available to the FMC indicates that rates in this Miami/Central America trade are already depressed due to heavy competition.

In the Pacific Coast/Far East trade, according to the FMC, there are instances involving specific commodities where the Soviet rates are as much as 48 percent below those of the competing conference and well below those of OOCL, a major independent in the trade. In the North Atlantic/European trade, rates of the Soviet carriers have gone below the conference rate by as much as 50 percent. Such reductions are, indeed, substantial and demonstrate the capability of the State-controlled operator to publish rates at whatever level may be necessary to acquire the involved cargo.

Most recently, a shipment of buses moving from Germany to Houston, Tex., purchased for the most part with Federal dollars, was carried by the Soviet carrier Baltic Shipping Co. at rates well below those quoted by a U.S. carrier, Lykes Bros. Steamship Co. for the same shipment.

Although all the facts are not yet known, I have been told that the German freight forwarder handling the shipment sought rate quotations. Lykes had quoted a LASH barge load of $20,000, which equals about $6,500 per bus. Subsequently, however, Baltic Shipping Co. successfully quoted a rate of $4,500 per bus.

According to one source, at that rate Baltic will not even cover its fuel costs for the voyage.

The Soviets, of course, can set any rate they want. They do not have to worry about profits or costs. It makes no difference to them how many rubles they have to spend inside the Soviet Union to earn a dollar's worth of hard currency.

They do not, for example, have to charge the 12.5 to 15 percent increase scheduled by the various conferences for 1978. According to one source, wage costs for their crews are extremely low by U.S. standards—$97 a month for the master, $31 for an ordinary seaman. And according to the same source, their vessels are fueled at costs that are fully 75 percent below those of other nations.

Mr. President, our national shipping policy is committed to free and open competition in the U.S. liner trades. Clearly predatory pricing practices contradict this policy, and render it meaningless and ineffective.

If they continue, the ultimate consequences for the liner segment of our merchant fleet are readily foreseeable. It will disappear, and our merchant fleet will no longer be capable of serving international economic, military and political commitments of the United States.

Mr. President, on behalf of Senator CANNON and myself I am introducing legislation which would enable the FMC to control the ability of State-controlled carriers in our liner trades to establish and maintain rates that cannot be matched by commercially motivated carriers, and thereby assure free and open competition in our liner trades. Shortly, my Merchant Marine Subcommittee expects to hold hearings on the bill.●

---

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 2874. A bill to amend the Foreign Trade Zones Act to increase the use of foreign trade zones in exporting, and for other purposes; to the Committee on Finance.

AMENDMENTS OF THE FOREIGN TRADE ZONES ACT

● Mr. INOUYE. Mr. President, in 1977 the United States suffered a record merchandise trade deficit of $36.6 billion (c.i.f. basis). It represents a deterioration of $21.8 billion from 1976's poor export performance. Since 1971, when we incurred our first trade deficit since 1893, deficits have almost become the rule rather than the exception.

There are some individuals who have dismissed the significance of the large deficits in the hope that the currency adjustment would cut imports and increase exports. However, as we have had more experience with the floating rate system, it is becoming clearer that price competitiveness is only part of the problem in closing the deficit and that currency adjustments can help our export trade only to a limited degree.

We require a major commitment to the export sector from the present administration. We need to reconsider existing restraints on exports and to devise new initiatives to encourage American firms to export. A comprehensive exporting policy is still lacking.

Foreign trade zones (FTZ) could be a fruitful source of exports and additional jobs. Zones are enclosed areas considered to be outside the customs territory of the United States and are used for storage, exhibition, assembly, manufacture, and other processing.

There are currently 31 cities with authorized FTZ facilities established pursuant to the 1934 Foreign Trade Zones Act. Interest in FTZ's has increased rapidly within the last few years. The number of authorized zones climbed from 21 in 1976 as cities have come to realize the benefits of zones in expediting and encouraging foreign commerce. The State of Hawaii in particular has been very aggressive in using its FTZ in its State redevelopment plans. Under the

able and thoughtful leadership of Homer Maxey, the Honolulu FTZ has emerged as the Nation's leader, accounting for approximately 50 percent of the goods received and shipped and more than 54 percent of the exports from the United States.

Foreign trade zones can also attract industry which would not have been established except for the benefits which FTZ's offer. The Honolulu zone has a major oil refinery which sells millions of dollars of fuel to ships and aircraft. The new Volkswagen plant in Pennsylvania will be located in a FTZ.

These new businesses mean jobs. Firms in the Hawaii zone jobs. This number should increase as more companies establish themselves in the FTZ. When it is operational, the Volkswagen plant will be a major industrial employer.

Used properly, FTZ's can be an important asset in our struggle to boost exports and create new jobs. However, the 1934 act has not provided sufficient flexibility, and it is the objective of this measure to enhance the attractiveness of FTZ's for exporting purposes.

The bill has been drafted as a result of a project that was proposed for the Honolulu FTZ several years ago. A local firm planned to establish a facility to manufacture bagasse, a sugar cane byproduct which is used in construction, for export to Japan. To make the project economically feasible, however, it was necessary to import machinery. The Treasury Department determined that duties would have to be levied on the machinery on grounds that machinery used for manufacturing in the zones was not exempt from tariffs under the act in spite of the fact that none of the product was destined for the customs territory of the United States. As a consequence of this determination, the proposal was shelved, and both the Nation and the State were deprived of the revenues and jobs which the project would have generated.

The bill being introduced today would correct this situation by permitting the tariff-free import of machinery, materials, and fuels used solely in the manufacture or production of goods for export. In order to qualify, the FTZ would be subject to stringent criteria.

It would have to show that: First, fuel, materials, or machinery is essential to the operation of the project; second, it is not available domestically at a comparable price; third, the total retail value of the goods manufactured and exported would exceed the duty which would otherwise be imposed on the imported goods and exceeds $100,000; and fourth, the establishment and operation of the project would not significantly reduce the export operations of existing firms.

In order to insure that the public interest is fully protected, the public would be able to comment on the application for this exemption. Authority for the exemption is limited to a renewable 6-year term, and if the project fails to meet its original purpose, permission for continuation may be denied. Finally, to prevent this provision from being misused to produce and assemble cheap imports, this bill provides that the imports would be taxed at regular duty rates.

I am aware of the fact that some critics of FTZ's believe that they facilitate only imports and hence eliminate American jobs. There is no evidence to support such a contention. Far from being harmful, FTZ's are a potentially important tool in job creation and economic redevelopment. Moreover, I believe this bill contains adequate provisions to thwart any misuse of the new authority.

Based on our experience in Hawaii, I believe that FTZ's can play a vital role in improving our export performance. While I do not wish to exaggerate the benefits, every step that would encourage American businesses to become more competitive and export minded is desirable.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2874

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

FINDINGS AND PURPOSE

SEC. 2(a). The Congress finds and declares that foreign trade is indispensable to the economic welfare of this Nation, that the expansion of such trade, and particularly the expansion of this Nation's exports, has taken on a new urgency, and that foreign trade zones can be utilized more effectively in enhancing this Nation's exporting capability.

DEFINITIONS

SEC. 3 As used in this Act, the term—

(a) "United States" means the several States, the District of Columbia, the Commonwealth of Puerto Rico, and the insular possessions.

(b) "Secretary" means the Secretary of the Treasury.

SEC. 4. The Act of June 18, 1934 (commonly known as the Foreign Trade Zones Act; 19 U.S.C. 81a et seq.) is amended by inserting after section 3 the following new section:

"SEC. 3A. (a) The Secretary, through the Bureau of Customs, is authorized to approve the duty-free entry of (1) machinery and materials to be used solely in the manufacture or production of goods in a zone if such goods are not subsequently entered into the customs territory of the United States, and (2) fuel and materials consumed solely in the manufacture or production of such goods, in the same manner and subject to the same limitations as foreign merchandise brought into such zone without being subject to the customs laws of the United States under section 3 of this Act. The Secretary shall approve such duty-free entry if he determines that such action conforms to an application approved by the Board under subsection (b).

"(b) Any grantee may apply to the Board for the application of the provisions of this section to any project conducted, or proposed to be conducted, within the zone, operated and maintained by the grantee. The Board may approve any such application if it determines that—

"(1) the appliaction of this section is essential to the successful operation of the project .which is the subject of the application;

"(2) domestic machinery, materials, and fuel are not available at prices comparable to the foreign machinery, materials, and fuel which are proposed to be used or consumed in the operation of such project, or at prices which would permit the successful operation of such project;

"(3) the total value of the goods to be manufactured or produced and exported will exceed the duties which (but for the application of this section) would apply to the entry of machinery, materials, and fuel to be used or consumed in the manufacture or production of such goods and the total retail value of such goods would be in excess of $100,000; and,

"(4) the establishment and operation of the project for which the application is made would not, determined by the Board, significantly reduce the export operations of similar existing businesses."

"(c) Upon receipt of each application, the Board shall publish a notice in the Federal Register to solicit the views of the general public, to be submitted to the Board within thirty days after the publication of the notice. The Board shall have thirty days after such views are submitted to reject or approve the application, except that it may order an additional sixty day extension for the purpose of requiring the applicant to submit additional supporting information. A final determination shall be made no later than one hundred and twenty days after submission of the application.

"(d) Approval granted pursuant to paragraphs (b) and (c) of this subsection shall be valid for six years, and every manufacturer shall reapply for approval with the Board pursuant to paragraphs (b) and (c) at six year intervals.

"(e) Machinery, fuel, materials or manufactured goods imported pursuant to this section shall be taxed at regular rates if subsequently entered into the customs territory of the United States.

"(f) The Board shall promulgate such rules and regulations as it considers necessary to carry out the purposes of this section. Such rules and regulations shall be drafted to eliminate unnecessary paperwork, to simplify forms and to expedite all proceedings."

SEC. 5. Section 16(c) of such Act is amended by inserting after the word "grantee" the following new sentence: "The report shall also contain a summary of activities and programs of the Board and each zone intended to increase the use of foreign trade zones to expand United States exports and such proposals as the Secretary of the Treasury shall make to expand the use of foreign trade zones in exporting."●

---

By Mr. HATHAWAY:

S. 2875. A bill to amend title XX of the Social Security Act to provide for service program planning and assessment; to the Committee on Finance.

SERVICE PROGRAM PLANNING AND ASSESSMENT

● Mr. HATHAWAY. Mr. President, the issue of social service planning and coordination is of great concern to me. It is of equal concern to those agencies and persons who work to deliver effective social services at a reasonable cost. In this regard, I am proposing an amendment to title XX to provide funding at the local level for planning and evaluation.

There is a vital need to develop: Effective planning mechanisms for the delivery of human services, close coordination of existing services, and the creation of a continuum of care. Furthermore, effective planning requires accurate needs assessment. I believe that part of this planning process may best be conducted at either the regional or local level. Individuals and organizations most familiar with an area and its services, or lack thereof, are in the best position to assess the needs, evaluate the existing

services, plan for the future, and develop direction and coordination of services. Title XX is designed to provide flexibility in local administration of social services. The State's services program are generally prepared at the State level. The funds are then allocated to various social services program.

However, title XX funding at present, does not adequately provide for planning and evaluation. A lack of input from the local level, both providers and consumers, has resulted in poor planning, duplication of services, and problems in intra-agency cooperation.

This bill will amend title XX by setting aside authorized funds for comprehensive planning and evaluation. There will be no additional cost from this bill since, it simply earmarks a portion of any increase in the title XX ceiling amount, for planning programs.

In keeping with the original intent of title XX to transfer control and decisionmaking in social service from the Federal level to the State and local levels, this amendment provides for planning at the regional and local levels by agencies designated by the Governor of each State. These planning agencies are to be composed, to the greatest possible extent, of persons responsible to the elected officials of the local government.

This amendment requires that not less than one-half of 1 percent of a State's title XX allocation be directed to regional organizations for purposes of planning and evaluation. It mandates that this planning focus on areas having common or related development problems; and that there be a coordinated effort to eliminate repetition and duplication of effort or expense. The amendment involves no additional cost, and should ultimately be cost saving through the establishment of a more efficient, coordinated social services system.

By allocating funds to regional planning agencies specifically for planning and evaluation, this amendment seeks to provide a mechanism to implement the important goal of State and local control of social services. The process of creating effective, efficient, and responsive social service systems is one which involves: Needs assessment—to determine both the resources of a community and the gaps in these resources; planning—to establish direction and goals; evaluation—to provide the necessary feedback, insuring that planning is responsive to real needs and assure that services are as efficient and effective as possible. These tasks require input from regional and local levels, from those agencies and persons who are familiar with a community, its facilities, its needs, and its consumers.

Different areas of the country have different needs; additionally, areas within a State have different human service requirements. The regional planning bodies, which are in the unique position of having direct access to pertinent information about an area's resources and wants, are designated in the amendment as metropolitan, regional, or district planning bodies. These agencies are able to function as direct points of input for consumers and providers of social services at the grassroots level.

Social service agencies, municipalities, and other public agencies in Maine have eloquently testified to the need for a vehicle for planning and maintaining the social service system on a regional and local level. They are increasingly aware of the need for both greater technical skills in planning and for community-level involvement in this planning process. There exists a consensus of opinion that increased funding requires increased involvement in the decisionmaking process. There is also an awareness that as social service systems become more complex, the process of coordinating services increases in importance and complexity as well. As programs and services expand, there is an increased need for accountability, for a mechanism which will provide information about the impact of programs. Establishing planning and evaluation at the regional and local levels provides a unique opportunity to develop systems that are responsive, and responsible to the people they serve.

I have received valuable and insightful input from communities in Maine, from planning organizations, from town and city governments, and social service agencies. I ask unanimous consent that there be included in the RECORD following my remarks a selection of letters from citizens in Maine which addresses the need for change in title XX legislation, as well as a copy of the bill itself.

I believe that this this amendment to title XX will improve the quality and quantity of local and regional input to the broad range of social services. I am confident that regional areas and local communities can, and will develop the type of planning which will produce an improved, more effective, and more efficient State social service program.

I look forward to the consideration of this legislation with my colleagues when it is referred to the Senate Finance Committee, of which I am a member.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 2875

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) Section 2002 (a) (3) of the Social Security Act, as amended, shall be further amended as follows:

"(3) No payment may be made under this section to any State with respect to any expenditure for the provision of any service to any individual unless—

(A) the State's services program planning meets the requirements of section 2004, and

(B) (1) the State's services program provides that not less than one-half of one percentum of the State's allocation is directed to regional planning organizations (as defined in section 2007 (3)) for the purpose of community needs assessment, service provider evaluation and continuity of service planning, and

(2) planning assisted under this section shall, to the maximum extent feasible, cover entire areas having common or related development problems. The Secretary shall encourage cooperation in preparing and carrying out plans among all interested municipalities, political subdivisions, public agencies, and other parties in order to achieve coordinated development of entire areas. To the maximum extent feasible, pertinent plans and studies already made for areas shall be utilized so as to avoid unnecessary repetition of effort and expense, and

(C) the final comprehensive annual services plan in effect when the service is provided to the individual includes the provision of that service to a category of individuals which includes that individual in the descriptions required by section 2004 (2) (B) and (C) of the services to be provided under the plan and the categories of individuals to whom the services are to be provided. The Secretary may not deny payment under this section to any State with respect to any expenditure on the ground that it is not an expenditure for the provision of a service directed at a goal described in paragraph (1) of this subsection." (b) Section 2007 is amended by adding at the end thereof:

(3) the term 'regional planning organization' means officials of metropolitan, regional, and district planning agencies or other agencies and instrumentalities designated by the Governor (or Governors in the case of interstate planning), and acceptable to the Secretary, empowered under State or local law or interstate compact to perform metropolitan, regional, or district planning, respectively: *Provided,* That such agenices and instrumentalities shall, to the greatest practicable extent, be composed of or responsible to the elected officials of the unit or units of general local government for whose jurisdictions they are empowered to engage in planning."

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall apply with respect to the first fiscal year beginning after enactment of an increase in the total authorization (under section 2002(a) (2) (A)).

---

COUNCIL OF GOVERNMENTS,
*Portland, Maine, January 25, 1978.*

Hon. WILLIAM D. HATHAWAY,
*U.S. Senate, Senate Office Building, Washington, D.C.*

DEAR SENATOR HATHAWAY: Thank you so much for all the time and effort expended by yourself and your staff on my request. I truly appreciate your work and the promptness of your reply. It is also very heartening to know that you share our concern.

Given the vital necessity of developing effective planning mechanisms for the delivery of human services, perhaps now is an appropriate time to re-examine the Title XX situation. The current federal allocation for Title XX services is 12 million. The amount is then matched by an additional 4 million of state and local monies. Of these funds, the state was allocated $381,470 in FY 1978 for administration, research, planning, evaluation and contracts for consulting. The total allocation for planning and evaluation was $68,466.00.

Needless to say, the state wants to maintain the funding for its planning efforts. However, given the fact that local sources provide $2.5 million of the total funds and the fact that the services are provided on the local level it would appear necessary and logical for local officials to have an active part in the decision making process. With the present system this is not, and will not, be the case.

There is a need for comprehensive planning and evaluation to become integral parts of the Title XX process. There is a need to recognize that different areas of the state have different human service needs. There is a need to begin to implement the underlying purposes of Title XX, i.e., transferring control and decision making on social services

from the federal level to the state and local levels. The attached letters attest to the recognition of these needs by local officials.

Until such time as funds are made available, above the ceiling, for planning and evaluation, these needs will remain unmet. I would urge you to consider developing and supporting legislation that will provide adequate funding for human service planning and evaluation. Moreover, I would strongly suggest that such funds be provided not for use by state but by substate districts.

Yours sincerely,

SHARON WHITLOW,
*Assistant to the Director.*

---

COMMUNITY ACTION COUNCIL, INC.,
*East Wilton, Maine, December 12, 1977.*

Ms. GLORIA GIFFORD,
*Chairperson, Title XX Task Force, Rockland, Maine.*

DEAR MS. GIFFORD: This agency went through several processes during the last few years in trying to receive local program support dollars. One system which was purely a "who you know" situation should never be allowed to surface. Local municipalities and County governments do not have staff or the expertise in trying to ascertain whether or not programs are efficient and effective. They have no idea if their dollars are being put to good use. A few years ago, this agency went to town meetings, and the opposition usually never gave information based on facts. Rumors were started. People voted without knowing exactly what was before them. Matters were seldom handled in a professional or rational manner. Many agencies were not held accountable but were judged by the public sentiment of the age group being served by their programs.

During the last two years, M.M.A. and A.V.R.P.C. took advantage of available resources and worked closely with municipalities and agencies in Franklin County to develop a mechanism for planning and evaluation of human services. This has been a difficult and time consuming assignment, but the benefits derived from it proved to be extremely worthwhile. For the first time agencies and municipalities are receiving professional guidance, agencies are being held accountable, both parties are experiencing meaningful interaction, and decision makers have sound information on which to act.

The time is here for the State to support this kind of social service planning. Also, the Planning Commission is the logical vehicle for being responsible to carrying out this mission.

It seems logical to me that the State should give its support and free up some of its administrative title XX dollars to make such programming a reality.

Please give this matter your immediate attention.

Respectfully yours,

LARRY E. DUBORD,
*Executive Director.*

---

COUNCIL OF GOVERNMENTS,
*Portland, Maine, December 13, 1977.*

Mr. F. WOODMAN JONES,
*Chairman, Maine Human Services Council, Augusta, Maine.*

DEAR MR. JONES: Enclosed please find a copy of a resolution that was unanimously adopted by the GPCOG Executive Committee at their December 13th meeting.

This resolution addresses the issues about which our local officials are deeply concerned. It is my hope that your Council and the Title XX Task Force will consider the points of this resolution during their deliberations on the FY 1977 Title XX plan.

I would also add that the issue of citizen participation is one with which local officials have experience. By decentralizing the Title XX planning process, local officials could contribute their information on and knowledge of local needs and the effectiveness of programs designed to meet those needs.

Your consideration of these issues will be greatly appreciated.

Very truly yours,

RICHARD WOOD,
*President.*

---

RESOLUTION

Whereas, the State of Maine receives over 12 million dollars annually to provide funding for social service programs, and

Whereas, local sources provide two thirds of the funds necessary to match the federal funds, and

Whereas, the programs and services receiving funds are intended to meet human service needs on the local level, and

Whereas, local officials do not have effective mechanisms for input to planning and evaluating human services that will best meet their communities' needs, and

Whereas, regional human service planning programs, have fostered local officials involvement and have provided information necessary for evaluating human service programs and funding requests at the local level,

Now, Therefore, Be It Resolved by the Executive Committee of the Greater Portland Council of Governments that a regional planning and evaluation program be established to ensure local officials participation in human service decision making process and that appropriate Title XX Administration funds be allocated to support said program.

CERTIFICATE

The undersigned duly qualified and acting Recording Secretary of the Greater Portland Council of Governments certifies that the foregoing is a true and correct copy of a resolution, adopted at a legally convened meeting of the Executive Committee of the Greater Portland Council of Governments held on December 13, 1977.

CAROL J. DEVERE,
*Recording Secretary.*

---

TRI-COUNTY MENTAL HEALTH SERVICES,
*Lewiston, Maine, December 15, 1977.*

Ms. GLORIA GIFFORD,
*Chairperson, Title XX Task Force, Rockland, Maine.*

DEAR MS. GIFFORD: Independent monitoring, analyses and reporting of the activities of human service agencies is a meaningful vehicle for exacting dialogue and coordination among those agencies. Likewise the allocation of scarce public resources/dollars can be achieved with greater ease and objectivity via such a vehicle.

For the first time in the Tri-County area Androscoggin Valley Region Planning Commission has effectively begun this process. There are a number of items still left to be done, as well as to continue what has begun. We are, however, confronted with the fact that the funding for the Androscoggin Valley Regional Planning Commission's human services planner terminates in April 1978.

I am writing in support of the Maine Municipal Association's suggestion that 1 percent of Maine's Title XX allocation be set aside expressly to fund Androscoggin Valley Regional Planning Commission's continued regional human service planning role. This 1 percent could logically be taken from the 5 percent administrative fee that the Department of Human Services retains from every Title XX contract. I say logically for two reasons. First, all of the referenced 5 percent cannot be utilized in support of Title XX contract administration, some must be used for other purposes. Secondly, the Maine Human Services Council has the statutory obligations to determine service gaps to attempt to fill those gaps and to exact a maximum of coordination, cooperation and unduplicated delivery of human services.

I can conceive of no more efficient or less costly way for this obligation to be fulfilled by the Maine Human Services Council. Uniform reporting by these regional efforts could be exacted by the Maine Human Services Council, while permitting maximum local input and involvement.

I hope that you, your Task Force and the Maine Human Services Council will give every positive consideration to Main Municipal Association's suggestion and this letter of support. Thank you.

Sincerely yours,

J. GREGORY SHEA, A.C.S.W.,
*Executive Director.*

---

THE TASK FORCE ON HUMAN NEEDS,
*Auburn, Maine, December 15, 1977.*

GLORIA GIFFORD,
*Chairperson, Title XX Task Force, Rockland, Maine.*

DEAR MRS. GIFFORD: It is becoming increasingly apparent each year that municipalities and counties should have access to professional resources in order to determine human needs, evaluate service providers, and thus be enabled to make valid constructive decisions when appropriating local government funds to human service programs.

Long range planning in the human service area is very difficult without technical assistance and could probably best be performed by a regional organization which has local government input. The Androscoggin Valley Regional Planning Commission is presently engaged in human services planning and evaluation but has no ongoing source of funding. I feel that A.V.R.P.C. would be a logical choice to carry on this planning and evaluation function.

It has been suggested by the Maine Municipal Association that 1% of Maine's allocation of Title XX funds be made available for this purpose from the Title XX administrative services within the Department of Human Services, As a human service provider I would like to go on record in support of the adoption of this proposal as I feel that it would be of benefit to this area.

Sincerely,

MARIE T. CONNOLLY,
*Acting Executive Director.*

---

BOARD OF SELECTMEN,
*Town of Dixfield, December 16, 1977.*

GLORIA GIFFORD,
*Chairperson, Title XX Task Force, Rockland, Maine.*

DEAR MRS. GIFFORD: Each year local governments fund human service programs with increasing dollar amounts, yet they have, little involvement in the decision-making process of how these dollars are spent. Municipalities and counties should have professional resources to determine needs and evaluate service providers. It is inappropriate to make financial demands upon local governments without providing them technical assistance.

This planning would best be performed by a regional organization which has local government input. In this region, human services planning and evaluation is already being done by the Androscoggin Valley Regional Planning Commission, but they have no ongoing source of funding. A.V.R.P.C. would be the logical choice to continue human service planning in the Tri-County region.

The Maine Municipal Association has suggested that one percent of Maine's allocation of Title XX dollars be made available for this purpose. The money would come from the Title XX administrative services within the Department of Human Services. I feel that adoption of this proposal would be beneficial to this region. We in Dixfield have found the planning and evaluations done for the 1st time this year by A.V.R.P.C. (as mentioned above) to be an invaluable tool in our budget process. Our local Finance Committee could not possibly have secured

and interpreted the information now available to us through A.V.R.P.C. efforts and we firmly believe we need this information or citizens of the town will drop appropriations for such requests altogether, for lack of proof of value received or method of comparison.

Very truly yours,

——— BARTLETT,
*Administrative Assistant.*

---

TOWN OF FALMOUTH, MAINE,
*December 19, 1977.*

Mr. F. WOODMAN JONES,
*Chairman, Maine Human Services Counsel, Augusta, Maine.*

DEAR MR. JONES: I am writing this letter to express my concern over the present structure of the Title XX planning process, which minimizes responsiveness to local needs and local concerns. I'm sure you realize that local governments are being asked to fund a growing number of human service agencies, and local tax funds provide nearly twice as much money as the State of Maine. Yet, local governments do not have a meaningful role in the allocation of Title XX funds. The underlying purpose of the Title XX program was to transfer control and decision making on human services to state and local governments. The State of Maine is not meeting that purpose by continuing to centralize decision-making in Augusta.

To offer a concrete suggestion, I believe we ought to be moving toward more comprehensive planning and evaluation in the Title XX process. For example, in the Greater Portland area, the Council of Governments has served on behalf of its member municipalities to evaluate and coordinate human service programs and planning needs. This addresses the problem of different areas of the state having different human service needs. In order to meet these needs, regions should be allowed to develop their own plans, as has been done effectively in the related fields of criminal justice, housing, area agencies on aging and United Ways.

Lastly, I would suggest that a portion of the funds currently used for state administration be allocated to regional planning agencies, thereby bringing the human services planning process closer to the local officials and citizens who are ultimately impacted by the plan.

I sincerely hope that you hear from other local governments on the Title XX planning process and you will find that it is a growing concern.

Thank you for your consideration.

Very truly yours,

DAVE WHITLOW,
*Town Manager.*

---

CITY OF SOUTH PORTLAND, MAINE,
*December 19, 1977.*

Mr. F. WOODMAN JONES,
*Chairman, Maine Human Services Council, State House, Augusta, Maine.*

DEAR MR. JONES: I am writing to you to express my concern over the process in which human service agencies obtain funding in the State of Maine. As the person responsible for budget preparation in the City of South Portland, I find it very difficult to evaluate the requests of these agencies for funds, requests which are increasing each year. My problem is further complicated by the fact that by the time I receive these requests, the agencies involved have already received funding from other sources and are looking to the City for a portion of the local share.

Since the City of South Portland is being asked for funds, it seems that we should be involved in the Title XX planning process as well. For example, many agencies which receive Title XX funds have provided services to clients in South Portland, totally independent of any City involvement and usually without any knowledge on the City's part. Now, these agencies are turning to the City asking for funding for services which they provide City residents and, in some cases, threatening to withdraw services if City funds are not appropriated.

I would like to have the City involved earlier in the process than it currently is, such as who gets Title XX funds, are the services needed, are there duplication of services, are the salaries and expenditures of the agencies appropriate? This would allow the City to express an opinion on the need for such agencies in South Portland instead of the current process where all types of commitments have been made prior to any request of the City.

I hope you will involve us in evaluating future requests for Title XX funds so that the current process can be improved.

Sincerely,

RONALD E. STEWART,
*City Manager.*

---

TOWN OF GORHAM,
*Gorham, Maine, December 20, 1977.*

F. WOODMAN JONES,
*Chairman, Maine Human Services Council, Augusta, Maine.*

DEAR MR. JONES: We feel compelled to write this letter to express our concern with the method by which allocation of Title XX funds are determined.

The Human Services Council and its Title XX Task Force does include some citizens and local officials on its boards. However, despite their participation and ultimate recommendations. We do not believe this is the intent of the Title XX program.

We would like to suggest consideration of some of the following criteria in determining allocation of funds:

1. Since needs differ from region to region, each region should be permitted to develop its own plan as has been done with success in other related fields. The Municipal Evaluation Committee of the Greater Portland Council of Governments has recently completed a comprehensive study of local human service planning needs, including consumer input. While we are not familiar with activities in other areas undoubtedly most regions have conducted similar surveys.

2. More input should be generated at the local level as local sources provide twice the money provided by the state. Local officials are cognizant of the services needed and desired by their clients. Also, ultimate control and decision should be a cooperative state, regional and local effort.

3. Make available to regional agencies a portion of administrative funds now used by the state, in order to permit regional agencies to undertake a study to develop a more equitable system of allocation and allow local officials a more active part in the human services planning process.

The foregoing are some of the concerns we would like you to be aware of in developing your annual plan and to, again, stress the urgency and importance of a cooperative state, regional and local involvement.

Sincerely,

EBEN B. MARSH,
*Town Manager.*
HELEN C. MASON,
*Welfare Director.*

---

TOWN OF MEXICO, MAINE,
*December 21, 1977.*

GLORIA GIFFORD,
*Chairperson, Title XX Task Force, Rockland, Maine.*

We at the local level of government find supporting human service agencies more burdensome. One reason these expenditures, however justified, run into difficulty is because appropriate technical assistance is not being provided.

I feel that money should be allocated from Title XX dollars to perform technical assistance evaluation. These funds should be channeled through the Regional Planning Commission as some of these agencies are already in this review process. As an example, A.V.R.P.C. is such an agency.

I wholeheartly endorse this evaluation process. Continuation of this program is vital if agencies are going to continue to seek municipal dollars. The continuation of such a program will be beneficial to recipients, providers, and municipalities.

Sincerely,

BYRON A. MOODY.

---

TOWN OF PARIS,
*South Paris, Maine, December 30, 1977.*

GLORIA GIFFORD,
*Chairperson, Title XX Task Force, Rockland, Maine.*

Each year local governments fund human service programs with increasing dollar amounts, yet they have little involvement in the decision-making process of how these dollars are spent. Municipalities and counties should have professional resources to determine needs and evaluate service providers. It is inappropriate to make financial demands upon local governments without providing them technical assistance.

This planning would best be performed by a regional organization which has local government input. In this region, human services planning and evaluation is already being done by the Androscoggin Valley Regional Planning Commission, but they have no ongoing source of funding. A.V.R.P.C. would be the logical choice to continue human service planning in the Tri-County region.

The Maine Municipal Association has suggested that one percent of Maine's allocation of Title XX dollars be made available for this purpose. The money would come from the Title XX administrative services within the Department of Human Services. I feel that adoption of this proposal would be beneficial to this region.

Sincerely,

PAUL C. BROWN,
*Town Manager.*

---

TOWN OF FREEPORT,
*Freeport, Maine, December 29, 1977.*

Mr. F. WOODMAN JONES,
*Chairman, Maine Human Services Council, State House, Augusta, Maine.*

DEAR MR. JONES: The purpose of this letter is to express my concern relative to the Title XX planning process for human services funding. My concern stems from my position of Freeport Town Manager where I participate in a local budget allocation process that appropriates approximately $10,000, much of which is used to match Title XX funds, and of Chairman of the Greater Portland Council of Governments Municipal Evaluation Committee for Human Services Delivery where I was involved in reviewing a significant number of funding requests from Greater Portland Human Service Agencies which rely on Title XX funding for their operations. At present, there does not appear to be a reliable mechanism for translating the local knowledge of human service needs into policy governing the dispersement of Title XX funding. In fact, the decisions seem to follow solely from the State and appear to be based not on actual local needs but on what the State assumes to be local needs. This process appears contrary to the intent of the Title XX program where control and decision making on social services were to be transferred to both State and local governments.

I would submit that the Regional Planning Agencies of Maine could supply the Title XX program a more comprehensive planning and evaluation process and could cause more of the adjustments necessary to meet local and regional needs than can the State. Concurrent with such a shift of responsibility, some of the funds currently being used for admin-

istration of the Title XX program should be provided to the Regional Planning Agencies to insure sufficient funds for conducting the review of human service agencies.

It is my hope that the Maine Human Services Council will recommend that local interests toward Title XX funding be considered to a much greater degree than currently perceived.

Cordially,

BRUCE E. BENWAY,
*Town Manager.*

---

TOWN OF PRINCETON,
*Princeton, Maine, December 22, 1977.*

MS. GLORIA GIFFORD,
*Chairperson, Title XX Task Force,*
*Augusta, Maine*

DEAR MS. GIFFORD: It has come to my attention that the Maine Municipal Association is proposing allocation of one percent of the Title XX funds set aside in each region in Maine for human service evaluation and planning. As town manager of Princeton, a small community in Washington County, I would like to take this opportunity to express my wholehearted support for this plan for several reasons.

First, I believe that savings accrued in human service dollars from such an exercise due to increased efficiency, and reduction in duplication of services would be far greater than the investment.

Secondly, human service funds should be spent where the most critical needs of citizens and communities are identified. Even well-run programs can only be beneficial when they fill a service void.

Thirdly, I think that the reputations of many viable and useful agencies have been damaged by the financial or responsibility of a very few. Hopefully, the proposed review would suggest uniform accounting procedures aimed at avoiding future problems.

Finally, there seems to be an increasing competition for scarce dollars at the local level, and at the same time agency requests continue to rise and proliferate. With such a situation, hard decisions are going to be made locally, and without a formalized review system, the likelihood of undeserving agencies receiving a disproportionate share of these scarce dollars increases.

In Princeton, we are in the final stages of a community needs assessment study which asked citizens their opinions about many facets of Princeton life, including human service agencies. Generally, respondents seemed confused about available services, did not use many that did exist, and identified areas where other services were needed. I personally sensed a negative attitude from several respondents toward some agencies.

I think that the review system proposed by the Maine Municipal Association is a logical tool with which to address the problems that have been identified. It is my understanding that similar projects have been developed and have been successful in Penobscot County and elsewhere, providing a much needed rational approach to the current confusing and unruly situation surrounding the realm of human service agencies.

Thank you for your time and consideration.

Sincerely,

DAVID HOLT,
*Town Manager.*●

---

By Mr. ABOUREZK:

S. 2876. A bill to provide for increases in appropriations ceilings for development ceilings, land acquisitions for boundary changes in certain units of the national park system, and for other purposes; to the Committee on Energy and Natural Resources.

NATIONAL PARK SERVICE

● Mr. ABOUREZK. Mr. President, I am introducing today a bill prepared at my request by the Department of the Interior. This measure would provide for increases in land acquisition and development authorization ceilings and boundary changes in certain units of the national park system.

In the past several Congresses, the Energy and Natural Resources Committee has found that incorporating many of these measures into an omnibus bill provides an expedient and effective vehicle for the consideration of such legislation. Such an approach permits considerable saving of processing time, without any real sacrifice of attention to, and consideration of, the merits of the individual components of the omnibus package.

Mr. President, while many of the measures incorporated into an omnibus bill might not seem to be of pressing urgency as they compete for time and consideration with numerous other major pieces of legislation, they are often of central and critical importance to the well-being and effective operation of the individual park unit which they affect. Most often, the resolution of these needs will result in improved and more effective administration of particular park units or the general operation of the entire national park system, and usually represent objectives already endorsed by the Congress in earlier legislation. For this reason, it is essential that they be considered and not left unattended in the effort to address matters of more apparent and pressing urgency.●

---

By Mr. HATHAWAY:

S. 2877. A bill entitled the Education Fiscal Assistance Act of 1978; to the Committee on Finance.

EDUCATION FISCAL ASSISTANCE ACT OF 1978

● Mr. HATHAWAY. Mr. President, today, I am pleased to introduce the Educational Fiscal Assistance Act of 1978, to assist taxpayers who are bearing the cost of educating their children. It will also inject Federal funds into school financing so that the burden of real estate taxes on citizens will be lessened.

I do not object to local school districts receiving benefits from Federal tax revenues. I have strongly supported a number of Federal programs to help meet the educational needs of our society. It is my view that devoting Federal funds to education is one of the very best investments that can be made by our society. It is an investment which pays handsome dividends. The individual benefits, the societal benefits, and the economic benefits are great and ultimately cannot be given a dollar figure which is in any way adequate.

At the same time, education represents an investments in ideas—ideas to meet our energy needs, ideas to provide quality, accessible, cost-efficient health care, and ideas to promote sound economic development, with decent jobs and housing for all our citizens. The ideas leading to solutions to these most difficult problems will only come to us through education provided equitably to all our citizens.

Throughout the 15 years I have served on the congressional committees responsible for education legislation, I have consistently supported Federal aid to education, and particularly elementary and secondary education. I believe the Federal Government can and should play a very significant role as a financial partner and source of innovation as long as questions of governance and curriculum are resolved at the State and local levels with full involvement of parents and teachers in fundamental policy decisions.

I have supported the concept of tax credit relief to those who must pay the cost of education for their children, whether the education is at the preschool, primary, secondary, college or vocational school level.

To understand the impact of education in this country, let me highlight a few statistics. In the fall of 1977, there were approximately 49 million children in kindergarden through 12th grade. Public school systems account for almost 44 million of these students and private elementary and secondary schools 5 million. Our country's 2- and 4-year colleges enrolled 11.3 million students in the fall of 1977. An article from the Wall Street Journal has highlighted the tremendous scope of this Nation's educational programs.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD as follows:

KIDS IN KINDERGARTEN DECLINED THIS YEAR BY RECORD NUMBER

WASHINGTON.—Kindergarten enrollment declined by the largest amount on record this school year, the Census Bureau said yesterday.

In a survey of education, the bureau said the number of children attending kindergarten fell to 3.2 million from 3.5 million, almost entirely because of a drop in the birth rate five years earlier.

Since the bureau began keeping enrollment records 30 years ago, kindergarten enrollment has dropped only three times. The biggest previous decline was 128,000 in 1972.

A total of 60 million persons under age 35 were going to all schools in October, a decline of 482,000 from the year before.

"The population of five-year-olds decreased about 8% between 1976 and 1977 as did kindergarten enrollment, reflecting the large drop in the number of births five years earlier," the report said.

Among other education trends found in the October 1977 survey:

The number of college students over age 25 increased to 4.1 million from 3.7 million.

Part-time students in college over age 35 increased about 9% in 1977.

College enrollment of people under 35 remained about 10.2 million. Enrollment of college freshmen increased by about 300,000 after a comparable drop the previous year.

The number of blacks attending college rose slightly to 1.1 million from one million but was double the number enrolled in 1970.

Women attending college remain at about 47% of all college students.

Nursery school enrollment rose to 1.7 million from 1.5 million in 1977.

Elementary school's enrollment dropped to 29.2 million from 29.8 million in the past year.

Students in private schools made up 11% of all elementary school pupils in 1977, down from 15% in the mid-1960s.

High school enrollment was unchanged in October at 16.7 million.

Mr. HATHAWAY. As we are well aware, colleges and universities are funded through a combination of tuition and fee charges, grants from the Federal Government, appropriations from State governments, and contributions and bequests from both alumni and private citizens.

The escalating cost of higher education has been eloquently explained by Senators ROTH, MOYNIHAN, PACKWOOD, and RIBICOFF.

Today's New York Times contains an excellent article on the rising costs of college education and what can be expected in the future. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TUITION AT SOME PRIVATE COLLEGES TO EXCEED $5,000 FOR FIRST TIME

(By Gene Maeroff)

The annual tuition at some of the nation's most prestigious colleges and universities will exceed $5,000 for the first time next fall, and the total costs, including room and board, will amount to more than $8,000, according to the College Entrance Examination Board.

A report of a survey of 2,693 institutions of higher education released by the College Board yesterday showed that the cost of an education at a four-year college would increase by 6 percent the coming academic year. Total costs will average $3,054 at public colleges and $5,110 at private colleges.

In private colleges, the gap between the average costs and those at some of the most expensive institutions is accounted for mainly by differences in tuition rates, which in large part reflect higher faculty salaries and greater overhead.

Some lesser-known private colleges, particularly those with religious affiliations, will have tuitions of less than $3,000, but such Ivy League schools as Yale, Brown and Princeton will have tuitions of more than $5,000.

In Princeton's case, even with an increase of $522 in overall charges, the university is projecting a deficit of $85,000 for next year.

Bennington College in Vermont will have the highest tuition in the country, $6,010, and another small New England institution, Hampshire College in Massachusetts, will have the second highest, $5,450.

The highest tuitions among publicly supported institutions will be in Pennsylvania. Pennsylvania State University, Temple University and the University of Pittsburgh will all have tuitions of about $1,400.

Other public universities that the College Board says will have tuition of more than $1,000 are the University of Michigan, the University of Minnesota, the University of Vermont and the University of New Hampshire.

The announcement of next fall's tuition rates come at a time when Congress is debating a plan that would give parents a tax credit for the tuition they pay.

COST PROBLEM FOUND GROWING

The proposal is opposed by the Carter Administration as inequitable and too costly, but this latest increase in tuitions may add to the support the proposal already has in Congress.

"Not only lower-income families, but also middle-income and upper-income families are finding it increasing difficult to meet the costs of a college education," the College Board said in its report, "Student Expenses at Postsecondary Institutions, 1978-79."

Sensing widespread concern over mounting educational costs, the College Board tried to reassure parents about the prospects for student financial aid, which the organization estimated would amount to $12.3 billion next year.

"Rising costs should not discourage students from considering college attendance," said Elizabeth W. Suchar, director of the College Board's scholarship service. "Financial aid is available to help defray costs. Students, including many from middle-income families, may qualify for financial aid and should apply for funds to help them attend colleges that they may not be able to afford on their own."

STANFORD GIVES WIDE AID

Stanford University in California, for instance, has a policy of meeting the financial need of any student who is admitted. Almost 55 percent of Stanford's 6,500 undergraduates receive some form of assistance.

Next fall, Stanford's tuition will rise to $5,130 and total charges to $7,999. The university's officials say that they intend to continue their policy of aid to students.

Hamilton College in Clinton, N.Y., where tuition will rise next fall by more than 10 percent to a high of $4,625, also meets the financial needs of all its students.

"In making these increases, Hamilton's trustees were well aware of the importance of maintaining the colleges' financial-aid program at a level commensurate with the new fees," said the college's president, J. Martin Carovano. "Additional financial-aid funds for scholarship students will, therefore, be made available to offset those increased charges."

A small, but growing number of institutions of higher education are developing plans to help to protect stndents against tuition increases in the course of their education.

For example, the University of Hartford announced last month the creation of three separate plans to help to hold down tuition.

One of the plans will guarantee freshmen no tuition increase in their sophomore year and "only modest increases in their last two years. Another plan will give an undergraduate student who returns each semester a credit of $50 per semester toward the senior year.

The third plan will give a 50 percent tuition reduction to the brothers and sisters of full-time undergraduates.

Washington University in suburban St. Louis is using a different kind of approach to enable families to guard against tuition increases. Beginning this fall, a freshman who pays for all four years of tuition in advance will not have to pay for increases as they occur. The cost is $17,200.

FEES LOWER IN THE WEST

For the 80 percent of the nation's students attending publicly supported institutions of higher education, there are considerable variations in tuition by region.

Students in the middle Atlantic states—New York, New Jersey, Pennsylvania, Delaware and Maryland—will pay more than twice as much as students in the West and the Southwest.

"I am concerned about a feeling that is spreading among the public and among legislators that students can and should pay more for their education," said Wesley W. Posvar, chancellor of the University of Pittsburgh. "This attitude is eroding the former commitment to low tuition."

In all parts of the country, public two-year community colleges will continue to charge the lowest tuitions, according to the College Board. The average tuition at the two-year institutions, where the vast majority of students are commuters, will be $408.

Mr. HATHAWAY. Public schools are primarily financed through local property and State sales taxes. Sales taxes are generally regressive in nature, with the tax on the purchasing of life's necessities often absorbing a much bigger share of disposable income of those least able to afford it. Similarly, property taxes can be insidious in their impact, hitting hardest those individuals on fixed incomes, while granting more favorable treatment to commercial properties.

In contrast to local property taxes and States sales taxes, which form the backbone of many States school financing sources, the Federal tax system collects revenues on the basis of income, with adherence to a progressive rate structure.

Although school policy should continue to be established at the State and local levels, school financing should not rely exclusively or dominantly on these regressive mechanisms. Utilization of Federal tax revenues for partially funding local educational expenses thus has the substantial benefit of insuring that those most able to pay are most relied upon. Conversely, to the extent that utilization of Federal funds shifts the burden from those individuals least able to pay and those regions of the Nation less able to generate sufficient revenues at the State and local levels, overall quality and equity will be promoted.

For all these reasons, I believe we must develop an alternative system of tax assistance for education. To this end, I am today introducing the Educational Fiscal Assistance Act of 1978.

This bill provides a $100 refundable tax credit to a taxpayer for each dependent child who is enrolled in a primary, secondary, vocational, technical school, college or university. The tax credit would be phased in for full-time college, university, vocational and technical school students beginning in 1978; for elementary and secondary students in 1981; and for part-time students in 1982.

I believe that this tax credit approach will provide both fiscal relief to taxpayers with children in eligible educational programs.

Mr. President, in order that my colleagues might be more fully informed of my intentions and the need for this reform, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2877

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Education Fiscal Assistance Act of 1978."

SEC. 2. CREDIT FOR EDUCATIONAL ASSISTANCE.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting before section 45 the following new section:

"SEC. 44C. EDUCATION TAX CREDIT.

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this subtitle for the taxable year, the amount of $100 for

each child of such individual who is a student in an eligible educational institution.

"(b) PHASE-IN WITH RESPECT TO CERTAIN STUDENTS.

"(1) SECONDARY AND ELEMENTARY STUDENTS.—No credit shall be allowed under subsection (a) with respect to any child of the taxpayer who is a student at a secondary school (including a vocational secondary school) or elementary school, for any taxable year beginning before January 1, 1981.

"(2) PART-TIME STUDENTS.—No credit shall be allowed under subsection (a) with respect to any child of the taxpayer who is not a full time student for any taxable year beginning before January 1, 1982.

"(3) GRADUATE STUDENTS.—No credit shall be allowed under subsection (a) with respect to any child of the taxpayer to the extent that the child is pursuing a course of instruction which is attributable to a graduate degree program.

"(c) DEFINITIONS.—For purposes of this section—

"(1) ELIGIBLE EDUCATIONAL INSTITUTION.—The term 'eligible education institution' means—

"(A) an institution of higher education;

"(B) a vocational school;

"(C) a secondary school; or

"(D) an elementary school.

"(2) INSTITUTION OF HIGHER EDUCATION.—The term 'institution of higher education' means an institution described in section 1201(a) or 491(b) of the Higher Education Act of 1965 (as in effect on January 1, 1978).

"(3) VOCATIONAL SCHOOL.—The term 'vocational school' means an area vocational education school (as defined in section 195(2) of the Vocational Education Act of 1963, as in effect on January 1, 1978) which is located in any State.

"(4) ELEMENTARY AND SECONDARY SCHOOLS.—The terms 'elementary school' and secondary school' mean, respectively, any elementary or secondary school (as defined in subsections (c) and (h) of section 801 of the Elementary and Secondary Education Act of 1965 as in effect on January 1, 1978)—

"(A) of a local educational agency (as defined in section 801(f) of such Act as in effect on such date); or

"(B) which is privately operated but only if it is—

"(i) accredited or approved under State law (or, in the case of a school in a State which has no procedure for the accreditation or approval of privately operated schools, which meets the requirements of State law relating to compulsory school attendance), and

"(ii) exempt from taxation under section 501(a) as an organization described in section 501(c)(3). The terms 'elementary school' and 'secondary school' include facilities which offer education for individuals who are physically or mentally handicapped as a substitute for public elementary or secondary education.

"(5) CHILD.—The term 'child' means an individual who bears the relationship to the taxpayer described in paragraph (1) or (2) of section 152(a) and with respect to whom such individual is entitled to a deduction under section 151(e).

"(6) FULL-TIME STUDENT.—For purposes of this subsection, the term 'full-time student' means an individual who, during any 4 calendar months during the calendar year in which the taxable year begins, is a full-time student at an eligible educational institution.

"(d) TAXPAYER WHO IS A DEPENDENT OF ANOTHER TAXPAYER.—No credit shall be allowed to a taxpayer under subsection (a) if the child is a dependent of any other person during a taxable year beginning with or within the taxable year of the taxpayer.

(b) REFUND OF EXCESS CREDIT.—Subsection (b) of section 6401 of such Code (relating to excessive credits) is amended—

(1) by striking out "and 43 (relating to earned income credit)," and inserting in lieu thereof "43 (relating to earned income credit), and 44C (relating to credit for educational expenses),", and

(2) by striking out "39 and 43" and inserting in lieu thereof "39, 43, and 44C".

(c) LIMITATION ON EXAMINATION OF BOOKS AND RECORDS.—Section 7605 of such Code (relating to time and place of examination) is amended by adding at the end thereof the following new subsection:

"(d) EXAMINATION OF BOOKS AND RECORDS OF CHURCH-CONTROLLED SCHOOLS.—Nothing in section 44C (relating to credit for educational expenses) shall be construed to grant additional authority to examine the books of account, or the activities, of any school which is operated, supervised, or controlled by or in connection with a church or convention or association of churches (or the examination of the books of account or religious activities of such church or convention or association of churches) except to the extent necessary to determine whether the school is an eligible educational institution within the meaning of section 44C(c)(2).".

(d) EXPEDITED REVIEW OF CONSTITUTIONALITY OF EDUCATIONAL TAX CREDIT.—

(1) CERTIFICATION OF QUESTIONS OF CONSTITUTIONALITY.—In any action brought in a district court of the United States, including an action for declaratory judgment or injunctive relief, concerning the constitutionality of any provision of section 44C of the Internal Revenue Code of 1954 (relating to credit for educational expenses) or any other provision of such Code relating to such section, the district court shall certify immediately all quesions of constitutionality of such provision of the United States Court of Appeals for the circuit involved, which shall hear the matter sitting en banc.

(2) APPEAL TO SUPREME COURT.—Notwithstanding any other provision of law, any decision on a matter certified under paragraph (1) shall be reviewable by appeal directly to the Supreme Court of the United States. Such appeal shall be brought no later than 20 days after the decision of the Court of Appeals.

(3) EXPEDITED CONSIDERATION.—It shall be the duty of the Court of Appeals and of the Supreme Court of the United States to advance on the docket and to expedite to the greatest possible extent the disposition of any matter certified under paragraph (1).

(4) SEPARABILITY.—If any provision of section 44C of the Internal Revenue Code of 1954 (or any other provision of such Code relating to such section), or the application thereof to any person or circumstances, is held invalid, the remainder of the provisions of such section and the application of such provisions to other persons or circumstances, shall not be affected.

(e) DISREGARD OF REFUND.—Any refund of Federal income taxes made to any individual, and any reduction in the income tax liability of any individual, by reason of section 44C of the Internal Revenue Code of 1954 (relating to credit for educational expenses) shall not be taken into account as income or receipts for purposes of determining the eligibility of such individual or any other individual for benefits or assistance, or the amount or extent of benefits or assistance, under any Federal program of educational assistance or under any State or local program of educational assistance financed in whole or in part with Federal funds.

(f) CONFORMING AMENDMENTS.—

(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting immediately before the item relating to section 45 the following:

"Sec. 44C. Education tax credit."

(2) Subsection (c) of section 56 of such Code (defining regular tax deduction) is amended by striking out "credits allowable under—" and all that follows and inserting in lieu thereof "credits allowable under subpart A of part IV other than under sections 31, 39, and 43.":

SEC. 3. EFFECTIVE DATE.

The amendments made by Section 2 of this Act shall apply to taxable years beginning after December 31, 1977, and shall cease to apply to any taxable year beginning after December 31, 1985.

---

By Mr. MAGNUSON (for himself and Mr. INOUYE):

S. 2878. A bill to amend the Central, Western, and South Pacific Fisheries Development Act to increase the appropriation authorization through fiscal year 1982, to expand the U.S. fisheries development effort, and to cooperate in the formation and research of the South Pacific Regional Fishery Agency, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. MAGNUSON. Mr. President, today I am introducing a bill that amends Public Law 92-444 in order to authorize increase efforts in the research and development of tuna and other latent fishery resources in the Central, Western, and South Pacific. Although this area is rich in tuna, and potentially other species as well, these fisheries are still largely in an undeveloped and underutilized state. This is due in large part to the lack of adequate research and development efforts.

At the present time, the nations of the South Pacific are asserting jurisdiction over fishery resources out to 200 miles, and are establishing an organization, entitled the South Pacific Regional Fishery Agency, to oversee the management of the species within this area. The new 200-mile jurisdictional assertion will add an estimated 7-million square miles of exclusive fishery zones to existing territorial waters. The nations involved include Australia, the Cook Islands, Fiji, the Gilbert Islands, Nauru, New Zealand, Niue, Papua New Guinea, the Solomons, Tonga, Tuvalu, and Western Samoa. The United States and its trust territories are not members of the parent South Pacific forum; however negotiations are presently underway which will attempt to bring the United States into this regional fishery agency.

The bill I am introducing today has two principal goals. The first is to reauthorize appropriations for Public Law 92-444, the Central Western and South Pacific Fisheries Development Act, through fiscal year 1982. This act was enacted in 1972 to assist in the development of the underutilized tuna resources in the area. The Secretary of Commerce is authorized under that act to carry out, indirectly or by contract, a program for the development of the tuna and other latent fisheries resources of the area. The program includes: Exploration for, and stock assessment of, tuna and other fish; improvement of harvesting techniques; gear development; biological resource monitoring; and an economic evaluation of the potential for tuna and

other fisheries. This program is presently carried out in the Central Pacific area by the Pacific Tuna Development Foundation (PTDF).

Although the act became effective in 1972, the tuna program was not initiated by the Department of Commerce until fiscal year 1975. Even when it was initiated, the Department did not request appropriations under the 1972 act but rather obtained funds from the program from the so-called Saltonstall-Kennedy trust fund (15 U.S.C. 713c–3). These Federal funds are being supplemented by contributions from the members of the Pacific Islands Development Commission and the tuna industry. The current authorization of Public Law 92–444 expires on September 30, 1979. However, because the Saltonstall-Kennedy trust fund is being used to capacity for other purposes, this bill is necessary to continue this worthwhile program.

The second goal of this bill is to demonstrate the interest and commitment of the Congress in developing the fishery resources of the South and Western Pacific area. Should the United States become a member of the South Pacific Regional Fishery Agency, this bill would authorize the Secretary of Commerce, in consultation with representatives of all member nations of the Agency, the Secretary of State, and the industry, to develop and carry out a program for research and development of the fishery resources of the region. Such a program would have as its objective not only increasing the capacity to harvest and to understand the species in the area, but also to develop the resources of the area and to facilitate bringing increased economic benefits to all the member nations through increased availability of fishery resources. Thus, for example, the bill provides that the results and findings of the research and development projects carried out under Public Law 92–444 and this bill shall be made available to any interested member nation of the agency. It is contemplated that the Secretary would work closely with the member nations of the agency, as well as the other enumerated parties, in seeking to maximize the benefits which may result from such development efforts.

In addition to these economic and developmental benefits, this bill, by expanding the availability of tuna in the Central, Western and South Pacific, should offer relief to the United States tuna fleet, which is now facing the probability of being squeezed out of a significant share of the tuna catch in the Eastern Pacific Ocean. A further advantage of the Central, Western and South Pacific tuna stocks is that the principal species, skipjack, is not associated with porpoise populations, and even the yellowfin do not have the same relationship with porpoises as the yellowfin in the Eastern Pacific. Thus, development of these tuna fisheries will not exacerbate the tuna-porpoise problem, but on the contrary, may offer some relief.

This bill increases the authorization for appropriations for next year to $4 million and for the following 3 fiscal years to $5 million. The authorization would cover both the present program of the Pacific Tuna Development Foundation through completion in 1982, and all programs which may arise after the formation of the South Pacific Regional Fishery Agency. Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2878

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Central, Western, and South Pacific Fisheries Development Act (16 U.S.C. 758a) is amended as follows:

(1) Section 3 of such Act is amended by striking out "and" immediately after "institutions," and inserting after "industry" the following: ", and all appropriate member nations of the South Pacific Regional Fishery Agency (hereinafter referred to in this Act as the 'Agency')".

(2) Such Act is further amended by inserting immediately after section 3 the following:

"SEC. 4. In addition to the authority granted in section 2, the Secretary, in consultation with the Secretary of State, representatives of all interested member nations of the Agency, and those parties set forth in section 3, may establish in accordance with section 2, a cooperative three year program for the development of tuna and other latent fishery resources of the Central, Western, and South Pacific Ocean to be completed within one year following official formation of the Agency and contingent upon the availability of funds. The Secretary shall make available to all interested member nations of the Agency the results and findings of research or development projects carried out under this Act."

(3) Sections 4, 5, 6, and 7 of such Act are redesignated sections 5, 6, 7, and 8, respectively.

SEC. 2. Section 8 of such Act, as redesignated, is amended by striking out "$3,000,000" and inserting in lieu thereof "$4,000,000, and for each of fiscal years 1980, 1981, and 1982 the sum of $5,000,000,".

---

By Mr. JAVITS (for himself, Mr. WILLIAMS, Mr. SCHWEIKER, Mr. RANDOLPH, Mr. CHAFEE, and Mr. DOLE):

S. 2879. A bill to amend the Public Health Service Act to establish a Commission on National Primary Health Care Needs; to establish hospital-affiliated primary care centers; to establish research and demonstration projects for primary care; to continue the assistance to community health centers, migrant health centers, and the National Health Service Corps; and for other purposes; to the Committee on Human Resources.

PRIMARY HEALTH CARE ACT OF 1978

Mr. JAVITS. Mr. President, today I am pleased to introduce with Senators WILLIAMS, SCHWEIKER, RANDOLPH, and CHAFEE, the Primary Health Care Act of 1978. This bill is the outgrowth of a provision—which I authored—included in S. 2474, the Health Services Extension Act of 1978, which would authorize the establishment of hospital-affiliated primary care centers under section 330 of the Public Health Service Act.

Mr. President, the bill I am introducing today is designed to give renewed emphasis to this Nation's efforts to meet the primary health care needs of its citizens. Although we live today in a world which transplants organs, uses microscopic instruments and laser beams to detect and treat diseases, and employs highly sophisticated technological innovations to prolong life, we have come to neglect the most basic health care needs of our people.

Today approximately 49 million people live in parts of the country which are considered to be deficient in personal health services. For many of these people, living in medically underserved areas means that medical resources in the form of manpower and facilities are scarce or nonexistent. When medicare and medicaid were enacted more than 10 years ago, these programs were hailed as the means by which this country would overcome the growing dilemma of limited access to high quality medical care by the elderly and indigent. Unfortunately, we have seen that these efforts fall short of their mark. While the lessons of medicare and medicaid are many, profound—and costly—one of the most important lessons to be heeded is that money alone will not solve the health care problems of the Nation. Without a corresponding availability of manpower and facilities, barriers which now prevent access to health care services cannot be removed.

Over the years, an increasing proportion of physicians have tended to specialize and subspecialize. In 1930, approximately 95 percent of all practicing physicians devoted the bulk of their time to the delivery of primary care services; by 1975, this percentage had plummeted to roughly 40 percent. The trend toward specialization forced physicians to cluster in parts of the country where access to highly sophisticated medical equipment and a large, comparatively affluent population base was readily available. This twofold pattern eventually brought us to the situation which plagues us today: Roughly a quarter of our entire population—people who live in sparsely populated or economically depressed urban sections of the country—suffer from inadequate medical resources.

A recent study in New York City, for instance, has concluded that great portions of the city are devoid of remotely adequate medical services. Essentially these areas represent medical deserts with only an occasional doctor's office or city or Federal clinic standing as an oasis for health care.

For years we in the Congress have engaged in debate and dispute over the need for a national health insurance program. The merits of the issue aside, of what benefit would national health insurance be to its recipients if adequate medical facilities and manpower are not available to implement the system? We cannot expect medical services which we now lack suddenly to materilize in parts of the country which have long been neglected merely because we have found the money to pay for our citizens' care.

It is my hope that through the coop-

erative efforts of the Congress and the administration we will, over the next few years, focus on assuring that necessary resources are made available in medically underserved parts of the country. I believe the legislation I am introducing today will move us closer to this goal.

This bill, the Primary Health Care Act of 1978, includes provisions for simultaneously addressing the long-range primary health care needs of the Nation while immediately increasing the number of facilities available for the delivery of primary care.

Specifically, the bill authorizes the establishment of a Presidential Commission on National Primary Health Care Needs whose mandate will be to assess the Nation's primary health care needs and develop a comprehensive strategy—focusing on both manpower and facilities requirements and utilizing resources from both the public and private sectors—for meeting these needs. The commission will also be responsible for conducting a special study designed to determine if Federal health facilities such as those owned and operated by the Department of Defense and the Veterans' Administration can be utilized in the short term to provide medical services in medically underserved areas where no other sources of care exist.

In addition, my bill would establish a specific section in the Public Health Service Act entitled "Primary Health Care" which would contain all existing and new authorities for primary health care programs. For example, the bill redesignates authorities for community health centers (sec. 310), migrant health centers (sec. 319) and the National Health Service Corps (secs. 331–338) so that they will appear under the new "Primary Health Care" section. My hope is that as future primary health care authorities are written, their consolidation into one permanent section will lead to a greater degree of policy coordination in program management.

More importantly, however, the bill contains the same significant increases in authorization for community health centers and migrant health centers which I as a cosponsor agreed to include in S. 2474, the Health Services Extension Act of 1978. Currently funding authorizations for these two programs are approximately $290 million. These funds coupled with appropriations from previous years have established more than 700 community and migrant health centers—centers which now provide primary health services to an estimated 5.1 million persons. This proposal would increase the authorizations for these programs by over $200 million over the next 5 years, increasing significantly our ability to establish new community and migrant health centers.

The bill also provides a new authority for the establishment of hospital-affiliated primary care centers. Generally, this provision permits the Secretary of HEW to award project grants for the purpose of establishing and operating primary care centers to hospitals located in areas where there is such a shortage of personal health services that the hospital's emergency room or outpatient department becomes the neighborhood's "clinic" or "physician's office."

I am hopeful that these primary care centers will achieve two goals: First, that improvements can be made in quality of care by converting the delivery system from one which, by its very nature, provides periodic, episodic care to one which concentrates on continuity. Second, I hope to reduce the cost of primary care services which are now delivered by hospitals by moving these services from the costly emergency rooms and outpatient departments into more appropriate—and hopefully more cost efficient—settings.

The bill authorizes $35 million, $60 million, and $85 million for fiscal years 1979, 1980, and 1981, respectively, for the hospital-affiliated primary care centers. The funds are intended to establish between 20 and 30 centers per year providing improved primary care services to approximately 1 to 1.5 million people.

Finally, the bill includes a new authority for research and demonstration projects for primary care in medically underserved areas. Such projects will focus on manpower recruitment and retention; experiments with differing types of organizational and provider models; programs aimed at increasing the productivity, effectiveness, and efficiency of health care providers; programs in health promotion, disease prevention, and health education; demonstrations in the coordination and integration of health and social service programs, and others. The bill authorizes $20 million, $25 million, and $30 million for both urban areas and rural areas for purposes of carrying out approved research and demonstration projects.

Mr. President, I believe that the elements of this bill will do much to improve the quality and accessibility of primary health care services in this country, and I hope my colleagues in the Congress will give this proposal their full support. Mr. President, I ask unanimous consent that the text of the bill and a detailed explanation of the bill be printed in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 2879

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Primary Health Care Act of 1978".

TABLE OF CONTENTS

Sec. 1. Short Title.
Sec. 2. Findings and Declaration of Purpose.
Sec. 3. Establishment of Commission on National Primary Health Care Needs.
Sec. 4. Commission Duties.
Sec. 5. Administrative Provisions.
Sec. 6. Designation of "Primary Health Care" Section.
Sec. 7. Community Health Centers.
Sec. 8. Hospital-Affiliated Primary Care Centers.
Sec. 9. Migrant Health.
Sec. 10. Research and Demonstration Projects for Primary Care.
Sec. 11. Health Professionals for Medically Underserved Areas.
Sec. 12. Evaluation.
Sec. 13. Miscellaneous.

FINDINGS AND DECLARATION OF PURPOSE

SEC. 2. (a) The Congress finds that—

(1) although the achievement of equal access to quality health care at a reasonable cost is a stated priority of the Federal Government, there remains a wide disparity throughout the Nation regarding the cost, quality and availability of medical care services;

(2) despite Federal financing programs designed to eliminate barriers to medical care services for the poor and the elderly, there remains a shortage of health resources, especially in medically underserved inner city and rural areas;

(3) residents of inner city and rural medically underserved areas lack the availability of basic and appropriate services for health promotion, disease prevention and primary care; and

(4) the Federal Government lacks a comprehensive and coordinated effort for systematically reducing the maldistribution of health resources based on geography and differences in income level.

(b) It is the purpose of this Act—

(1) to develop and promote a long-term strategy for addressing primary health care needs;

(2) to alleviate the shortage of health resources in both urban and rural medically underserved areas of the country; and

(3) to provide authorities for research and demonstration projects which develop innovative approaches for the organization and delivery of primary care.

ESTABLISHMENT OF COMMISSION ON NATIONAL PRIMARY HEALTH CARE NEEDS

SEC. 3. (a) There is established a Commission to be known as the Commission on National Primary Health Care Needs (hereinafter in this part referred to as the "Commission").

(b) (1) The Commission shall be composed of 21 members appointed by the President. The President shall select members of the Commission from individuals distinguished in the fields of medicine, health promotion, disease prevention, primary care, medical care organization and delivery and consumers of health care. Members of the Commission shall be appointed for the life of the Commission. The President shall appoint the members of the Commission within sixty days of the date of the enactment of this Act.

(2) Within the Commission there shall be a five member panel on urban issues and a five member panel on rural issues. Commission members assigned by the Chairperson to such panels shall represent the following interests: one urban or rural consumer of primary health care; one health manpower expert; one medical care organization and delivery expert (including facilities and services); one health promotion and disease prevention expert, and one primary health care expert. The remaining eleven members shall include three consumers and eight experts from categories described in subsection (b)(1).

(3) The Secretary of Health, Education, and Welfare, the Secretary of the Department of Defense, the Administrator of the Veterans' Administration, and the Chairperson of the National Council on Health Planning and Development shall be ex-officio members of the Commission.

(4) (A) Except as provided in subparagraph (E), members of the Commission shall each be entitled to receive the daily equivalent of the annual rate of the basic pay in effect for grade GS–18 of the General Schedule for each day (including traveltime) during which they are engaged in the actual performance of the duties of the Commission.

(B) Members of the Commission who are full-time officers or employees of the United

States shall receive no additional pay on account of their service on the Commission.

(C) While away from their homes or regular places of business in the performance of duties of the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703(b) of title 5 of the United States Code.

(c) The Chairperson of the Commission shall be selected by the President by and with the advice and consent of the Senate. The Vice-Chairperson shall be elected by the members of the Commission.

(d)(1) The Commission may appoint and fix the pay of such staff personnel as it deems desirable, which shall include at least 12 professionals and appropriate support personnel. Such personnel shall be appointed subject to the provisions of title 5, United States Code, governing appointments in the competitive service, and shall be paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(2) The Commission may appoint and compensate, at a rate not to exceed the annual rate of basic pay in effect for grade GS–18 of the General Schedule, an executive director, without regard to the provisions of title 5, United States Code, governing appointment in the competitive service, and the provisions of chapter 51 and subchapter III of chapter 53 of such title, relating to classification and General Schedule pay rates, who shall administer the full-time daily activities of the Commission.

(3) The Commission may procure temporary and intermittent services to the same extent as is authorized by section 3109(b) of title 5 of the United States Code, but at rates for individuals not to exceed the daily equivalent of the annual rate of basic pay in effect for grade GS–18 of the General Schedule.

COMMISSION DUTIES

SEC. 4. (a) The Commission shall carry out the following:

(1) The Commission shall issue a report to Congress within 18 months after the date of enactment of this Act on the national primary health care needs. Such report shall give special attention to the varying needs of both urban and rural areas and shall include—

(A) the development of a national strategy (including public and private efforts) to assure equal access to primary health care for all individuals regardless of location or income;

(B) an evaluation of Federal efforts to correct the maldistribution of health resources by geography and income;

(C) an assessment of the numbers and locations of medically underserved people, including a system to annually update efforts to meet the special health resource needs of such populations; and

(D) an assessment of the resources necessary to provide equal access to primary health care for all individuals, including research and development, services, manpower, and facilities.

(b)(1) The Commission shall conduct a special study to determine if the Department of Defense, the Veterans' Administration and other Federal health resource facilities can be appropriately utilized in medically underserved areas to provide needed medical services, with special emphasis on the provision of primary care.

(2) The Commission may conduct such special studies as it considers appropriate to carry out the purposes of this section.

ADMINISTRATIVE PROVISIONS

SEC. 5. (a) The Commission may for the purpose of carrying out its duties under this Act hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence as the Commission deems advisable.

(b) The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out its duties. Upon the request of the Chairperson of the Commission, the head of such department or agency shall furnish such information to the Commission.

(c) The Commission shall complete its duties under this Act not later than the expiration of the 24-month period beginning on the first day of the first month that follows the date on which all members of the Commission have taken office. The Commission shall make periodic reports to the President, the Congress, and the Secretary respecting its activities under this Act.

(d) For the purposes of this subpart the term "primary care" means first contact medical care services, including health promotion and disease prevention, and continuous patient management throughout secondary and tertiary treatment.

(e) There are authorized to be appropriated to carry out the provisions of sections 3, 4, and 5, $5,000,000

DESIGNATION OF "PRIMARY HEALTH CARE" SECTION

SEC. 6. Title III of the Public Health Service Act is amended by—

(1) redesignating part H (and all cross references thereto) as part L;

(2) inserting after section 369 the following:

"PART H—PRIMARY HEALTH CARE

"SUBPART I—PRIMARY HEALTH CENTERS.".

COMMUNITY HEALTH CENTERS

SEC. 7. (a) Title III of the Public Health Service Act is further amended by transferring section 330 to part H and redesignating such section (and all cross references thereto) as section 370.

(b) Section 370(e)(2) (as designated by subsection (a)) is amended by—

(i) striking "and" after clause (1);

(ii) striking the period after clause (J) and substituting "; and"; and

(iii) adding the following new clause:

"(K) the center, in accordance with regulations promulgated by the Secretary, has developed an ongoing referral relationship with one or more of the hospitals located in its catchment area.".

(c) Section 370 (as redesignated by subsection (a)) is amended by adding the following at the end thereof:

"(h) The Secretary shall establish, by regulation, a plan to allow community health centers to retain earned income from the operations of the center if the income is used to—

"(1) expand or improve the services of the center;

"(2) expand the population eligible to utilize the services of the center;

"(3) make managerial or physical improvements to the center; or

"(4) establish a reserve fund for use in conversion to a prepaid reimbursement modality.".

(d) Section 370(g)(1) (as redesignated by subsection (a)) is amended by striking out "and" after "1977,", and inserting before the period at the end of the sentence thereof the following: ", $10,000,000 for the fiscal year ending September 30, 1979, $10,000,000 for the fiscal year ending September 30, 1980, $10,000,000 for the fiscal year ending September 30, 1981, $10,000,000 for the fiscal year ending September 30, 1982, and $10,000,000 for the fiscal year ending September 30, 1983".

(e) Section 370(g)(2) (as redesignated by subsection (a)) is amended by striking out "and" after "1977,", and inserting before the period at the end of the sentence thereof the following: ", $320,000,000 for the fiscal year ending September 30, 1979, $352,000,000 for the fiscal year ending September 30, 1980, $387,200,000 for the fiscal year ending September 30, 1981, $425,900,000 for the fiscal year ending September 30, 1982, and $468,500,000 for the fiscal year ending September 30, 1983".

HOSPITAL-AFFILIATED PRIMARY CARE CENTERS

SEC. 8. Part H of title III is further amended by adding after section 370 the following new section:

"HOSPITAL-AFFILIATED PRIMARY CARE CENTERS

"SEC. 371. (a) For purposes of this section:

"(1) The term 'community hospital' means either a public general hospital, owned and operated by a State, county or local unit of government, or a private nonprofit community hospital either of which primarily serves a medically underserved population as defined in section 370(b)(3).

"(2) The term 'hospital-affiliated primary care center' (hereinafter referred to as 'primary care center') means a distinct administrative unit of a community hospital, located in or adjacent to the hospital, which:

"(A) delivers primary health services (as defined in section 370(b)(1), except that the requirement to provide emergency medical services shall be fulfilled by referral to the emergency room of the community hospital) to a catchment area which is determined by the hospital and approved by the Secretary;

"(B) provides referral to supplemental health services as defined in section 370(b)(2);

"(C) provides referral to emergency medical services and authorized access to patient medical records on a 24-hour a day, seven day a week basis; and

"(D) provides information on the availability and proper use of health services provided by the community hospital and the primary care center.

"(3)(A) The term 'primary care group practice' means any combination of three or more primary care physicians (as defined in section 771(b)(2)(F)((ii)) who are organized to provide primary health services in a manner which is consistent with the needs of the population to be served; who are located in or adjacent to the community hospital; who have admitting privileges to the community hospital; and who are either:

"(i) salaried by the hospital such that all members of the group practice are full time in the hospital and a majority of the members of the group practice is full time in the primary care center; or

"(ii) organized into a legal entity (partnership, corporation or professional associatoin) which has a contract approved by the Secretary with the community hospital to provide primary health services. The group shall have an income distribution formula which shares the income and expenses of the group in a systematic manner; all members of the group practice shall devote full-time to the fulfillment of the contract.

"(B) In designated health manpower shortage areas (as defined in section 375 as redesignated under section 11 of the Primary Health Care Act of 1978) where there is an approved application for assignment of National Health Service Corps personnel, the Secretary may assign National Health Service Corps personnel in fulfillment of the requirements of subparagraph (3)(A) where the center would otherwise be unable to form a group practice. The psysician staff may not be composed entirely of National Health Service Corps personnel.

"(C) Physicians in specialties other than primary care specialties may become members of the group practice as needed, except that such physicians may not be used to ful-

fill the requirements of subparagraph (b)(2)(C).

"(4) The term 'primary care resident' means a graduate physician in training, whose training program is approved by appropriate certifying bodies and is in a primary care specialty (general internal medicine, general pediatrics, and family practice) and whose training program requires that at least 40 percent of patient care responsibilities during the last two years of board-eligibility training requirements are in ambulatory care.

"(b)(1) The Secretary may make grants to community hospitals to assist such hospitals in planning, developing and operating primary care centers in medically underserved areas.

"(2) To be eligible for a grant under this subsection, the community hospital must submit an application which contains or is supported by the following assurances, satisfactory to the Secretary—

"(A) that the services of the primary care center shall be delivered through a primary care group practice. Primary health services may be delivered by primary care residents if such services are delivered under the direction of a member of the group practice, and if the primary care resident is assigned to the primary care center for a period of not less than two years. Medical and other health science students may receive primary care training in the primary care center. In no case shall the obligations of the full-time members of the group practice also be full time in the teaching of residents and students. The Secretary shall issue regulations to assure that teaching does not detract significantly from the efficiency and productivity of the actual delivery of service in the primary care center,

"(B) that, to the extent practicable, primary health services in the community hospital shall be delivered only through the primary care center and that qualified personnel trained in triage will be placed in the emergency room, the outpatient department and the primary care center to screen and direct patients to the appropriate location for care,

"(C) that each patient of the primary care center will have an identified member of the group practice who is responsible for the continuous management of the patient when the patient requires referral (inpatient or outpatient) or emergency services,

"(D) that, to the extent practicable, excess facilities and equipment in or owned by the community hospital will be converted for use in the primary care center.

"(E) that the hospital and the primary care center shall avoid unnecessary duplication of facilities and equipment, except that the primary care center may install appropriate support equipment for routine primary health services,

"(F) that the primary care center shall be maintained as a separate and distinct cost and revenue center for accounting purposes. Only such costs which are clearly associated with the provision of services in the primary care setting may be assigned to the primary care center. Inpatient-related costs and costs associated with the education and training of residents, medical and other health science students may not be calculated into the costs of operating the primary care center.

"(G) that the primary care center shall be operated in accordance with all the requirements for community health centers in subsection (e) except for paragraph (2)(G) thereof. The hospital shall have an advisory board which is composed of individuals, a majority of whom are health consumers of the hospital's catchment area. The board shall participate in the development of the application for a grant under this section and shall participate in the development of any renewal grants. The Secretary shall not approve an application for a grant under this section unless it has been approved by the advisory board. When the center is operational, the advisory board shall meet at least six times per year to review the operations of the center to develop recommendations to the hospital's governing board concerning the types of services to be provided and the operation of the center, and

"(H) that the primary care center shall maintain an information program for its patients which fully discloses—

"(i) the covered professional services and referral capabilities offered by the primary care center, and

"(ii) the method by which patients of the primary care center may resolve grievances respecting billing for covered professional services or the quality of the covered professional services.

"(3) Grants under this subsection may be used for covering the costs associated with (A) planning, (B) developing (including modernization and renovation of space), and (C) operating primary care centers.

"(c) The Secretary shall, upon request, provide necessary technical or other nonfinancial assistance (including fiscal and program management assistance and training in such management) to a community hospital to assist it in developing plans for, and in operating, a primary care center. Funds appropriated under this section may be used to carry out the purposes of this subsection.

"(d) The Secretary shall establish, by regulation, a plan to allow primary care centers to retain earned income from the operations of the center if the income is used to—

"(1) expand or improve the services of the center;

"(2) expand the population eligible to utilize the services of the center;

"(3) make managerial or physical improvements to the centers; or

"(4) establish a reserve fund for use in conversion to a prepaid reimbursement modality.

"(e) There are authorized to be appropriated for the purpose of making payments for grants under this section $35,000,000 for the fiscal year ending September 30, 1979, $60,000,000 for the fiscal year ending September 30, 1980, and $85,000,000 for the fiscal year ending September 30, 1981. Not more than $500,000 per project may be used for planning and development.".

MIGRANT HEALTH

SEC. 9. (a) Title III of the Public Health Service Act is further amended by transferring section 319 to part H and redesignating such section (and all cross references thereto) as section 372.

(b) Section 372(f) of the Public Health Service Act (as redesignated by subsection (a)) is amended by adding at the end thereof the following new paragraph:

"(5) The Secretary shall establish, by regulation, a plan to allow migrant health centers to retain earned income from the operations of the center if the income is used to—

"(A) expand or improve the services of the center;

"(B) expand the population eligible to utilize the services of the center;

"(C) make managerial or physical improvements to the center; or

"(D) establish a reserve fund for use in conversion to a prepaid reimbursement modality.".

(c)(1) Section 372(h)(1) of the Public Health Service Act (as redesignated by subsection (a)) is amended by striking "and" after "1977," and inserting before the period at the end of the first sentence the following: ", $4,000,000 for the fiscal year ending September 30, 1979, $4,000,000 for the fiscal year ending September 3, 1980, $4,000,000 for the fiscal year ending September 30, 1981, $4,000,000 for the fiscal year ending September 30, 1982, and $4,000,000 for the fiscal year ending September 30, 1983".

(2)(A) Section 372(h)(2) (as redesignated by subsection (a)) is amended by striking out "and" after "1977,", and inserting before the period at the end of the first sentence thereof the following: ", $40,000,000 for the fiscal year ending September 30, 1979, $44,000,000 for the fiscal year ending September 30, 1980, $48,400,000 for the fiscal year ending September 30, 1981, $53,240,000 for the fiscal year ending September 30, 1982, and $58,564,000 for the fiscal year ending September 30, 1983".

(B) The third sentence of section 372(h)(2) is amended by striking out "and" after "1977,", and inserting before the period at the end thereof the following: ", the fiscal year ending September 30, 1979, the fiscal year ending September 30, 1980, the fiscal year ending September 30, 1981, the fiscal year ending September 30, 1982, and the fiscal year ending September 30, 1983".

(3) Section 372(h)(3) (as redesignated by subsection (a)) is amended by striking out "and" after "1977,", and inserting before the period at the end of the sentence thereof the following: ", $6,000,000 for the fiscal year ending September 30, 1979, $6,600,000 for the fiscal year ending September 30, 1980, $7,260,000 for the fiscal year ending September 30, 1981, $7,986,000 for the fiscal year ending September 30, 1982, and $8,784,600 for the fiscal year ending September 30, 1983".

RESEARCH AND DEMONSTRATION PROJECTS FOR PRIMARY CARE

SEC. 10. Part H of title III of the Public Health Service Act is further amended by adding after section 372 the following:

"SUBPART II—RESEARCH AND DEMONSTRATION PROJECTS FOR PRIMARY CARE

"GRANTS AND CONTRACTS FOR PRIMARY CARE RESEARCH AND DEMONSTRATION PROJECTS

"SEC. 373. (a) The Secretary is authorized to make grants to and enter into contracts with nonprofit private and public organizations and providers of health and dental care to demonstrate new, improved, or expanded primary health and dental care delivery mechanisms in the community setting for medically underserved populations.

"(b) For purposes of this section:

"(1) The term 'medically underserved population' means the population of an urban or rural area designated by the Secretary as an area with a shortage of personal health services or a population group designated by the Secretary as having a shortage of such services. In designating urban or rural areas for purposes of this paragraph, the Secretary shall take into account unusual local conditions which are a barrier to access to or the availability of personal health services.

"(2) The term 'rural' means an area that is not an urbanized area (as defined by the Bureau of the Census).

"(3) The term 'urban' means an area that is an urbanized area (as defined by the Bureau of the Census).

"(c) Grants and contracts may be made pursuant to this section to examine and develop—

"(1) methods of attracting and retaining primary care physicians, dentists, physician assistants, nurse practitioners and other allied health professionals, both individually and as teams, to train and practice among medically underserved populations;

"(2) the use of differing types of organizational models and providers, all directed

toward meeting the unique needs of medically underserved populations;

"(3) management and technological improvements to increase productivity, effectiveness, efficiency, and financial stability of health and dental care providers, including new or improved methods for biomedical communication, medical and financial recordkeeping and billing systems;

"(4) health promotion, disease prevention and health education programs directed toward obtaining full utility from available health and dental resources;

"(5) methods of identifying, coordinating, and integrating existing health and social service facilities and programs to maximize use of available resources, avoid duplication of effort, and ensure a coordinated, comprehensive care system, including demonstrations to explore the feasibility and effectiveness of combining primary health and dental care delivery programs with other health and social services in the context of integrated social service centers;

"(6) regional approaches to the delivery of health and dental care, through the coordination and integration of primary care programs, including support for federations of existing clinics and consolidated health care delivery systems operating in multiple locations;

"(7) identification and development of new funding mechanisms for the provision of health and dental care, including local revenue generation with public responsibility for these programs assured through the periodic election of legally constituted governing boards and maintenance of service standards facilitated by Federal incentive awards to participating medically underserved populations:

"(8) specific services or mixture of services appropriate for a given area, including ambulatory care, home health care, environmental health services, community outreach activities, transportation services, and other supplemental services:

"(9) effect of availability of primary care and home health services in terms of reduction of emergency room visits, hospitalizations, and institutionalization in long term care facilities; and

"(10) other innovative approaches designed by the applicant and approved by the Secretary to improve the availability of quality health and dental care.

"(d) The Secretary shall submit an annual report to Congress which shall include a description of actions taken, services provided, and funds expended under this section, and evaluation of the effectiveness of such actions, services and expenditures of funds, and such other information as the Secretary considers appropriate.

"(e) An application for a grant or contract under this section shall be in such form, submitted to the Secretary in such manner, and contain such assurances, as the Secretary may require.

"(f) The amount of any grant or contract under this section shall be determined by the Secretary, but shall not exceed the amount that the Secretary determines is needed to carry out the purposes of the grant or contract.

"(g) The Secretary may make payments under this section in advance or by way of reimbursement, and at such intervals and on such conditions as the Secretary finds necessary.

"(h) The Secretary shall fund projects relating to each of the ten demonstration authorities identified in subsection (c)(1)–(10).

"(i) The Secretary may continue to support, out of funds appropriated under this section, those projects presently funded through the Public Health Service under the Health Underserved Rural Areas Program.

"(j) There are authorized to be appropriated for the purpose of funding grants and contracts in rural areas under this section $20,000,000 for the fiscal year ending September 30, 1979, $25,000,000 for the fiscal year ending September 30, 1980, and $30,000,000 for the fiscal year ending September 30, 1981.

"(k) There are authorized to be appropriated for the purpose of funding grants and contracts in urban areas under this section $20,000,000 for the fiscal year ending September 30, 1979, $25,000,000 for the fiscal year ending September 30, 1980, and $30,000,000 for the fiscal year ending September 30, 1981."

HEALTH PROFESSIONALS FOR MEDICALLY UNDERSERVED AREAS

SEC. 11. (a)(1) Subpart II of part C of title III of the Public Health Service Act is transferred to part H of such title as subpart IV, and sections 331, 332, 333, 334, 335, 336, 337, and 338 are redesignated as sections 374, 375, 376, 377, 378, 379, and 380, respectively.

(2) The heading for subpart IV, as so redesignated, is amended to read as follows: "Health Professionals for Medically Underserved Areas".

(b) Section 378 (as so redesignated by subsection (a)) is amended by—

(1) inserting "(a)" after "Sec. 378.", and

(2) inserting at the end of subsection (a) thereof the following:

"(b) In addition to the report required by subsection (a), the Secretary shall submit a special report, developed through consultation with the National Advisory Council on the National Health Service Corps (as defined in section 379), to the Committee on Human Resources of the Senate and to the Committee on Interstate and Foreign Commerce of the House of Representatives on Februray 1, 1979. Such special report shall delineate the present and future directions of the National Health Service Corps particularly its relationship as a health manpower program and as a health services delivery program, analyze the use of corpsmen in the various settings defined in section 375, address the use of the Corps in meeting urban and rural health needs and project the estimates of the Corps' manpower and their use through 1985.".

(c) Section 380 (a) (as redesignated by subsection (a)) is amended by striking "$57,000,000" and substituting "$64,000,000".

EVALUATION

SEC. 12. (a) The Comptroller General shall evaluate the operations of primary care centers, community health centers and migrant health centers which receive assistance under the Public Health Service Act. Each distinct category shall be evaluated separately and a comparison shall be made.

(b) The Comptroller General shall report to the Congress the results of such evaluation not later than 30 months after the date of enactment of this section.

MISCELLANEOUS

SEC. 13. (a) Section 1313 of the Public Health Service Act (42 U.S.C. 300e–12) is repealed.

(b) Section 752 (b)(5)(A) of the Public Health Service Act (42 U.S.C. 2940) is amended by inserting the following new sentence after the first sentence thereof: "Certain specialties needed by the Corps may be deferred for more than three years, but in any given year such deferments shall constitute no more than 5 percent of the total number of deferrals granted.".

---

SECTION-BY-SECTION ANALYSIS: COMMISSION ON NATIONAL PRIMARY HEALTH CARE NEEDS

The bill would establish a Commission on National Primary Heath, Care Needs which would develop a national strategy for assuring equal access to primary health care services for all Americans, including appropriate responsibilities for both the public and private sectors. Also the Commission would be required to issue a report to the President and the Congress containing an evaluation of federal efforts to correct the maldistribution of health resources by geography and income; accurately assess the numbers and locations of medically underserved people (including a system to update annually efforts to meet the special health resource needs of these populations); assess the resources necessary to provide equal access to primary health care for all Americans; and, finally, determine the cost of providing such access.

While I recognize that the subject of primary care has been the focus of numerous studies, books, articles, and conferences in recent years, I am convinced that this Commission is necessary for two important reasons: first, it can serve as the mechanism by which the current state of knowledge regarding primary health care needs can be brought together into one comprehensive report thereby tying together the valuable contributions of each of these individual efforts; secondly, it will hopefully be able to provide answers to questions which have been thus far left unanswered due to the availability of resources necessary to support the required research. In other words, it is my intent that this Commission—through extensive research activities—will provide substantive answers to such questions as what resources are necessary to provide equal access to primary health care, what will be the costs associated with this effort, and what is the best strategy for achieving these goals. As we all know, the answers to these questions have so far remained elusive.

In addition to these responsibilities, the Commission would be required to conduct a special study of federal health resources—including the resources owned, operated or employed by the Department of Defense and the Veterans Administration—to determine if such resources can be utilized appropriately in medically underserved areas to provide vital health services.

I am concerned that there are federal health resources whose access is restricted only to members of the military or veterans in areas of the country where services and facilities are desperately needed by the general population. Because I believe we can no longer afford to overlook the inefficient use of health care resources, I believe consideration should be given to the prospect of opening access to these federal health resources in medically underserved areas. The Commission on National Primary Health Care Needs would be given the responsibility of evaluating and making recommendations regarding this proposal.

The Commission will be composed of 21 presidential appointees: five of the appointees will constitute a panel on urban issues and five will constitute a panel on rural issues. Members of these two panels shall each include a manpower expert, an expert in medical care organization and delivery, an expert in health promotion and disease prevention, and an expert in primary care. In addition, there shall be one consumer member of each panel. The remaining eleven members shall include three more consumers and eight additional experts from the previously designated categories. The Secretaries of the Department of Health, Education, and Welfare and the Department of Defense, as well as the Administrator of the Veterans' Administration, shall each designate a nonvoting, ex-officio member of the Commission. The Chairperson of the National Council on Health Planning and Development shall also serve as a nonvoting, ex-officio member of the Commission. Finally, the bill contains provisions for appropriate staff positions and sets the life of the Commission at two years.

COMMUNITY HEALTH CENTERS

As a long-time proponent of community health centers (CHCs), I supported in S. 2474 a major increase in the authorization levels for CHCs. S. 2474 provides for a five-year extension of the CHC authorities; during

that time period (FY 1979 to FY 1983), the authorization levels are increased from $320 million to $468.5 million. Because community health centers have generally proven themselves to be an effective mechanism for the delivery of primary health care services—a fact which has served to strengthen my commitment to their growth and development—I have included, as an indication of this support, the amended authorization levels in my bill.

I have also included in my bill an amendment which would allow CHCs, with the approval of the Secretary, to retain earned income from the operations of the center if the income is used for one or more of the following purposes: to expand or improve the service of the center; to expand the population eligible to utilize the services of the center; to make managerial or physical improvements to the center; or to establish a reserve fund for use in conversion to a prepaid reimbursement modality.

The last amendment which I am proposing under this section would require every CHC to develop a structured referral relationship with one or more nearby hospitals. It has recently come to my attention that severe gaps occur in the care of individuals who are treated by CHC physicians who do not have hospital staff or admitting privileges. Because I believe that CHCs should strive to assure continuity of care to the people they serve, I believe it is important to require that appropriate referral relationships be structured between CHCs and hospitals. It is my hope that the establishment of such relationships will lead to improvements in continuity of care provided by CHC patients.

Finally, I would like briefly to address an issue which is currently undergoing extensive debate—that issue involves the controversy over how funds appropriated under the CHC and other federal health services programs are divided between rural and urban areas. Many rural health advocates are expressing concern over the fact that a disproportionate amount of funds under these programs is being spent in urban areas. However, HEW estimates that while it costs approximately twice as much to provide services in an urban area as in a rural area, roughly the same number of people are being served.

I believe that the long-range federal policy response regarding the urban/rural controversy must focus on numbers of people served and not on the proportion of funds allocated between the two areas. We must accept the fact that there are cost of living as well as cost of medical care differences between urban and rural areas. Consequently I plan to urge my colleagues in the Human Resources Committee and in the entire Congress to adopt a policy which would direct HEW in its grants awards process, under this and other health resources programs, to assure to the extent possible that equal numbers of people in rural and urban areas will be served.

HOSPITAL-AFFILIATED PRIMARY CENTERS

In response to my concern about the shortage of primary care services which results in the inappropriate utilization of outpatient departments and emergency rooms for the receipt of such services, I proposed in S. 2474, The Health Services Extension Act of 1978, establishing hospital-affiliated primary care centers in urban areas. The purpose of these centers was to provide a more appropriate setting for the provision of primary care services for people residing in inner-city areas where no other sources of care exist. Since the introduction of S. 2474, I have received numerous suggestions for improving and refining this measure from witnesses who testified at hearings, meetings with individual interest groups, and site visits by my staff to prototype models. This bill which I am introducing today reflects the modifications which have been made in response to this valuable input.

Conceptually, the most fundamental change which I have made in this proposal involves an expansion of eligible institutions from those located exclusively in urban areas to those located in any medically underserved area (as determined by the HEW Secretary). After hearing testimony and talking to a number of groups which represent rural health interests, I am convinced that there are many hospitals located in rural areas which are plagued by the same problems that trouble many urban, inner-city hospitals. More importantly, however, I now believe that any legislative effort aimed at improving the availability of health resources should focus on the broader national issue of medically underserved areas. Whether a person lives in an urban or rural area is irrelevant if that person needs medical care which cannot be obtained due to a shortage of health resources. For this reason I have expanded my proposal to include all medically underserved settings.

Under my proposal, HEW would award grants to community hospitals (defined as either public general hospitals or private, nonprofit hospitals which serve primarily a medically underserved population) for the purpose of establishing hospital-affiliated primary care centers. Intended grant recipients are those hospitals which are currently delivering primary health services through their emergency rooms and outpatient departments because no other source of care exists for the delivery of such services to a population designated by the Secretary as medically underserved. The Secretary should exercise careful discretion in awarding these grants so as to avoid duplication of services to the same population group if existing means of providing services is adequate to fulfill the needs of the population.

The primary care center must be a distinct administrative unit of the community hospital and must be located in or adjacent to the community hospital. With respect to the first requirement, it is my intent that the Secretary give priority to those hospitals which exhibit a strong willingness and commitment to make whatever organizational and structural changes are necessary within the hospital to assure a significant degree of autonomy for the primary care center. After reviewing the operations of ambulatory services departments at the Genesee Hospital (Rochester, New York) and the North Central Bronx Hospital (New York City), I am convinced that the key to the successful operation of these centers lies in their ability to function in an aggressive, independent, and autonomous fashion from the operation of the inpatient facility. While I believe it is inappropriate to mandate in legislation a particular organizational structure because the needs of individual hospitals vary widely, it is my intent that the Secretary give priority to hospitals which through the appropriate rearrangement of administrative, departmental, and professional relationships display the kind of dedication, support, and commitment which have made Genesee and North Central Bronx so successful.

It is also my intent that the primary care centers be located in or adjacent to the community hospital. This requirement is included for the convenience of the patients who, when the primary care center becomes operational, will be rerouted from the hospital's outpatient department and emergency room to the new center. Because of potential cost differentials which are likely to occur between those centers located in the hospital and those centers located adjacent to the hospital, it is my intent that the Secretary give priority to applications which indicate that the primary care center will be established adjacent to the hospital. Although I have included stringent requirements regarding what costs may be assigned to the primary care center, I believe that it will be considerably easier to control costs if the primary care center is not within the inpatient facility. However, because I recognize that many hospitals do not have these resources readily available, and that many such hospitals suffer from the inappropriate utilization of their emergency rooms and outpatient departments for the delivery of primary care, it is not my intent to preclude such hospitals from being eligible for grants under this section.

The hospital-affiliated primary care centers must:

(1) Deliver primary health services which, with the exception of the requirement for the provision of emergency medical services, is defined exactly as primary health services are defined under the Community Health Centers program.

(2) Provide referral to supplemental health services (also as defined under the Community Health Centers program).

(3) Provide referral to emergency medical services and authorized access to patient medical record on a twenty-four-hour day, seven-day-week basis. With respect to emergency health services, I have chosen not to require that the primary care centers directly provide emergency health services because such a requirement would result in an unnecessary duplication of services between the primary care center and the hospital. The term "authorized access to patient medical records" is used here to indicate that access to patient medical records will be by only those health practitioners who may need such access to treat effectively a patient of the primary care center.

(4) Provide an information program for the residents of the catchment area which describes the services of the primary care center and the hospital. Since the primary care center will be a new health services delivery entity in the community, it will be important for both the hospital and the primary care center to educate potential users as to the appropriate use of each of the facilities.

The services of the primary care center must be delivered by a primary care group practice. A primary care group practice must, at a minimum, be composed of at least three primary care physicians (general internists, general pediatricians, and family practitioners) who are organized to provide primary health services in a manner which is consistent with the needs of the population to be served. This means that a group cannot be composed of all pediatricians or all internists, but must be of a mix of professionals capable of providing health services to persons of all ages. Each of the members of the group practice must have admitting privileges to the affiliated community hospital. In addition, the physicians of the group may either be salaried by the hospital or may be organized into a legal entity (partnership, corporation or professional association) which has a contract (approved by the Secretary) with the community hospital to provide primary health services. Under the first model, all members of the group practice must be full-time in the primary care center. Under the second model, the group must have an income distribution formula which shares the income and expenses of the group in a systematic manner, and all members of the group must devote full time to the fulfillment of the contract.

Because I recognize that there are hospitals in some parts of the country which may have difficulty organizing a group practice to meet the specified requirements simply because that area is experiencing a physician shortage, my bill gives the Secretary the authority to substitute physician members of the National Health Service Corps for physician

members of the group. Where this occurs, however, at least one member of the group must come from the hospital or community.

My bill also allows primary care residents to practice in the primary care centers since these centers are logical settings for residents in primary care specialties to obtain training in ambulatory care. A primary care resident is defined as a graduate physician in training, whose training program is approved by appropriate certifying bodies and is in a primary care specialty (general internal medicine, general pediatrics and family practice). These residents may practice only in the primary care center if the resident is assigned to the primary care center for a period of at least two years and if the resident practices under the direction of a member of the group practice. It is my understanding that one of the critical elements of residency programs in some primary care specialties involves requiring the resident to be responsible for the continuing care of an assigned panel of patients. The requirement that the resident practice under the direction of a member of the group practice is not meant to preclude such an arrangement; it is only meant to assure that a member of the group will ultimately be responsible for the care delivered to any patient of the primary care center.

It is also my intent that, where appropriate, the center would utilize the services of allied health personnel in the treatment of patients. In addition, for purposes of education and training, medical and other health science students would be allowed to receive training in the primary care center as long as such training did not significantly detract from or interfere with the delivery or quality of services. Finally, the group would be allowed to add physicians in other specialties as needed, except that these physicians could not be used to fulfill the requirements pertaining to continuous management of patient care described below.

In addition to these requirements, the hospital must also provide assurances in its application that the primary care center will meet the following requirements:

1. That, insofar as possible, primary health services in the community hospital will be delivered only through the primary care center. To assure this practice, health professionals such as nurse practitioners and physician assistants who are qualified to perform triage shall be placed in the emergency room, outpatient department and primary care center to screen and direct patients to the appropriate locations for care.

2. That each patient of the primary care center will have an identified member of the group practice who is responsible for the continuous management of the patient when the patient requires referral (inpatient or outpatient) or emergency services.

The concept of "continuous management" is a vital component of this program. People who now find themselves forced to use outpatient departments and emergency rooms to obtain primary care services are people who are being treated only on a periodic and episodic basis. Even when these encounters occur, it is unlikely that the patient will be treated by the same physician twice. In order to improve the quality of care delivered to such people, my bill places one physician member of the group practice in charge of the continuing care of each patient. This means that one member of the group is responsible for overseeing the delivery of primary care services, for managing and coordinating care when referral or emergency services are required, and for providing follow-up after completion of the referral services. To accomplish this task, every person who becomes a patient of the primary care center is required, through some mutually satisfactory arrangement, to be assigned to a member of the group. Through this practice I am hopeful that we can eliminate the current problems with fragmentation in care.

In this connection, it is also my intent that when a person who is not affiliated with the primary care center or who does not have an established, ongoing relationship with a private physician arrives at the emergency room or outpatient department seeking care, every effort will be made to see that a member of the primary care group practice immediately, or in the case of true emergencies, within a reasonable period of time, becomes responsible for the continuing care of that patient.

In addition, when a patient of the primary care center arrives at the emergency room for treatment during a time when the primary care center is not open, that patient's primary care physician should be immediately notified. At the same time, no patient of the primary care center should be able to receive services through the outpatient department unless a referral for such services is made by the primary care center.

3. That excess facilities and equipment in or owned by the hospital will be converted for use in the primary care center. In making determinations as to which facilities and equipment will be converted, such determinations will be made in the best interest of the primary care center.

4. That the hospital and the primary care center will avoid unnecessary duplication of facilities and equipment, although the primary care center would be permitted to install appropriate support equipment—such as radiology and laboratory equipment—for the purpose of providing routine primary health services.

5. That the primary care center will be maintained as a separate and distinct cost and and revenue center which would have charged to it only those costs which are clearly associated with the provision of primary health services. The hospital would not be permitted to assign inpatient related costs or costs associated with the education and training of resident, medical or other health science students to the primary care center.

6. That the primary care center must be operated in accordance with all the requirements associated with community health centers as listed under 330(e) of the Public Health Service Act or 371(e) of my proposal, except for (e)(2)(G). The hospital must have an advisory board which will participate in the development of the grant application and any renewal applications and which will make recommendations to the hospital's governing board regarding the operation of the center. The Secretary may not approve an initial grant application or any renewal grant application unless the application has been approved by the advisory board.

7. That the primary care center will maintain an information program for its patients which fully discloses the covered professional services and referral capabilities offered by the primary care center and the method by which patients of the primary care center may resolve grievances regarding billing for covered professional services or the quality of such services.

Like community health centers, my bill authorizes these centers to retain earned income if such income is used for those purposes outlined under the community health center section.

Also, my bill gives the Secretary the authority to provide, to those hospitals who so request, necessary technical and other nonfinancial assistance for the purpose of assisting that hospital in developing its plans for and operating a primary care center. The Secretary may use funds appropriated under this section to carry out this function.

The authorization levels for this program have been set at $35 million for FY 1979, $60 million for FY 1980, and $85 million for FY 1981. Funds may be used for planning, developing (including modernization and renovation of space) and operating primary care centers. No more than $500,000 per project may be awarded for planning and development activities.

Before concluding the discussion on this section, I would like to add several general thoughts. First, it is my intent that to the extent possible the primary care centers should be developed so that the overall effort is directed at making the services available to the entire community or catchment area and not just those persons who are "unsponsored" (i.e., the near-poor or non-Medicaid eligibles). It is not my intent that these centers perpetuate any system which involves different classes of care for middle or upper class persons and indigent persons.

As a corollary, it is my intent that the Secretary encourage and, to the extent possible, give priority to those hospitals which demonstrate in their application a willingness ultimately to establish a system of prepayment for reimbursement of services. I have long been committed to HMOs and the concept of prepayment and am convinced that these centers are logical settings for the development of such reimbursement methods.

MIGRANT HEALTH CENTERS

For purposes of this bill, I have redesignated the migrant health center authority from Section 319 of the Public Health Service Act to Section 372. In moving this section, I have included no amendments outside of those contained in S. 2474, The Health Services Extension Act of 1978, except one which like community health centers and hospital-affiliated primary care centers allows migrant health centers to retain earned income.

RESEARCH AND DEMONSTRATION PROJECTS FOR PRIMARY CARE

Section 373 authorizes the Secretary to award grants and contracts for the purpose of funding demonstrations in new, improved, or expanded primary health care delivery mechanisms in the community setting in medically underserved areas.

This program would give the Secretary the authority to make grants to or enter into contracts with nonprofit private and public organizations and providers of health care to undertake a variety of research and demonstration projects aimed at improving the delivery of primary care services in medically underserved areas.

The Secretary is required to submit an annual report to the Congress detailing the accomplishments of this program. The bill authorizes $20 million, $25 million and $30 million for fiscal years 1979, 1980, and 1981, respectively, to both urban and rural areas for the purpose of funding demonstration projects under this section.

HEALTH PROFESSIONALS FOR MEDICALLY UNDERSERVED AREAS

Under my proposal, the National Health Service Corps is redesignated Sections 374–380. Under this provision, I have included the proposed authorization level changes contained in S. 2474 and an amendment which gives the Secretary the authority to permit a certain percentage of National Health Service Corps members to complete residencies which last longer than three years before beginning their service obligations.

EVALUATION

This section authorizes the General Accounting Office to perform an evaluation of the operations of community health centers, migrant health centers and hospital-affiliated primary care centers. This evaluation shall focus on how well each type of center is meeting its statutory goals, and, more importantly, shall compare the centers to determine relative cost effectiveness.

MISCELLANEOUS

Finally, I have included an amendment which would repeal Section 1313 of the Health Maintenance Organization Act. Section 1313 prohibits the use of any other funds under the PHS Act from being used for the development of HMOs. I believe that delivery systems such as community health centers and hospital-affiliated primary care centers are logical, natural settings for the future development of HMOs and should be encouraged. Section 1313 currently stands as a barrier to this effort because of the limitation it places on the sources of funds which can be used for HMO development.

Mr. RANDOLPH. Mr. President, this is not a cursory accommodation of the Senator from New York (Mr. JAVITS), who has had in the past—and continues by his action today in presenting this measure—the awareness and understanding of and commitment to a problem. It is one that is not only in the cities but also in the rural sections of West Virginia, as it is within the metropolitan areas of the State he represents, and in the many rural sections in New York State. But it is a problem. We want, insofar as possible, as I understand it, to reach people, to help people. That is the reason why we need this type of approach.

Am I correct?

Mr. JAVITS. Exactly right. And it is a quarter of the population of the United States.

Mr. RANDOLPH. Again I commend my colleague.

Mr. JAVITS. I thank the Senator for his generosity and for joining in the bill.

Mr. SCHWEIKER. Mr. President, today I am pleased to join with Senator JAVITS as a cosponsor of the Primary Health Care Act of 1978. This is a proposal to provide ongoing authority and funding for a program to establish more vitally needed primary health care treatment centers in underserved areas, both urban and rural.

In addition, the bill authorizes research and demonstration programs in order to identify innovative new ways to provide health services in medically underserved areas.

The bill also establishes a Commission on National Primary Health Care Needs to assess the primary care needs, evaluate the existing Federal effort, and recommend alternatives for the Congress and the President to consider.

When I introduced my Rural Health Services Act of 1978, S. 2744, I noted in my statement that rural underserved areas were badly in need of primary care facilities and services. As a representative of a State with both large rural areas and large urban areas, I am concerned about the lack of primary care health facilities in all underserved areas.

I am, therefore, joining with Senator JAVITS in proposing the Primary Health Care Act in the belief that this is a constructive step toward alleviating the shortage of primary care in underserved areas.

---

By Mr. NELSON:

S. 2880. A bill to provide that future Federal employees will be covered by social security and may elect not to be covered by the applicable Federal employees retirement system, that current Federal employees may elect to be covered by social security and if they so elect may elect to discontinue being covered by a retirement system for Federal employees and have retirement credits under any such system transferred to social security; to the Committee on Finance.

S. 2881. A bill to provide for the actuarial soundness of the Civil Service Retirement and Disability Fund through a financing plan which will be fair and equitable to Federal employees and to the taxpayers; to the Committee on Governmental Affairs.

SOCIAL SECURITY COVERAGE OF NEW FEDERAL EMPLOYEES AND THE ACTUARIAL STATUS OF THE CIVIL SERVICE RETIREMENT FUND

● Mr. NELSON. Mr. President, today I am introducing two bills, one of which would require that individuals who are newly employed by the Federal Government after December 31, 1979, be covered mandatorily under the social security system. This bill also would provide an option for persons who are presently employed by the Federal Government to participate in the social security system on a voluntary basis. The other bill would require that the Civil Service Retirement Board of Actuaries report to the Congress with a plan which provides for the financing of the Civil Service Retirement Fund on an actuarially sound basis and with recommendations for financing the fund in a manner which will be fair and equitable to Federal employees and to all American taxpayers.

At the outset, I want to make it clear that the pension rights which have accrued to any present or retired employee of the Federal Government, including postal workers and other civil servants, will not be affected in any way by these bills. This legislation applies only to new Federal employees, and will not terminate the existing Federal retirement programs. Presently employed Federal employees will continue to accrue pension benefits in the future in the same way and to the same extent they do today.

I am introducing this legislation because social security coverage should be extended to all new Federal employees. In my opinion, there is not adequate justification for mandating virtually all private sector employees and self-employed individuals to be covered by social security while all Federal employees are covered under a different and more liberal system in which employees do not contribute half the cost as they do under social security.

Consider, for example, the following facts:

After 5 years on the job, a Federal employee is "vested," that is, the employee has an earned right to a pension. Under social security, 10 years of coverage ultimately will be required to become eligible for retirement benefits.

Under the civil service retirement program, an employee can retire at age 55 without any actuarial reduction in benefits and without any reduction in that retirement pay if the individual continues to work. Within 10 years, the "retired" civil servant can accrue social security coverage and at very low rates. Under social security, a person can retire at age 62 at an actuarily reduced pension. If an individual receives social security and simultaneously holds another job, there is a benefit reduction if the earned salary is greater than the so-called retirement test, which this year is set at $3,400 for social security recipients under age 65, and $4,000 for recipients age 65 and above.

Employees covered under social security and their employers pay the full cost of social security benefits. No general revenue payments are now used to finance social security benefits. Federal employees, on the other hand, pay about 25 percent of the cost of their pensions. The rest is funded out of general revenues.

The retirement benefits under the Federal civil service retirement program are more generous than those provided under social security. A comparison of the benefits accruing to high wage earners under each system substantiates this assertion. Congressmen and their staffs, for example, receive 2.5 percent a year credit for each year of service multiplied by the average of the highest three consecutive years of earnings. After 30 years of service, for example, a Congressman would receive 75 percent of his average highest consecutive 3 years pay, usually the last 3 years. In social security, a high wage earner's retirement benefit would be equivalent to 33 percent of his covered earnings the year before retirement.

Social security is a compulsory system which has been extended over the years to cover the vast majority of jobholders in the labor force today. Before 1950, only about 60 percent of jobs in the private sector were covered. During the 1950's and 1960's, social security coverage was extended to most farm and household workers, self-employed professionals and nonprofessionals, members of the Armed Forces, and employees of nonprofit organizations—except clergymen. Legislation permitting the voluntary group coverage of State and local government employees also was enacted. At present, 9 out of 10 employees work in covered employment at any one time, though virtually everyone works in employment covered by social security at one time or another during their working years.

The extension of social security coverage to all public employees is a logical progression in the social security system. While I support mandatory coverage of State and local employees, a number of questions have been raised about the constitutionality of imposing a tax on State and local employment.

The first bill I am introducing does not mandate State and local public employees into the social security system. Nevertheless, hearings on the constitutionality of the social security tax as applied to State and local employees should be held and the issues relating to this question should be fully discussed. As chairman of the Senate Finance Subcommittee on Social Security, I intend to hold hearings on this issue.

No question exists, however, as to the constitutionality of covering all new Fed-

eral employees under social security. This first bill would mandate all new Federal employees into social security. Those employees who already are employed by the Federal Government would have the choice of maintaining their current status under a Federal retirement program or opting into social security. For those who elect to be covered by social security, credits would be transferred into social security. Any excess contributions that the employee might have made to the Federal plan over and above what he would have contributed to social security would be fully refunded.

PENSION COMMITTEE NEEDED

Mr. President, over the past 3 years, I have advocated the establishment of a Senate Pension Committee to oversee this Nation's retirement programs, including social security, Federal retirement programs, and military pensions. Such a Pension Committee would have the responsibility to oversee the proliferation of Federal retirement programs, to bring to the attention of the Senate, the Congress, and the American public the cost of new benefits provided in these programs and to bring a degree of discipline to the process which decisions are made about the funding and actuarial soundness of the retirement programs. The necessity of such a committee is clearly demonstrated, in my judgment, by the compelling evidence concerning the status of just one of the Federal retirement programs, the civil service retirement system.

FEDERAL RETIREMENT SYSTEMS

Right now, there are some 68 different retirement systems covering Federal employees, although seven of these plans cover 98 percent of all Federal employees. These seven retirement systems include: Civil Service, Foreign Service, Uniformed Services, U.S. tax court judges, Tennessee Valley Authority, Federal Judiciary, and the Federal Reserve Board. The civil service retirement program, however, covers 75 percent of all Federal employees.

The status of these various Federal retirement programs has been the subject of several investigations by the General Accounting Office. The GAO has been particularly concerned about the proliferation of Federal retirement plans, the multitude of inconsistencies between and among the various public retirement plans and social security, and the large unfunded liability that continues to grow every year.

In January of this year, the Treasury Department issued a report on the public debt and the actuarial economic status of the various major retirement and disability pension funds. A review of this actuarial status report reveals that between September 30, 1976, and the fiscal year ending 12 months later on September 30, 1977, the actuarial deficit of the Federal nonsocial security pension funds increased by $18.7 billion. For example, during this one fiscal year the unfunded liability of the civil service retirement fund grew by $10 billion. At the end of fiscal year 1977 the total unfunded liability of the civil service retirement fund was $117 billion.

The time has come for the Congress to deal with the financial problems confronting the various Federal retirement systems and to decide whether all Federal employees should be covered under social security. An examination of the civil service retirement fund demonstrates the financing problems which are extent, generally, in each of the Federal retirement systems.

At my request, the chief actuary of the civil service retirement fund prepared a history of the civil service retirement fund's current financial status, including unfunded liability and projections for the total unfunded liability through the year 2000. Unfunded liability is defined as the amount estimated to be needed to fully finance all benefits due current and former employees and annuitants, when all current and projected income to the fund—which includes agency and employee contributions, 30 year payments, interest payments on the unfunded liability, and military credit payments—is taken into account. The chief actuary's report reveals that in 1921, the unfunded liability of the civil service retirement fund was $200 million. The total unfunded liability is now over $117 billion, and the actuary projects that the unfunded liability will grow to $361 billion by the year 2000. In other words, the unfunded liability of the civil service retirement fund will more than triple in the next 23 years.

I ask unanimous consent that the two charts I have referred to thus far be inserted in the RECORD at this point. Chart No. 1 is the Treasury Department's report on the actuarial status of the various Federal retirement programs. Chart No. 2 was prepared by the chief actuary of the civil service retirement fund and it illustrates the history of the fund's unfunded liability.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

CHART 1

SCHEDULE 10—ACTUARIAL STATUS OF ANNUITY PROGRAMS AS OF SEPT. 30, 1977

[Dollar amounts in millions]

| Agency and program | Valuation date and valuation period | Valuation interest rate, percent | Actuarial liabilities | Actuarial assets | Actuarial deficiency (−) or surplus (+) |
|---|---|---|---|---|---|
| Department of Commerce: National Oceanic and Atmospheric Administration: Retired pay, commissioned officers. | Sept. 30, 1977 | 5.0 | $27 | | −$27 |
| Department of Defense: | | | | | |
| Retired pay | do | 3½ | 175,085 | | −175,085 |
| Panama Canal Company and Canal Zone Government: Retired benefits to certain former employees.[1] | do | | 10 | $10 | |
| Department of Health, Education, and Welfare:[2] | | | | | |
| Social Security Administration: | | | | | |
| Federal old-age and survivors insurance trust fund | Oct. 1, 1977 (1977–2051) | 6.6 | 9,383,000 | 5,887,000 | −3,496,000 |
| Federal disability insurance trust fund | do | 6.6 | 2,255,000 | 963,000 | −1,292,000 |
| Federal hospital insurance trust fund | Oct. 1, 1977 (1977–2002) | 6.6 | 890,325 | 648,748 | −241,577 |
| Department of Labor: | | | | | |
| Federal Employees' Compensation Act[3] | Sept. 30, 1977 | | 7,417 | | 7,417 |
| Pension Benefit Guaranty Corporation[4] | do | Varying | 273 | 118 | −155 |
| Department of State: Foreign service retirement and disability fund | do | 5.0 | 2,736 | 1,125 | −1,611 |
| General Services Administration: Pensions for former Presidents and former Presidents' widows.[5] | do | 7.0 | 2 | | −2 |
| Veterans Administration: Compensation and pensions fund[6] | Sept. 30, 1977 (Fiscal years 1978–83) | | 55,742 | | −55,742 |
| Veterans insurance and indemnities[7] | do | | 41 | | −41 |
| Independent agencies: | | | | | |
| Civil Service Commission: Civil service retirement and disability fund | Sept. 30, 1977 | 5.0 | 249,000 | 133,000 | −116,000 |
| Railroad Retirement Board: Railroad Retirement System[8] | do | Varying | 38,179 | 28,926 | −9,253 |
| Tennessee Valley Authority: | | | | | |
| Retirement system: | | | | | |
| Fixed benefit fund[9] | Sept. 30, 1976 | 8.0 | 332 | 396 | 64 |
| Variable annuity fund[10] | Dec. 31, 1976 | 5.0 | 84 | 84 | |
| U.S. Tax Court: Tax Court judges survivors annuity fund[11] | Sept. 30, 1977 | 7.0 | 2 | 1 | −1 |

[1] Non-U.S. citizen employees who retired prior to Oct. 5, 1958, are not covered by the Civil Service Retirement System but do receive retirement benefits under a separate annuity plan.

[2] The liabilities and assets have been computed over the valuation periods indicated, taking into account the assets at the beginning of the periods indicated and the present values of all income and outgo items during the period.

These estimates are prepared on the bases used by the Congress in making provision for financing the program—that future young workers will be covered by the program as they enter the work force. If the estimates were to be prepared on the assumption that no workers were to be covered in the future other than those who were 17 and over as of Sept. 30, 1977 (that is, contrary to the basis on which the Congress has provided for financing the program), there would be a deficiency of $5,362 billion for the OASDI program, computed on the dynamic assumptions basis. The OASDI figures in this report are consistent with the estimates based on the intermediate assumptions published in the 1977 Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Disability Insurance Trust Funds.

No long-range data are furnished for the Federal supplementary medical insurance trust fund since this program is operated on a 1-year term insurance basis, with the premium rate being adjusted by the Secretary of Health, Education, and Welfare so as to finance the cost of the program. Therefore, this system is not susceptible to long-range actuarial analysis, and it has no actuarial deficiency on this basis, but rather only for the existing situation as to incurred liabilities and funds on hand.

The above estimates reflect the status of the programs in effect before the enactment of the Social Security Amendments of 1977 (Public Law 95–216) on Dec. 20, 1977.

[3] Actuarial liabilities for Federal Employees' Compensation Act represent estimated future costs for death benefits, disability compensation, medical, and miscellaneous costs for approved compensation cases on rolls as of Sept. 30, 1977.

[4] This corporation administers insurance programs to prevent loss of pension benefits to participants in covered private plans if they terminate without sufficient assets to pay such benefits.

[5] Each former President is entitled to an annual monetary allowance equal to the basic pay of the head of an executive department. Payments are made from funds appropriated to the General Services Administration and transferred to the Secretary of the Treasury. The widow of each former President is entitled to an annual monetary allowance of $20,000. Payments are subject to certain conditions provided in 3 U.S.C. 102 note.

[6] This is an estimate of compensation, pensions, and other benefits costs as shown in the long-range plans of the agency.

[7] This is an estimate of the claims costs as shown in the long-range plan of the agency.

[8] The actuarial deficiency has been determined under provisions of the Railroad Retirement Act of 1974, Public Law 93-445 approved Oct. 16, 1974, which completely restructured the annuity program.

The above actuarial valuation was made under an open-end approach, that is, account was taken of the expected income and outgo with respect to individuals who will enter railroad service in the future. For the closed group of present members of the System, the actuarial figures show a deficiency of $14,963 million.

[9] The amount shown for actuarial assets represents the book value of assets held by the fund plus the present value of prospective TVA contributions for currently accruing benefits. The amount shown for the actuarial deficiency represents the present value of prospective TVA contributions for past service benefits.

[10] The amount shown for actuarial assets represents the market value of assets held by the fund.

[11] This fund was established under 26 U.S.C. 7448, and is used to pay survivorship benefits to eligible widows and dependent children of deceased judges. Participating judges pay into the fund 3 percent of their salaries or retired pay to cover creditable service for which payment is required and such additional funds as are needed are provided through appropriations. 17 judges are participating in the fund, and 4 eligible widows are receiving survivorship annuity payments. This fund holds $599.000 of public debt securities.

Note: Because the various annuity programs have been computed on different actuarial bases, a total has not been computed.

CHART No. 2

*History of unfunded liability of the civil service retirement system*

[Amounts in billions]

| Fiscal year: | Unfunded liability |
|---|---|
| 1921 | $0.2 |
| 1925 | 0.3 |
| 1928 | 0.4 |
| 1935 | 1.2 |
| 1942 | 1.5 |
| 1953 | 9.9 |
| 1958 | 27.5 |
| 1963 | 37.7 |
| 1965 | 43.4 |
| 1966 | 46.1 |
| 1967 | 50.3 |
| 1968 | 54.9 |
| 1969 | 60.2 |
| 1970 | 52.8 |
| 1971 | 58.6 |

| 1973 | 81.4 |
| 1974 | 90.4 |
| 1975 | 97.2 |
| 1976 | 106.7 |
| 1977 | 116.3 |
| Projections: | |
| 1978 | 121.0 |
| 1979 | 126.0 |
| 1980 | 130.0 |
| 1985 | 165.0 |
| 1990 | 214.0 |
| 1995 | 279.0 |
| 2000 | 361.0 |

Mr. NELSON. In 1969, the Congress decided that the actuarial status of the civil service retirement fund was so severe that immediate action designed to stabilize the financial situation of the fund was warranted. It was estimated at this time that by 1987, disbursement from the fund would exceed income and that the trust fund reserve would be totally exhausted. The Government would then have had to secure the trust fund obligations from general revenues or reduce benefit payments.

Rather than be faced with such a situation, the Congress passed H.R. 9825, Public Law 91-93, effective October 20, 1969. The purpose of the legislation, as stated in the House committee report, was "to improve the financing and funding practices of the civil service retirement system, so as to maintain confidence in the soundness of the retirement fund and to assure that the necessary money is available when needed to pay the annuities of Government retiree's and survivor annuitants in full and on time."

The civil service retirement fund found itself in a critical financial condition primarily for two reasons. First, the Government had failed over the years to contribute its share of matching contributions to the fund. However, in 1969, the Government's failure to contribute its equitable share represented only about 10 percent ($5-6 billion) of the unfunded liability at that time.

Second, the other major contributing factors to the unfunded liability were liberalization in Federal employee pay (which in turn increased the liability of the trust fund), in annuities, and in groups covered. These liberalizations were passed by the Congress without providing for the means by which to finance the liberalizations.

In an effort to correct this situation, the Public Law 91-93 revisions to civil service retirement law were enacted. This law specified that:

1. The Government amortize, in thirty annual payments, any liability attributed to new or liberalized benefits, including annuity increases other than those annuity increases already provided for in the prior law.

2. The Government make an annual transfer of general revenue funds to the Civil Service Retirement system for interest on the unfunded liability and for the cost of allowing credits for military service. These annual payments are to be made at a rate of 10 percent of the interest payment and the military credit payment in fiscal year 1971, 20 percent in fiscal year 1972, 30 percent in fiscal year 1973, and so forth, until 100 percent is reached in fiscal year 1980 and thereafter when the total interest payment and the military credit payment will be paid.

These provisions represented an attempt "to finance future benefit increases and disclose the true costs of any such benefit liberalizations" by funding them with general revenues. The designers of this legislation believed that by using general revenues the actual costs of liberalizations would be exposed, and because the Government would have to amortize the new liability over a 30-year period, the Congress and the public would be made aware of the implications associated with liberalizations before they were agreed to.

In reality, the provisions of Public Law 91-93 just slowed the growth of the unfunded liability. Public Law 91-93 did not stop the growth of the unfunded liability. The act only provided for interest payments on the existing unfunded liability, the amortizing of any liabilities created subsequent to Public Law 91-93, and payments to cover the cost of military credits. Public Law 91-93 failed to require that the annuity cost-of-living increases already provided for in a previous statute be financed through the 30-year amortization process. In addition, prospective financing of the unfunded liability created by automatic Federal employee pay increases was not provided for in Public Law 91-93. As a result, the financing of the unfunded liability created by these pay increases does not take place until after pay increases go into effect, even though such increases occur annually.

In a Civil Service Commission staff report the 30-year financing provision of Public Law 91-93 was described as "an essential adjunct to Public Law 91-93 funding not to strengthen financing, although it does to some extent, but as a measure of the cost of new benefits." In this sense the new law was successful—there have not been any major liberalizations since enactment of the statute in 1969. But, the fact remains that the true cost of the system has not been totally revealed to Congress and the American people.

The 1969 law also provided for what were described then as "limited, but needed, improvements in the benefit structure." These improvements were not covered by the new financing provisions in the statute. Therefore, these new liabilities created in the 1969 law added to the unfunded liability. The new liberalizations, which increased the unfunded liability of the fund, included: First, a change in the base years used for computation of benefits from the average of the high 5 earning years to the average of the high 3 years, which increased future benefits an average of 10 percent; second, an additional 1 percent added to future cost-of-living adjustments payable to annuitants, so as to compensate for the 5-month waiting period which elapsed between the time the Consumer Price Index (CPI) rose 3 percent and the actual time the annuity payment would be increased; third, a provision to include the value of unused sick leave for computing annuities upon death or retirement; and fourth, a provision to enable surviving annuitants to receive their benefits if they remarry. Public Law 91-93 also did not apply the new 30-year amortization provision to a pay raise which occurred in July 1969.

This 1969 pay raise combined with the liberalizations provided in Public Law 91-93 created immediate new liabilities, exempt from the law's 30-year amortization provision, of some $4.5 billion. Because the new liberalizations would continue to escalate each year, the unfunded liability would concommitantly increase each year as well. The following chart illustrates the initial unfunded liability:

P.L. 91-93 new benefits:

| *Increase in funded liability (millions)* | |
|---|---|
| High 3-year average | $337.0 |
| Sick leave credit | 329.5 |
| Survivor annuity | 150.0 |
| 1% cost-of-living increase | 243.0 |
| Total | 1,059.5 |
| Pay increase effective July 1969 | 3,400.0 |
| Total exempted from financing provisions | 4,459.5 |

UNFUNDED LIABILITY AND FINANCING CRITERIA UNDER PUBLIC LAW 91–93

As I have just stated, the liberalizations in Public Law 91–93, which contributed to the growth of the unfunded liability, were not covered by the new financing provisions established in the statute. These liberalizations were not subject to the requirement that the Government pay the costs of every future liberalization. This means that the increase in the unfunded liability of the civil service retirement fund would not be paid for through 30 equal annual appropriations.

As a result, both the unfunded liability and the interest payments on the unfunded liability grew and continue to grow. Since 1969, Federal contributions have increased at a rapid rate when expressed either in actual dollar amounts or as a percentage of payroll. Even though the total Government contributions in fiscal year 1977 was over $9.2 billion—of which $2.9 billion represents the agency contribution paralleling the employees' contribution and over $6.3 billion from general revenues—the civil service retirement fund unfunded liability grew in fiscal year 1977 by $10 billion.

Moreover, the Public Law 91–93 financing provisions do not reveal the actual total costs associated with the civil service retirement fund, and in fact, fall far short of the financing requirements Congress imposed on private pension programs by the Employee Retirement Income Security Act (ERSIA) standards.

CIVIL SERVICE RETIREMENT COSTS

Normal Cost.—The value of benefit rights accrued annually by employees under a retirement system is referred to as the "normal cost" of the system. Normal cost is commonly expressed as a percent of payroll, representing the estimate of the amount of funds which, if accumulated annually and invested over covered employees' careers, will be enough to meet their future benefit payments. The process utilized to determine the normal cost involves mathematically predicting the future experience of the system (salary progression, rate of return on investments probable rates of employees' death, disability, retirement and termination of employment) and translating this experience into cost on the basis of the system's benefit provisions.

There are two methods to calculate normal costs: Using static or dynamic projections.

"Static" calculations do not consider future general pay increases or annuity cost-of-living adjustments. The normal cost of civil service retirement is calculated by the Board of Actuaries on a static basis. However, annuities are based on an employee's salary, which is adjusted for inflation each year, and annuities are also adjusted according to mandated statutory semiannual cost-of-living increases. These increases in salary create additional liabilities on the civil service retirement system—Federal white collar salaries have increased over 70 percent since 1969. Moreover, annuity adjustments to current retirees increase twice a year based on the Consumer Price Index increase in the previous 6 months. These increases for retirees have totaled over 80 percent since 1969. The Board of Actuaries estimates the system's static cost to be 13.64 percent of covered payroll.

"Dynamic" calculations consider the existing statutes which provide for future pay increases and annuity cost-of-living increases. The Board of Actuaries has estimated the dynamic costs to range from 21.56 percent to 28.74 percent of payroll, depending on the economic assumptions used. The Office of Management and Budget estimates the dynamic normal cost of civil service retirement to be 31.7 percent of pay at present.

METHOD OF FINANCING

A retirement system is considered actuarially sound if trust fund reserves and income to be received are equal to the system's liability for benefit payments to present retirees and the anticipated liability for active employees who will receive benefits in the future.

Most Federal employees contribute 7 percent of pay and agencies match this contribution with another 7 percent for a total 14 percent—congressional employees contribute 7.5 percent, and Members of Congress contribute 8 percent of pay. Historically, the 14 percent combined rate has been compared to the static normal cost of 13.64 percent, leading some to the conclusion that the system is actuarially sound.

Because of the relationship between the employee contribution rate and the static normal cost, many people are convinced that Federal employees pay half the cost of their benefits. Historically, the Government has not always matched the employee contribution each year by putting its contribution into the trust fund, and therefore, it is also widely believed that the current unfunded liability is the responsibility of and should be financed by the Federal Government.

The present financing provisions do not cover the total costs of the civil service retirement system. A chart prepared by the chief actuary of the civil service retirement fund reveals that the true total cost of the civil service retirement system in fiscal year 1977 was 29.3 percent of payroll, with the Federal Government paying 75 percent of these costs. Employees contributed 7 percent, agencies another 7 percent, and general revenues contributed 15.3 percent, making for a total Government contribution of 22.3 percent of payroll. I ask unanimous consent that this chart be inserted at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

CHART 3

CONTRIBUTIONS OF THE CIVIL SERVICE RETIREMENT FUND AS A PERCENTAGE OF COVERED PAYROLL

[In percent]

| Fiscal year | Employee contribution | Government contribution | | | Total (combined employee Government contributions) |
|---|---|---|---|---|---|
| | | Agency | General revenues | Total Government contribution | |
| 1970 | 6.7 | 6.7 | 0.9 | 7.6 | 14.3 |
| 1971 | 7.0 | 7.0 | 2.8 | 9.8 | 16.8 |
| 1972 | 7.0 | 7.0 | 3.9 | 10.9 | 17.9 |
| 1973 | 7.0 | 7.0 | 5.9 | 12.9 | 19.9 |
| 1974 | 7.0 | 7.0 | 7.7 | 14.7 | 21.7 |
| 1975 | 7.0 | 7.0 | 11.8 | 18.8 | 25.8 |
| 1976 | 7.0 | 7.0 | 13.1 | 20.1 | 27.1 |
| 1977 | 7.0 | 7.0 | 15.3 | 22.3 | 29.3 |
| Projected (with 4 percent CPI, 4.5 lercent salary increase, and 4 percent interest on trust funds): | | | | | |
| 1978 | 7.0 | 7.0 | 17.5 | 24.5 | 31.5 |
| 1979 | 7.0 | 7.0 | 19.4 | 26.4 | 33.4 |
| 1980 | 7.0 | 7.0 | 21.2 | 28.2 | 35.2 |
| 1985 | 7.0 | 7.0 | 23.1 | 30.1 | 37.1 |
| 1990 | 7.0 | 7.0 | 25.1 | 32.1 | 39.1 |
| 1995 | 7.0 | 7.0 | 26.8 | 33.8 | 40.8 |
| 2000 | 7.0 | 7.0 | 28.0 | 35.0 | 42.0 |

Mr. NELSON. By the year 2000 the chief actuary estimates that the civil service retirement system will cost a total of 42 percent of payroll or 7 percent of pay for employees and 35 percent of payroll for the Government. It should be emphasized that these cost projections are based on optimistic economic projections of a 4-percent increase in the Consumer Price Index, 4.5-percent salary increase, and 5 percent interest annually.

Clearly, the current method of utilizing static calculations to determine financing requirements does not reveal the total costs of the system. The total costs are hidden from the general public and even from Federal employees or retirees who often believe their contribution and an equal agency contribution on their behalf actually finances the system.

There is a need to determine the actual long-range cost of the current civil service retirement system and other Federal retirement systems, taking into

account the effect of inflation on salaries and benefits. Such costs should be determined through the use of dynamic assumptions.

There are three major economic assumptions which must be included in a dynamic valuation of a retirement system: Annuity increases, salary increases occurring as a result of inflation adjustments, and the rate of investment return.

In civil service retirement, postretirement annuities are tied to the Consumer Price Index (CPI) and initial annuity levels are related to the average of the highest 3 years salary. Therefore, assumptions must be made as to the future CPI annuity increases and salary increases in a dynamic valuation of civil service retirement. The interest rate for investment return used in a dynamic valuation should also be higher than that used for a static valuation since the return should be higher as inflation increases.

GUARANTEED USE OF GENERAL REVENUES

Public Law 91-93 established a guarantee for the use of general revenue funding to finance the civil service retirement fund. In fiscal year 1977 over 50 percent of the cost of the civil service retirement system was paid for out of a general revenue appropriation with another 25 percent in agency contributions which represents the agency's matching share. By the year 2000 the chief actuary has projected that over two-thirds of the system's cost will be paid by general revenues and the remainder will be paid by agency and employee contributions. I ask unanimous consent that two additional charts be inserted in the RECORD at this point. Chart No. 4 shows the total Government dollar contributions to the fund from 1970 to 1977 and projections of contributions through the year 2000. Chart No. 5 is a financial statement for the fund.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

CHART NO. 4

*Government dollar contributions to Civil service retirement fund*

[In thousands]

| Fiscal year | Agency | Total |
|---|---|---|
| 1970 | $1,665,529 | $1,896,346 |
| 1971 | 1,914,492 | 2,687,888 |
| 1972 | 2,059,958 | 3,221,374 |
| 1973 | 2,141,460 | 3,901,941 |
| 1974 | 2,290,894 | 4,817,464 |
| 1975 | 2,494,724 | 6,707,383 |
| 1976 | 2,741,576 | 7,877,108 |
| Transition quarter | 697,262 | 2,134,708 |
| 1977 | 2,909,760 | 9,278,181 |

*Projections*

[Amounts in billions]

| | |
|---|---|
| 1978 | $10.7 |
| 1979 | 12.1 |
| 1980 | 13.5 |
| 1985 | 17.9 |
| 1990 | 23.8 |
| 1995 | 31.2 |
| 2000 | 40.3 |

CHART 5

CIVIL SERVICE RETIREMENT FUND FINANCIAL STATEMENT

[Amounts in millions]

| | Employee contributions | Government contribution | Interest | Total receipts | Total disbursements | Fund[1] |
|---|---|---|---|---|---|---|
| 1921 | $21.5 | | $0.1 | $12.6 | $2.9 | $9.7 |
| 1922 | 14.1 | | .6 | 14.7 | 6.4 | 18.0 |
| 1923 | 14.2 | | 1.0 | 15.2 | 7.7 | 25.4 |

[1] Fund amount may not balance with other columns due to transfers of funds from and to other retirement systems and due to change from cash to accrual basis in 1972.

Mr. NELSON. Mr. President, the first bill I am introducing today will establish mandatory social security coverage of all new Federal employees hired after December 31, 1979. The second bill requires the Civil Service Retirement Board of Actuaries to report to the Congress, within 12 months after enactment, with a plan to assure the actuarial soundness of the civil service retirement fund. The actuarial assumptions used in the plan must include the best estimates of future events. Such best estimate assumptions must consider the rate of return on investments, future earnings, inflation, mortality, turnover, and disability.

It is generally agreed that future inflation should be anticipated in the actuarial valuation of pension plans which automatically react to inflation such as final average pay pension plans and plans integrated with social security.

The financing method used to assure actuarial soundness of the civil service retirement fund must assure that:

Retirement benefits will be paid as promised;

Currently accruing retirement costs are known and considered in program evaluations and budgetary allocations;

Adequate cost measures for new proposals are developed; and

Retirement costs bear a reasonable relationship to compensation.

The time has come for the actual cost of the civil service retirement systems to be revealed. The plan called for in the second bill will reveal the costs and will require that the actuaries of the civil service retirement fund come forth with a plan which will finance civil service benefits in a manner such that employees and employers contribute equal amounts. I believe that when this information is brought to light, the Congress will decide that new Federal employees should be covered under social security and that the civil service retirement fund should be financed on an actuarially sound basis with a financing plan that is fair and equitable to Federal employees and to the taxpayers.●

By Mr. HELMS:

S. 2882. A bill to provide that comparability pay increases shall apply to Members of Congress in any year only if the cost-of-living index for the preceding 12-month period has not increased by

more than 2 percent; to the Committee on Governmental Affairs.

FREEZE GOVERNMENTAL SALARIES

Mr. HELMS. Mr. President, I listened with interest to the President's comments on inflation this afternoon. I believe the American people are beginning to realize that the main cause of inflation lies right on the doorstep of Congress. The cause of inflation is wild, wasteful and extravagant Federal spending.

When Congress authorizes the spending of billions upon billions of dollars more than the Federal Government takes in—and this has been going on for years—that is an engraved invitation to devastating inflation.

When the Federal Government goes into debt by another $50 billion, as it is doing this year, more inflation is inevitable.

The President proposed as part of his program, a freeze on the salaries of certain government officials. Because he has no authority over congressional salaries he did not propose freezing them. I am proposing that the salaries of Senators and Representatives be frozen until inflation stops.

I send to the desk, as in legislative session and for appropriate reference, a bill to amend the Pay Comparability Act of 1967, the device which provides for increase in congressional salaries without requiring Congress even to vote on those increases.

Congress causes inflation by massive spending programs and regulations that cripple the economy. Congress should forgo any pay hike until inflation is stopped.

My bill simply provides that the existing automatic increases be stopped insofar as Members of Congress are concerned.

By insulating itself from the agony of the inflation it causes, Congress has invited the lack of public approval that now exists.

Thomas Paine called it tyranny when the English monarch imposed taxes on the American colonies that people in England did not have to pay. The Congress is equally guilty when it imposes the "tax" of inflation on the American people and then makes itself immune from inflation by automatically increasing the salaries of its own members.

Mr. President, I ask unanimous consent that my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2882

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the adjustments in compensation which, but for this Act, would be made in any year under paragraph (2) of section 601(a) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31), relating to comparability adjustments in the annual rate of pay of Members of Congress, shall take effect only if, during the 12-month period preceding the date on which such adjustments are otherwise to take effect, the Consumer Price Index (all items—United States city average), published by the Bureau of Labor Statistics, has not increased by more than 2 percent.

---

By Mr. CURTIS:

Senate Joint Resolution 126. A joint resolution to authorize the President to proclaim the month of May 1978 as "National Car Care Month"; to the Committee on the Judiciary.

NATIONAL CAR CARE MONTH

● Mr. CURTIS. Mr. President, spring is a welcomed season. Year after year we can count on warmer weather, plants coming to life once again, a time of lighter spirits and brighter days. Unfortunately, in recent years spring has shown a tragic characteristic as well. As the weather improves and more people take to the highways, the number of automobile accidents increases. Last year, according to the National Safety Council, the number of fatal automobile accidents per month in the United States rose steadily from March through July as follows:

| | |
|---|---|
| March | 3,600 |
| April | 3,890 |
| May | 4,280 |
| June | 4,490 |
| July | 5,100 |

It is estimated that in 1977 a total of 49,200 people died in highway accidents.

The Department of Transportation reports that in at least 4 percent and possibly as many as 16 percent of those accidents, a vehicular defect contributed to the tragedy. Those defects were the result of driving a car too many miles for too many months and years without check-ups. The three most frequent defects are with brakes, steering, and tires. Many of these problems can be avoided with simple routine car maintenance.

I am today asking that the month of may be designated "National Car Care Month" in order to increase awareness of the impact of preventive auto maintence on the health and well-being of our country.

So many expensive repairs can be avoided by much simpler maintence in the first place.

For example, nearly 90 percent of all tire trouble occurs in the last 10 percent of tread wear. All it takes to check the tread is to place a penny in the tread to check wear. It is much better to replace a worn tire before it has a chance to blow out on a busy highway at high speed.

Regular changing of motor oil and of oil and air filters prevents a lot of stalling in major intersections.

In fact, a lot of simple steps will save a lot of worry.

The Automotive Parts and Accessories Association estimates that more than half of all car engines are operating inefficiently. In a recent test of New York City's Bureau of Motor Vehicle Pollution's 25 department cars, two-thirds of the cars required a new air filter; 62 percent needed new spark plugs; and one-third needed new positive crankcase ventilation (PCV valves).

The obvious benefits beyond the savings of lives and of wear-and-tear on one's car are the savings of money and energy. Cars properly tuned get an average of 8.2 to 25 percent better gas mileage than cars not properly tuned.

Emission control devices are considered a major factor affecting auto fuel economy. If not maintained, such controls can cut gas mileage up to 25 percent.

Misfiring spark plugs can cut mileage by 10 percent. Spark plugs should be checked every 7,500 miles.

Improper front-wheel alinement can cut gas mileage by another three-tenths of 1 percent.

Failure to give immediate attention to burned-out headlights, brake lights, and turn signals can cost untold highway suffering.

By encouraging routine car care, we are encouraging auto safety habits that will benefit all of us.

In terms of the energy crisis, we have learned that we cannot continue the wasteful energy consumption practices of the past. Transportation accounts for 25 percent of our total energy consumption. Even a small percentage of savings is therefore significant.

In terms of the state of our economy, we are wise to do-it-yourself whatever auto maintenance tasks we know how to perform, and to trust reputable auto mechanics to handle those we cannot.

Mr. President, I believe that setting aside a specific month in which all Americans are made more aware of the desirability and need for effective and regular car care may make a lasting impression on the safety of our Nation's highways, and on the value of our hard-earned money.

I ask unanimous consent to have the joint resolution calling for designation of May as "National Car Care Month" printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 126

Whereas the most recent National Safety Council statistics indicate that 16,800,000 auto accidents occurred in the United States in 1976, resulting in 46,700 deaths;

Whereas 49,200 auto accident fatalities were reported nationwide in 1977;

Whereas a 1969 report on turnpike accidents estimated that 11 per centum of all fatal accidents involve some kind of vehicle defect;

Whereas auto safety inspection standards are not uniform in all fifty States;

Whereas car maintenance is as essential a factor in accident prevention as is skillful driving;

Whereas recent studies have indicated that substantial reductions in gasoline consumption and emissions of air pollutants can be achieved through proper maintenance and adjustment; and

Whereas public awareness of the critical impact of effective car care on highway safety and the conservation of energy and the improvement of air quality will encourage improved car care: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America*

*in Congress assembled,* That the President is authorized and requested to issue a proclamation designating the month of May 1978 as "National Car Care Month", and calling upon the people of the United States and interested groups and organizations to observe that month with appropriate activities and efforts to maximize road safety by encouraging the conscientious care and maintenance of automobiles.●

## ADDITIONAL COSPONSORS

S. 123

At the request of Mr. INOUYE, the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 123, a bill to amend the Social Security Act to provide for the payment of services by psychologists, and for other purposes.

S. 224

At the request of Mr. INOUYE, the Senator from Washington (Mr. JACKSON) and the Senator from Minnesota (Mrs. HUMPHREY) were added as cosponsors of S. 224, a bill to amend title 5, United States Code, to allow credit for civil service retirement purposes for time spent by Japanese-Americans in World War II internment camps.

S. 1974

At the request of Mr. NELSON, the Senator from California (Mr. CRANSTON), the Senator from New Mexico (Mr. DOMENICI), and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of S. 1974, the Regularity Flexibility Act.

S. 2128

At the request of Mr. INOUYE, the Senator from Missouri (Mr. EAGLETON) was added as a cosponsor of S. 2128, a bill to amend the Internal Revenue Code of 1954 to eliminate the adjusted gross income limitation on the credit for the elderly, to increase the amount of such credit, and for other purposes.

S. 2360

At the request of Mr. MOYNIHAN, the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 2360, a bill to authorize an appropriation to reimbuse certain expenditures for social services provided by the States prior to October 1, 1975, under titles I, IV, VI, X, XIV, and XVI of the Social Security Act.

S. 2414

At the request of Mr. WEICKER, the Senator from Utah (Mr. GARN), the Senator from Oregon (Mr. MARK O. HATFIELD), the Senator from North Carolina (Mr. HELMS), the Senator from Idaho (Mr. MCCLURE), and the Senator from Vermont (Mr. STAFFORD) were added as cosponsors of S. 2414, a bill to prohibit importation of coffee produced in Uganda into the United States.

S. 2455

At the request of Mr. BIDEN, the Senator from Colorado (Mr. HART), the Senator from Maine (Mr. HATHAWAY), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Minnesota (Mrs. HUMPHREY), and the Senator from South Dakota (Mr. MCGOVERN) were added as cosponsors of S. 2455, the Homeowner's Equity Act.

S. 2691

At the request of Mr. WILLIAMS, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 2691, a bill to provide for the furnishing of congregate housing services under the U.S. Housing Act of 1937.

S. 2711

At the request of Mr. WILLIAMS, the Senator from New York (Mr. JAVITS) was added as a cosponsor of S. 2711, the Community Schools and Comprehensive Community Education Act of 1978.

S. 2725

At the request of Mr. MATSUNAGA, the Senator from South Dakota (Mr. ABOUREZK) was added as a cosponsor of S. 2725, a bill to consider air traffic specialists as air traffic controllers for retirement purposes.

S. 2733

At the request of Mr. MCINTYRE, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 2733, the Small Business Energy Loan Act.

S. 2738

At the request of Mr. DOLE, the Senator from Indiana (Mr. LUGAR), and the Senator from New Mexico (Mr. SCHMITT) were added as cosponsors of S. 2738, a bill to provide for the indexation of certain provisions in the tax laws.

SENATE JOURNAL RESOLUTION 72

At the request of Mr. INOUYE, the Senator from New Mexico (Mr. SCHMITT), the Senator from New Mexico (Mr. DOMENICI), and the Senator from Pennsylvania (Mr. SCHWEIKER) were added as cosponsors of Senate Joint Resolution 72, authorizing the President to proclaim annually a week during the first 10 days of May as "Pacific/Asian American Heritage Week."

SENATE RESOLUTION 411

At the request of Mr. LUGAR, the Senator from Illinois (Mr. PERCY), and the Senator from New Mexico (Mr. SCHMITT) were added as cosponsors of Senate Resolution 411, a resolution expressing the sense of the Senate that further efforts be made by Federal departments and agencies to channel additional deposits to minority-owned commercial banks.

SENATE CONCURRENT RESOLUTION 73

At the request of Mr. DOLE, the Senator from Oklahoma (Mr. BARTLETT), the Senator from North Carolina (Mr. HELMS), the Senator from Hawaii (Mr. INOUYE), and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of Senate Concurrent Resolution 73, a resolution regarding the imposition of import fees on crude oil.

AMENDMENT NO. 849

At the request of Mr. NELSON, the Senator from California (Mr. CRANSTON), the Senator from New Mexico (Mr. DOMENICI), and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of amendment No. 849, intended to be proposed to S. 1974, the Regulatory Flexibility Act.

AMENDMENT NO. 1696

At the request of Mr. NELSON, the Senator from South Dakota (Mr. MCGOVERN), the Senator from Hawaii (Mr. MATASUNGA), the Senator from Minnesota (Mrs. HUMPHREY), and the Senator from South Dakota (Mr. ABOUREZK) were added as cosponsors of amendment No. 1696, intended to be proposed to H.R. 7200, the Public Assistance Amendments of 1977.

AMENDMENT NO. 1716

At the request of Mr. CRANSTON, the Senator from South Dakota (Mr. MCGOVERN) was added as a cosponsor of amendment No. 1716, intended to be proposed to S. 2570, a bill to amend the Comprehensive Employment and Training Act of 1973 to provide employment and training services, to extend the authorization, and for other purposes.

## AMENDMENTS SUBMITTED FOR PRINTING

### HIGHWAY POTHOLE BILL—S. 2557

AMENDMENT NO. 1769

(Ordered to be printed and referred to the Committee on Environment and Public Works.)

Mr. SCHWEIKER submitted an amendment intended to be proposed by him to the bill (S. 2557) to provide emergency assistance for the repair of certain weather related damage to highways and urban mass transportation systems due to the winter of 1977–78.

● Mr. SCHWEIKER. Mr. President, today I am submitting an amendment I intend to offer to S. 2557, a bill designed to aid States to repair highway and street damages caused by the disastrous 1977–78 winter. S. 2557, introduced February 22, by my distinguished colleague from Kentucky (Mr. HUDDLESTON) is identical to H.R. 10979, which passed the House of Representatives February 21, 1977. My amendment will permit funds not used by States which did not suffer serious damage this winter to be reallocated to the hardest hit States.

I strongly support the need to provide relief to States which suffered extensive damage to their roads, particularly to those States whose road repair budgets will be exhausted long before completion of repairs which necessarily must be done this spring and summer.

S. 2557 would provide 100 percent reimbursements to repair road damages suffered as the result of the 1977–78 winter. Reimbursements are to be in addition to those funds already budgeted by the States; therefore, the repair workload must exceed the current State budgets and cannot act as a substitute for State funds.

The bills provide that no State is to receive more than 7 percent of the total authorized ($17.5 million) nor less than one-half percent of the total ($1.25 million); however, no provision is made to reallocate funds earmarked to States which did not suffer sufficient road dam-

age attributable to the 1977–78 winter in excess of their current road budgets.

Under one distribution estimate recently brought to my attention, Pennsylvania would receive $9.7 million, much less than the maximum allowed under this bill and considerably less than needed to complete necessary road repair work. I do not seek to deprive any State of funds to repair winter road damage to which it would be entitled under S. 2557. However, since some States clearly did not have severe winters, they will be unable to qualify for their share of the aid. And I want to be certain that Pennsylvania or another State which had extensive winter road damage is able to receive sufficient aid. In light of the current crisis, I feel it would be wrong not to spend these funds and to withhold important relief from those hardest hit States.

Mr. President, I feel this approach has merit, and I have brought it to the attention of my colleagues on the Environment and Public Works Committee, requesting they incorporate the concept into the bill it recommends to the full Senate. Otherwise, it is my intent to offer this amendment at the appropriate time during debate on the bill.●

## LABOR LAW REFORMS ACT OF 1978—S. 2467

AMENDMENTS NOS. 1770 AND 1771

(Ordered to be printed to to lie on the table.)

Mr. HELMS submitted two amendments intended to be proposed by him to the bill (S. 2467) to amend the National Labor Relations Act to strengthen the remedies and expedite the procedures under such Act.

## PANAMA CANAL TREATIES—EX. N, 95–1

AMENDMENT NO. 101

(Ordered to be printed and to lie on the table.)

Mr. ALLEN (for himself and Mr. THURMOND) submitted an amendment intended to be proposed by them, jointly, to the Panama Canal Treaty, Ex. N, 95–1.

## RESERVATIONS SUBMITTED FOR PRINTING

RESERVATION NO. 13

(Ordered to be printed and to lie on the table.)

Mr. THURMOND submitted a reservation intended to be proposed by him to the resolution of ratification of the Panama Canal Treaty, Ex. N, 95–1.

## NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

● Mr. PELL. Mr. President, on April 19, 1978, at 10 a.m., the Committee on Rules and Administration will resume the hearings which began on September 28, 1977, on S. 2, the Program Evaluation Act of 1977, and on S. 1244. the Federal Spending Control Act of 1977. The working group of Senate committees' staffs, which was convened after the first day of hearings to consider this matter and report to the Rules Committee, has completed its work, and its report is now in printing.

Those who wish to testify or submit a statement for inclusion in the hearing record should communicate as soon as possible with the Committee on Rules and Administration, 305 Russell Senate Office Building, Washington, D.C. 20510, or telephone Miss Peggy L. Parrish, chief clerk, at 224–0281.●

SUBCOMMITTEE ON ARMS CONTROL, OCEANS AND INTERNATIONAL ENVIRONMENT

● Mr. PELL. Mr. President, the Subcommittee on Arms Control, Oceans, and International Environment of the Committee on Foreign Relations will hold a hearing on Thursday, April 13, on U.S. preparations for the United Nations Special Session on Disarmament. The hearing will be held at 10 a.m. in room 4221 of the Dirksen Senate Office Building.

Witnesses will include the Honorable Charles W. Maynes, Assistant Secretary of State for International Organization Affairs; Dr. Lawrence Weiler, Special Coordinator for the United Nations Special Session on Disarmament, Arms Control and Disarmament Association; William H. Kincade, executive director of the Arms Control Association; Edward C. Luck, deputy director of policy studies for the United Nations Association-United States of America; and, Dr. Charles C. Price of the board of directors of the Council for a Livable World.

As chairman of the subcommittee, I am very interested in making certain that the United States contribute to this session in a very positive fashion. For years, other nations have looked to the United States to set an example in arms control. This session will afford the nations of the world who care about the control of armaments to explore with each other ways in which all can cooperate to ease the burden which arms purchases and competition have entailed.●

COMMITTEE ON ENERGY AND NATURAL RESOURCES

● Mr. JACKSON. Mr. President, I wish to announce for the information of the Senate and the public, the scheduling of a public hearing before the Senate Committee on Energy and Natural Resources.

The hearing is scheduled for April 17, beginning at 9 a.m. in room 3110, Dirksen Senate Office Building. Testimony is invited regarding S. 2821, a bill to authorize $8,868,000 for grants to the Government of Guam for construction of public facilities, and for other purposes, and S. 2822. a bill to authorize the appropriation of funds for the rehabilitation and resettlement of Bikini Atoll, Trust Territory of the Pacific Islands, and for other purposes.

For further information regarding the hearing you may wish to contact Mr. James P. Beirne of the committee staff on extension 42564. Those wishing to testify or who wish to submit a written statement for the hearing record should write to the Committee on Energy and Natural Resources, room 3106, Dirksen Senate Office Building, Washington, D.C. 20510.●

SUBCOMMITTEE ON GOVERNMENTAL EFFICIENCY

● Mr. EAGLETON. Mr. President, the Subcommittee on Governmental Efficiency and the District of Columbia will hold hearings on the proposal for a new basic criminal code for the Distirct of Columbia, submitted by the District of Columbia Law Revision Commission, on May 3 and 4, 1978. The hearings will take place in room 3302, Dirksen Building.●

SECURITIES INVESTOR PROTECTION ACT AMENDMENTS

● Mr. WILLIAMS. Mr. President, I wish to announce that the Subcommittee on Securities of the Committee on Banking, Housing and Urban Affairs, will hold hearings on H.R. 8331, the Securities Investor Protection Act Amendments of 1977 on April 25, 1978. The hearings will be held in the committee's hearing room, room 5300 in the Dirksen Senate Office Building, at 2 o'clock p.m.●

SPECIAL COMMITTEE ON AGING

● Mr. CHURCH. Mr. President, I wish to give notice that the Special Committee on Aging will continue its hearings on alternatives in long-term care for the elderly on Monday, April 17 at 9 in room 1224, Dirksen Senate Office Building.

Senator DOMENICI will preside at a hearing on "Health Care for Older Americans: The 'Alternatives' Issue—Standards in Home Care and the Home Services Act."●

FOREIGN AGRICULTURAL POLICY SUBCOMMITTEE

● Mr. STONE. Mr. President, I wish to alert my colleagues to the plan of the Foreign Agricultural Policy Subcommittee of the Senate Committee on Agriculture, Nutrition, and Forestry to conduct a hearing on April 21, 1978, to examine legislation to establish an international food reserve.

I would like to point out that last year the Senate included an international food reserve section within the 1977 Food and Agriculture Act, but it was deleted in conferer ce because of a jurisdictional problem on the House side. This administration has indicated its strong support for an international food reserve and its intention to move ahead and acquire 220 million bushels of wheat for the reserve, which should be beneficial to producers.

The hearing will focus on bills introduced by Senators LUGAR (S. 2641), HUMPHREY (S. 2278), and the administration bill.

We will have a group of invited witnesses, but written statements will be accepted for the record. The hearing will begin at 9:00 in room 324 RSOB. Anyone requiring further information should contact the committee at 224–2035.●

CORRECTION

● Mr. ABOUREZK. Mr. President, I would like to note for my colleagues that

the hearing schedule for the Energy and Natural Resources Committee printed in the RECORD on Tuesday, April 4, 1978, contained an error with regard to two hearings scheduled before the Parks and Recreation Subcommittee.

The correct schedule is:

April 24.—Ceilings and Boundary modifications within units of the National Park System.

April 28.—S. 88, to add additional lands to the Sequoia National Park, California.●

## ADDITIONAL STATEMENTS

### EMERGENCY AGRICULTURAL ACT

● Mrs. HUMPHREY. Mr. President, I am deeply concerned that our farmers be able to earn an adequate income. They are confronting serious adverse economic conditions, and our Government must be responsive in providing effective remedies.

I voted for the original Senate version of the Emergency Agricultural Act of 1978 because it included several alternative proposals for subsequent consideration by a House-Senate conference in developing a reasonable program which could be rapidly implemented.

The conference committee reported legislation providing for a system of new flexible target prices and loan rates for the 1978 wheat, corn and cotton crops, tied to decisions by farmers to take land out of production.

I reluctantly decided to vote against the conference report because it failed to meet two crucial tests. First, it could not be quickly implemented. The President has stated that the budget costs and possible inflationary impact of this particular system of farm assistance would probably necessitate his vetoing this legislation. However, even if this bill should become law the further time involved in administrative implementation would go beyond the period of crop planting in many areas.

Second the extent to which this particular program would actually benefit the major portion of Minnesota agriculture must seriously be questioned. In fact, concern has been expressed that livestock, dairy and poultry operations, constituting almost two-thirds of Minnesota farm income, could confront sharply reduced supplies of feed.

Because of the uncertain outcome of this legislative program, I believe it is essential that Congress pursue further action in connection with pending farm credit legislation, to strengthen aid levels and associated programs under the 1977 farm bill (Public Law 95–113), and to focus our efforts on the needs of the small family farm. In large part because of this major 4-year program enacted by Congress last September, there recently have been significant improvements in market prices. But the fact remains that rising costs of fuel, labor, fertilizer, and heavy debt burdens of capital investment still are exceeding the income of far too many of our farmers from these market sales. Legislative remedies enacted by Congress must effectively address this urgent issue, while at the same time sustaining improvements over the long term and helping to assure expanded international export market opportunities.●

### IN A CLASS BY HERSELF

● Mr. HANSEN. Mr. President, I should like to call attention to an article that appeared in the Chicago Tribune magazine of April 9, concerning the success of a small private school in the black West Side area of Chicago. The story tells of how a dedicated teacher, after years of frustration in the public schools of Chicago, started her own school, and has achieved remarkable successes with children who had not been helped by the public schools.

I would like to note particularly that this kind of school is exactly the place where the Packwood-Moynihan tuition tax credit proposal will make the most real difference. The rich always have and always will be able to send their children to private schools, and the top private schools will always be well-attended and well-endowed. This legislation will not change that. But it will make a big difference for the poor and people of modest means who will be given at least a chance at a different kind of education where the public school is not meeting their needs.

And there can be little doubt that it is in the poorest areas and in minority areas where the public schools have had their greatest failings.

One example of this was that in the recent national merit scholarship competition for black students, well over half of the winners in the Chicago area attended private schools, even though those schools enroll only a small fraction of black students.

We argue loudly in favor of competition in many segments of our society. But in perhaps the most crucial area for our children, education, we have not been willing to give all parents an opportunity at the freedom of choice that the rich have always enjoyed. The tuition tax credit will at least open a small door for striving parents who want a better life for their children through education. Where the public schools are not fulfilling the needs of their children, they deserve that opportunity.

I wish to submit the article for the RECORD:

IN A CLASS BY HERSELF

Grammar school students quote Shakespeare, discuss Socrates, evaluate Beowulf, tell about Ptolemy the cartographer. They recite passages from Kipling and Emerson. Youngsters write themes about Sophocles and "The Brothers Karamazov" that reveal a grasp of the concepts. Spelling and grammar are excellent.

A school for advanced youngsters in Winnetka? Evanston? Oak Park? Wheaton?

Not at all. It's Westside Prep at 3819 W. Adams St. on Chicago's tough West Side. The school began two and a half years ago as the vision of Mrs. Marva Collins, who "was fed up after 14 years of teaching in the Chicago public schools." Using their family savings, her husband, Clarence, remodeled the second floor of their two-family home, and the school opened in September, 1975, with six neighborhood youngsters. It grew to 14 by the end of the first year, and today 20 students ranging in age from 5 to 20 attend Westside Prep.

Seemingly tireless at 37, Marva Collins is never still. Encouraging, prodding, cajoling, joking, and inspiring, she exhorts the youngsters to sit up straight, speak up, look people in the eye, and pay attention. While one age group masters a drill in a workbook, another group receives individual instruction from her.

"You have to show the children you believe in them," Mrs. Collins says. "That you know they can accomplish anything. All you really need for teaching is a blackboard, books, and a pair of legs that will last throughout the day."

"What does extinct mean?" Mrs. Collins asks Erika McCoy. "It means something is no longer alive," answers Erika, a bright, perceptive 8-year-old.

Before coming to Westside Prep last year Erika had been placed in a class for the mentally retarded. Today she writes themes on "The Year and Its History" with such lines as: "January is named after the Roman god Janus. March is named after Mars the Roman god of war. June honors Juno the wife of Jupiter."

Nine-year-old Creshon Harris couldn't read when he started at Westside Prep last year. "He couldn't even read *the* or *an*," says his mother, Mrs. Jeanne Harris. "Now he's reading well and is much more interested in school. His spelling is improving, and has even started reading at home. His behavior is much better because he's successful and enjoys what he does. Mrs. Collins believes in the kids and they believe in her, and now they believe in themselves. The school has given me a lot of peace because I know my child is doing better and getting what he needs."

The connection between learning disabilities and crime is well-documented. Recalling his days as chaplain in Chicago's House of Correction. Father Bruce Wheeler, an Episcopal clergyman, says: "We had an 18-year-old boy in for his fifth conviction for stealing cars. I talked with him and discovered he didn't steal cars to sell but to go joyriding. He couldn't buy a car and drive it because he couldn't get a driver's license. Why couldn't he get a driver's license? Because he couldn't read. In his last term we got a school started in the jail and taught him to read. He was discharged, got his license, got a job, and never came back." Rev. Wheeler points to one of the costly aspects of the broad spectrum of problems summed up under the label "learning disabilities."

Several years ago three states finished studies showing that between 85 and 90 per cent of all juveniles sentenced to correctional facilities suffered from clinically provable learning disabilities. A number of the children who come to Westside were diagnosed as retarded or learning disabled. The experience there has shown that all they needed was adequate teaching. The learning disability apparently lay with the teacher rather than the child.

Mrs. Joanne Turner would probably echo that view. Her daughter, Kimberley, is 10 and, says Mrs. Turner, "She was so far behind in the other school she didn't care anymore. She was nervous and cried all the time. In just a few months in Westside Prep her reading score jumped from 2.2 to 4.0. She won't miss school—even in zero weather. I think Mrs. Collins accomplishes more because she spends more time with the children. Kim plays much better with other children and is always reading at home. If you're any mother at all, you want the best for your child, and

Westside Prep has been tremendous for mine."

Today Kimberley reads at her age level and a few weeks ago wrote: "Marquette was a Jesuit missionary and explorer. Born in France, he began to study to become a priest at 17. He taught a while before he was sent to Canada as a missionary in 1666.

"Father Marquette studied the Indian language. Most of his first years was spent in Lake Superior area to convert the Indians to Christianity. In 1671 he founded a mission in upper Michigan. While in the wilderness Father Marquette met the young explorer Louis Joliet."

"I was angry for 14 years teaching in the public schools," Mrs. Collins says. "Money isn't the answer. And gimmicks don't make education better. Teaching takes a personal interest on the part of the teacher. It takes discipline and dedication to learning, and then we create an intellectual climate that challenges these youngsters to do more."

Five-year-old Christopher Stubblefield concurs. "I like the school," he says with a grin, "because we do hard things here."

"We have a contract system," Mrs. Collins continues. "The children have to complete a certain quantity and quality of work on a contract basis, just like their parents. If they don't work, they don't get paid."

After one youngster was asked to recite and said he only knew half of his assignment, Mrs. Collins said, "When you go home, I'll ask your mother to give you only half your dinner."

A heavy emphasis on individual responsibility predominates in the classroom. "Success doesn't come to you." Mrs. Collins exhorts. "You go to it. You don't buy it with Green Stamps. There's no check until the work is done. You don't get any report card unless all the homework is in. Every moment here is going to be used."

Mrs. Collins: "What did you learn from the 'Little Red Hen'?"

Class: "If you don't work, you don't eat."

Mrs. Collins: "What did you learn from the story of the boy who cried wolf?"

Class: "If you're a lier, nobody will believe you even if you're telling the truth."

Westside Prep is incorporated by the office of the Secretary of State in Springfield. The children attend school from 8 a.m. until 2:45 p.m.—and sometimes 3 or 3:30—with 30 minutes for lunch. The school year began Sept. 8 and will end June 26.

Mrs. Collins admits to no failures and bristles at the suggestion that her students are carefully selected and therefore do superior work. "No child fails," she says. I choose children from the neighborhood who are at the lowest ebb and need it most. Many are from single-parent homes."

Tuition at Westside Prep is $80 a month, but if a parent cannot afford to pay there's no charge. There's a waiting list of 175 children from the neighborhood. Mrs. Collins believes the school works better with less money because she has to spend more time teaching and more time with the children.

Comments by her students support that assessment. Asked how Mrs. Collins differs from other teachers he has had, 10-year-old Duane Alexander, who entered Westside last fall, replied: "She doesn't sit down. She keeps after us until we do it right—that's a lot different In the other school if we didn't do something right, they just left us alone. Mrs. Collins takes time to read with us and ask questions. We spend more time learning at her school."

Ten-year-old Tracy Shanklin added: "The teachers in the other schools weren't consistent. Mrs. Collins is. We don't have to be afraid to ask a question if we don't understand something. She'll explain the answer until we understand She'll give us a book, and we study it until we know what it's all about."

Said Kimberly Turner: "Mrs. Collins spends more time with us. She cares more about what we learn and knows when we don't understand something. Then she helps us."

Students are tested frequently with such standard evaluations as SRA Assessment Survey, California Achievement Test, Metropolitan Achievement Test, and the National Standard Test.

"The children read aloud in class," says Mrs. Collins, "because it keeps them from mispronouncing words as they are likely to do if they read silently. Oral reading is beneficial to punctuation, vocabulary, and style. Children begin to understand synonyms, characterization, conflict, and the author's point of view."

Marva Collins grew up in Atmore, Ala., a small town near Pensacola, Fla. Her father was a successful funeral director and imbued her with a desire to learn and succeed. An avid reader as a child, she attended Clark College in Atlanta after finishing high school in Atmore. Following graduation from Clark she attended Chicago Teacher's College and then studied creative writing for the gifted child at Columbia College here.

Always direct, she says: "We use graphing in math and emphasize mathematics at Westside Prep although it doesn't get as much attention as the reading and writing our children do. We use the Open Court series in basic reading. Many teachers say it's too difficult for kids. Actually, it's too difficult for the teachers. I really learned nothing in college that helped me become a teacher. Academically, it has been my Creator and me."

"Im sure that's correct," agrees Dr. Hobart Mowrer, research professor of psychology at the University of Illinois. "The entire field of learning theory is vastly overrated. And I think poor schools and poor students are a reflection of disintegrated family life and a sick society. The permissiveness that started with John Dewey has contributed to the problem. It's obvious that Marva Collins' emphasis on basics and on responsibility is paying off for these students in Westside Prep."

Dr. Mowrer's comments are particularly significant because he is a well-respected authority on learning theory. An internationally respected psychologist, he has published three books and scores of papers on learning theory and taught eight years at the Harvard Graduate School of Education.

Why does Mrs. Collins' school work? "Well," says Dr. R. P. Albert, principal of Central Elementary School in suburban Riverside, "my reaction is simply that she's an exceptional teacher. They exist in many places, and I think that her own personality and strength motivate the students. Teachers who believe in the kids transfer these feelings to them. Reading excerpts of themes by these youngsters I see that they have outstanding vocabularies and are dealing with abstract ideas. That's unusual in children this age.

"Teachers like Mrs. Collins have what is needed to show young people that they can make it if they try through disciplined effort. I'm committed to the public schools, but I think we need these kinds of alternatives as well."

Another view of Westside Prep comes from Dr. Leonard Borman, a research associate at Northwestern University's Center for Urban Affairs and director of the Self-Help Institute there. Borman may know more about the burgeoning self-help movement than anyone else in the country.

"Looking at what Mrs. Collins is doing, I see it as a solid self-help effort," Dr. Borman says. "She has gone outside the formal system, and I suspect if you're interested in helping kids learn, you have to go outside the system and bootleg it. She's a unique teacher, highly skilled, who wants to help these kids master intellectual skills and is doing it. A fascinating example of self-help at work."

The self-help works so well that a boy who was with her for two years now attends De La Salle as a 13-year-old freshman. And a girl who spent two years at Westside Prep is now doing top-caliber work in Glencoe.

Invariably outspoken, Marva Collins found her remarks inspiring anonymous hate letters during her public school career. But she has continued working with a loving blend of humor, kindness, endless repetition, and sometimes sternness. "You can if you try," Collins emphasizes. "We have to build the total child, otherwise these youngsters will be crushed."

Her students quote Marcus Aurelius: "He alone is poor who does not believe in himsel." Teaching by example as well as words, Collins radiates the kind of self-confidence that enabled her to refuse $16,000 in federal funds last year.

"We keep putting Band-Aids on hemorrhages—giving people money but no skills," she says. "My dream for these kids is that they get all the education they can and then come back to live in this neighborhood and help other young people. My husband and I could live somewhere else, but I think we belong here, and we plan to stay and do what we can." ●

## REPRESENTATION IN CONGRESS FOR THE DISTRICT OF COLUMBIA

● Mr. ABOUREZK. Mr. President, I am happy to announce my cosponsorship of Senate Joint Resolution 65, the companion resolution to the recently passed House Joint Resolution 554, granting voting representation in Congress to the residents of the District of Columbia.

I believe that it is incumbent upon me and my colleagues to follow the example of the House of Representatives and pass this resolution. It is important to send a strong mandate to the States to insure this amendment's final ratification.

Commonsense and consideration of the needs and rights of all American citizens would lead one to favor this proposal. There has been no debate to my knowledge over the fact that the residents of the District of Columbia are citizens of the United States. Our country has governed itself for 200 years on the principle of representative government. It is a basic principle that every citizen of the United States should be represented in the Congress. It is beyond my imagination why we should have to be fighting 200 years after our independence for the right of some citizens to be represented. Yet, time and time again the people of this country have had to fight to insure that some group of people are not excluded from this simple and basic right. We have had to amend the Constitution to allow women to vote. to allow blacks to vote, and now to allow residents of the District of Columbia to vote for their own representatives. My hope is that some day we will reach the point where the people will be fully enfranchised. We have come a long way in that direction, but we are not there yet.

Bevond simple consideration of the basic rights of every citizen of the United States, there is a practical reason for extending voting representation in Congress to the District of Columbia. There is a special relationship between the Dis-

trict and the Federal Government. The Congress controls the local legislative process of the District. There is no other jurisdiction in the United States whose needs and desires can be unilaterally thwarted by the Congress. And yet the Congress cannot be held accountable for its actions by the residents of the District of Columbia. Therefore, it is imperative that the District be provided with voting representation in both Houses to provide the residents of our Nation's Capital with a strong voice to insure that their needs and desires are met. Without this representation, the residents of the District will continue to have their desires thwarted with absolutely no recourse.

I understand that there is some concern among some of my colleagues about diluting their power in the Senate by adding two new Senators from the District of Columbia. This should not be a consideration in determining the rights of the residents of the District to be represented in Congress. If some of my colleagues are nonetheless bothered by this consideration, I would simply ask them to take example from our former colleagues who have served in the House and the Senate and have allowed State after State to enter into the Union and have full voting representation in the Congress.

I hope that my colleagues come to the realization that as long as the residents of the District of Columbia are not fully represented here in Congress, the Constitution protects only some of the citizens of this Nation. Let us create a Government that truly represents all its people.●

## SOUTH AFRICA

● Mr. GOLDWATER. Mr. President, for many years I have had a deep interest in the whole continent of Africa. During World War II occasionally I had to fly aircraft across the middle of that vast expanse and then during other parts of that time I served on the northern perimeter. I have visited South Africa on numerous occasions, also Rhodesia and recently South West Africa. I intend to have more to say about this part of the world as time goes on during this session and even on into the next one because I am completely convinced that if the Carter policy toward the continent of Africa and specifically Rhodesia, South Africa, and South West Africa continues without any indication of disfavor on the part of the Congress, without any cessation of what is taking place on his part, that we are going to see utter chaos across that continent that is going to become the most important one in the world as time slowly goes on. I have come across a paper written by Dr. D. S. Prinsloo of Pretoria entitled "United States/South Africa Relations," which I think will make a perfect opening background statement for those which I will place in the RECORD from time to time. Therefore, I ask that this article be printed in the RECORD at this point in my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STRANGULATION WITH FINESSE: U.S. POLICY TOWARD SA

(By Dr. D. S. Prinsloo)

PART I: UNITED STATES/SOUTH AFRICA RELATIONS

2. Background to U.S./South Africa Relations:

2.1 Diplomatic relations:

The United States has had a long historical relationship with South Africa, first with the various colonies and states that formed the Union of South Africa in 1910, and afterwards with the Union which became a Republic in 1961.

The Dutch settlement at the Cape was founded in 1652, and in 1795 this fledgling colony was owned by Great Britain. Four years later, in 1799, an American Consulate was opened in Cape Town, the fifth such post established on the African continent after the attainment of American independence twenty-three years previously.

In 1854 the independence of the Boer republic, the South African Republic (Zuid-Afrikaansche Republiek), was recognised by Britain. After the influx of large numbers of foreign fortune seeks subsequent to the discovery of gold in that country in the early 1870's, and in particular after the rush of Americans to the new city of Johannesburg after the discovery of the world's richest gold deposits on the Witwatersrand in 1886, an American Consulate was opened in Johannesburg in 1891. Seven years later in 1898 a Consulate was also opened in Pretoria, capital of the Republic.

At the end of the Anglo-Boer War of 1899–1902 the two Boer republics became British colonies along with the Cape of Good Hope and Natal. In 1906, four years before the establishment of the Union, an American Consulate was opened in Durban, port city of Natal.

The process of the upgrading of the diplomatic ties between the two countries paralleled South Africa's progress towards full statehood within the British Empire. During the First World War South Africa was a part of the British Empire, and as a result the South African Prime Minister, Jan Smuts, enjoyed a high standing in London and Washington after the war. He strengthened his image through his intimate participation with American leaders on the drawing up of the Covenent of the League of Nations.

The status of South Africa and the other British dominions was largely clarified through the Balfour Declaration of 1926, and with the country's autonomous status confirmed, the South African government on 1 June 1927 created a separate Department of External Affairs to administer the country's external relations. In 1928 the status of the American Consulate in Pretoria was raised to a Consulate-General, while a South African legation was opened in Washington in 1929.

For the first number of years after the formation of the Union, two political parties dominated the local scene. The governing party after Union was the South African Party (SAP), officially formed in 1912, and the National Party which was formed when General Hertzog broke away from the SAP in 1914. The National Party won the 1924 general election after co-operation with the Labour Party, and formed the so-called pact-government, which also won the 1929 elections. As a result of South Africa's economic difficulties following the world-wide economic crisis after the Wall Street crash in 1929, co-operation was sought between the SAP and the governing NP. As a result the two parties fused in December 1934 to form the United Party. Dr. D. F. Malan and his supporters declined to fuse and reformed the National Party. As a result of increasing voters dissatisfaction with the UP government, the reformed National Party regained power in May 1948 after an election agreement with the Afrikaner Party. This election victory was significant as the election manifesto of the NP was based on a policy of racial segregation, an important factor in South Africa's international relations ever since.

In the following year the American Consulate-General in Pretoria was upgraded to an Embassy, and on 23 March 1949 North Winship presented his credentials as the first American Ambassador to South Africa.

2.2 Elements shaping US policy towards SA:

The political awakening of the countries of the Third World following World War II gradually gave new direction to the foreign policies of the major powers. US policies towards Africa were slow to adopt to the new circumstances evolving on the continent, partly through disinterestedness and partly through ignorance of the awakening giant so far removed from the affairs and interests of the American people. South Africa is one of the oldest independent countries on the continent, and is also the most advanced and developed country. Initial US interaction with South Africa was, therefore, largely based on growing economic relations. The 1948 election victory of the National Party with its policy of racial separation, preceding with one year the elevation of diplomatic ties between the two major countries to ambassadorial level gradually posed an increasing dilemma for subsequent US Administrations. This dilemma involved issues ranging over a wide spectrum, and included the following:

(1) The US attitude towards the racial policies and practices in South Africa, and their potential influence.

(a) on US relations with the rest of Africa and the Third World, and

(b) on American society, particularly the Negro population.

(2) The importance of the volume and extent of US economic relations with South Africa, including substantial trade and investments.

(3) US reliance to a large degree on the importation of strategic raw materials, particularly minerals, from South Africa.

(4) The defence and strategic importance of South Africa for the US and its allies, located on the southern tip of the African continent at the meeting point of the Indian and Atlantic Oceans.

The importance and implications of these factors will now be viewed briefly.

3. Political interaction:

The argument over the power and importance of political and economic instruments of policy has not ceased. US interaction with South Africa over the past three decades has been characterised by attempts to attain some balance between the perceived negative influence of political relations with South Africa on the one hand, and the ever-increasing importance of economic relations on the other hand.

According to Lake US policies toward South Africa since World War II have been marked by caution, compromise and muddle, by inconsistency between rhetoric and action, and by a "low profile" uncharacteristic of most of America's post-war foreign policies. This was particularly true of the Truman years, but even in the eight years of the Eisenhower Administration, the apparent tension between rhetoric and action in American policy which has been obvious

ever since, began to emerge. This was partly due to events within South Africa, but also to the emergence of large numbers of newly independent states in Africa that slowly forced changes in the US African policy and also its voting behaviour at the United Nations. Until 1958 the US continued to abstain from voting on resolutions concerning South Africa's racial policies, in agreement with the assessment that the UN was not competent to intervene in domestic matters. In 1958 with the changing face of the African map, the State Department Bureau of African Affairs was created, and in the same year the US voted for a UN resolution which expressed regret and concern over South Africa's racial policies.

The US official attitude displayed a further hardening after the Sharpeville incident of March 1960, and apart from State Department condemnation of the incident, the US also voted for a UN Security Council resolution which "deplored the policies and actions of the South African Government."

The Kennedy Administration went further than any of the previous Administrations, both in the strength of its verbal condemnations of South Africa's policies and in taking action for the first time which demonstrated American opposition to it. One of South Africa's most outspoken opponents in the Administration during those years was the Assistant Secretary of State G. Mennen Williams. The US policy under President Johnson followed the same lines established by Kennedy, and according to Lake even went beyond the opposition of the Kennedy years. During these years two new steps were taken in the UN. In June 1964 the US voted for a Security Council resolution creating a committee of experts to study the feasibility and implications of sanctions against South Africa.

The other action involved South West Africa. Shortly before the decision of the International Court of Justice in July 1966, Assistant Secretary Williams stated that the Court's judgement will be binding on all parties, and that the United States expects the parties to the suit to comply with the judgment, apparently said in the hope and belief that the judgment would go against South Africa. When this did not happen, and the ruling went against Eithiopia and Liberia, the State Department backtracked and issued a statement which emphasized the limited nature of the ruling and South Africa's continuing responsibility to the UN. In October the US also supported a resolution condemning South Africa for its refusal to relinquish its control over SWA, and asking the Security Council to take all effective measures to oust South Africa from SWA.

The Nixon Administration noticeably changed American policy towards South Africa. The Kennedy and Johnson Administrations were criticized by South African opponents from the left for their failure to translate its public denouncements of South Africa's policies into actions that might have forced a radical change. In his first year in office Nixon requested a comprehensive review of the American approach towards Southern Africa, the so-called National Security Study Memorandum 39 (NSSM 39). This study laid the foundation of US policy towards southern Africa until the collapse of the Portuguese empire in Africa, a policy which favoured the maintenance of the status quo as far as possible. A possible reason for this was the American preoccupation with Vietnam, coupled with increasing domestic pressure to end the Indochina war. According to Baker the following were the main assumptions on which the recommendations of the NSSM 39 rested:

(1) that Whites—in the Portuguese colonies, Rhodesia, Nambia and South Africa—would retain power for a considerable period of time;

(2) that although guerrilla war in Mozambique and Angola might ultimately lead to a Portuguese withdrawal, factionalism among the Rhodesian nationalist groups would prevent them from successfully combining and contesting against White power there;

(3) that South Africa, given its military power, could relatively easily curtail internal or external African opposition to its rule;

(4) that with increasing industrialisation, the condition of black workers in South Africa might improve, thereby leading to greater internal stability; and

(5) that South Africa would ultimately grant independence to the various homelands and Namibia, doing so however in such a manner that they remained subservient to South Africa.

Then came a series of events that had a deep impact on the whole spectrum of international relations: the coup in Lisbon leading to independence for Angola and Mozambique under Marxist control; the Marxist victories in South East Asia; the resignation of Nixon after the Watergate scandal; the international energy crisis following the three-fold rise in the price of Arab oil; and increasing Soviet/Cuban military involvement in the affairs of Africa.

The one factor leading to a large degree of consistency in US policy towards southern Africa in the Nixon/Ford years, is the influence of Dr. Henry Kissinger, first as national security advisor and later as Secretary of State, making him the architect of American foreign policy during those years. According to Baker, Kissinger's basic assumption was that development was impossible without stability and order. He viewed the post-war world as comparable to the period following the French Revolution and Napoleonic wars, when Metternich fashioned a series of alliances among nations that brought nearly a century of peace to Europe prior to World War II. The Angolan civil war, and particularly the extent and implications of Soviet/Cuban involvement, forced Kissinger to address himself to that part of the world and its problems, the purpose of his efforts being that of forestalling further Soviet intrusions in Africa. To that end solutions had to be found for the problems facing Rhodesia and Namibia, and South Africa was perceived as the key to their solution. Pressure was therefore exerted on South Africa, but on the basis of "carrot and stick" approaches. The US protested South Africa's racial policies, but in a muted form in return for South Africa's other areas of southern Africa. That was in general terms the basis of US policy towards assistance in solving the problems of the South Africa until the advent of the Carter era, which will be discussed in Part II.

4. Economic interaction

As noted earlier, American policy towards South Africa has for many years revolved around the question of attaining some balance between the perceived negative effects of relations with South Africa, and the importance of US economic relations with the country. Economic interaction is indeed the strongest link between the two countries. This aspect will be dealt with in terms of two facets, trade and investment.

4.1 Trade

US trade with South Africa increased steadily throughout the years of interaction, with the US maintaining and increasing the trade balance in its favour. Just before the Second World War US exports to South Africa had been about $66-million annually. This figure rose to $230-million in 1946, and climbed steadily to $427-million in 1960. This trend continued throughout the Kennedy/Johnson years, gaining new momentum during the Nixon/Ford years. The following figures give an indication of the growth of US/RSA trade and the increasing US favourable trade balance in the latter period:

| United States | Exports to RSA | Imports from RSA | Favorable balance |
|---|---|---|---|
| 1968 | 450 m | 250 m | 200 m |
| 1973 | 746 m | 377 m | 369 m |
| 1975 | 1,307 m | 845 m | 462 m |
| 1976 | 1,350 m | 927 m | 423 m |

Up to this period the RSA has maintained its lead as the largest trading partner of the US in Africa, taking 31 percent of all US exports to Africa in 1975.

No estimate has been made of the number of jobs in the US that depend on that trade, but according to John Chettle, if a conservative estimate of one job for every $20,000 worth of trade is taken, then some 66,000 jobs depend directly on that trade, and even more if the multiplier effect is taken into account. Apart from trade, the RSA also received substantial loans from US financial institutions.

The relative importance of United States trade with the Republic of South Africa can be seen in the following tables of South African exports to and imports from its major trading partners.

By 1976 the United Kingdom was still South Africa's most important initial export market, although its relative importance changed quite substantially over the period above—declining from 33.3 per cent in 1969 to 22.1 per cent in 1976. The US rose to 10.2 per cent in 1976.

Europe has traditionally been the dominant supplier of imports. The United Kingdom has traditionally been the single most important country, but Western Germany surpassed it in 1974 and 1976, while in 1976 the United States became the leading supplier of imports to South Africa.

4.2 Investment:

Even more important than the volume of US trade with the RSA is the growing value of US investments in South Africa. It has also become a major target of pressure within the US to effect a significant discouragement and even withdrawal of US investment in the RSA.

US investment in South Africa has a long history going back to the early part of the century, increasing significantly after World War II with increased investment of $15-million in 1946 for industrial projects by Ford, General Motors, Goodyear and Firestone. Investment grew from $212-million in 1953 to $350-million in 1960, despite a dip in the early fifties. The Sharpeville incident caused a temporary decline in the rate of investment, but by November 1960 US companies began to express their old confidence in South African stability and profitability when plans for expanded investment by a number of companies became known. After a series of economic measures taken by the SA Government in May 1961 American capital flowed in again.

During the Kennedy years official policy on private American investment in SA remained neutral. In 1962 a number of US firms started investing in South Africa for the first time, while in the same year US companies earned $72-million in South African profits, almost twice the average rate of US business on investment in other countries. Johnson continued with the policy of benign neutrality towards investment in the RSA leading to healthy growth trend, and by 1968 US investment in the RSA was about five times the value of 1950 investment. President Johnson's Executive Order of January 1968 constraining US foreign investment as part of his campaign to improve the US balance of payments position, affected US investment in South Africa, but many individual US investors compensated by buying stock in South African companies.

The following table summarises the size and trends of US investment in South Africa from 1963 to 1970:

U.S. INVESTMENT IN SOUTH AFRICA

[In millions of U.S. dollars]

| Year | Book value | Net capital outflows | Income and earnings |
|---|---|---|---|
| 1963 | 411 | 12 | −35 |
| 1964 | 467 | 17 | −36 |
| 1965 | 529 | 31 | 179 |
| 1966 | 600 | 20 | 536 |
| 1967 | 666 | 35 | 202 |
| 1968 | 696 | 6 | 185 |
| 1969 | 755 | 6 | 196 |
| 1970 | 868 | 52 | 219 |

Between 1968 and 1973 the volume of investment showed a marked growth, increasing to $1,26-billion, or by 73 percent in the five-year period. During this time the annual return on investment remained between 17 and 19 per cent.

In 1970 the U.S. Department of Commerce began to advise U.S. investors to consider investment opportunities in South Africa's neighbouring Black states before investing in the RSA itself. It also referred U.S. businessmen to a study by the South African Institute on Race Relations on measures foreign businessmen could take to improve working conditions and benefits for non-White employees.

The following table summarises the increase in total foreign investment in South Africa in the period from 1973 to 1975:

FOREIGN INVESTMENT IN SOUTH AFRICA DISTINGUISHED BY REGION

[In SA rand million]

| Year | Total foreign liabilities to— EEC | Rest of Europe | Americas | Africa | Asia | Oceania | International organizations and other | Total |
|---|---|---|---|---|---|---|---|---|
| 1973 | 6,698 | 956 | 1,776 | 375 | 216 | 78 | 281 | 10,380 |
| 1974 | 7,945 | 1,147 | 2,557 | 447 | 279 | 84 | 298 | 12,757 |
| 1975 | 9,851 | 1,690 | 3,566 | 498 | 348 | 85 | 412 | 16,450 |

Between 1970 and 1976 US direct investment in South Africa almost doubled, while US investments in the rest of Africa (as a result mainly of the nationalisation of US corporations elsewhere in Africa) during the same period fell from $2,6-billion to $2,4-billion. US investment in South Africa, as a proportion of investment in sub-Saharan Africa, grew dramatically in this period: in 1972 that proportion was 38 percent, and by 1974 it was 56 percent, while repatriation of profits of these enterprises from South Africa were also much higher.

At the start of the Carter era, US investment in South Africa has risen to a substantial volume. Almost 400 US corporations, including the top 50 corporations, have subsidiaries or associates in South Africa. In some cases like General Electric the involvement goes back to before the turn of the century. Another 6,000 American companies do business with South Africa on an agency basis. According to New African Development, US firms operating in South Africa employ about 100,000 South Africans, of whom 70 percent are Black. These companies also play an important role in South Africa's economy, controlling about 43 percent of the petroleum market, 23 percent of the automobile sales, and 70 percent of the computer business.

Ferguson and Cotter, in pleading the case for economic pressure on South Africa, mention the fact that US investments in South Africa amount to little more than one percent of total US overseas investment, and that a reduction of US investment would do little harm to the US economy. The other side of the coin is the fact that South Africa provides out of its own savings a high proportion of capital needed for development. Over the 1970–74 period gross domestic fixed investment totalled R21 897-million, and only R2 385-million, or 11 percent, was financed by foreign capital of which less than one-fifth was from the US. Disinvestment by the US would therefore have comparable disadvantages for both countries.

5. Military, nuclear and space co-operation:

5.1 South Africa's strategic importance:

Volumes have been written and said about the strategic importance of the Republic of South Africa, with the main focus being on:

(a) free access for the West to the Cape sea route;

(b) South Africa as the strongest anti-communist nation on the African continent in view of increased Soviet expansion on the continent;

(c) Western access to the immense mineral wealth of southern Africa in view of the fact that the Soviet bloc is a net exporter of minerals critical to Western defense interests;

(d) the uncertainty and vulnerability of the Gibraltar and Suez routes in time of conflict;

(e) South Africa as a proven and committed Western ally in terms of global conflict.

According to Dornan any appraisal of Western interests in Africa should begin with an analysis of Soviet activities in the region, and in the southern hemisphere generally, and that the basis for continued US relations with the RSA should be guided by the [alarming] increase in Soviet influence and capabilities, in connection with the strategic advantages afforded by both the position and the resources.

Brigadier Thompson states that the outstanding importance to the Atlantic powers of the free use of the Cape sea route, and assured access to the mineral resources of South Africa is clear, but what is less clear are the circumstances under which these interests might be denied to the West. In clarifying these circumstances, Robert Moss stressed the growing Soviet expansion and influence in Africa to further its global policy. He noted the strategic foothold which the Soviet Union has gained with the institution of pro-Moscow Marxist regimes in Angola and Mozambique to increase the intensity of the Soviet pioneer movement Rhodesia, South West Africa and the RSA for the very purpose which Thompson fears: to be in a position to deny access to

the West of the Cape sea route, and South Africa's mineral importance. The latter aspect, South Africa's mineral importance, is discussed in the following section, while the attention will now be briefly focused on the importance of the Cape sea route.

For many years military experts have stressed the importance of the Cape sea route. However, it has taken the world energy crisis to bring this home to the man on the street in the West, who now appreciates how much his future, for at least the next decade, depends on Middle East oil which has to be shipped around the Cape of Good Hope. The concern of the West is not wholly focused on oil but also on foodstuffs and important mineral supplies imported via the Cape route. South Africa is the guardian of this route, immediately astride one of the two direct trade routes between the Atlantic and Indian oceans. Its central position in that regard is enhanced by the vulnerability of the other, the Gibraltar-Suez-Red Sea route, to interdiction at several key points. Trade around the Cape of Good Hope now totals 2300 vessels per month, of which 600 are tankers; moreover, of the total tonnage passing around the Cape, 70% is represented by oil-carrying vessels.

The 1973 oil crisis has highlighted the strategic importance of the Cape sea route. By the year 1980 it is estimated that about 1000 million tons of oil will have to be transported by sea. Even with an enlargement of the Suez Canal only about one-fifth of the oil from the Persian Gulf would pass that artery, leaving the alternative Cape sea route more vital than ever before. Even now, the Cape route is Western Europe's and NATO's most important supply route for oil—57% of Europe's requirements passing through it annually. Already 20% of U.S. oil requirements travel via the Cape and this figure should increase to 60% by the 1980's. In addition 25% of Europe's food supplies also pass through the Cape sea route.

Despite the increasing importance of the Cape sea route, considered in the context of the Soviet strategic offensive in Africa and in the Indian Ocean, the British government has decided to terminate the Simonstown naval agreement, the only meaningful security agreement in existence for the entire area. Nevertheless, South African military planners still intend to maintain a high state of readiness to protect the Cape sea route—lifeline of the Free World—against the aggressive offensives of unfriendly forces.

The following table illustrates the volume of traffic passing around the Cape in only one month, January 1976:

| | Freighters | Tankers | Total | Percent of total |
|---|---|---|---|---|
| Liberian (flag of convenience, mostly United States) | 47 | 98 | 145 | 21.97 |
| British | 56 | 43 | 99 | 14.97 |
| Norwegian | 18 | 19 | 37 | 5.60 |
| Greek | 42 | 13 | 55 | 8.32 |
| Warsaw Pact | 20 | | 20 | 3.03 |

| Grand total | 383 | 278 | 651 | 100.00 |
| Daily Average | 12.35 | 8.97 | 21.32 | |

South Africa's relations with the US in terms of defense, nuclear and space cooperation up to the start of the Carter Administration will now be viewed briefly.

5.2 Military Co-operation:

South Africa had for long co-operated with the US in world conflicts, and fought as a US ally in both the First and Second World Wars. Reflecting US/South African friendship during World War II, a lend-lease agreement was signed, and the US established a small number of air bases in South Africa. In 1947 the lend-lease debt was settled for $100-million, while South Africa also agreed to buy $1.4-million worth of remaining lend-lease equipment.

Early in 1949 the Nationalist government in South Africa was one of the first to send an air crew for the massive Berlin airlift. This was reportedly one of the reasons for the American decision to be among the first nations to upgrade their diplomatic representation in South Africa to ambassadorial level in March 1949. In August 1949 Lt. Gen. Beyers, the South African Chief of Staff, and Minister of Defense Erasmus, visited the US for inspection of US military training facilities and to see what kinds of American equipment would be suitable and available for the training of South African defense forces.

In 1950, in response to a request from the UN after the North Korean attack on South Korea, South Africa decided to send No. 2 Squadron of the SAAF to assist the UN force, and was attached to the 18th Fighter Bomber Wing (USAF).

Military co-operation fell short of a formal alliance despite the fact that the South African government repeatedly approached the US and NATO such a relationship. In 1951 an agreement was signed with the US making provision for reimbursable military assistance under the US Mutual Defense Assistance Act. The South African government continued to press for a "Southern NATO" until 1957, and reportedly also tried in 1954 to get NATO Bases in South Africa as a means of gaining a defense guarantee from the US, but neither plans materialised. In July 1955 Britain reached an agreement with South Africa for the return of the Simonstown base to South Africa by 1957, with Britain and her allies retaining use of the base for wartime operations even if South Africa were not a belligerant. At that time US naval vessels made regular use of South African ports, and in October 1959 ships of the US, British French, Portuguese and South African navies took part in a combined antisubmarine operation off the southern coast of South Africa. American participation in these annual joint exercises, named "Capex" reportedly ceased in the early sixties.

In 1963 pressure for actions against South Africa to mount internationally. In August the UN Security Council began to debate on a resolution calling for a ban on all arms sales to South Africa. President Kennedy, anticipating the UN vote, instructed Ambassador Adlai Stevenson to declare unilaterally on 2 August that the US would cease arms sales to South Africa after the end of 1963, and for so long as South Africa continued with its race policies.

Military co-operation between the two countries hit a low point during the Johnson Administration. In 1964, the US extended the scope of its position in the arms embargo, supporting a resolution forbidding the sale to South Africa of materials for the making of arms. The Johnson Administration seems to have been more careful than its successor in its observance of the 1963 arms embargo. For example, sale of light aircraft which could clearly be used for military purposes was prohibited. In 1965, the US refused to license sales to South Africa of single-engine Cessna aircraft which had special equipment that could have made the planes of immediate military value, and of a marine patrol aircraft, the Atlantic 1150, which had been developed by the US, France, Belgium, West Germany, and The Netherlands, under NATO. In September 1966, the US barred the sale to South Africa of three French Mystere 20 jetliners equipped with US General Electric engines.

US/South African military relations worsened after the *Roosevelt* incident of 1967. In February 1967 when the *USS Franklin D Roosevelt* was about to refuel at Cape Town en route to Vietnam, 38 Congressmen protested the granting of shore leave to members of the crew, which was duly cancelled by the US naval authorities. It has ever since been American policy to avoid the use of South Africa ports by its military vessels, except in the case of an emergency. Despite this development and the arms embargo, the South African Navy continued to supply information to the US Naval Attache at Cape Town on Russian vessels in the area.

Military co-operation improved during the Nixon years. In 1969 there were press reports that the French Mystere 20 jetliners equipped with General Electric engines, sales of which had been vetoed by Johnson, were approved available to the South Africa government. In July 1970 the US joined France in abstaining on a UN Security Council resolution which approved a tightening of the non-obligatory arms embargo against South Africa, on the grounds that it was too sweeping.

After the completion of the NSSM 39 study for the Nixon Administration in 1969, Nixon accepted the recommendation that his administration should enforce the arms embargo against South Africa, but with liberal treatment of equipment which could serve either military or civilian purposes. Evidence suggests that the Nixon administration did in fact substantially relax the arms embargo, particularly by making available new items in the "gray area" that had been forbidden previously. According to reports, Nixon paid little attention to criticism of his military policy towards South Africa because South Africa played an important role in the plans of his administration to counter the Soviet threat in the Indian Ocean area and to enhance the security of the Cape area.

Military relations between the two countries entered a vitally important phase as the Angolan civil war mounted in intensity late in 1975. In the course of the hostilities, the leader of the UNITA movement, Jonas Savimbi, requested South Africa to aid the anti-Marxist forces in their struggle against the pro-Moscow MPLA. This appeal was backed by President Kaunda of Zambia and President Mobutu of Zaire who preferred to see victory by the non-Marxist forces.

According to Lt. Gen. William Yarborough the major political *faux pas* of which South Africa was guilty was probably the result of that country's unfamiliarity with the brutal nature of big-power politics. On 14 October 1975 a South African armoured strike force crossed into Angola at the secret request of senior US officials to launch a whirlwind campaign that brought the much stronger Communist forces to the verge of defeat. However, on 19 December 1975 the US Senate, by a vote of 54 to 22, imposed a ban on all further American assistance, overt or covert, to the anti-communist forces in Angola.

The South African forces and their Angola UNITA and FNLA allies, poised to take Luanda and destroy the remaining communist strongholds, suddenly found themselves stranded with their American support withdrawn at the crucial moment. Unwilling to fight the entire communist bloc alone, the South African troops were withdrawn the following month, leaving way open for the seizure of one of Africa's richest and strategically important territories by Moscow's

proxies—the MPLA, Cubans and East Germans. On 31 March 1976 the UN Security Council denounced South Africa and not Cuba as the aggressor in Angola, while the US failed to veto the resolution knowing that the allegation was untrue and that the US was an indirect partner to South Africa's participation in the war.

According to General Yarborough those who had covertly urged South Africa into the war, afterwards conveniently forgot that they had done so and joined in the condemnation of South Africa. In attempting to emerge from the Angolan debacle with as little embarrassment as possible, Secretary of State Kissinger denied in a written statement that the U.S. had any role whatsoever in South Africa's intervention in Angola, and said that the U.S. had even publicly condemned that intervention. That was the general state of affairs in military co-operation between the two countries before Carter took over the White House.

5.3 Nuclear Co-operation:

The South African Atomic Energy Board (AEB) was formed in 1949, and is one of the founder members of the International Atomic Energy Commission. On the recommendation of the AEB the detailed planning of an atomic energy research and development programme for South Africa was begun in the late 1950s.

The commencement of a formal programme of nuclear co-operation between South Africa and the United States dates back to July 1957 when the two countries signed a ten-year agreement on the peaceful uses of atomic energy. According to Sanford Greenberg this agreement resulted in the U.S. Atomic Energy Commission's making available to South Africa:

(a) up to 500 kilograms of 20 percent enriched uranium for fueling power reactors;

(b) up to 6 kilograms of 90 percent enriched uranium for use in a materials-testing reactor; and

(c) research quantities of U-233, U-235 and plutonium.

From 1960 onwards senior staff members of the South African AEB began to proceed to various overseas nuclear establishments for prolonged periods of training in advanced nuclear technology, including the Argonne National Laboratory in Illinois and the Oak Ridge National Laboratory in Tennessee.

In 1961 a $100,000 grant was awarded to the Bernard Price Institute of Geophysical Research at the University of the Witwatersrand in Johannesburg to help improve methods of monitoring nuclear testing.

In 1964 the main facility of the South African AEB was inaugurated. That is the Oak Ridge-type research and materials-testing reactor, SAFARI-1, at the National Nuclear Research Centre at Pelindaba near Pretoria. According to testimony by George Houser, at the U.S. House of Representatives Hearings:

(a) many South African staff members were trained at Oak Ridge;

(b) Oak Ridge supplied a consultant for the Pelindaba reactor;

(c) the director of Oak Ridge was an honoured guest at the inaugural ceremonies;

(d) the United States supplied the enriched uranium to start the reactor; and

(e) nine American organizations were involved in the project, with the major contractor being Allis-Chalmers.

In 1967, the 1957 agreement for U.S./South African co-operation was renewed for another ten years. According to the NSSM-39 study: ". . . the South African Government (then) informed the U.S. that it would do nothing in its uranium transactions to increase nuclear proliferation. South Africa has played a constructive role as a permanent member of the Board of Governors of the International Atomic Energy Board."

In 1970 it was announced by the South African AEB that its scientists have developed a new process for the enrichment of uranium, and a pilot plant established by the Uranium Enrichment Corporation at Valindaba near Pretoria has since successfully proved the commercial viability of the process. In 1973 the Nixon Administration signed contracts with South Africa under the new ten-year agreement to supply enriched nuclear fuel for a planned nuclear power station in South Africa. However, after the U.S. declined to participate in the project, the SA Electricity Supply Commission announced in 1976 that the contract had been awarded to a French consortium. At present the nuclear power station, named Koeberg, is being constructed on the farm Duynefontein between Cape Town and Saldanha Bay, and is expected to come into operation by the end of 1982. It is still unclear whether the Carter Administration is willing to honour the contract signed in 1973.

5.4 Space Co-operation:

Although no programme of research by means of space probes has been carried out, scientists of the South African Council for Scientific and Industrial Research (CSIR) have for long participated in research based on space programmes of other countries. Space tracking in South Africa started in 1957 when the CSIR determined the orbit of the first Russian satellite, Sputnik I.

Space co-operation between South Africa and the United States also started in 1957. In September 1960 agreement was reached between the two countries on three facilities of the US National Aeronautical and Space Administration (NASA) in South Africa. The agreement covered:

(a) a minitrack radio tracking station established under an agreement in 1957;

(b) a camera optical tracking station established in 1958; and

(c) a deep space probe radio tracking station at Hartbeeshoek near Johannesburg (operated by the CSIR on behalf of NASA)

In June 1962 agreement was also reached between the two countires for the establishment of a US military space tracking station in South Africa. According to Schlesinger the US agreed to sell to South Africa as part of the bargain arms for use against communist aggression.

NASA held the Deep Space Tracking Station in South Africa in very high regard. In a confidential memorandum submitted to the Nixon Administration in July 1969 the following was said:

"The South African NASA tracking facility is a vital element in a global network of stations which provides the total communication link with out planetary-bound flight spacecraft. These stations perform three basic functions necessary to mission success tracking—the determination of the precise position and speed of the spacecraft; data acquisition—the reception of information on both scientific experiments and spacecraft "health"; and command and control—the transmission of radio signals to the spacecraft to provide the many instructions necessary in the performance of the flight mission.

The NASA station was located at South Africa both because it had the proper geographic location in relation to the other stations of the Deep Space Network (which are spaced 120 degrees apart) and because it is uniquely located to allow the precise tracking of Cape Kennedy-launched spacecraft during the critical phase just after the spacecraft are placed into planetary bound trajectories (post-injection phase). The tracking information obtained during this phase is used to determine the exact midcourse corrections to be made to the spacecraft's flight path in order to achieve planetary intercept. While trajectory paths will vary somewhat with each mission, the South African station is optimumly located to perform this task for all missions.

As the complexity of NASA's Planetary Programs increase by such new missions as the dual orbital spacecraft of the planet Mars in 1971 and a flyby spacecraft of the more distant planet Jupiter in 1972, even greater tracking precision will be required. Thus, the South African station will play even more of a key role during the critical early post-injection phase.

In addition to its unique launch support role, the South African station also is located to operate in conjunction with other deep space stations around the globe to assure continuous communication to spacecraft. During certain periods the plant positions in the ecliptic place become quite southerly, as in the case for the Mars missions in 1969 and 1971 and Jupiter in 1972. Spacecraft flying to the planets during these periods usually depart from earth in a far southerly trajectory. As a result, for a period of a few months they are viewed primarily by only the Southern Hemisphere stations, South Africa and Australia, both of which are essential to achieve adequate ground tracking, data acquisition, and command support.

Therefore non-availability of the South Africa station would impose serious mission operational constraints and would degrade ground tracking support to a high risk condition."

Despite the importance attached to these installations, American space tracking operations in South Africa ceased in 1975, and some of the facilities were taken over by the CSIR.

6. U.S. reliance on South African strategic minerals

The strategic importance of southern Africa (wherein the RSA is the kingpin) is nowhere better illustrated than by the importance of the massive mineral wealth concentrated by some freak twist of nature on the southern African subcontinent. For the U.S., which is the world's leading consumer of minerals, this is of paramount importance. Although the U.S. is also the world's leading producer of minerals, it is nevertheless dependent on the large scale importation of most minerals. With regard to the U.S. dependence on the RSA in this regard, Lake states the following: ". . . U.S. reliance on the other important materials listed above (minerals) is declining. It either produces them synthetically or has large quantities stockpiled." Also in this regard Ferguson and Cotter have the following opinion: "The other main Western economic interest—in South Africa's gold, chrome, diamonds and iron ore—is considerable. But, arguably, long-term access to these can best be safeguarded by dissociation from the present regime."

The authors apparently have little knowledge concerning the importance and "manufacture" of minerals, and Third World politics. There are fortunately others in the U.S. and among its allies who realize the importance of the continued friendship with mineral producing allies, and who are also more knowledgeable about the U.S. and its allies' crucial dependence on imported strategic materials.

Taking statistics available for five principal minerals, bauxite (for making aluminum), copper, lead, zinc and iron ore, the following figures show the dependency of the U.S. major NATO allies and Japan on imported metals, (figures refer to 1968).

| | Bauxite | Copper | Lead | Zinc | Iron ore |
|---|---|---|---|---|---|
| West Germany | 100 | 97 | 72 | 46 | 86 |
| United Kingdom | 100 | 100 | 93 | 100 | 56 |
| France | 11 | 100 | 75 | 90 | 8 |
| Japan | 100 | 66 | 55 | 61 | 93 |
| United States | 88 | 32 | 19 | 51 | 34 |

In contrast, the USSR exports iron ore, manganese, lead, zinc and aluminum. Hungary and Poland also export ores. Thus, the Soviet military alliance is very largely self-sufficient in minerals. A similar pattern emerges for energy. The USSR enjoys a surplus, whereas the principal NATO allies and Japan all have deficits. The US is least dependent on energy imports, Japan almost totally. The position of the UK is improving as a result of North Sea oil production.

The growing appreciation of America's dependence on imported strategic minerals and of the problems association with securing adequate supplies of such materials is well illustrated by the following statement from the US Geological Survey publication, Resource Perspectives 1975: "The entire US economy is based on minerals. In 1972, the last full year prior to the pinch of the oil embargo, domestic raw materials valued at $32-billion were converted into energy and processed materials, the value of which exceeded $150-billion and formed the basis of a Gross National Product of $1.1-trillion."

The report adds: "The United States continues to be ever more dependent on foreign sources of supply for essential raw materials. Forecasts for the year 2000 indicate that we shall then be completely dependent on imports for 12 commodities, more than 75 per cent dependent for 19 commodities and more than 50 per cent dependent for 26 commodities."

The following table gives an indication of the US dependence on imported minerals.

PERCENTAGE OF U.S. MINERAL REQUIREMENTS IMPORTED IN 1975 FROM MAJOR FOREIGN SUPPLIERS

| Commodity | Percentage of needs imported by United States | Ranked major foreign suppliers |
|---|---|---|
| 1. Columbium | 100 | Brazil, Thailand Nigeria. |
| 2. Mica sheet | 100 | India, Brazil, Malagasy. |
| 3. Strontium | 100 | Mexico, United Kingdom, Spain. |
| 4. Manganese | 99 | Brazil, Gabon, Australia, South Africa. |
| 5. Cobalt | 98 | Zaire, Belgium, Finland, Norway, Canada. |
| 6. Tantalum | 95 | Thailand, Canada, Australia, Brazil. |
| 7. Chromium | 91 | South Africa, U.S.S.R., Turkey, Rhodesia. |
| 8. Asbestos | 86 | Canada, South Africa. |
| 9. Aluminium | 85 | Jamaica, Surinam, Australia, Dominica. |
| 10. Fluorine | 82 | Mexico, Spain, Italy. |
| 11. Bismuth | 80 | Peru, Japan, Mexico, United Kingdom. |
| 12. Platinum group metals | 80 | South Africa, United Kingdom, U.S.S.R. |
| 13. Tin | 75 | Malaysia, Thailand, Bolivia. |
| 14. Mercury | 73 | Canada, Algeria, Mexico, Spain. |
| 15. Nickel | 71 | Canada, Norway. |
| 16. Zinc | 64 | Canada, Mexico, Australia, Honduras, Peru. |
| 17. Tellurium | 59 | Peru, Canada. |
| 18. Selenium | 58 | Canada, Japan, Mexico. |
| 19. Antimony | 56 | South Africa, China, Bolivia, Mexico. |
| 20. Tungsten | 54 | Canada, Bolivico, Thailand, Peru. |
| 21. Cadmium | 50 | Mexico, Canada, Australia, Belgium. |
| 22. Potassium | 49 | Canada. |
| 23. Gold | 45 | Canada. Switzerland, United Kingdom, France. |
| 24. Gypsum | 39 | Canada, Mexico, Jamaica. |
| 25. Vanadium | 36 | South Africa, Chile, U.S.S.R. |
| 26. Barium | 35 | Ireland, Peru, Mexico. |
| 27. Petroleum | 35 | Canada, Venezuela, Nigeria, Saudi Arabia. |
| 28. Silver | 30 | Canada, Mexico, Peru. |
| 29. Iron | 29 | Canada, Venezuela, Japan, Europe Common Market. |
| 30. Titanium | 28 | Canada, Australia. |
| 31. Salt | 6 | Canada, Mexico, Bahamas, Chile. |
| 32. Pumice | 5 | Greece, Italy. |
| 33. Lead | 4 | Canada, Peru, Australia, Mexico. |
| 34. Natural gas | 4 | Canada. |
| 35. Magnesium | 3 | Greece, Ireland, Japan. |

The Executive Vice-President of the U.S. Industrial Council, Anthony Harrigan, links this dependence on minerals to the importance of South Africa as a prime source of strategic minerals and states: "The United States is increasingly dependent on South Africa for strategic materials as it imports more than one hundred minerals—16 of them in very large quantities. If the Soviets are successful in detaching these resources, they will have struck a massive, possibly devastating blow to the West. And these resources, together with the very substantial resources of Rhodesia and South West Africa, would give the Soviet totalitarian order a bigger boost than any other in its history."

According to a study on Africa's Resources submitted by the U.S. African Affairs Advisory Council in 1971, a major porportion of the world's reserves of a few commodities important to U.S. strategic or economic needs are contained in Africa. The study found that most of these commodities "are found primarily in almost unique concentrations in southern Africa" and concluded that the U.S. may in the long run have to turn more to southern Africa for its chromite and other critical minerals. The U.S. is already dependent primarily on South Africa (in 1968–69 figures) for 40 per cent of its antimony, 38 per cent of its chrome ore and more than one-third of its platnium group metals, as well as 85 per cent of its uranium oxide imports. The study concluded that South Africa will probably be the future U.S. source for other minerals such as manganese and vanadium. The key minerals exported from South Africa to the U.S. is noted in the following table:

*Key minerals exported from South Africa as a percentage of U.S. imports*

| | |
|---|---|
| Antimony ore | 43 |
| Chrome | 30 |
| Chromite | 21 |
| Ferrochrome | 35 |
| Copper | 6 |
| Ferromanganese | 36 |
| Platinum group metals | 48 |
| Vanadium | 57 |
| Vermiculite | 100 |

South Africa has been most richly endowed with an immense variety of mineral resources, and is the world's major producer of precious metals and minerals, including gold, platinum metals, and gem diamonds. It also has vast resources of other important industrial minerals such as fluorspar, asbestos, limestone, phosphates and vermiculite. It has the world's largest reserves of important ferrous metals such as manganese, chrome and vanadium, has vast reserves of high-grade iron ore and almost unlimited resources of medium- and low-grade iron ore, and has smaller but significant resources of other ferrous metals such as nobium, tantalum, tungsten and Molybdenum. South Africa is already a significant producer of copper, and it is expected that this production, together with that of lead and zinc, will increase dramatically as a result of the recent discovery of a vast new metallogenic province in the north-western Cape Province. The country also has relatively large, though low-grade, reserves of coal, and ranks among the top three or four countries in the world in terms of known uranium reserves.

The following two tables give an indication of South Africa's importance to the United States and to the West in terms of both known reserves and actual production:

SOUTH AFRICAN RESERVES AS A PERCENTAGE OF WORLD RESERVES IN 1975

| Mineral | World ranking | World | Percentage non-Communist world |
|---|---|---|---|
| Platinum | 1 | 86 | 99 |
| Chrome ore | 1 | 83 | 84 |
| Vanadium | 1 | 64 | 96 |
| Gold | 1 | 49 | 61 |
| Manganese ore | 1 | 48 | 84 |
| Fluorspar | 1 | 46 | 50 |
| Diamonds | 2 | 8 | 92 |
| Nickel | 3 | 10 | 12 |
| Uranium | 4 | 17 | 30 |
| Zinc | 4 | 9 | 9 |
| Phosphate rock | 4 | 8 | 8 |
| Asbestos | 5 | 10 | 14 |
| Antimony | 5 | 4 | 10 |
| Lead | 5 | 4 | 5 |
| Iron ore | 6 | 4 | 6 |
| Coal | 6 | 2 | 4 |
| Titanium | 8 | 2 | 40 |

SOUTH AFRICAN MINERAL PRODUCTION AS A PERCENTAGE OF WORLD PRODUCTION

| Mineral | World ranking | World | Percentage non-Communist world |
|---|---|---|---|
| Vanadium | 1 | 46 | 58 |
| Gold | 1 | 59 | 74 |
| Platium | 1 | 55 | 88 |
| Antimony | 1 | 21 | 31 |
| Chrome ore | 2 | 30 | 47 |
| Manganese | 2 | 24 | 41 |
| Diamonds | 3 | 17 | 22 |
| Urnaium | 3 | 13 | 13 |
| Asbestos | 3 | 10 | 19 |
| Nickel | 7 | 3 | 4 |
| Fluorspar | 8 | 5 | 6 |
| Coal | 9 | 2 | 5 |

Because of South Africa's large share in the world production of many minerals, the West was the leading producer in 1975 of gold (73 per cent of total value of production), vanadium (71 per cent), uranium (65 per cent), nickel (64 per cent), the platinum group metals (60 per cent), asbestos (58 per cent), zinc (57 per cent), lead (53 per cent), copper (46 per cent), phosphate rock (44 per cent), fluorspar (43 per cent), and iron ore (41 per cent). The Communist World was the most important producer of three commodities—bituminous coal (51 per cent of total world production), manganese (38 per cent), and chrome ore (37 per cent). The Third World was the leading producing bloc of tin (75 per cent of total world production), industrial diamonds (57 per cent), and antimony (38 per cent).

What the position of the Western World would have been in 1975 without South Africa's contribution of these 18 strategic mineral commodities is clear. South Africa was responsible for more than 10 per cent of the total Western production of half of these minerals—the platinum group metals (88 per cent), gold (74 per cent), vanadium (58 per cent), chrome ore (47 per cent), manganese ore (41 per cent), antimony (31 per cent), industrial diamonds (22 per cent), asbestos (19 per cent), and uranium (13 per cent).

Had Africa been excluded from the Western bloc, the latter would have been at a

serious disadvantage against the Communist World in the case of gold, the platinum group metals, industrial diamonds, antimony, chrome ore, and manganese ore. That the West can ill afford to ignore its dependence on South Africa in the supply of adequate quantities of essential minerals is therefore also clear. In 1973, despite the fact that the Western World produced 42 per cent of the total value of world mineral production, it was able to meet only 65 per cent of its consumption requirements. Had it not been for South Africa's contribution, production would have fallen to well below 50 per cent of the mineral needs of the West.

The Third World and the communist bloc, with its considerable excess of production over consumption, could be in a position, once again, to hold the West in ransom.

The truth of this last statement is borne out by the question of US importation of chrome. In May 1968 President Johnson issued an Executive Order which prohibited importing all Rhodesian commodities and products, including chrome. Just before the enactment of the Byrd amendment in 1971, the Soviet Union (because it enjoyed a near monopoly of the chrome market) raised the price of its low-grade chrome ore by 188 per cent from $25 per ton to $72 per ton. At that time there was also strong evidence that the Soviet Union was breaking UN sanctions and was importing highgrade Rhodesian chrome and exporting its own low-grade chrome to the US. After the US resumed importing of Rhodesian chrome in 1972, prices declined to normal levels.

However, beginning in 1975 when there appeared to be a strong drive for the repeal of the Byrd amendment in the US Congress, the Soviet Union and Turkey immediately increased chrome ore prices, and in 1975 Russian metallurgical grade ore was quoted at $160 per ton. In the light of all this, Crane states the following: "It is positively moronic in 1977, to depend on the Soviets for chrome ore and also ask the American taxpayers for $121-billion for national defense, the primary purpose of which is to safeguard and defend the nation against possible Soviet aggression. Somehow, somewhere, someone has calculated that Soviet chrome is less blemished with violations of human rights than Rhodesian chrome, and that the Soviet Union is less of a threat to world peace than Rhodesia."

This contention is today equally true with regard to the Carter Administration's attitude towards South Africa!

7. Summary of relations up to 1976

Relations between South Africa and the United States after World War II have fluctuated as a result of a variety of factors, including these:

1. The National Party victory in 1948, and its continuous rule since has resulted in an official policy based on the recognition of ethnicity and the separation of races in the political, economic and social structures of the country. This policy has been anathema to most of the world ever since, and provided for a major strain on US/South African relations, with the extent of opposition and condemnation reflecting different U.S. administrations.

2. The Truman era was followed by eight years of relatively conservative Republican administration under Eisenhower, during which relations between the two countries were largely cordial. That was followed by eight years under Kennedy and Johnson, during which relations became much more strained. For the first time the US came out strongly against South Africa's policies, and also took specific action to demonstrate its opposition to those policies. Relations between the two countries improved again during the eight years of Republican administration under Nixon and Ford. There was, however, a tendency during the last two or three years of that period, particularly under the influence of Kissinger to persuade South Africa to aid the US in attempts to reach some settlement in Rhodesia and South West Africa.

3. Developments within South Africa, and in particular incidents like Sharpeville and the adoption of stringent security measures in the early sixties, induced a noticeable hardening of the US attitude towards Pretoria.

4. The race relations situation within the US itself during the late fifties and early sixties, notably the civil rights campaign, also exerted some influence on relations between the two countries.

5. Developments within the international system following World War II, also forced certain adaptations in US policy towards South Africa. These include the rapid process of de-colonisation in the Third World which drastically altered international relations in general, the composition of the UN General Assembly, and relations between the major powers. These developments necessitated a reevaluation of US foreign relations, and in its bi-lateral relations, leading to further hostility towards South Africa to appease the Third World countries.

6. Soviet expansionism during the period following World War II, the fall of Eastern Europe to communism, the Korean War, the continuing march of communism in South East Asia, and increasing Soviet subversion and direct intervention [and aggression] in Africa, brought a small measure of reality back into US perceptions of South Africa's strategic role and position. However, during the last part of the Ford administration, the US once again showed its by now characteristic reluctance to physically demonstrate its intentions towards communist expansion, as was clearly seen in its inability to act positively during the Angola civil war and the Marxist take-over of that country.

Part II is devoted to an anlysis of US policies and actions towards South Africa during the first fifteen months of the Carter Administration, and the marked increase in the intensity of its anti-South Africa policies which evolved the South African Prime Minister's pointed remark that "the United States want to strangle us with finesse." It is clear, however, that despite this drastic increase in intensity, these policy changes do not demonstrate a complete departure from earlier US policies toward South Africa, but merely the intensification of a latent anti-South African posture among certain powerful US policy influences and policy-makers. This spirit had been latent and becomes overt from time to time, but did not have the opportunity to manifest itself fully to the extent that the Carter Administration allowed it to do.●

## CUBA'S MILITARY ADVENTURES

● Mr. EAGLETON. Mr. President, much has been written about Cuba's military operations in Africa, especially in Angola and more recently in Ethiopia. I believe that an article by Hugh Thomas in the Christian Science Monitor of March 17, 1978, is a very perceptive one and ask that it be printed in the RECORD.

The article follows:

CUBA'S MILITARY ADVENTURES

(By Hugh Thomas)

Cuba always has differed from other Communist states in the emphasis which she has given to military matters.

It used to be supposed that this was the inevitable consequence of her undeclared war with the United States; but nearly 10 years ago Réné Dumont and K. S. Karol already were pointing out the importance of the Cuban army in the sugar harvest.

A careful look at the names on the central committee of the Communist Party shows that army officers predominate there. Where else than in Cuba would the Minister of Education have risen to that role through the Army, having been at one time head of the combat readiness department of the armed forces?

In recent years, Premier Fidel Castro has come to be referred to in the Cuban press as "Commander-in-chief Fidel Castro" (in place of "Doctor" or "Maximum Leader") and that press constantly depicts military scenes or the arrival or departure of some minister of defense from other countries of the Communist world.

POWERFUL ARMED FORCES

The Cuban armer forces are now larger and more powerful than those of all the East European Soviet satellites except for Poland (whose population is four times Cuba's) and far more formidable than those of her Latin American neighbors—even than Mexico, Venezuela, and probably Brazil. This military side to the regime in Cuba partly derives, no doubt, from the fact that Premier Castro and his colleagues were the victors in a civil war (as Tito was in Yugoslavia). The Cuban Government also relies on frequently evoked reminders of the struggles of Cuba against Spain in the 19th century and of the years of "struggle" against the dictators Machado and Batista in this century.

Dr. Castro, like other Caribbean radicals, always has seemed to like guns. His first appearances on the Caribbean scene in the 1940s were all associated with improbable armed expeditions, inside and outside Cuba—at Cayo Confites and in Colombia, in the University of Havana, and then outside the Moncada barracks. Dr. Castro was always the man who put his faith in guns. "As long as there is a revolutionary with a gun, no cause will ever be lost," he told senior officers in the army in December, 1976, after four days of maneuvers, dutifully adding: "We feel increasingly grateful toward the Soviet Union which provided us with these magnificent weapons and taught us how to use them" (Gramma, Dec. 19, 1976). Revolution, Dr. Castro told the Cubans after the failure of the Bay of Pigs in 1961, had not given the people votes; it had given them guns.

COMMUNISM OF MARS

Cuba is thus not a Euro-Communist state; it is not a "revolution with pachanga" (as Guevara said of it in 1960); it does not have *Fidelista* communism. It has a military communism, the communism of the war god Mars.

One obvious purpose of this substantial military investment has become clearer since 1975. Thwarted of his expressed dream in 1960 of converting the Andes into the Sierra Maestra of the Latin American continent, Dr. Castro has been happy, after the collapse of the Portuguese empire, to carry the idea of revolutionary struggle to Africa, in which Cuba always has been interested.

Indeed, the first Cuban involvement in Africa which came to public knowledge was as long ago as the 1964 revolution in Zanzibar. Che Guevara was active in the Congo (as it has since become known) before he went off to his death in Bolivia in 1967. Revolutionary leaders from Africa were welcome in Havana from the early days of the Cuban Revolution, and many have had military training in Cuba. It may be that some of these interests were pursued independently of Soviet policy; but on the whole, it would seem very improbable indeed that, with its economy tied closely to that of the Soviets, Cuba has ever done anything abroad which

has not had Moscow's approval. The Soviet Union herself has been preoccupied by military power in the last few years.

CASTRO'S PERSONAL INTEREST

That does not mean, of course, that Dr. Castro may not have been personally interested in an African military adventure; that had he been against such an adventure, he would not have found means of opposing it (as Eastern European leaders would have done if a similar project had been put to them); or even that he may not even have been responsible, or partially responsible, for formulating the idea of sending troops to Africa. For Dr. Castro has high political gifts, imagination, and daring which must be a breath of fresh air in orthodox Kremlin circles.

The Cuban adventure in Africa began in earnest with the commitment of several thousand troops to assist the MPLA (the Marxist national movement) in Angola in late 1975. Since Cuban troops previously had been noticed on a small scale in places as diverse as Vietnam and Syria, little attention was (to begin with) paid to the Cubans in Africa. Then it turned out that the troops numbered well over 10,000; and it soon became obvious that they were the essential element in assuring that the Soviet Union's candidate in the Angolan civil war would be the victor.

WIDESPREAD AFRICAN PRESENCE

Subsequently, the continued (and in November, 1977, reinforced) Cuban military presence (of perhaps 20,000 troops with 4,000–5,000 civilians) has enabled the Angolan leader Agostinho Neto to remain in power, Cuban support being decisive in suppressing the attempted coup d'état of May 27, 1977.

Cuban troops have been observed, either in the form of military missions or combat assignments, in numerous African countries, including Ethiopia and Mozambique, and with the Polisario forces in Sahara. (The Algerian-backed Polisario guerrilla movement is fighting for the independence of the Western Sahara, a former Spanish colony partitioned by Morocco and Mauritania.) They are also in the (South) Yeman. It may be that Cubans using Soviet weapons saved Ethiopia from defeat by the Somalis in November, 1977. In Tanzania, there is a Cuban medical mission.

The Cuban investment in Africa is an enormous one for a country of 9 million people. The burdens obviously are being felt in Cuba itself: in September and October, the Cuban minister of Health spoke of defects and delays in health service, and Dr. Castro spoke of shortage in the schools. The 4,100 Cuban civilian technicians whom Castro last July mentioned as serving abroad (mostly in Africa) are said to have risen to 6,000 by December, 1977, doctors in particular going to Ethiopia and Angola. Some would say that they are needed at home. Still, Cuba will continue her "internationalist duty."

CASTRO'S TOUR

How long will these difficulties be able to be fobbed off? And when will the discontent that many already are feeling because of a seemingly endless African commitment, including deaths, merge with irritation at the cost of the commitment? Is the recent crime wave to which Castro drew attention (in a speech on Sept. 28) a symptom of this?

Dr. Castro went to central Africa personally for the first time in 1977, although he often had been to Algeria before.

He arrived in Algeria from Cuba on March 1, 1977, and went immediately from there to Libya, Somalia, (South) Yemen, Ethiopia, Tanzania, Mozambique, and Angola. He stayed longest in Libya, being there fully 10 days—March 1–12. He returned home after a second two-day visit to Algeria, via East Germany and the Soviet Union, being away altogether six weeks. Almost everywhere he spoke, although not always for very long. The speeches did not differ greatly from place to place and were often rubbish. In Somalia he said:

"It is 5:45 in the evening. In Cuba it is 9:45 a.m., but the same sun shines over us. . . . There is another sun which shines over us, the sun of revolution and socialism—a sun which is rising all over the world. There is a dawn for this sun but there will never be a dusk. . . ."

SIMPLE, OLD-FASHIONED SPEECHES

After that, the President of Somalia presented Castro with the S[illegible]alian star, first class, an order which, as things have turned out, he cannot be very pleased with now that Somalia has gone to war with Cuba's main ally in East Africa, Ethiopia. In Ethiopia Dr. Castro watched a musical depicting the iniquities which had occurred during the reign of Emperor Haile Selassie and seems not to have spoken.

He was particularly well-received in Tanzania. In Angola, he spoke several times, making use of a simple old-fashioned language which seems to have gone down well:

"Luanda is to the Angolan Revolution what Paris was to the French Revolution and Leningrad was to the glorious Russian Revolution." And:

"What did colonialism leave in Africa? Nothing. We have toured Africa, rather a part of Africa, in the past few weeks, and what we have seen disturbs us very much. The colonialists exploited this continent for centuries, and exploited its sons and daughters . . . there are no (sic) doctors or hospitals . . . how can anyone expect a neocolonialist people to do anything to benefit the African peoples? In Cuba and Angola we . . . don't speak of socialism alone, we speak of scientific socialism."

ONE HOPE AND FRIEND

Back in Europe, he said: "Although the DDR (East Germany) was not on the itinerary of our trip . . . toward the end I said, 'Let's go pay a visit to the DDR.'" In East Berlin, Dr. Castro made a long public report on his African journey, and expressed great satisfaction that so many countries were proceeding directly from tribalism and nomadism to socialism:

"Dear comrades of the DDR, on this trip I was also able to see the great confidence the undeveloped nations, the nations of Africa, the countries which lived under colonialism, have in the socialist camp and especially in the Soviet Union. They know that in their struggle . . . they have only one hope and friend . . . the socialist community headed by the Soviet Union." China, of course, could not ranked as a possible friend, since, in a recent debate in the UN, her representatives had called the Cuban "mercenaries" in Angola and had spoken of the Soviet Union's "ruthless offensive there."

Finally, in Moscow, Dr. Castro had two days of discussions with the Soviet leaders, and with other friends of the cause, such as (head of the Palestine Liberation Organization) Yasser Arafat, in Moscow at that time, and Luis Corvalan, the secretary-general of the Chilean party, as well as Cuban students studying in Moscow.

SOVIET, CUBAN AGREEMENT

During these discussions, Communism Party Secretary Leonid Brezhnev "expressed his great appreciation for the 'foreign policy activities' of the Republic of Cuba, pointing out . . . that its authority on the international scene had increased."

The communiqué spoke of "complete agreement of views" between the Soviet and Cuban Governments on what had been discussed. Dr. Castro at a banquet given in his honor complained of the "ludicrous hypocrisy" of the "imperialist leaders" in speaking of "human rights," adding that in Africa he had been able to see for himself (keen-eyed observer that he is) that "bourgeois ideology is totally discredited and totally bankrupt." At all these occasions in the Soviet Union, Dr. Castro, like his hosts, made verbal concessions about the desirability of détente, although how he manged to contemplate such a concession to a system which he regards as "sweating blood through every pore" is hard to see.

NO POLICY DIFFERENCES

Several conclusions seem to follow, Dr. Castro's own speeches suggest that any difference between Soviet and Cuban policy toward Africa simply does not exist. Anyone who continues to argue that there is such a difference is telling us more about himself than the world. The fact that Dr. Castro's journey to Africa seemed to interfere with, perhaps even upstage, the visit of (then Soviet) President Nikolai V. Podgorny a day or two later, must be irrelevant. Dr. Castro may on occasion have suggested or initiated certain lines of Soviet policy. But it will remain *Soviet* policy.

Dr. Castro himself may welcome this great new thrust for his foreign policy, but his dependence on Soviet transport, weapons, equipment, and fuel prove that essentially the Cubans are Moscow's sepoys in Africa. The Soviet Government perfectly appreciates that the international reaction might be hostile—even considering the enfeebled state of the West—if Soviet infantry were sent to Africa.

But Cubans are internationally popular and many fewer people will complain. Many people want so very much to believe that the Cubans are paladins of freedom. Is this part of a payment by Cuba for Moscow's 17 years of economic and military assistance? It looks like it.

COORDINATING TERRORIST SUPPORTERS

No. doubt, too, Cuba plays a definite part in coordinating the Soviet Union's relations with states such as the (South) Yemen, Libya, and North Korea, which give active support to terrorism. Terror was not part of Dr. Castro's own rebellion against Colonel Batista; but, since 1959, many well-known terrorists have been trained in Cuba, from "Carlos" downwards. When in Africa, Dr. Castro spent a long time with Muammar al-Qaddafi in Libya, and, as earlier mentioned, he saw PLO leader Yasser Arafat in Moscow.

The success of Cuba in Angola in putting into effect Soviet policy must surely suggest to the Soviet Union that, in similar situations in the future, another Cuban expeditionary force may be equally useful. If, for example, there were to be a breakdown in Spain, an eventuality I admittedly regard as improbable, the Cubans probably would turn up there in a very short time as the revolution's roving expeditionary force. "International public opinion" would be neither greatly shocked nor hostile.

Cuba's revolutionary drive—although active for the first time among those very Caribbean states such as Jamaica with whom in the past, for cultural and linguistic reasons, she had nothing to do—has little more to contribute in Latin America. That continent is being left (by Moscow and Havana) to "stew in its imperialist juice" for the time being.

CAPACITY FOR WAR, NOT HUMANISM

But the revolution which was launched in 1959 to free a Latin country from U.S. tutelage has now caused Cuba, financed and equipped by a Eurasian power, to become the spearhead of insurrection in Africa. Although Cuba always has had a surrealistic quality, few would have supposed such a fantasy possible in the past. The Cubans seem to be quite uninterested in letting the chance of improved relations with the United

States affect what they say is their "internationalist" duty in new parts of the world.

Obviously Cuba is a long way from being that exemplary revolutionary state which her many friends assumed she was going to be in those heady days of 1960 and 1961. She is unique in the Communist world for her capacity for war, not for her humanism. She is unique in the Americas as a state whose leaders are willing if not anxious to intervene in the affairs of far-off nations of which previously she knew nothing. And the Caribbean verve, drive, and youthful enthusiasm, which visitors to Cuba always have noticed and which, despite everything, seem to survive, seem entirely at the orders of her implacable (white, Slav, and septuagenarian) paymasters.●

## THE INDIANAPOLIS SYMPHONY ORCHESTRA

● Mr. LUGAR. Mr. President, the Indianapolis Symphony Orchestra, one of the Nation's truly outstanding orchestras, will be performing Sunday, April 16, at 8:30 p.m. in the Kennedy Center.

This distinguished orchestra, directed by John Nelson, is in its 48th season. The performance in Washington is 1 of 15 in the annual spring tour of the orchestra which also will include an engagement in Carnegie Hall.

Founded by Dr. Ferdinand Schaefer in 1930, the orchestra has been a vital part of the cultural life of Indianapolis, the State of Indiana, and the United States.

In this season, the orchestra will perform approximately 170 concerts before more than a quarter of a million people in concert halls, high schools, malls, churches, and city parks.

The orchestra members have been especially effective in reaching youth. The popular Lolli-Pop concerts, designed as first adventures in music, are presented throughout the city and State, and the orchestra includes audience participation and demonstrations of the various instrument sounds. Other special attempts to work with youth include the special "Symphony in Color" art contests, the Bach to Rock Concert, and the Young Artist Concerts.

With special funding from the city of Indianapolis, approximately 10 free municipal concerts are held in the city's parks. This offers many the chance to bring blankets and picnics and to listen to music under the stars.

The orchestra performs often during the noon hour at several Indianapolis downtown locations for the benefit of thousands of citizens who enjoy the performance while eating lunch.

The orchestra comes to the Kennedy Center during a period of unprecedented success. I look forward to hearing a great performance this Sunday.●

## SOLAR ENERGY

● Mr. McGOVERN. Mr. President, solar energy will be one of the major sources of energy for the world within the next 50 years. Development of this needed energy source has been slowed in the United States by the lack of strong positive action by the Federal Government.

Europe appears to be opening up a lead on us in the development of solar energy.

Mr. President, I ask that "Europe: A Burst of Energy in Solar Heating," published in the March 6, 1978, issue of Business Week, be printed in the RECORD. It includes an excellent summary of recent developments in solar energy in Western Europe.

The material follows:

EUROPE—A BURST OF ENERGY IN SOLAR HEATING

Like the U.S., Europe has been socked this winter by blizzards and bone-chilling cold. For the Continent's fledgling solar energy industry, however, soaring fuel bills are good news. From West Germany and Sweden to France, Italy, and Switzerland, hundreds of companies are eagerly venturing into what its advocates tout as one of the hottest growth prospects of the late 1970s. Solar-market analysts foresee double-digit growth through 1985 in annual sales of home hot-water systems, heating and cooling units, and, ultimately, solar electric components.

Though the business is unfolding at varying rates across the Continent, West German and French companies are in the lead. Starting from scratch two years ago, some 500 West German producers, suppliers, and installers of solar collectors have mushroomed to annual sales of $20 million in 1977. "We are reckoning with double to triple that figure this year," says Alex Urbanek, an official of Munich's Solar Energy Association. Though most are tiny, local service components, heavyweights such as Robert Bosch (which has designed a gas-assisted solar system for home heating and hot water) and Messerschmidt-Boelkow-Blohm are gearing up projects.

At least a dozen French companies also are working on solar power plants, home systems, and photovoltaics (direct conversion of sunlight to electricity). Their 1977 sales totaled roughly $15 million. One of the more advanced companies, La Radiotechnique-Complec (RTC), a majority-controlled subsidiary of Philips of Holland, sold 5,000 of its photoelectric panels around the world last year at an average cost of $400.

USING THE SUN

Pierre-Marie Brun, RTC solar product chief, says that most customers use the units to power remote radio beacons, highway telephones, navigation buoys, and aircraft warning lights, such as those on the mountaintop approaches to Saudi Arabia's Medina airport. RTC will soon have competition from Motorola Inc., which plans to retool part of its semiconductor plant in Toulouse to produce photovoltaics.

The key to the industry's continued growth, especially in the often cloudy regions of northern and central Europe, may be government incentives to sweeten solar's appeal. Germany is expected to enact a tax credit to meet 25% of solar costs, and a British parliamentary committee has urged cash grants of up to 50%. France is spending $30 million a year on research and development aimed at commercializing its solar industry. In Sweden, where half of all oil imports are used in home heating, the government underwrites 35% of the cost of home solar units up to a maximum of $650. That could broaden the still tiny market that chemical maker KemaNobel hopes to tap in a joint venture with Euroc, Sweden's largest maker of building components.

"There's a tremendous potential," says Ulf Liljestrand, KemaNobel's solar project chief. "Stockholm gets more sunlight than Paris." He concedes two stiff obstacles: snow and "plumbers who don't like to go climbing around roofs."

BROAD INTEREST

Still, the vast increase in oil prices since 1973 has spurred many governments to action. In addition to national solar programs such as Germany's four-year, $60 million R&D effort, the European Community is putting $70 million into projects to commercialize solar collectors and sharply cut the cost of photovoltaics.

In Sicily, the EC is financing a $7 million solar electric plant built by a Europe-wide consortium to power a town of 800 by 1980. Italian companies now exploring solar projects include Fiat, Montedison, Zanussi, Ansaldo, and Metalli Industriale.

Even the snowcapped Swiss are stirring. Polisolar in Berne, one of a dozen small Swiss solar-energy companies, will "supply a $1 million solar heating and cooling system" this year at the Rome plant of Contraves Italiana, a Swiss-owned electronics and arms makers in the Oerlikon-Bührle empire. Polisolar's collectors are now being used for industrial processes, desalting, and small power plants by licensees in Spain, Sweden, and Austria.

Though the great sunbelt from Morocco to India is an enticing, already perceptible target, the largest market for Europe's solar entrepreneurs will be their 350 million fellow citizens. The French government foresees 200,000 solar-assisted homes and offices by 1981, and spokesmen for German industry project similar growth. Judging by the heady mood of solar's pioneers, the sky—the seat of the industry's principal "fuel source"—is the limit.●

## A REBUTTAL TO TECHNOLOGICAL PROTECTIONISM

● Mr. JAVITS. Mr. President, in today's Washington Post Daniel S. Greenberg has made a major contribution to the national debate on an open and free international trading system. Greenberg is, however, not talking about restrictions on the free flow of goods, but rather on the free flow of ideas, technological protectionism, as he calls it.

In attacking those who would stop the movement of technology overseas, Greenberg reminds us that much of today's R. & D. is now taking place outside the United States. He calls upon U.S. manufacturers to undertake a concerted effort to "exploit" that outside R. & D. similar to the one undertaken by many nations to exploit American-financed research.

Greenberg believes that the major difference between the United States and other nations is in the governmental commitment to "scientific and technological voyeurism." Comparing the roles of scientific attachés in U.S. Embassies abroad and in embassies of other countries, Greenberg concludes that as a matter of policy U.S. Government officials abroad are not in the "business of collecting scientific and technical data for shipment back home," which their foreign counterparts are doing.

Once again, the issue returns to whether the United States has an overall policy that extends to nontrade specific areas, which reflects a commitment to insuring technological change in U.S. industry and the promotion of exports.

Daniel S. Greenberg has effectively rebutted the arguments for intellectual protectionism by providing a positive, nonrestrictive solution. I commend this arti-

cle to my colleagues and ask that it be printed in the RECORD.

The article follows:

OUR INDOLENT PURSUIT OF FOREIGN TECHNOLOGY

(By Daniel S. Greenberg)

Listening in on the complaints that officials in industry, labor and government are making about foreign industrial competition, one gets the impression that some of them would rather curse the darkness than light a candle.

Consider, for example, one of the fastest growing themes in the protectionist camp—namely, that foreign firms are scooping up the results of vast quantities of our taxpayer-financed research and using it to innovate products that outsell domestic goods.

Is that true? You can safely bet your Japanese-made television set that it's true. Which is why the president of the International Association of Machinists and Aerospace Workers charged last year that Japan has reaped $15 billion from the purchase of $1.5 billion of American technical know-how. It's why leaders of the American electronics industry have been pushing for curbs on the export of American scientific and technical knowledge. And it's why the White House has included the export of such knowledge in a recently ordered governmentwide study of what ails industrial innovation in this country.

But before the drumbeat for technological protectionism gets any louder, it would be useful to take note of certain facts concerning foreign mining of American science and technology. Our industrial competitors work hard and systematically at keeping in touch with the output of American laboratories. And we make it extremely easy for them to do so. But in the meantime, there is scarcely an organized American effort to keep abreast of foreign research, which, despite our ethnocentric notions of American scientific supremacy, actually accounts for well over half of the world's scientific and technological output. Furthermore, when it comes to research of industrial value, our seemingly huge budgets are misleading. Half of the government's funds go into military projects, whereas Japan, for instance, devotes no more than 10 percent to that purpose.

In evaluating the calls for protectionism, however, the relevant point isn't who's doing more or less research, since great quantities of it are going on here and abroad. Rather, it's our indolence in matching the organized, serious efforts that many nations make to exploit—as the protectionists correctly contend—American-financed research.

For example, the semigovernmental Japan Trade Center has technically trained representatives posted in New York, Los Angeles, San Francisco, Houston and Chicago. Their duties, according to a spokesman, "are to watch everything in American industry and gather information." The same monitoring role is carried on by representatives of many Japanese firms.

France, which follows a determined policy of keeping in touch with research in the major industrialized nations, keeps six science attachés in Washington, plus one each in Boston, Houston and San Francisco. Principal among their duties is following American science and technology at the laboratory level. The object is to know what's going on long before the rest of the world finds out through the traditionally slow process of scientific publishing.

The embassies of almost all the other industrialized nations are staffed for that purpose, though the intensity of the efforts varies. A staff member of the State Department science office points out, "Most of these people work for their ministeries of commerce and industry, not for the foreign ministry, and their job is to watch the industrial area."

It's all open and aboveboard and, in fact, is greatly assisted by the U.S. government National Technical Information Service (NTIS), which offers for sale about 75 percent of all scientific and technical papers produced in the United States. Foreign sales are such a booming business—with Japan the biggest customer—that NTIS has contracted for foreign dealers to handle its publications in Japan, Britain, France and the Netherlands. Foreigners take 10 percent of NTIS sales. It is a unique window on a national research enterprise—immensely valuable, of course, to American researchers, but equally so to foreign competitors. Except for a small organization in the Netherlands, no other country has anything resembling NTIS.

The United States does maintain science attachés in 23 of our embassies. But unlike most of their foreign counterparts here, they're not in the business of collecting scientific and technical data for shipment back home. Rather, they're concerned with "policy matters"—whatever that means.

The military services, led by a longstanding Navy operation based in London, try to keep in touch with leading scientific centers abroad, but their interests are narrowly defined and are not geared to industrial purposes.

The imbalance in scientific and technological voyeurism is something that American industry is aware of. But with the government indifferent to the problem and pooled monitoring efforts barred by antitrust regulations, few companies do anytihng about it.

One major exception is General Electric, perhaps the most shrewdly and tightly managed of our big high-technology corporations. Monitoring of foreign science and technology is handled by two GE representatives in Zurich, two in London and one in Tokyo. According to Charles M. Huggins, GE's manager of international programs for corporate research and development, "We assume that 60 percent of all new science and technology is developed outside the United States."

American campaigners for technological protectionism should think about that.●

## UPGRADING THE LABOR FORCE

● Mr. McGOVERN. Mr. President, the United States, regrettably, has not responded imaginatively enough to the unemployment problem. We have continued to nibble around the edges of the problem, seeing it as largely a welfare issue, involving people who are urged to pick themselves up by the bootstraps with minimum help or assistance from unemployment compensation.

The nations of Western Europe have adopted a far different policy, which I believe is more effective. They have developed a labor force "investment policy." They believe that labor must be trained and retrained on a continuing basis to supply the changing spectrum of sophisticated skills needed by a high-technology economy.

Although such a program is more expensive than the present policy, in the long run it would increase the productivity and profitability of the American economy. Such a policy could also respond creatively to the kinds of plant shutdowns and plant closings which recently occurred in Youngstown, Ohio.

Mr. President, I ask that an excellent article by Herbert E. Striner, outlining this problem and recommending solutions, entitled, "Investing to Upgrade the Labor Force," printed in the March 13, 1978, edition of Business Week, be printed in the RECORD.

The article follows:

INVESTING TO UPGRADE THE LABOR FORCE

(By Herbert E. Striner)

This nation's dismal unemployment rate is inexcusable, politically and economically. While successive U.S. Administrations wring their hands over the problem, another major industrial country has rolled up its sleeves and dealt with it. Over the last decade, West Germany has outperformed us on employment, productivity, and inflation control, and we steadfastly refuse to learn the lesson. The West Germans, like most of the West European countries, view their work force as a form of "capital." They assume that this capital must be trained and retrained on a continuing basis to supply the changing spectrum of sophisticated skills needed by a high-technology nation. To do so requires a labor force "investment policy."

Beginning in 1964, West Germany has provided, *as a right* to every adult, whether employed or unemployed, up to two years of full-time training or retraining. All training costs plus an income subsidy, which can be as high as 90% of the last wage, are covered. The income subsidy varies inversely with the last wage. Thus, a low-wage employee loses little income in upgrading his or her skills and increasing productivity. A higher-paid worker will lose proportionately in income, thus guaranteeing there are no frivolous decisions to leave a job. The psychology works. Most people want to make more money rather than less. If they are given help to achieve this goal, they will do so. Those needing the most help, but with the most to gain, are the low-paid workers. Hence, they are subsidized the most. But the economy gains the most by their becoming higher-skilled workers. Moving allowances and short-term rental allowances to encourage moving where the good jobs are located are all included.

Because of the success of the West German approach, the French passed similar legislation in 1971, and the British followed in 1975. But even before the German legislation of 1963, the Danes and Swedes had already proven the efficacy of the "investment" approach.

RESISTING AN EFFECTIVE IDEA

Meanwhile, the U.S. has continued to nibble around the edges of the unemployment problem, seeing it as a sort of disguised welfare problem involving people who should be urged to use their own bootstraps with minimal help from unemployment payments. We view workers as an asset as long as they are employed. They become a liability when unemployed, and we are reluctant to spend too much money on them, hoping instead that the economy will improve or they will somehow find some sort of job.

We have had some training programs, of course, but our expenditures have been slight when compared with the relative efforts of West German, French, and since 1975, British programs. We have not, since the GI bill following World War II, provided both an adequate income supplement and a long enough period of training to do the job of maintaining a work force capable of supplying our advanced industrial and service sector needs. No U.S. Administration has really considered the European experience. Our key policymakers are most often "educated" by economic advisers about the inevitability of the Phillips curve and its trade-off between low unemployment rates and higher inflation. But these economic advisers seldom make the point that each country has a

different Phillips curve, with ours being one of the worst.

THE WRONG EMPHASIS

We continue to spend money during the hot summers to cool off human tinder. We spend money for public service jobs that can be done by functional illiterates or by workers who can read and write but have too few skills for the better jobs that are vacant in both the public and the private sectors. We urge businessmen to design jobs for low-skilled workers. What a travesty! We perpetuate economic fraud in these efforts. In November, 1977, when the U.S. unemployment rate was about 7%, the Conference Board's index of help-wanted advertising reached an all-time peak. The jobs are there, but the trained people are not.

Until we adopt an investment approach to our labor force and spend funds that are really adequate for a continuing upgrading of this key resource, our unemployment rate will remain above acceptable levels. Our $2,000 billion economy probably needs an ongoing training program that covers about 2% of our work force each year.

Even when European unemployment rates are adjusted for U.S. data collection methods, the West German rate is around 4%, and the French is around 5%. Scandinavian rates are, of course, well below 3%.

Such a program should be modeled on the German system, which in turn follows the pattern set by our own GI program. It would provide payments and counseling to unskilled workers, but it would let them decide what sort of training they wanted and where they would get it. Private schools, public schools, and on-the-job training programs could then compete on the basis of efficiency.

It will cost a great deal more than we are accustomed to spending for education and training to deal adequately with the problem of an effective work force. But, as every successful businessman knows, you have to spend money to make money. Many of the industrial countries in Western Europe have learned that lesson with respect to their work forces, and their high economic performance has shown it. We have refused to learn from what they have done, especially the West Germans, and our low economic performance has shown it.●

## ANGOLA

● Mr. GOLDWATER. Mr. President, most of the Members of this body will remember the time when the junior Senator from California, Senator Tunney, stood on this floor and offered a resolution that would cut off all U.S. help from the embattled troops of Angola and South Africa. Troops embattled against two of our common enemies, the Cubans and the Soviets. Now I am not going to stand up and say that this Congress or this Senate know precisely or completely what was taking place in Angola after the Portugese had left, but I do think it is necessary for any American interested in how the United States came to take what I consider to be one of the most disastrous mistakes in its history, and I must admit that in the last 10 years we have probably made more foreign policy mistakes than in the entire course of our 200-year history.

I do not care to relate the story of Angola from my own memory or even from my own study because it is not an easy-to-understand situation, particularly it was not easy for Members of this body who had been suffering through the unhappiness of Vietnam to understand how our country became or was involved in an action so far from our shores. Had this whole situation been presented to us, to all of the committees involved, to each individual Senator in a very complete and precise manner, I doubt that the Tunney resolution would ever have prevailed. It was close to Christmas, however, and we were anxious to get home and Vietnam was still a very ugly memory, and no one wanted to become involved in one of those misdirected efforts.

I have studied this, however, enough to realize in my own mind, at least, that the United States, my country, made a mistake which was the opening door to what has been another serious mistake; namely, in the Horn of Africa where we allowed the Cubans equipped with Soviet Arms, to again enter another part of Africa and to observe today these same forces established in Mozambique, ready to invade what has always been the friendly country of Rhodesia. I do not care at this time to go further in this discussion of the continent of Africa, so I will confine my interest at this particular date to what went on in Angola and this, I believe, will allow the reader to begin to form an idea of what the future history of the continent of South Africa will be, particularly if the misguided intentions of President Carter and Ambassador Young are allowed to prevail. One of the best series of articles that I have studied on this whole matter was written by a man on the scene, Mr. Robert Moss who writes for a number of papers, including the Pretoria News, and I ask that this series of articles pertaining to Angola and our part in it and our foregoing our friends in that part of the world be printed in the RECORD.

The material follows:

[From the Pretoria News, Apr. 2, 1977]

HOW S.A. WAS BETRAYED

How Fidel Castro's 15,000 Cuban invaders of Angola, armed by Russia, won a victory by default over the anti-communist guerrillas is told in detail for the first time in an exhaustive study, which begins on this page today, of this largely secret war.

The author, Robert Moss, shows that the United States, having begged South Africa to put troops in to offset the communist intervention, lost its nerve and failed to stop the great buildup of men, guns and aircraft from across the seas, which had started, trucked right across the African continent, way back in 1964.

The Russians' motives were far from ideological. They were after oil, diamonds, minerals—and naval bases.

Only now, when the war is nominally over but guerrilla resistance continues, does the truth of this extraordinary adventure begin to emerge.

The pro-communist forces outnumbered the anti-communists by 10 to one in weaponry. Ten times as many Cubans as South Africans went in. But it was failure of will which determined the issue in the end.

On the morning of October 7, 1975, a company of teenage soldiers from Jonas Savimbi's anti-Soviet Unita movement was heading west through central Angola.

The men belonged to one of three black guerrilla movements which had been promised a share in Angola's independence from Portugal, then only a month away. Their mission was to intercept a column of pro-Soviet MPLA forces that was reported to be striking east towards Nova Lisboa, Angola's second biggest city.

The Unita (National Union for the Total Independence of Angola) column had started out from its base in Silva Porto with two old Panhard armoured cars (a gift from President Mobutu of Zaire) but one had broken down along the way. Its other weaponry was not impressive: three jeep-mounted anti-tank missile launchers, two 106 mm, recoilless guns, and four 0.50 Browning machine-guns. But at this stage that was virtually the full inventory of Unita's hardware.

The column included 14 South African infantry instructors acting as advisers, led by a major. They were tough professionals who had volunteered to go to the aid of UNITA in what had so far been a losing battle against superior Soviet-supplied weapons. They wore Unita uniforms.

About seven kilometres outside the village of Norton de Matos, the little column reached a bridge. Scouts were sent forward, and reported that the enemy was not in sight.

But then a spotter plane appeared overhead, and one of the black soldiers opened up on it with a machine-gun. This was the signal for all hell to break loose. From over the brow of the hills beyond the river the concealed MPLA (Popular Movement for the Liberation of Angola) forces opened up with recoilless guns, light artillery, air-burst mortars—and five Soviet-built T-34 tanks with Cuban crews joined in.

The South African major's jeep was knocked out from under him by an armour-piercing projectile from one of the tanks, but he escaped uninjured. Unita's young soldiers—who had had only two weeks to prepare them for war—scattered in confusion. But Unita's solitary armoured car, commanded by a South African lieutenant, swung forward and lobbed a 90 mm shell into one of the Soviet tanks, which disappeared in flames. The South Africans managed to knock out a second tank with one of Unita's 106 mm guns. After this, the other three Soviet tanks pulled back.

While the enemy mortars kept up an intensive fire, the South Africans, ducking and weaving, slammed six anti-tank missiles towards the hidden positions, without any certainty of hitting anything. But a Unita patrol subsequently claimed that 116 of the enemy had been killed. There were no South African casualties.

This skirmish at an obscure spot in central Angola (never before reported) was the first armed confrontation between the Cubans and South Africans, the prelude to an extraordinary war in which one of the most brazen land-grabs that the Russians and their satellites have attempted proved to be successful—not because of victory on the battlefield, but because of the political failure of the Western powers to deliver sufficient support to the anti-Soviet guerrillas.

The communist invasion of Angola is one of the most decisive, and most sombre, turning points in the whole period since 1945. It is the story of how more than 15,000 troops from a sugar-cane republic in the Caribbean were transported 6,000 miles across the Atlantic to serve as the Gurkhas of the Soviet Empire, and how a pro-communist government in Lisbon, and a number of Third World governments, smoothed the way for that invasion.

It is also the story of how the South Africans—supposedly pariahs—were begged by the United States and by moderate black Africans leaders to put troops into Angola to offset the communist intervention. By the end of a lightning armoured offensive the South Africans came within a hair's breadth of securing a total military victory for the anti-Communist black movements of Angola.

Why that victory was thrown away is the most complex story of all. But the most damning factor was the failure of nerve in Washington.

In an age of televised battles, the war for Angola was a remarkably secret war, and the truth of what happened is only slowly beginning to seep out. The Cubans have just produced their authorised version, in the form of a book-length article published by the Colombian novelist Gabriel Garcia Marquez in the Mexican magazine Progeso. In the midst of a wealth of factual detail, his account is littered with distortions and plain untruths.

For example, Garcia Marquez states that the decision to send Cuban combat soldiers into Angola was taken on November 5, 1975.

But Cuban troops were on the battlefield months before then. He describes a battle at a Cuban training centre outside Benguela in October that the South Africans found deserted and crawling with lice. He gives the impression of a triumphal Cuban march to the south in the early months of 1976, but does not mention that it took the Cubans more than two months to occupy the territory that the South Africans vacated after they took the political decision to withdraw.

But there are two basic truths in the Garcia Marquez account. The first is that the Cuban invasion was encouraged by the belief that the Americans, after Vietnam, Watergate and the witch-hunt against the CIA, were in no shape to respond effectively to communist aggression. The second is that the Cubans were confident that, if they ran into real trouble, their Russian sponsors would not allow them to fail.

It was a war of camouflage. Both the Cubans and the South Africans went into Angola at the outset wearing civilian clothes or other people's uniforms. Cuban volunteers (such as the three wounded prisoners who were taken to South Africa for medical treatment) were told that they were being sent to work on a building project, or to undergo a political training course in Russia. The first South African instructors with Unita were ordered to talk only in English and to describe themselves, if asked, as English.

I cannot profess to write the secret history of the Angola war in full but this narrative (based on authoritative sources in several non-communist countries) will tell a great deal that has never been told before. First, there is the communist invasion of Angola and how it was achieved; then the course of the war, including the battle for Luanda, the capital: and then the West's capitulation, which has brought, in President Kaunda's chilling phrase, "a plundering tiger and her savage cubs" to the gates of Rhodesia, South Africa, and the moderate black African States.

The Russians had been deeply involved in Angola since the early 1960s.

In 1956, the rigidly pro-Soviet Portuguese Communist party had helped to found the Popular Movement for the Liberation of Angola, in which Dr. Agostinho Neto—a mulatto who had helped to set up a clandestine communist group during his student days in Oporto—emerged as the dominant figure.

In the early 1960s the MPLA established its first contacts with the Cubans, who were helping to run a training camp for African guerrillas at Dolisie in Congo-Brazzaville. A number of MPLA cadres also received training in Cuba during this period.

In 1964, the Portuguese Communist leader Alvaro Cunhal set up a meeting for Agostinho Neto with the Soviet leaders in Moscow. This was the trigger for a more ambitious Soviet support programme.

The Russians began shipping consignments of arms and food to Dares Salaam, from where they were trucked to the MPLA via Zambia.

Soviet merchant vessels laden with small arms, AK–47 rifles, RPG–7 rocket launchers, and mortars became a familiar sight in Tanzanian waters. The Russians also began doling out a cash subsidy ranging between 150,000 and 300,000 dollars a year.

Most significant, perhaps, the Russians began to receive a regular intake of MPLA recruits for training at the Institute of Marxism Leninism (for aspiring commisars) at the army camp at Simferopol in the Ukraine (for rank and file soldiers), and at the Frunzi military college (for officer material). One of the graduates of Frunzi was Iko Carreira who, as the MPLA's Minister of Defence, was to play a critical role in the secret talks that led to the Cuban invasion of Angola.

Soviet aid to the MPLA diminished between 1972 and 1974, apparently as a result of the movement's miserable performance in guerrilla operations against the Portuguese.

There was a sharp renewal of interest in the MPLA, however, just before the coup in Lisbon on April 25, 1974, that set the scene for the decolonisation of Portuguese Africa.

The Portuguese Communists were deeply involved in the coup, and the Russians had at least six weeks' fore-warning of it.

But for the Russians the key strategic objective was not Portugal itself, but Portugal's African possessions—above all Angola, rich in oil, diamonds and other minerals, and occupying a vital geopolitical position. Unita sources have claimed that as early as 1969 the Russians concluded a secret treaty with the MPLA leader Neto under which they undertook to guarantee continued support in return for a pledge that, if the MPLA succeeded, it would allow Russia to set up naval bases in Angola.

The Portuguese announced their plans for decolonisation in August, 1974. In the second half of that year, the Russians shipped arms valued at 6-million dollars to the MPLA via Dar es Salaam.

They also opened up a new route for arms deliveries via Congo-Brazzaville. Weapons were either shipped to the Congolese port of Pointe Noire, and then smuggled into the Cabinda enclave by truck, or flown into the Maya Maya air base, outside Brazzaville, and ferried into Angola by small vessels plying the deserted north-western coast by small cargo planes.

At this stage, the Portuguese High Commissioner in Angola was Admiral Rose Coutinho, the "Red Admiral," notorious for his pro-MPLA sympathies.

Sources close to the leaders of the rival National Front for the Liberation of Angola (FNLA) claimed that the bitter hostility that Rosa Coutinho displayed towards the FNLA and its leader Holden Roberto was connected with the indignities inflicted on him when, as a young colonial army officer based at Santo Antonio de Zaire, he was captured by FNLA troops and imprisoned in Kinshasa for six months. Holden Roberto's brother-in-law is President Mobutu of Zaire.

Whatever the explanation, Rosa Coutinho made no attempt to curb the delivery of Soviet-bloc weapons to the MPLA after he was appointed High Commissioner in 1974.

His immediate successor, Air Force General Silva Cardoso, was less partisan. In April 1975, he stopped a Yugoslav vessel from unloading its full cargo of arms in Luanda harbour, but the rest of the cargo got through, smuggled by fishing vessels and Soviet-made landing craft from Pointe Noire.

It fell to General Silva Cardoso (who was abruptly sacked in July, on the pretext of "physical exhaustion") to preside over the disintegration of the political formula for Angola's future that had been agreed on at a conference at Alvor in Portugal and signed on January 15, 1975.

The three Angolan guerrilla movements were to have strived in a transitional Government to prepare for a general election on October 30 and independence on November 11. They were also supposed to provide 8,000 men each for a national defence force.

But the MPLA and its backers had no intention of sharing power with anyone, still less of holding general elections in which Unita—because of its political base among the Ovimbundu peoples, the largest ethnic group in the country—would almost certainly have swept the board.

Between April and August, 1975, Soviet bloc arms flowed in through the ports of Luanada, Dar Les Salaam and Pointe Noire, and the Russians also embarked on a major airlift of arms by Soviet military transports landing in Brazzaville.

The MPLA was being equipped for conventional war with rocket-launchers and with 1–54 and 1–34 tanks and field artillery.

In contrast, the FNLA and Unita were still equipped with side arms and little else.

Although the CIA was authorised to spend 300,000 dollars in covert support for the FNLA in January 1975, supplies started to trickle through in significant quantities only in July—partly the result of holdups in Kinshasa, where the local officials are not famed for their efficiency or incorruptibility.

But it was no good supplying weapons without teaching the MPLA how to use them. In December, 1974, a large contingent of MPLA officers and NCOs had been flown to Russia for intensive training. But early in 1975 a more momentous decision was taken: To put Cuban instructors into Angola.

Cuba's deputy Foreign Minister Carlos Rafael Rodriguez, publicly admitted (in a speech in December 1975) that there were already 230 Cuban military instructors with the MPLA in the spring of 1975. Some may have been transferred around this time to the fort of Massangano. On July 25 another 50 Cubans arrived by plane in Brazzaville to help assemble arms stockpiled at Pointe Noire.

Left-wing Portuguese officers who had visited Havana in July had undertaken (according to the Garcia Marquez version) to secure formal Portuguese approval for Cuban aid to the MPLA. In August the MPLA Defense Minister Iko Carreira visited Moscow and asked for Soviet troops to support his movement. The Russians immediately rejected his request, no doubt fearing American intervention, but it was suggested to Carreira that he should put the same request to the Cubans. Soon afterwards Carreira met three senior Cuban advisers in Luanda, and it became their task to sound out Castro.

Despite the involvement of the Cubans in other parts of Africa, the Middle East and the Caribbean, some well-placed Western sources believe that Castro did not immediately become fired with enthusiasm for this new prospect of ideological derring-do.

His main fear was that the Americans would retaliate—possibly by direct action, or at least by a blockade, against Cuba. The pitiful state of the Cuban economy and the slender defense budget (a nominal 300-million dollars a year) might have been another disincentive. But the Russians made it clear that they would be footing the bills, and are said to have offered secret assurances that they would enter the Angolan conflict directly in the event of American intervention.

At the same time, a series of radical black African Governments, including Guinea-Bissau, Guinea-Conakry, Mozambique, Algeria and Congo-Brazzaville, pressed Castro to send in troops.

Western intelligence sources believe that Castro had already decided on the full-scale invasion before Oscar Oramas, one of the Cuban advisers who had been to Luanda, met him in Havana in the last week of August to warn him of the possibility that the South Africans—who had kept closely in

touch with both the FNLA and Unita behind the scenes—might eventually step in on the side of the rival movements. In any event, the fact that the decision to commit Cuban troops to a combat role was taken long before November 5 (the date given by Garcia Marquez) is demonstrated by the course of events over the following weeks.

Cuban troops went into the battle in Angola two months in advance of the South Africans.

On August 6, 200 more Cuban instructors reached Luanda, where the MPLA was now in uncontested control. During August Unita source reported that some of the Cubans were transferred south to Lobito and Benguela where the Cubans established a training camp and a supply base.

In the bitter fighting in which the MPLA seized control of Lobito, a traditional Unita stronghold, that same month, "yellow-faced men who spoke Spanish" are said to have fought with the MPLA. In September, on the northern front, the FNLA found the bodies of two Cubans in a burned-out armoured car.

From late September, the arrival of Cuban troops steadily accelerated. As with the arms shipments, Congo-Brazzaville was the key trans-shipment point.

President Marien Ngouabi was promised his reward for services rendered when he visited Havana in mid-September. Fidel Castro promised him some expensive military assistance, including the gift of six Soviet-built patrol boats (the Congo republic had only two). Soviet MIG fighters, and training in Cuba for Congolese paracommandos.

At Pointe Noire, war supplies were already being landed, stored and trans-shipped.

On September 25 the Cuban vessel Vietnam Heroico docked at Pointe Noire with 20 armoured vehicles, 30 army trucks and 120 Cuban soldiers. On October 5 another Cuban ship, the Cerro Palado, docked with another 350 troops, who were taken by plane to the northern front.

Then La Playa de Habana docked on October 12 with another 500 troops. The previous day 270 Cubans, including pilots, had reached Brazzaville by air. On October 14 a Cuban Communist party delegation turned up in Brazzaville and assured the MPLA that Cuba would provide the pilots to fly the Mig-21s and Mig-17s that were being supplied by Russia. That was the day that a South African armoured column crossed the Angolan border from its base headquarters at Runtu.

On October 16 Russian transport aircraft landed another 800 Cuban soldiers at Brazzaville.

These and subsequent Soviet flights made use of landing rights at Algiers and Conakry. On October 18 and 19 the 500 Cubans who had sailed in La Playa de Habana were flown to Angola in Soviet military planes.

The following day another 750 Cubans were landed at Novo Redondo, South of Luanda, by coastal vessels. On October 26, 160 Cubans landed at the Maya Maya air base and left the same day for Angola.

As Castro's men continued to arrive, the quantity and quality of the Soviet war material shipped to Pointe Noire increased spectacularly. MIG 21 jet fighters in parts (to be assembled in Congo-Brazzaville); tanks, armoured vehicles, rocket launchers and small arms. Many of these weapons were transferred to huge arms depots set up inside Angola, at Porto Amboim and Uuicama ready to be used by the Cuban reinforcements as they came in.

By Angola's independence day, November 11, there were at least 4,000 Cuban troops based in Angola. Some 2,500 of them were stationed in Luanda and on the Quifangondo front, where their presence enabled the MPLA to fight off the FNLA's drive towards the capital.

Hence it is nonsense to make out that Cuba's decision to send in major combat units was taken only in early November, after South Africa's intervention.

In the two months after independence the strength of the Cuban forces in Angola was increased to over 15,000. Some of the troops came from the special infantry of the Interior Ministry (the equivalent of the KGB's special troops, who are experts in internal repression), but more were "volunteers," drawn from the ranks of former national servicemen, who were offered substantial pay increases to make the trip. Not everyone was told that he was going to war.

Sergeant Esequiel Mustelier, a 23-year-old small farmer from Oriente province, who was captured by the South Africans in the Cariango area on December 10, claimed that he had left Cuba on what he believed to be a peaceful mission, to build schools in Angola.

He was astonished to find no building materials were available.

Carlos Maru Mesa, and Roberto Morales Bellma, taken prisoner on December 12, claimed they had really happened to that they were being sent on a political course in Russia.

Only after they had been deployed at an unknown battlefield in central Africa were their families informed of what had really happened to them.

How did the Cuban troopplanes get to Angola?

The favourite refuelling point for the Russian-made Ilyushins and British-built Britannias leaving José Marti airport between October and mid-December 1975, was Barbados. Security at Seawell airport was slack, it was a long way outside the capital, Bridgetown, and few people seemed to have noticed the night flights in the first few weeks.

It is not clear whether the Barbadian Government gave the green light. But the then Prime Minister, Mr. Errol Barrow, conceded in an interview with The Sunday Telegraph that there may have been as many as 50 flights before he was forced to lodge a formal protest with the Cubans on December 17.

Other observers say that at the height of the airlift there were between 10 and 15 flights a week, and as many as five in a single night. It is impossible to believe that Mr. Barrow's Government did not know from very early on that these mysterious planes, each carrying 100-odd young men, were additional to the scheduled Cuban flights that had been stopping over at Seawell for the previous two years.

American pressure finally stopped the flights, although there was a wrangle within the American Embassy at the time over how much pressure should be applied. The black American Ambassador, Theodore Britton, was accused by the head of his political section of trying to "ingratiate" himself with Barrow.

After the Barbados connection was cut off the Cubans turned to Eric Williams, the Prime Minister of Trinidad, for the same facilities. But he refused, on the ground that he was not ready to back foreign intervention in Angola.

However, the Cubans soon found more amenable countries.

The Portuguese played a key part in getting the Cubans to Angola around Christmas, 1975. Britannia-31s flown by Cubana de Aviacion were allowed refuelling facilities at the airbase on the island of Santa Maria in the Azores.

The pattern was the same with five flights in the last days of December: the Cuban planes would land at night with their internal lights dimmed, and without declaring their cargo. No passengers would disembark.

But Portuguese military intelligence officers established that the flight from Havana on December 20 contained 94 passengers en route to Guinea-Bissau. Another 259 passengers were on four succeeding flights.

Senior Portuguese officers say that American pressure finally persuaded the Portuguese to cut off refuelling facilities, which had been initially granted on the personal authority of the then President General Costa Gomes.

The tremendous logistical exercise that was mounted to get the Cubans and their equipment to Angola went virtually unreported at the time and Western intelligence services were sometimes slow to pick up definite news of some of the key items that were being smuggled in. But the Cubans ran into plenty of snags along the way.

Some of the small coasters used to transship arms and men from the Congo republic into northern Angola were sabotaged: Two were blown up by Portuguese agents in contact with the French intelligence service, and at least three more were blown up by South African commandos using simple dynamite charges.

[From the Sunday Telegraph, June 6, 1977]

HOW SOUTH AFRICA TOOK ON CASTRO'S INVADERS

(By Robert Moss)

The Communist invasion of Angola posed a challenge to the West. Would anyone take it up? Or would Cuban troops and Soviet guns enable a Marxist movement with only minority backing in the northern part of the country to set up a dictatorship?

The prospect was far from palatable to most black Africa. Moderate or pro-Western leaders like Kenneth Kaunda of Zambia, Mobutu of Zaire or Senghor of Senegal had no desire to see a new Soviet puppet régime set up in Angola. Zambia and Zaire, both dependent of Benguela railway, feared that the Communists would then use economic pressure to change their own policies, and that Angola would be turned into a base for subversion.

Equally, Angola's mineral wealth (especially in diamonds, iron ore and the oil from Cabinda) and its strategic position made it of vital concern to Western Governments. But Angola mattered in a deeper sense, as a place where the Russians had set out to test the capacity of post-Vietnam America to respond to Communist aggression in far-flung places. Before the end of the conflict, most Western nations—America, Britain, France, West Germany, Italy, Spain and Israel—had contributed their mite to the anti-Soviet forces in Angola.

There was a CIA operations officer in Silva Porto, UNITA's headquarters, throughout the war. British Intelligence and private interests—especially Tanganyika Concessions and Lonrho, which loaned UNITA its pilots—remained in close liaison with UNITA and arranged delivery of smaller items such as radio equipment. UNITA leaders frequently came to London for medical treatment and to lobby British M.P.s. When the South Africans withdrew their instructors from Silva Porto, French "mercenaries" working for SDECE (the French M16) took over; in many ways, the French were more adventurous than any other Western power. The Spanish provided a safe base in Europe for the white Portuguese fighting with the FNLA, who were given false papers by the police.

Intelligence officers from all these countries met—sometimes at remote airstrips—to compare their inventories, and to check that they were not duplicating arms supplies.

It was left to South Africa to shoulder the heaviest burden, by providing instructors, advisers and finally an armoured column in a desperate bid to lower the odds against the black nationalists, who were fighting a losing battle against Cuban troops and big guns from Russia. No one thanked the South Africans for what they tried to do. On the contrary, it earned them a smack in the teeth from the U.N. Security Council on March 31,

1976, months after their combat troops had withdrawn.

GUARANTEES FROM THE AMERICANS

Yet, as South Africa's Defense Minister, Mr. Botha, pointed out in a speech to Parliament, his country was at least a part of Africa, unlike Cuba, and presumably had some right to concern itself with events across its borders.

But the key fact about South Africa's intervention was one that neither Mr. Botha nor any other senior official in Pretoria has ever been prepared to discuss. It is that when the South Africans went into Angola, they went in with the private blessing of many Western and black African Governments, and at the urgent invitation of the black nationalist movements in Angola. At one stage, for example, President Mobutu of Zaire actually implored the South Africans to bomb northern MPLA positions. The UNITA leader, Jonas Savimbi, flew to Pretoria at a critical stage in the war to beg Mr. Vorster to keep his troops in Angola. The South Africans also went in with the encouragement of Dr. Kissinger, who offered American guarantees that, in the event, he was unable to fulfill.

How did the South Africans get sucked into a black civil war? The story begins in March, 1975, when a senior South African intelligence officer met Jonas Savimbi in a European capital. At a meeting in Lusaka on April 14 Savimbi asked for small arms and cash to enable his movement to contribute to the joint black army that was supposed to be set up under independence, and so help to establish a military balance that could force the pro-Soviet MPLA to agree to hold elections.

The South Africans—like other Western Governments—were worried by the jealousies between UNITA and its rivals of FNLA, the third black faction in Angola, and urged Savimbi to establish a formal alliance with Holden Roberto, its leader. Savimbi was reluctant, complaining of gangsterish behavior and "anti-white" attitudes among the FNLA chiefs. The South Africans rejected his request and allowed contact to lapse for several months. (Savimbi found other backers in the meantime—including the Chinese, who supplied seven tons of arms in the first half of 1975.)

The South Africans had also been approached by Holden Roberto, through Portuguese intermediaries such as Colonel Santos e Castro, a respected former counter-insurgency fighter, who had been a provincial governor in Angola and was to become a key figure in the anti-Communist movement in both Portugal and Angola. Their first meeting with Roberto took place in Kinshasa in July. On the strength of Roberto's undertaking to consolidate an alliance with Savimbi the South Africans agreed to give the FNLA a shipment of mostly second-hand light machine-guns, rifles and mortars, which arrived in August.

A third meeting towards the end of August, in UNITA-held territory inside Angola, when a senior South African army general was present, set the scene for South Africa's entry into the war. The South African army agreed to provide instructors. Two training camps were set up: one for UNITA at Calombo, south of Silva Porto, another for the FNLA forces loyal to Daniel Chipenda at Mapupa, in southern Angola. Crash courses at these camps enabled the anti-Soviet movements to put 6,000 trained (or at least partly trained) men into the field in six weeks.

A platoon of South African soldiers had already been deployed inside Angola, around the Calueque hydroelectric works on the Cunene river on August 9. But this was a purely defensive exercise, intended to guard the Cunene dam and hydro-electric scheme, which supplied energy to the major towns of southern Angola, from marauding gangs. The South Africans later claimed that their intervention here had had the tacit approval of the Portuguese.

Dr. Hilgard Mayer, the South African Foreign Minister, later said that South Africa's entry on to the battlefield had had "a limited objective—that of gaining time for the rival forces in Angola, with the catalyst of diplomatic pressure from black Africa, to achieve a political settlement.

The army's instructions were to assist Savimbi's and Roberto's forces to regain control of the areas of southern and central Angola where they enjoyed traditional ethnic support, and above all to help UNITA to hold on to its capital, Nova Lisbon, which was threatened by the Cuban and MPLA forces. The hope was that, if the anti-Soviet forces were seen to be in a position of strength on November 11, the day of independence, the MPLA and its sponsors would be forced to make a treaty with them and abandon their plan for outright conquest.

"BROTHERS" FOR THE UNITA TROOPS

As it turned out, the astonishing military success of the tiny South African column in Angola offered the chance of something more: an outright military victory over the Communists. But the chance was rejected.

Even for a black leader who was as consummate a politician as Jonas Savimbi, the relationship with the South Africans was uneasy at first. After all, he had been fighting the Portuguese in the bush for years, only to end up with the country whose apartheid policy was the focus for the hatred and resentment of black nationalists everywhere as his ally. But he soon found a close friend and confidant in the young fair-haired paratroop colonel who landed in Silva Porto on September 21, 1975.

The South African was no newcomer to Angola. He had served as a military attaché with the South African embassy in Luanda between 1970 and 1973, and spoke fluent Portuguese. Savimbi's men took to calling the South African Commandant Kaas (which means "Commander Cheese") because of his fair complexion and the fact that he came from a Dutch family, and Kaas called Savimbi "the Doctor," or simply "Doc."

The major had arrived with a team of 18 infantry corps instructors, who were soon described in the UNITA camps simply as "the brothers." Their orders were to provide training in conventional warfare for UNITA troops, and to help UNITA establish a holding position in central Angola.

The South African team arrived at a moment when the pro-Soviet forces had seized control of all the major towns in Angola except Nova Lisbon, Silva Porto, Luso and Holden Roberto's capital. Carmona, in the north, and Daniel Chipenda's capital, Serpa Pinto, in the southeast. The Communists held all major ports, and were driving deep into the Ovimbundu tribal areas traditionally controlled by UNITA.

Commandant Kaas found himself in charge of a disused Portuguese goal and 1,000-odd enthusiastic UNITA recruits, mostly aged between 14 and 20. He set up a two weeks' training course, working the recruits day and night. His personal headquarters were at the airfield outside Silva Porto.

UNITA was desperately short of weapons, and the shortage was made worse by sheer disorganisation. It was not until after independence day, for example, that Commandant Kaas discovered a cache of 600 light machineguns that someone had hidden away in the bush and then forgotten. All UNITA's weapons and explosives were piled up together in a few mud huts in Silva Porto, and UNITA commanders as far away as Pereira d'Eca would have to trek north to be resupplied. The explanation was political. Savimbi was well aware that one way to prevent remote subordinates from developing into unruly warlords was to leave them in no doubt about where their next bullets would come from.

UNITA had other foreign helpers, although they were of uneven value. Agents from most Western Powers bobbed up in Silva Porto throughout the campaign, and were put up in relatively palatial former Portuguese residences, or in the former monastery. President Mobutu of Zaire not only sent six old Panhard armoured cars (whose electric clutch defeated inexperienced drivers) but 120 smartly turned-out soldiers as well.

PRETORIA'S ORDER: "HOLD BACK"

Their appearance, however, was no guide to their combat potential. They spent most of their time preying on the local girls, and when real fighting was in the offing, they took to removing the steering wheels from the armoured cars overnight in order to prevent any offensive being launched. Savimbi and Commandant Kaas managed to stop this practice by making it plain to the Zairean major in charge that his men were not expected to do any actual fighting. Although Savimbi was pressed to send the Zaireans back, he prevaricated, unwilling to offend Mobutu. However, UNITA took great care to lock up abandoned shops and warehouses and guard them against possible looters.

The crucial mission of the South African advisers with Savimbi was to stop the Communist forces from advancing on Nova Lisboa down one of the three main roads that were open to them: from Luanda to the north, and from Benguela and Lobito to the west. A UNITA column under Savimbi's command set out on October 4 to ward off a reported Communist thrust from the west, and clashed with the Cubans and the MPLA three days later.

After the battle the UNITA forces set up defensive positions to the west of Nova Lisboa and Commandant Kaas radioed an urgent request for reinforcements. He was sent a squadron of 22 armoured cars, airlifted to Silva Porto on big C–130 transports. It was tempting to strike north to the Cuanza river with this new force, but the orders from Pretoria were to hold back. Word had already come of the arrival of another South African force in the south of the country.

One evening in late October, Major Chindondo, the UNITA Chief-of-Staff, arrived breathless and excited at the training camp. He had come to alert Commandant Kaas, to reports that the enemy was advancing towards Nova Lisboa in great strength from the north, and was massed in the Quibala area.

Commandant Kaas assembled most of his armoured cars and a UNITA battalion in a column, code-named Foxbat, which struck north and eventually took up defensive positions in the Cela area. It was here, on November 7, that the UNITA forces bagged one of their biggest quarries. The MPLA advance was being led by a senior Cuban officer driving in a black Citroën. A South African gunner fired at his car with a 106 mm. gun, and he was killed.

The Foxbat column was ordered to hold a line about 30 km. north of Nova Lisboa until independence day—although, in military terms it would have had little difficulty in advancing to the line of the Cuanza river, 270 km. further north. The political directive was that the South Africans should not go beyond traditional UNITA territory, and should be ready to withdraw on November 11.

Meanwhile, another South African column drove over the border of South-West Africa into Angola on October 14. The code-name given to it by the South African high command was Operation Zulu, which apparently confused the Cubans. There were, indeed, more black South Africans than white in the columns, but there were certainly no Zulus.

The officer in command was a stocky colonel in his early forties, an Afrikaner from

the Cape Province who had graduated from the military academy in Saldanha Bay and had volunteered to serve in Angola at the beginning of the month. He was to earn the nickname "Rommel" from his comrades because of the extraordinary speed of the column's advance.

He was alerted at 9:30 p.m. on October 9 that he should get ready to leave Pretoria for the operational headquarters at Rundu, on the Angolan border, on a 7 a.m. flight the following morning. At Rundu, he discovered that his force was to consist of two battalions: a Bushman battalion, mainly recruited from the Caprivi strip, and including many Bushmen who had fought for the Portuguese as skirmishers and trackers, together with Portuguese ex-army officers; and a black FNLA battalion consisting of about 1,000 men divided into three companies and commanded by a mulatto, Commandant Businha.

The FNLA men were followers of Daniel Chipenda, the warlord whose headquarters was at Serpa Pinto. Chipenda had broken away from the MPLA a year before and his loyalty could never entirely be taken for granted by his new allies.

"Rommel" had only six South African officers and seven N.C.O.s to help him command his force. From the outset they had a language problem. Half the Bushmen spoke Portuguese; the other half (recruited in South-West Africa) spoke Afrikaans. So orders would be issued to their Afrikaner commanding officer in Afrikaans. He would then repeat them in English to the Portuguese officers, who in turn would translate them into Portuguese. It was a process that would have been merely tedious on the parade-ground, but on the battlefield it presented the risk of fatal confusion and delay.

"Rommel's" orders were to capture all the important centres along the coast that he could reach before independence day on November 11, within the ethnic areas where support for the UNITA and the FNLA was strongest. He was to make it clear to the civilian population that his was a UNITA/FNLA column; some Portuguese settlers wrongly imagined that they had come to restore the old order.

A SHOOTOUT AT THE BAR

When the column crossed the border at Cuangar on October 14 it included only civilian vehicles—lorries, vegetable trucks, private cars and a few Land-Rovers. The first target was the southern town of Pereira d'Eca, which had already changed hands several times. The column ran into light resistance from MPLA ambush parties using RPG-7 anti-tank rockets along the road (and also from NITA foragers who had not yet been notified of Operation Zulu) but when it got to the town, most of the defenders fled into the bush.

This was to become the pattern throughout much of the campaign. MPLA soldiers took to wearing civilian clothes under their uniforms so that, once driven out of their positions, they could drop their rifles, whip off their military gear, and merge into the civilian population.

The column occupied Pereira d'Eca so quickly that MPLA troops on the outskirts were not immediately aware that the town had changed owners. Commandant Businha was having a celebratory drink in a local bar when two MPLA soldiers came in. He whirled around, took one look at them, and gave the MPLA salute (two fingers up). When they responded, he fired from the hip with his F.N., killing both.

The condition of Pereira d'Eca gave a glimpse of what the South Africans were to find in the bigger towns, gutted by a black civil war. Most of the buildings had been sacked; the shops looted down to the floorboards. Local UNITA forces were brought in to restore basic services.

From Pereira d'Eca, the column swung north-west towards Rocadas where it was joined on October 20 by four troops of armoured cars (about 20 in all) and half a platoon of 81mm. mortars, sent over the border from South-West Africa. The column also gained some more exotic recruits at Rocadas. It was met by a band of 47 Portuguese led by a small, dapper captain with a twirled moustache called Aparicio, who proudly announced that he and his followers were members of the Portuguese Liberation Army (ELP) and that they intended to drive the Communists out of Angola before carrying the crusade to Portugal itself. Aparicio quickly acquired the nickname "Garibaldi" with the South Africans. Unfortunately his group proved to be bolder in promises than in deeds, and never went further than Sá da Bandeira.

Two days later, the strengthened column, now led by a Land-Rover with a machine-gun mounted on top, swept into the town of Joao de Almeida. This was more vigorously defended; it had been used as a major MPLA storage depot, and large quantities of food, equipment and propaganda materials were captured.

Now the road was clear for the assault on Sa da Bandeira, the capital of Huila province, which was still believed to contain a sizeable white population. "Rommel's" main worry now was that the MPLA would pull back inside the town, putting the civilians at risk, but the defences turned out to be concentrated at outlying positions, especially a hill called Monte Cristo Rei because of the large statue of Christ on its summit.

The Zulu forces struck first at the airfield (standard procedure throughout the offensive, since the column was basically air-supplied) and then sent troops to scale the Monte Cristo Rei by stealth on the night of October 24. They found that the MPLA had already withdrawn, together with their big guns. This again was part of the pattern of the campaign so that as Zulu drove farther north it ran into even heavier firepower.

AMBUSH FROM ROCKET-LAUNCHERS

It was left to Captain Garibaldi and his Liberators to clear Sa da Bandeira.

Joined by another troop of Panhard armoured cars and another half-platoon of 81mm. mortars, the South Africans' next target was the major southern port of Mocamedes. On the way the column came under fire from 122mm. single-tube rocket-launchers, an ideal weapon for ambush, very light, easy to handle, and capable of being fired from an ordinary car.

The column managed to fight its way through and occupied the harbour of Mocamedes on the evening of October 27. There was an interesting variety of shipping bobbing at anchor, including a Portuguese navy corvette and Portuguese, Greek and Italian merchant vessels. The South Africans believed that these ships had been bringings arms—and probably Cuban troops as well—to Mocamedes, and were now being loaded up for a mass evacuation. They also knew that Nord-Atlas aircraft, allegedly owned by Frelimo in Mozambique, had been flying troops and equipment out of Mocamedes in advance of the Zulu offensive.

As the sun set over the harbour roads, a red Fiat coupé with a white flag fluttering from its bonnet drove out of the town towards "Rommel's" improvised command post. It had two occupants: the Portuguese captain in command of the 150 paratroops in the town, and a naval officer from the corvette. They requested that the ships in the harbour should be allowed to leave, on the grounds that they were evacuating refugees. The captain also insisted that his paratroops wanted to have nothing to do with the war. "We are neutrals," he insisted. "My rôle here is to guard the lives and property of the refugees."

It was later discovered that he was not telling the whole truth. Unknown to the Zulu force, the communications centre at Silva Porto had already picked up an urgent radio signal from the Portuguese command in Mocamedes to Luanda, requesting that MPLA reinforcements should be sent at once. It was also confirmed later that at the time Zulu arrived, a Soviet vessel had been waiting outside the harbour, bearing more arms and ammunition.

PULLING OUT WITHOUT A FIGHT

Although he could see barges laden with MPLA men plying back and forth between the harbour and the ships at anchor, "Rommel" decided to grant the vessels permission to leave. He also told the navy officer that if the corvette had not left by dawn, it would be blown out of the water—pure bluff, since the South Africans had no means of blowing it up.

By first light on October 28 the corvette had gone. Although there had been intensive fire the previous night, when MPLA and Cuban forces occupied a ridge outside the town and kept up an intensive and accurate fire with 122mm. rockets, there was little resistance inside the town itself. Advance units reached the airport (south of the city) too late to prevent the take-off of a Nord-Atlas carrying MPLA leaders, Cuban advisers and some heavy weapons. Although no Cubans were actually sighted during the fighting around Mocamedes, the precision firing was the clue to their presence.

After local UNITA forces were established in control of Mocamedes, the column turned back to Sá da Bandeira to regroup for the main assault on the north. There were reports that the MPLA was probing south from its positions at Benguela and Lobito—a primary objective for the South African operation as the country's second port and its most important railhead.

The rainy season was beginning, flooding rivers and turning the lowland areas farther north into swamp. From now on, the campaign was to centre on bridges and river crossings. Control of all-weather roads became the key to victory or defeat.

On the road from Sá da Bandeira to Benguela, the Zulu column ran into a series of extremely well-prepared MPLA positions. The influence of the Cubans—who showed themselves in the war to be well-trained in preparing and holding static positions, although inept fighters when things failed to go according to plan—was now obvious at every stage along the way.

The first major clash on the road to Benguela took place at Caporolo at the end of October. Here the Cubans and MPLA had set up their guns on a hill overlooking a bridge. "Rommel" sent his Bushmen westward along the river to look for a ford they could cross in order to take the enemy by surprise from behind. The Bushmen went too far, missing the ford. In the meantime, one of the Panhards nosed too far forward along the main road, disclosing the column's position.

To the South Africans' astonishment, the enemy forces simply picked up their equipment and ran—but not before trying to blow up the bridge. The explosive charges had all been set, but the last man who had checked the circuit on the detonator had forgotten to reconnect the wire, the South Africans drove on across the bridge, and pushed on to Catengue, where the roads from Benguela and Nova Lisboa intersect. It was time to take stock and find out where the enemy was.

A party was sent eastward on the Nova Lisboa road, where MPLA units were reported to be advancing towards Catengue. A South African lieutenant called Jan, blackened from many months in the *bushwelt* along the South-West African border, and with flowing hair and beard, drove in the leading Land-Rover. He drove

straight into an advancing MPLA convoy, led by officers using Mercedes-Benz and Citroën cars "borrowed" from the Portuguese.

He was saved by the fact that the MPLA took one look at him and imagined he was a Cuban. "Donde estáu los compañeros?" someone asked. Jan grunted, waved behind him down the road, and put two fingers up in the approved MPLA style. The MPLA grinned and drove by—and Jan opened up on them with a .50 Browning machine-gun.

He subsequently set up an ambush post on the road from which he was able to knock off no fewer than seven MPLA cars in succession with a 90mm. gun. They just kept coming on like moths into the flames, without any prior reconnaissance.

Three MPLA men were captured and made to strip and dig graves for the next victims of the ambush. Jan bore the nickname of "the Cuban" for the rest of the campaign.

Meanwhile, reconnaissance parties established that a major Cuban/MPLA force had dug in a few kilometres farther up the Benguela road, with 15 or 20 mortars. The mortars sowed terror among the troops when the Zulu column tried to break through on November 2. The black troops refused to face the mortars, and the column was pinned down for six hours, under a ferocious concentration of fire. The black FNLA gunners, for their part, returned the MPLA barrage by firing off their own mortars so rapidly (25 rounds a minute instead of the normal two) that their guns burned out and the barrels grew so hot that when a round was inserted, it would ignite immediately. There were many severe burns. The road was finally cleared after scouts from the Zulu force found a trail winding round the south of the enemy position. An advance group was sent to try to cut off the MPLA line of retreat but, as before, the enemy beat a hasty retreat.

Once again: luck saved the bridge for the Zulu column. Cuban engineers had run a wire back from the bridge for some 2,000 metres to the detonator. Everything was set for demolition, and the South Africans were astonished that the bridge did not go up in flames. By a fluke, one of their mortar rounds had cut the wire.

At the Catengue battlefield, the South Africans picked up another clue to the Cuban presence: an intelligence map marked in Spanish. They captured seven prisoners, who told them that there was a large camp outside Benguela with some 350 Cubans.

After Catengue, the MPLA and their Cuban friends bolted north, leaving neatly-dug trenches and even big ammunition dumps in their wake.

Just south of Benguela, the column found another camp, which turned out to have been the main Cuban base in the area.

The Zulu force was now ready for the assault on Benguela. It numbered about 150 white South Africans with their Panhards, together with the loyal Bushmen and the FNLA battalion, reduced to some 450 blacks and 80 white Portuguese. The attack began on November 4, just a week before independence day, and the airfield to the south-east of the town was seized without resistance.

But now something happened that the South Africans had feared all along: the MPLA and the Cubans pulled their forces back into the city itself. Simultaneously, they opened up a murderous barrage with half-a-dozen single-tube 122mm. launchers, dug in on the other side of Benguela, as well as intensive small-arms fire from the native huts on the outskirts of the town. The column was pinned down at the airport for 26 hours.

For the first time during his almost uninterrupted advance, "Rommel" was faced with a dilemma. His mortars had a maximum range of only about five kilometres, while the enemy batteries were at least 7–8km. away, and the Soviet-made 122s had a range of up to 14km. He could not risk firing into the town, nor could he advance with his armoured cars and allow the enemy to snipe at them from close range. Meanwhile, the deafening thud of the enemy rockets was terrifying his men.

From his command post in the airport control tower "Rommel" finally hit on a solution. He sent his mortars round the eastern outskirts of the town, gambling on getting them within striking distance of the enemy positions before the Cuban range-finders could get a fix on them.

He succeeded because the enemy imagined that he had: when the South African mortars opened up, they were still several hundred metres too far away from their targets. However, the enemy commander must have concluded that the South Africans were merely ranging in, because the Cubans and their rocket launchers pulled out immediately. The mortar companies inside Benguela followed suit.

The battle for Benguela had offered a warning: good soldiering could not always make up for the disadvantage of being outgunned, least of all in a war where the black troops on both sides showed a marked preference for fighting as far away as possible from the enemy lines. "Rommel" radioed back to Rundu with an urgent request for field artillery to match the MPLA's longer-range weapons.

On November 7 the Zulu force drove on to Lobito. The population was largely pro-UNITA, and the Cubans and the MPLA pulled out without fighting. After Lobito had been seized by the pro-Soviet forces, UNITA had been able to keep in close contact with its cadres inside the town by telephone; no steps had been taken to cut off the most obvious form of communication.

The Zulu force stayed at Lobito until independence day. "Rommel" expected to be recalled on November 11, in accordance with his original orders. But the orders were changed. Bloodier fighting lay ahead.

---

[From the Sunday Telegraph, Feb. 13, 1977]

BATTLE OF DEATH ROAD

(By Robert Moss)

The last representative of the Portuguese empire in Africa, Admiral Leonel Cardoso, the High Commissioner of Angola, decided not to stay for the country's independence celebrations on November 11, 1975. He watched the Portuguese flag being lowered over the 16th-century fort of São Miguel in Luanda, declared that "Portugal is departing without a feeling of guilt or shame"—and scuttled to the safety of the frigate riding at anchor in the harbour.

Five centuries of colonial rule ended as MPLA troops swarmed into the admiral's palace. Portugal, he said, had handed over power to "the six million Angolan people."

While the Marxists in Luanda hailed Agostinho Neto as Angola's first black president, the supporters of the two anti-Soviet movements, UNITA and the FNLA, danced in the streets of Nova Lisboa (renamed Huambo) and Ambriz. The MPLA was quickly able to boast the diplomatic recognition of the Soviet bloc, the Marxist African States and capitalist Brazil. Meanwhile UNITA and FNLA proclaimed their own State, the "People's Democratic Republic," and claimed that they controlled 11 of Angola's 16 provinces.

With the South African column code-named Zulu waiting at Lobito for its marching orders and with FNLA forces threatening Luanda from positions less than 19 miles to its north, the anti-Communist forces enjoyed clear military superiority. But their advantage was rapidly eroded after November 11 by the continued build-up of Cuban combat forces and Soviet weaponry, and the failure of the Western Powers to respond to it.

One glittering opportunity had been lost on the very eve of independence, in a savage battle for the capital. While South Africa's "Rommel," the colonel commanding, Operation Zulu, was striking north to Benguela and Lobito, the FNLA was pushing south in a desperate attempt to seize Luanda before independence day. The FNLA had been driven out of the capital in July, when the MPLA launched a surprise attack, in which Portuguese pilots—flying civilian planes of the Portuguese Angolan airline, TAA'G—had flown reconnaissance missions. But by early November, the Marxists' position in Luanda was no longer secure.

Fighting around Dondo to the south, where the hydro-electric plant that supplied the capital's electricity is located, resulted in blackouts. Luanda's water supply was also cut off for days. Further, the anti-Soviet forces had managed to isolate the capital from its food supplies; the richest farming lands were securely in UNITA hands. There seemed to be a chance that the defenders of Luanda could be starved into submission.

Meanwhile by November 6 a column of some 800 black FNLA troops reinforced by 130 white Portuguese led by Colonel Gilberto Santos e Castro and Major Cardoso—a brilliant irregular fighter and a former officer of Salazar's secret police, the PIDE—and three Zairean battallions led by a Zairean colonel had advanced as far as Caxito, a strategic crossroads 31 miles north of Luanda. Holden Roberto, the mulatto leader of the FNLA, his eyes permanently masked by dark glasses, had taken personal charge of the column and was poised for an assault on Luanda. It was timed for November 10, the eve of independence.

But from the start of the attack things went wrong. The FNLA columnn had advanced to the area of the Bengo river, and was supposed to strike across the bridge over it at first light on November 10. But the orders got garbled, officers overslept, and the attack did not start until 7:45 a.m.

It was the direction of the attack rather than its timing that doomed it from the start. Facing Holden Roberto's men, on the other side of the Bengo river, was a force of some 800 Cubans. The MPLA soldiers with them were commanded by Cubans right down to section level.

The Cubans were well-armed. They had jeep-mounted rocket-launchers, heavy mortars, the huge 40-barrelled "Stalin organs" that terrified black troops, and plenty of machine-guns and anti-tank guns. They had dug themselves in on hilltops at Quifangondo with their guns commanding the only road to Luanda from the north, now bordered by swamp because of the rainy season.

When the Portuguese commanders suggested that the main offensive down the exposed road should be supported by flanking movements on foot through the swamp, the black FNLA officers refused to send their men out, complaining that the swamp was full of crocodiles and "man-eating snakes." The South African and American advisers with FNLA were alarmed by the planned offensive, and it was suggested that Roberto should attempt a broad encircling movement from the east. But Roberto, burning with impatience to plant his flag in the capital before independence day, insisted on taking the direct route—down Death Road.

The South African brigadier who had arrived at the little port of Ambriz to act as liaison officer with Roberto's forces afterwards complained of another reason for failure. In the days before the attack on Luanda, the C.I.A. had organized an emergency airlift of weapons for the FNLA. Mortars and light infantry weapons were flown into Zaire in big C–141 transports and ferried on to Ambriz by Zairean air force planes and the FNLA's own Fokker Friendships, expropriated from the old civilian airline.

The weapons included 10 new 120mm. mortars and some 106mm. recoilless guns. But according to the South African brigadier, the weapons arrived without handling instructions or sighting equipment. There was no time to prepare the FNLA or Santos e Castro's Portuguese to use them.

This account is disputed by American sources, who claim that there was no failure on the side of the suppliers and that there must have been a mixup on the ground. This, in turn, might well have been related to the political climate in Washington. Because of the legal requirements that had been imposed on the CIA to report its operations to Congress the officers assigned to liaise with Holden Roberto were pulled in and out of Angola like yoyos. Although the Americans were the principal armourers for the FNLA (which had, however, benefited from many other sources, including China, which had earlier provided several hundred instructors to train FNLA troops at Kinkuzu in Zaire) they failed to provide continuous or effective tactical advice and logistical supervision on the ground.

American instructors for the 120mm. mortars and the 106mm. recoilless guns turned up in the end—after the battle for Luanda had been fought and lost. Even when they did turn up, they came without the range tables for the guns.

FNLA TROOPS BOGGED DOWN IN MARSHES

So the column that rolled forward at breakfast-time on November 10 was in no way matched to the enemy in waiting. While the Cubans were bristling with brand-new Soviet hardware, all that the FNLA could boast were second-hand rejects from its Western (primarily American) sources, together with odds and ends picked up from black market arms dealers. Holden Roberto had only one gun that was capable of ranging in on the Cuban positions, a 130mm Korean artillery piece. His men carried sidearms of almost every conceivable origin, including Russian-made weapons (mostly supplied by Rumania in August, 1974). Their only armoured vehicles were a few old Panhards manned by Portuguese whites.

The outcome of the battle on Death Road was a foregone conclusion. The Cubans sent up a tremendous barrage of rocket and artillery fire as Roberto's troops approached the Bengo river bridge. Then some of the Cubans drove forward in jeeps from which they fired off Soviet-built rockets at the exposed FNLA troops, by now bogged down in the marshes. Most of Roberto's Panhards were knocked out within an hour. The FNLA abandoned the field within three hours. Five of the Portuguese whites had been killed; black casualties may have run into hundreds.

Some of those present still feel very bitter. Colonel Santos e Castro and the South African brigadier maintain that Luanda would have fallen to the FNLA if the Americans—or other Western sources—had supplied a bit more hardware, and the know-how to put it into the field.

If the South Africans had been able to dispatch a second Zulu column to northern Angola, they could easily have forced their way through to Luanda. Indeed, the Foxbat column could have penetrated the natural defences of Luanda from the south before November 11 by swooping across the Cuanza river—if it had been given the order to do so. But how would it look to the world if pink-faced young Afrikaners were photographed driving into a black African capital in their armoured cars?

It was the desire not to get too far out on a limb that had led to the initial decision in Pretoria that South African troops in Angola would be withdrawn immediately after independence day, November 11. The decision was reversed. One reason has been kept deeply secret until now.

Jonas Savimbi, the UNITA leader, flew to Pretoria on November 10. He met Mr. Vorster, South Africa's Prime Minister, and implored him to keep his troops in Angola at least until the summit meeting of the Organisation of African Unity (OAU), then due to convene in Addis Ababa on December 9. He told Mr. Vorster that moderate black African leaders—including Zambia's Kenneth Kaunda, who was regularly meeting Savimbi—were deeply concerned that the anti-Soviet forces should sustain their position in the field until a vote on Angola could be taken by the OAU.

The other former Portuguese colonies, all under Marxist control, were about to recognise the MPLA Government in Luanda, together with the rest of Russia's friends in Africa: Guinea-Conakry, Somalia, Algeria, Congo-Brazzaville, Mali, and Mauritius. But most of black Africa was sympathetic to the MPLA's rivals, especially UNITA, despite Russian diplomatic pressure.

AMIN'S RAGE AT SOVIET AMBASSADOR

One target for the Soviet diplomatic offensive was the unpredictable Idi Amin, that year's chairman of the OAU. The Russians had given him a squadron of Mig-21 jet fighters, but the hamfisted Soviet ambassador in Kampala, Alexei Zakharov, pushed Amin too hard for support in recognising the MPLA. Amin exploded, accusing the Soviet ambassador of acting "as if he were vice-president of Uganda," and Zakharov was hastily recalled. The Russians followed up by withdrawing all their embassy, military and technical personnel. Although this finally induced Amin to make a mollifying statement, he remained neutral for the time being on Angola's civil war.

So the point that Jonas Savimbi had to make in Pretoria was a highly pertinent one. He told Mr. Vorster, in effect, that if South Africa could ensure that the anti-Soviet forces could at least hold their own in the major towns outside Luanda, it might be possible to get a majority vote at the OAU in favour of a tripartite settlement in Angola. Similar pleas were reaching Pretoria from other sources.

The South Africans were later begged by the Zaireans and the FNLA, for example, to lend air support to a renewed assault on Luanda from the north. The discreet liaison maintained by the Bureau for State Security (BOSS) with black African leaders was producing similar appeals for the South Africans to hang on in Angola. The same request was coming from senior American officials, although Dr. Kissinger—who was a hawk on Angola but was extremely nervous of Press and Congressional efforts to expose American connections with South Africa—had taken steps to isolate himself from direct contacts with the South Africans.

Secrecy was still all-important, both to the South Africans (who had maintained a total blackout at home on Press reports of their involvement) and to the Governments and black nationalist leaders who now depended on them but could not afford to admit it. At Silva Porto, which had begun to be visited by journalists invited by UNITA, as well as by a wide range of African delegates, secrecy was an obsession from the start.

But the South Africans assigned to UNITA were more worried about running into SWAPO guerrillas than reporters. SWAPO (South-West Africa People's Organization) is one of South Africa's deadliest enemies. It had also collaborated with UNITA over a long period, and had used UNITA-controlled areas of Angola as bases for its raids into South-West Africa. Now, without SWAPO's knowledge, UNITA had called in the South Africans as its allies. The South African advisors had spent years of their lives fighting the SWAPO guerrillas and had no wish to meet them socially on neutral ground—where they might easily find themselves greatly outnumbered.

There was a narrow escape just before Savimbi's secret visit to Pretoria, when the South African advisers in Silva Porto were asked to leave town in haste in order to avoid being spotted by a big OAU delegation that was due in. The UNITA commander said he would send for them as soon as the OAU dignitaries left. But after a couple of days no message had arrived.

Commandant Kaas, itching to get back to the war, decided to drive back to town. He arrived at the UNITA headquarters at six o'clock, and ordered a bleary guard to send for the commander at once. He turned up, badly hung-over and wide-eyed with alarm. "Don't you know they haven't left?" he hissed. Fortunately, the OAU delegates were all sleeping off the last night's revels in the former monastery used as a UNITA guest-house—which gave Commandant Kaas plenty of time to beat an orderly retreat back into the bush.

Sketchy Press reports about the South African presence had begun to appear, but they were sufficiently vague to be ignored. No journalist had been anywhere near the zones where the South Africans were fighting. But when the Cubans managed to take some South Africans prisoner, their presence could no longer be shrugged off—and the Communists, lobbying for black African support, made full propaganda use of their captives, the undeniable proof that the "racists" had "invaded" Angola.

Both the military and the political war escalated after November 11. On independence day, "Rommel" received orders to push further north from Lobito. His new orders were to advance to Novo Redondo and other towns around the line of the Queve river—Porto Amboim, Gabela, Quibala.

REINFORCEMENTS FOR "ROMMEL"

The South Africans suffered their first heavy casualties (heavy, that is, in relation to the tiny size of the Zulu column) on November 12, when Cuban gunners dug in six miles south of Novo Redondo dropped a mortar bomb in the midst of the column as it was crossing an exposed stretch of muddy road between flooded marshes. Eighteen South Africans were wounded, and the fact that only one died was due solely to the speed with which they were got to an airstrip under cover of darkness and whisked back to a field hospital at Rundu.

But "Rommel" was about to receive vital reinforcements; a battery of 25-pounders was dropped at Benguela the same day, and the guns were brought forward overnight and placed in new positions. The surprise factor was enough to win the battle. The Cuban gunners on the other side started firing their rockets into the positions the South Africans had occupied the previous day when "Rommel's" guns opened up at first light. Then they withdrew, unable to blow the bridge behind them because the flooded river had risen so high that they were unable to fix explosives to the pylons.

Novo Redondo was occupied on November 14. Here the Zulu column halted, although units were sent out to link up with the Foxbat column farther east, in the area of Santa Comba. "Rommel" sent out patrols to reconnoitre the roads farther north, and found that the Cubans and MPLA had blown all the bridges over the Queve river and set up formidable defences on the other side.

The road to Porto Amboim looked like another Death Road. It was impossible to get within four-and-a-half miles of the town cross-country because of the flooded swamps. For the same reason, it was impossible to get off the road. The road to Gabela looked easier,

but scouts reported that the positions on the other side were "all manned by whites." The prospect of trying to rebuild a bridge under intensive fire from the Cubans' "Stalin organs" was not exactly appetising.

"Rommel" radioed back to Rundu requesting that a paratroop company should be dropped behind the enemy positions at Gabela. His request was refused. Frustrated by his relative lack of firepower and the lack of any means to get across the Queve river he then asked for permission to pull back to Lobito. He was told to wait. At last he was told to move east and establish a new headquarters near Cela in an area where the Foxbat column had run into formidable opposition.

"Rommel" was recalled on November 26. He could console himself for the disappointment at the Queve river with the thought that, during the 33 days the Zulu column was on the move, it covered 1,974 miles—an average of some 60 miles a day.

The bloodiest battles of the war remained to be fought. On the central front, near Quibala, the Cubans were massing. The South Africans were compelled to move in 140mm guns and to form yet another battle group, code-name "Orange."

CUBANS HURLED INTO COMBAT

It was in no-man's land north of Santa Comba that the celebrated "Battle of Bridge 14" took place. It raged for three days, from December 9 to December 12, and an entire battalion of Cuban troops were hurled into the combat. By the end of the battle, four South Africans and an estimated 200 Cubans had been killed on the eastern front, where the South Africans had responded to a UNITA request to help them to recapture Luso and to clear the Benguela railway right up to the Zambian border. Savimbi's calculation was that if UNITA could establish its control over the whole length of the railway line it would guarantee the permanent support of land-locked Zambia by offering it a secure outlet to the sea for its copper and other exports.

By this stage there was, of course, no secret about the extent of Kaunda's commitment to UNITA. Like other visitors to UNITA who travelled via Lusaka, I had found myself received by Jorge Sangumba, UNITA's ubiquitious Foreign Minister, on the airport tarmac at the end of October, whisked through immigration and customs formalities, and subsequently put on to savimbi's personal Learjet (flown by Lonrho pilots) at the Zambian mining company's airstrip for the flight to Silva Porto.

But Savimbi's accurate calculation was that the mood could easily change, and that control of the railway would ensure that UNITA'S most vital black African friend would stay friendly.

As it turned out, UNITA never gained control of the entire railway. Luso, which had changed hands several times in the course of the fighting, was taken by a column, code-named "X-Ray," on December 11. This column had been stiffened by another two troops of South African armoured cars, but the advance farther east was halted about 12½ miles short of Teixeira da Sousa, up against the Zambian border. The problem, once again, was the state of the bridge. A very large bridge had been blown, and South African engineers estimated that it could take up to three months to repair. Savimbi was told that at that stage it was not worth taking.

Before December 9, the day the OAU was supposed to meet, the Cubans had a stroke of luck which they were to turn into a major psychological warfare victory: they captured four South African mechanics who had been sent forward to repair a vehicle north of Cela and accidentally drove on too far into enemy-held territory. They were subsequently displayed in Luanda. The attention of the world media was now rivetted on the the South Africans. The Cubans did not admit their own involvement in Angola until December 22.

The South Africans were by now intensely worried about the danger of fighting a lone battle against Communism in Angola. The heavy weapons that they had expected the Americans to supply were not arriving. The power of the U.S. Congress—and notably, of the House of Representatives Committee on Intelligence—to demand and get information on CIA operations had led to the disclosure, and subsequent leakage to the Press, of five separate programmes, all of which had to be at least partially abandoned. And now South African prisoners were being posed for the cameramen in Luanda.

A secret war had become embarrassingly public, and there were now strong pressures within the Government for an immediate withdrawal. The date had already been fixed: it was to coincide with the OAU summit. But the OAU meeting was suddenly set back; it would now take place on December 18. Should the South Africans wait? The question became acute after December 18. On the last day that Congress met before the Christmas recess, the Senate voted to cut off all further covert assistance to UNITA and the FNLA.

The vote followed the revelation through Congressional hearings of the full extent of covert support for the anti-Soviet movements in Angola, including details of the airlift of light infantry weapons and rocket launchers to Zaire, and the provision of five Zaire-based spotter planes piloted by Americans. After the Senate Foreign Relations Committee voted 7–0 against military aid to any faction in Angola, an extraordinary coalition of liberals and conservatives voted in the Senate to impose a total ban.

The ghost of Vietnam was stalking Capitol Hill. The distrust of Government secrecy and the fear of embroilment in a potential Third World quagmire now ran so deep that even some of the Senate's most notable hawks voted for the ban.

The news came to Pretoria as damning evidence of South Africa's growing isolation in the struggle to determine Angola's future. The mood of doubt deepened as news came in of heavy casualties around Quibala—and of a further postponement of the OAU meeting until January 9.

DEMANDS OF DIPLOMACY

Some frenzied backroom diplomacy took place, involving numerous trips back and forth between black African capitals—notably Lusaka—and Pretoria. There were renewed pleas for South Africa to hold the ring for a bit longer. But Kaunda expressed his concern, on New Year's eve, that the South Africans should leave before the OAU meeting opened or, at the latest, before it wound up. The British and French Governments both expressed concern that the South Africans should withdraw before the UN Security Council meeting scheduled for early January. While it was understood that the military position of the anti-Soviet forces in Angola could rapidly become untenable if the South Africans left, the Governments that had been discreetly sympathetic were now alarmed by the political and diplomatic situation.

South Africa's ambassador to the UN, Mr. Pik Botha, darted home for urgent consultations, and met with the Prime Minister and defence chiefs at Oubosstrand at the end of December. It may have been at this meeting that the decision on the final withdrawal was taken.

The stage was set for the final dénouement. On the eve of the OAU's weekend summit in Addis Ababa, the MPLA paraded another three South African prisoners for the benefit of the world media. (The MPLA is still holding all seven South African captives.) The only thing that the black African leaders who assembled in Addis Ababa were able to agree on was a blanket condemnation of South Africa.

But the depth of black African distrust for the Angolan Marxists and their friends was made plain by the fact that, instead of voting overwhelmingly for a pro-MPLA resolution, the conference split right down the middle. A total of 22 States supported a document drawn up by Senegal's President Senghor, calling for a "government of national reconciliation" in Angola. The same number supported an alternative text produced by Nigeria's Brigadier Murtala Muhammed, which called on the OAU to recognise the MPLA as the legitimate Government of Angola.

This was the end of the road for the South Africans. To have stayed on in Angola would have required a new injection of men and material, with no assurance of adequate backing from any major power, but with the certainty that a continued South African presence would be used by the Marxist lobby in the OAU in the bid to get a new vote that would commit the organisation to the MPLA, and in accelerated efforts to isolate South Africa within international bodies like the U.N.

Their losses had been remarkably light—33 South Africans killed, as against an estimated 2,000-plus Cubans.

The withdrawal of South African forces came on January 22. They pulled back to a line just north of the Cunene river. It is significant, in view of the Cubans' propaganda claims of heroic victories in Angola, that it took them more than two months to occupy the vacuum left behind by the departing South Africans.

UNITA forces held on to the Salazar bridge, over the the south-eastern bend in the Cuanza river, for weeks after the South Africans had gone. When the Cubans finally came inching south, Soviet-made spotter planes were sent ahead to check for any signs of remaining South African forces. The Cubans and the MPLA did not finally reach the border with South-West Africa until April 1, 1976, a week after the South Africans withdrew from their last remaining positions defending the Cunene hydroelectric scheme.

Mr. Vorster said at the time the withdrawal began that the fact "that an acceptable government of unity has not been established in Angola is not the Republic of South Africa's fault. The Republic was not prepared to sacrifice its last man in a war on behalf of the Free World." I cannot quarrel with that statement.

South Africa was fighting many other people's battles in Angola. The background will probably never be fully explained by the South Africans themselves for fear of destroving their remaining hopes of détente with black Africa.

Their refusal to go it alone was influenced by other factors. The most crucial was the possibility that the Communists might escalate the war by putting MiG fighters into the air. French intelligence sources (who maintained an excellent listening-post in Brazzaville throughout the war) reported that 12 MiG–21 fighters were uncrated in Pointe Noire in October, 1975, and assembled by Cuban technicians. American aerial surveillance subsequently established that these planes and a further 10 MiG–17s, were brought to airfields inside Angola in December. Big aircraft fuel dumps were established at the eastern diamond mining town of Henrique de Carvalho, which remained in MPLA hands throughout the war.

These planes were not used during the course of the South African campaign, nor (to the best of my knowledge) was there ever a direct threat from the Russians to

intervene if the South Africans pushed farther north, or refused to depart. But the presence of the Migs was a silent threat.

Their deployment would have presented the South Africans with the choice of committing their own Mirage fighters to an aerial battle over Angola—which might in turn have produced a further Communist escalation—or of watching superior hardware win the war for the Cubans. Even without planes, the Cubans (whose strength was up to 15,000 by mid-January) were exploiting their colossal superiority in armaments. No one intervened to stop the shipment of arms and men to Luanda during the campaign.

If there had ever been hopes that the Americans might attempt a blockade, they collapsed after the Senate vote on December 18. Meanwhile, the Soviet navy showed the flag by shadowing East European merchantmen en route to Angola.

Then there was the manpower problem. There were never more than about 2,000 South Africans in Angola, as against almost 10 times as many Cubans by the end of the campaign. The troops South Africa deployed in Angola were the national servicemen who could be spared after security requirements in South-West Africa had been fulfilled, led by professional officers and N.C.O.s.

To increase the South African presence, it would have been necessary to mobilise citizen forces, and that would have meant going to Parliament, with consequent publicity.

MARKED LACK OF SOLIDARITY

Iko Carreira, the MPLA Defense Minister whose special contacts with Moscow were discussed in the first article, remarked in an interview in May last year that the victory for his movement in Angola was "in no way extraordinary, since proletarian internationalism exists." He was saying in effect that there will be more Angolas.

One thing the West did not take into account, he added, was "the militant solidarity of our friends, and in particular the Cubans." Sadly, the West showed precious little solidarity when it came to the crunch, let alone "militant" solidarity. How much confidence can African or Third World countries that are also targets for Soviet aggression feel after Angola—especially now that Mr. Carter's newly-appointed Ambassador to the U.N., Mr. Andy Young, has said that he does not view Communism as a danger in Africa, and that the Cubans are a force for stability in Angola? Angola's shadow may prove to be as long as Vietnam's.

[From the Pretoria News, Aug. 2, 1977]

INVASION!

(By Robert Moss)

It was the day "Rommel" and his column crossed the Angolan border at Cuangar. The column consisted only of civilian vehicles—lorries, vegetable trucks, private cars and a few Land-Rovers.

The first target was the southern town of Pereira D'Eca, which had already changed hands several times. The column ran into light resistance from MPLA ambush parties using RPG–7 anti-tank rockets along the road (and also from Unita foragers who had not yet been notified of Operation Zulu) but when it got to the town, most of the defenders fled into the bush.

This was to become the pattern throughout much of the campaign. MPLA soldiers took to wearing civilian clothes under their uniforms so that, once driven out of their positions, they could drop their rifles, whip off their military gear, and emerge into the civilian population.

The column occupied Pereira D'Eca so quickly that MPLA troops on the outskirts were not immediately aware that the town had changed owners. Commandant Businha was having a celebratory drink in the local bar when two MPLA soldiers came in. He whirled around, took one look at them, and gave the MPLA salute (two fingers up), when they responded, he fired from the hip with his FN, killing both.

The condition of Pereira D'Eca gave a glimpse of what the South Africans were to find in the bigger towns, gutted by a black civil war. Most of the buildings had been sacked, the shops looted down to the floorboards. Local Unita forces were brought in to restore basic services.

It was left to Captain Garibaldi and his liberators to clear Sa Da Bandeira. It took them about a week—albeit a very sociable week with the wine flowing freely at impromptu parties of Portuguese in the streets.

The South Africans offered the local radio station to the Unita/FNLA causes, but they were not organised, so Garibaldi walked up and began issuing declarations that the town had been freed by the Portuguese Liberation Army.

Some of these broadcasts gave rise to a report in the foreign Press that the ELP was leading the march to the north.

Joined by another troop of Panhard armoured cars and another half platoon of 81 mm mortars, the South Africans' next target was the major southern port of Mocamedes.

On the way the column came under fire from 122 mm single-tube rocket-launchers, an ideal weapon for ambush, very light, easy to handle, and capable of being fired from an ordinary car.

It was in the skirmishes outside Mocamedes that the column also saw RPG–7 rockets used as a means of psychological warfare. These rockets have a range of about 960 m and a self-destruct fuse fired high, they would explode in mid-air with a big bang and with a big cloud of dense black smoke—totally harmless, since they do not produce shrapnel, but most demoralising to the black soldier, who could not be persuaded that no harm would come.

The gun battle outside Mocamedes might have gone badly for the Zulu column if the enemy had brought heavy mortars into play. But the column managed to fight its way through, capturing a new Russian-made 82 mm recoilless gun, and occupy the harbour of Mocamedes the same evening (October 27). There was an interesting variety of ships bobbing at anchor, including a Portuguese Navy corvette, and Portuguese, Greek and Italian merchant vessels. The South Africans believed these ships had been bringing arms—and probably Cuban troops as well—to Mocamedes, and were now being loaded up for mass evacuation. They also knew that Nord-Atlas aircraft allegedly owned by Frelimo in Mozambique, had been flying troops and equipment out of Mocamedes in advance of the Zulu offensive.

As the sun set over the harbour roads a red Fiat coupé with a white flag fluttering from its bonnet drove out of the town toward "Rommel's" improvised command post. It had two occupants: The Portuguese captain in command of the 150 paratroops in the town, and a naval officer from the corvette. They requested that the ships in the harbour should be allowed to leave on the grounds that they were evacuating refugees. The captain also insisted that his paratroopers wanted to have nothing to do with the war. "My role here is to guard the lives and property of the refugees," he said.

It was later discovered that he was not telling the whole truth. Unknown to the Zulu force, the communications centre at Silva Porto had already picked up an urgent radio signal from the Portuguese command in Mocamedes to Luanda, requesting that the MPLA reinforcements should be sent at once. It was also confirmed later that at the time Zulu arrived, a Soviet vessel had been waiting outside the harbour, bearing more arms and ammunition.

Although he could see barges laden with MPLA men plying back and forth between the harbour and the ships at anchor, "Rommel" decided to grant the vessels permission to leave. He also told the navy officer that if the corvette had not left by dawn, it would be blown out of the water—pure bluff, since the South Africans had no means of blowing it up. But the Zulu column had nothing to match the corvette's guns, and both "Rommel" and Commandant Businha were well aware that had it remained in the harbour during the battle for the town, their forces could have been cut to pieces. The Portuguese paratroops were ordered to stay in their barracks.

By first light on October 28th the corvette had gone. Although there had been intensive fire the previous night, when MPLA and Cuban forces occupied the ridge outside the town and kept up an intensive and accurate fire with 122 mm rockets, there was little resistance inside the town itself.

Advance units reached the airport (south of the city) too late to prevent the take-off of a Nord-Atlas carrying MPLA leaders, Cuban advisers and some heavy weapons. Although no Cubans were actually sighted during the fighting around Mocamedes, the precision firing was the clue to their presence. At earlier skirmishes back along the road MPLA gunners had been missing with 82 mm recoilless guns fired at close range.

In the clear light of day, Mocamedes harbour could be seen to be a pitiful state. The dockside was littered with suitcases, trunks and packing-cases that Portuguese refugees had been forced to leave behind—and with rapidly rusting cars. Crates destined for Zaire or Zambia, landed by ships diverted from overcrowded ports further north were heaped in pyramids.

Looking out over the Atlantic one of "Rommel's" lieutenants had a bright idea. "Let's bring the Bushmen down here to see the ocean," he suggested, "they have never seen it before." So the Bushmen were duly marched down to the waterside, but they were not impressed. Perhaps they thought this was just another dam. No one wanted to bathe in the salt water.

After local Unita forces were established in control of Mocamedes, the column turned back to Sa da Bandeira to regroup for the main assault on the north. There were reports that the MPLA was probing south from its positions at Benguela and Lobito—a primary objective for the South African operations was the country's second port and its most important railhead.

The rainy season was beginning, flooding rivers and turning the lowland areas further north into swamp. From now on, the campaign was to centre on bridges and river crossings. Control of all-weather roads became the key to victory or defeat.

On the road from Sa da Bandeira to Benguela, the Zulu column ran into a series of extremely well prepared MPLA positions. The influence of the Cubans—who showed themselves in the war to be well-trained in preparing and holding static positions, although inept fighters when things failed to go according to plan—was now obvious at every stage along the way.

The first major clash on the road to Benguela took place at Caporolo at the end of October. Here the Cubans and MPLA had set up their guns on a hill overlooking a bridge. "Rommel" sent his Bushmen westward along the river to look for a ford they could cross in order to take the enemy by surprise from behind. The Bushmen went too far, missing the ford. In the meantime, one of the Panhards nosed too far forward along the main road, disclosing the column's position.

To the South Africans' astonishment, the

enemy forces simply picked up their equipment and ran—but not before trying to blow up the bridge.

The explosive charges had all been set, but the last man who had checked the circuit on the detonator had forgotten to reconnect the wire. The South Africans drove on across the bridge, and pushed on to Catengue, where the roads from Benguela and Nova Lisboa intersect. It was time to take stock and find out where the enemy was.

---

[From the Sunday Telegraph, Feb. 20, 1977]

MOSCOW'S NEXT TARGET IN AFRICA

Can the West learn from Angola's tragedy, or are we condemned to relive the experience? What the Russians learned from Angola is that war by proxy pays off. They will be strongly tempted to use the same technique in other places—and almost certainly in the assault on Rhodesia and South-West Africa.

The Cubans are Moscow's all-purpose mercenaries, but they are not the only proxy soldiers who are being deployed in the widening war for southern Africa.

The Nigerians are said to be heavily involved in Angola. Western intelligence sources report that Nigerian troops were present at battalion strength when the MPLA and the Cubans pushed south last year. According to UNITA sources in Paris, the Nigerian strength has since been reinforced.

UNITA sources claim to have tapes of radio intercepts showing that at least 5,000 Nigerian troops have been deployed in Angola. They are operating as far south as Mocamedes, and are also based in Lobito, Luanda and the eastern diamond mining town of Henrique de Carvalho. UNITA claims to have intercepted radio communications in English (the common language between the Nigerians, the Cubans and the MPLA), in the Ibo, Hausa and Yoruba dialects, and in a form of pidgin Creole that could indicate the presence of forces from Sierra Leone as well.

An intriguing sidelight is that UNITA also claims that a British shipping line played a key role in ferrying Nigerian troops and military supplies to Angola. Nigeria, rich in oil and boasting an army of some 210,000 men, can clearly afford to be more than rhetorical in its backing for the guerrilla movements of southern Africa.

The Tanzanians have also moved into the region. President Nyerere has put 1,400 of his troops into northern Mozambique to help the FRELIMO Government to suppress the major revolt of the Makonde tribes led by Lazaro Kavandame. Mozambique's army is largely recruited from the warlike Makonde.

Yet another African army is reported to have sent units south: Somali troops are said to be quietly moving into Mozambique. Rhodesian guerrillas in Maputo have bragged to Portuguese correspondents that Somali tanks will be used in future operations against Ian Smith's forces. The story may not be as bizarre as it sounds. Somalia, like Cuba, is a Soviet satellite whose armed forces and intelligence services operate under the direct supervision of Russian officers. Although the Somali army is small (some 25,000 men), it is well-endowed with Soviet armour and has performed well in border skirmishes with the Ethiopians. The Somalis have 200 Soviet-made T–34 tanks and about 50 T–54s.

The black expeditionary forces' task may be to free the Cubans for a future offensive against Rhodesia, South-West Africa—or Zaire, which is also a prime target for the Russians. But the Cubans in Angola still have their hands full in coping with the continuing guerilla war, and the total number there has probably been increased since the end of the South African campaign; some estimates range as high as 22,000.

There are more than 1,000 Cuban advisers and "technicians" in Mozambique, nominally assigned to the Senna sugar plantations or to the port of Beira. Many are believed to be military instructors for the ZIPA guerrillas from Rhodesia and the FRELIMO forces.

In Somalia, at least 600 Cuban instructors are attached to the Somali army and the pro-Somali guerrillas from Djibouti—the French-controlled port on the Red Sea that is expected to become independent later this year. The Cubans are also active in Equatorial Guinea, where President Macias has established one of the bloodiest dictatorships in black Africa. Some 200 Cuban instructors train his paramilitary forces and his personal bodyguard. There are another 300 Cuban advisers in Sékou Touré's Guinea.

In Sierra Leone, Cubans are training an internal security unit, and the Cuban "technicians" have also been sent to the strategically-placed former Portuguese possessions in West Africa: Guine-Bissau, the Cape Verde Islands, and Sao Tome e Principe.

The Cubans are particularly well-entrenched in Congo-Brazzaville, the main staging-point in their invasion of Angola. They maintain at least 400 men at the Pointe Noire docks and the Maya Maya air base, and there are reports that reinforcements have recently been moved in from Angola in preparation for an attempt to put renewed pressure on Zaire's President Mobutu, whose supply routes to the Atlantic are now endangered. In Tanzania there are at least 150 advisers and "technicians," some of them attached to the Tanzanian People's Defence Force.

All in all, it is not a bad effort for a Caribbean sugar-cane republic of eight million people. Of course, someone else is picking up the tabs. The Russians have not only been subsidising the Cuban economy to the tune of more than $1 million a day; they invested over $500 million in the Angolan campaign, and are believed to have supplied weaponry and equipment to Angola worth more than $350 million in the year since the South Africans pulled out.

But Cuba's role as a Soviet proxy is even more striking if you take account of the Cuban presence in the Caribbean (where Castro's men are training Jamaican police) and in the Middle East (where 150 Cuban instructors are training international terrorists in Iraqi camps), not to mention the Cubans' effort to take control of the non-aligned countries' news pool and the role of the Cuban intelligence service, the DGI, in orchestrating the activities of Latin American exile groups and transnational terrorists in Western Europe. Is it possible to imagine an anti-Communist country of the same size acting on the same scale today?

The strategic effect of the loss of Angola is summed up by two statements that oddly concide: one from the Soviet paper *Izvestia*, in a major article last August; the other from South Africa's Prime Minister, Mr. Vorster, in his New Year's message. *Izvestia* said that "revolutionary events have seized southern Africa—the last strong bulwark of colonialism and racism—and the speed of the spread of the flame attests to the huge supplies of 'explosive material' accumulating there." Mr. Vorster, in simple but chilling words, showed that the message had not been lost on him: "The storm has not struck yet. We are only experiencing the whirlwind that goes before it."

Were the effects of the Cuban victory foreseen by the men who sat down in the American Senate on December 17, 1975, to debate whether or not they should vote to cut off all United States support to the anti-Soviet movements in Angola? With a few honourable exceptions, it seemed that the Senators were talking about another war. Senator after Senator recalled the anguish of Vietnam, the peril of getting sucked into another quagmire, the hopelessness of trying to shape events in a far-off place of which Americans knew nothing.

CONTINUING FIGHT AGAINST MARXISTS

Hubert Humphrey caught the prevailing mood: "The United States better start taking care of things it knows how to take care of. We know so little of Africa, the 800 and some tribes that make up Africa . . . I say it is like a different world."

Senator McGovern jumped up to argue that it made no difference which of the black movements won anyway. Senator Tunney thought the rival Angolan movements were only nominally pro-Soviet or pro-American. At heart, all of them were "basically pro-Angolan, Socialist and highly nationalistic." Most of the Senators who spoke that day found it difficult to believe that the Russians would be able to establish a secure foothold in Angola, and some suggested that Angola could prove to be Russia's Vietnam.

It was not a wholly absurd idea. To this day, three anti-Soviet guerrilla movements are continuing the struggle in Angola: UNITA in the south and centre of the country, the FNLA in the north, and the secessionists of FLEC in the Cabinda enclave. Unlike Left-wing revolutionaries from other countries who fly off to university sinecures or their Swiss bank accounts after suffering defeat on their home ground, Jonas Savimbi is carrying on the battle deep inside Angola.

He has claimed that UNITA has 22,000 armed supporters, although Western intelligence sources believe that the figure is probably no more than 6,000. It is virtually impossible to get reliable information on the guerrillas' military capacities, but one index of UNITA's ability to harass the regime is the fact that no train has been able to cover the whole length of the Benguela railway—from the Zambian border to the coast—since the beginning of the war. UNITA's political base is still largely intact, and the MPLA has had little success in building up support among the Ovimbundu peoples, traditional UNITA sympathisers.

This means that it might well be possible for UNITA and the other anti-Soviet groups to inflict a serious humiliation on the Cubans and the MPLA—if they could count on effective outside support. But no Western Power is disposed to play the part of armourer and adviser to UNITA in the way that the Russians and the Chinese played it for the Vietcong.

SOUTH AFRICANS MAINTAIN CONTACTS

Now that the MPLA régime has been admitted to the United Nations, backing UNITA has become diplomatically tricky—although some Western Governments are more strait-laced than others. The French were ahead of the stampede to recognize the MPLA back in February, 1976 (much to the annoyance of their EEC partners, who had expected to be consulted) but this did not inhibit them from remaining deeply involved with UNITA and the FNLA.

Zambia's President Kaunda has come under intense pressure from his "frontline" colleagues to sever all links with UNITA, and finally had to ask Jorge Sangumba, UNITA's chief foreign spokesman, to leave his customary haunt, the Intercontinental Hotel in Lusaka. Jorge now gives his patronage to the Intercontinental Hotel in Kinshasa.

The South Africans maintain contact with the anti-Soviet movements, and there is a large colony of white Angolan refugees. But they are inhibited by their desire not to provide a pretext for a Communist-backed invasion of South-West Africa.

Ironically, if any outside power is ready

to adopt a "forward policy" in Angola, it could still prove to be China. The Chinese have backed both the FNLA and UNITA in the past. Many UNITA leaders, including Savimbi's number two, Miguel Nzau Puna, have received training in China. Puna complained to me when I last saw him about the rigours of the Chinese training schedule (which continued into the night with political indoctrination sessions). The Chinese cut off support to UNITA at the end of 1975, when hard evidence of South Africa's involvement seeped out.

But the Chinese are angry that they have lost nearly every point to the Russians in the contest for power in black Africa—despite the fact that they have spent considerably more in economic aid. So renewed contact with UNITA is a possibility, if a remote one.

With or without outside backing, UNITA's proven survival capacity worries the Russians. The Soviet ambassador in Luanda, Boris Vorobyev, is said to have been instructed to press the MPLA to do a deal with UNITA. President Neto and the Cubans are reluctant, but the biggest stumbling-block is that neither Savimbi nor any other of the top-ranking UNITA leaders has been ready to accept the idea of a deal with the MPLA—which, in current circumstances, would amount at best to a conditional surrender. KGB agents have therefore been trying to sound out UNITA representatives abroad to discover whether it is possible to create a rift between Savimbi and lower-level cadres, so far without notable success.

Angola today cannot be objectively described as an independent country. Control of its armed forces, its secret police, its economy, its civil administration and its educational system is in the hands of Russians, Cubans and East Europeans, and the MPLA itself is being remoulded into an orthodox Communist party. The Cuban garrisons are the basic guarantee that the régime will not only survive but toe the line.

The Cubans have divided Angola into six military regions, with garrisons in the major towns. Five major mopping-up operations have been launched against the anti-Communist forces since the South Africans withdrew, but despite the savagery with which the Cubans and the MPLA have dealt with the civil population large swathes of Angola are still contested zones.

The continued flight of refugees over the 1,200-mile border of South-West Africa is an eloquent comment on the way the people of southern Angola regard their new masters. Some 10,000 have been absorbed into South-West Africa.

A conservative intelligence estimate has 3,700 Cuban troops currently in the central-western region, embracing Lobito, Huambo (formerly Nova Lisboa) and Bie (formerly Silva Porto); 2,000 in each of the northern, eastern and southern regions; and 3,000 in the Cabinda enclave, where some of the fiercest fighting is taking place. There are at least 1,500 Cuban troops in Luanda.

This gives a total of about 14,000 of whom 6,000 are infantry. The Cuban forces include an armoured regiment with 120 T-54 and T-34 tanks and 1,900 men, an armoured car regiment with 70 Soviet-made BRDM vehicles and 1,600 men, an anti-aircraft battalion and five regiments equipped with multi-barrelled rocket-launchers.

The Cubans are also the key element in the new Angolan air force. They pilot all of the MPLA's Soviet-supplied planes, which include a dozen MIG-21s, 10 MIG-17s, helicopters, and Antanov-2 light transport planes. They also pilot some of the scores of light aircraft that were bequeathed by the Portuguese forces. Cubans command the air bases throughout Angola, and are supervising the construction of new air bases at Huambo, Mocamedes and Cabo Lindo and the extension of existing air fields. This could be the prelude to a Soviet attempt to use Angola as the base for a major offensive against South-West Africa.

But Cuba's involvement is not restricted to troops. The Cuban ambassador in Luanda is Oscar Oramas, one of the architects of Cuba's invasion, a senior figure in the Cuban Communist party, an old Africa hand (who was formerly ambassador in Conakry) and, most important of all, a key operative of the Cuban intelligence service, or DGI, a satellite of the KGB directly supervised by a KGB general and his Soviet staff. The new Angolan intelligence service, the DISA, is directly controlled by the DGI.

CUBANS TRAINING UNION LEADERS

Similarly, Cuban advisers have assumed key positions throughout the civil service, and notably in the Interior Ministry, the Education Ministry, and in the supervision of the MPLA's programme of "political mobilisation," which is supposed to drum up support for a "mass Marxist-Leninist party." The Cubans are training Angolan trade union leaders, and the syllabus on offer at the Lazaro Pena trade union college in Marianao includes Marxist philosophy and Cuban history. The Cubans are strongly represented on President Neto's staff, and he is said to have entrusted his personal security to them. They share control of the Finance Ministry and the Bank of Angola with the Russians. The recent measures to establish a new Angolan currency, the kwanza, set an example to any other Government that might wish to wipe out its middle class at a stroke. Angolan families are allowed (on a one-for-one basis) to exchange the old Portuguese Angolan escudos for kwanzas, but only up to the limit of 20,000 kwanzas. Anyone who has more than that stashed away has to accept that his savings have been turned into worthless paper.

Last July, Angola became the first African country to join the Soviet-controlled Council of Mutual Economic Assistance (CEMA). Since Neto's visit to Moscow in October, the trickle of East European technicians, agricultural scientists and managers has become a flood.

Between them, the Cubans and the Russians now decide who can enter and leave Angola, what civil liberties (if any) individuals and organisations will be allowed, what the country will export and import, and how much money will be printed. On the coffee plantations, Cuban supervisors are said to operate a system of forced labour: workers are shifted from one place to another, or from one job to another, without notice or appeal.

These are examples of what "satellisation" means. But foreign troops and advisers can be shown the door.

The Russians remember what happened in Egypt in 1972, when Sadat turned against them, just as the Cubans remember the eviction of their mission from Brazzaville in 1968, before Marien Ngouabi seized power. So an effort is being made in Angola, as in Mozambique, to transform the ruling movement into an orthodox Communist party.

Soviet writers have described in detail how this effort should proceed. The classical text is a book entitled "Political Parties of Africa," published in Moscow in 1970. Its main editor is Vassily Solodovnikov, now Soviet Ambassador in Lusaka.

Solodovnikov accepts that it is unrealistic to expect to create a Communist society in Africa overnight. It will be necessary to begin by working through "revolutionary democratic parties," like the movements that came to power in Guinea, Congo and Tanzania, and like the MPLA in Angola. These movements may start out as a mish-mash of nationalism, Marxism and tribalism, but they include activists "who are inspired by the ideas of scientific Socialism"—in plain words, Communists.

Solodovnikov's thesis is working out in Angola. During his visit to Moscow last October, Agestinho Neto signed a 20-year friendship treaty with Russia that provided for regular exchanges between the MPLA and the Soviet Communist party. Soon after his return, the MPLA announced that Angola was to be described officially as a "Marxist-Leninist republic."

It is perhaps a toss-up whether the MPLA in Angola or FRELIMO in Mozambique has gone further towards achieving Sovietisation. The MPLA does not seem, as yet, to have matched FRELIMO's regulations that dictate the maximum thickness of the soles (and the heels) of shoes, according to the age and sex of the wearer.

Both President Podgorny and Leonid Brezhnev are expected to visit Africa this year. Their main ports of call will be Maputo and (probably) Dar-es-Salaam. The message could be that the West is on the retreat and that Russia is becoming the dominant power in Africa. Their strength is that they are acting according to a global strategy—while Western leaders are not.

The ring of naval and air facilities that the Russians have acquired around the African coast, and the deepwater harbours where they now have the opportunity to create new naval bases, include Luanda and four excellent ports in Mozambique: Maputo, Beira, Nacala and Porto Amelia. Somalia, Congo and all of what used to be Portuguese Africa now have Governments that can be called Marxist, and Soviet-bloc military advisers, troops and intelligence officers are present throughout most of the continent.

But the most important thing to grasp about the Soviet design for southern Africa is that it is essentially negative, it has been accurately described, in an admirable paper from the Institute for the Study of Conflict as "a strategy of denial"—denial, that is, of raw materials and communications.

THREAT TO CAPE ROUTE

A leading Soviet Africanist, E. Tarabrin, predicts that the West's dependence on African raw materials will increase rapidly over the rest of the decade, and that imports of chromites (from Rhodesia and South Africa) will double. Soviet experts also stress that much of Africa's mineral wealth lies in the southern half. The gold, diamonds, platinum, copper and other industrial metals are rich stakes to play for.

Geography is just as important as natural resources. If the Cape route—which carries about 70 percent of the strategic materials required by NATO countries—could be denied to the West, the world could be cut in half vertically by the closing of the Suez Canal as well. There is no alternative to the Cape route, not just because the Suez Canal can be closed overnight and Western Europe is so dependent on Middle Eastern oil, but because technology has bypassed the Canal: the supertankers cannot get through it.

The Communist invasion of Angola was a step toward the fulfilment of Russia's grand design: the domination of the whole of southern Africa.

By giving up in Angola, the Western Powers threw away a unique opportunity to hold the line against Soviet expansion in southern Africa. Why unique? Because in Angola, the reality of the Soviet threat was not obscured by racial sentiment—at any rate, not until Marxist propagandists set about trying to turn the South Africans into the villains of the piece.

The war in Angola was not a war of black men versus white men. It was a war between rival black guerrilla movements and their foreign helpers. It presented a clearcut choice between a pro-Soviet group that promised to turn Angola into a Marxist-Lenist republic and its pro-Western oppo-

nents who promised democratic elections and guarantees for private investors.

Learning from Angola, the Russians are determined to ensure that if they can engineer the removal of the white Government in Salisbury, there will not be a subsequent battle for the spoils between pro-Soviet and anti-Soviet blacks, which might again divide black Africa. How can they ensure that? The spade-work has already been done. The bulk of the black guerrilla forces have been united by the Nkomo-Mugabe alliance, under the umbrella of the Patriotim Front.

The five neighbouring African Governments—which were at loggerheads during the Angolan war—have been persuaded to give their support to Nkomo and Mugabe. Britain and America say they will refuse to accept any settlement that is rejected by these two, even though they patently cannot claim to speak for the majority of black Rhodesians and the only hope of a civilised solution in Rhodesia lies in an agreement between Ian Smith and more representative black leaders such as Bishop Muzorewa.

The Soviet calculation—which seems to be paying off so far—is that the assault on southern Africa will be tolerated, if not aided and abetted, by the West, so long as it is carried out in the name of "majority rule." The fact that, for most of black Africa, "majority rule" means one-party dictatorship or primitive despotism is conveniently ignored.

THE WEST'S LOST CHANCE

But what is still less excusable is the neglect by Western politicians of one of the abiding lessons of Angola: that if "majority rule" means government with the consent of the people, then it can only survive in Africa if it is defended against Communist aggression.

Now Britain and America say that they will not accept a settlement worked out between blacks and whites inside Rhodesia—or for that matter, South-West Africa. The Marxist guerrilla leaders must be included; it seems that it does not matter over-much to either Western Government if the whites have any say.

If Angola is any guide—and I am convinced that it is—this is a prescription for another Marxist dictatorship, imposed by force of arms, which would provide the base for black guerrillas and Soviet proxy troops to attack the ultimate target: South Africa.●

## ACTION OF NATIONAL ENERGY PLAN URGED

● Mr. BAYH. Mr. President, the National Energy Plan has been in the hands of the House-Senate conferees since last fall. Despite the hopes of most of us that we could complete action on these legislative proposals before the end of the last session in December, the conferees have remained deadlocked over the most controversial aspect of the President's plan—the Natural Gas Policy Act. While the conferees are dealing with issues of extreme complexity and momentous importance to the Nation, and they have been working with great diligence to resolve their differences, the American people, as well as observers around the world, are understandably becoming a bit impatient and skeptical about our national resolve due to lack of progress on the energy front. I share these growing concerns.

For this reason, Mr. President, I have joined with Senator METZENBAUM and 50 of my colleagues in the House and Senate in sending a letter to the President urging that the first three parts of the energy bill be passed out of conference and sent to the White House, no longer delayed by division over the natural gas bill. This would also permit separate action on the tax portions of the national energy plan and encourage the tax conferees to resume the deliberations they broke off last year.

As you know, the President's energy plan was composed of five separate legislative proposals: A conservation bill, a coal conversion bill, a utility reform bill, a natural gas pricing proposal and an energy tax bill. The Senate considered each of these measures separately, at great length, and passed them along to the conferees as soon as they were approved on the Senate floor. The House of Representatives, on the other hand, considered the President's proposals as a package, at one time, and have treated them as such in the conference.

The conferees finished their work on the conservation bill on November 1; on the coal conversion bill on November 11; and on the utility bill on December 1. At the behest of the administration, the Speaker of the House has chosen to prevent action on the three completed bills, hoping to keep all five sections in the conference together. As a result of these procedures, the conservation, coal conversion and utility bills have been languishing in conference, awaiting resolution of the natural gas pricing controversy, and the conference has not resumed negotiations on the tax bill.

Mr. President, I think that we are past the time when this procedure makes sense. The initial submission of the national energy plan to the Congress as a package was quite sensible. It allowed Members of Congress to see the whole plate, as it were, and keep various portions of the plan in mind as others were being considered. Continuing to link the five proposals together at this point in time is no longer helpful. In fact, the evidence is mounting that it is becoming harmful. Businessmen and homeowners, farmers and consumers cannot make practical decisions that press for answers. Leaders around the world are increasingly doubting our ability to put our house in order, and the value of the dollar continues to plummet. Oil imports continue to climb and anticipated energy projects are at a standstill.

The major unresolved issues with which the conferees must deal will not be affected one way or another by the conferees reporting out the proposals on which they have completed action. The two key issues still to be decided are whether to force the price of domestic oil to OPEC prices by imposition of a tax at the wellhead, and whether the lid is going to be taken off natural gas prices.

These issues are not new to the Congress. The pros and cons of deregulating the price of natural gas have been debated on and off in this Chamber for years, ever since the Supreme Court ruled on the legality of Government regulation of natural gas prices. The attempts to reduce energy dependence and petroleum imports by raising prices to OPEC levels through the wellhead tax is analogous to President Ford's recommendation to impose import duties on foreign oil. The Congress debated that issue thoroughly at that time.

Mr. President, the decisions the conferees, the Congress, and the President make on these questions will not be affected by early passage of the conservation, coal conversion, and utility bills. However, the freeing up of these proposals and separation of the tax and natural gas bills from one another will make a difference.

As my colleagues and I have stated in our letter to the President, action on the non-gas portions of the energy bill last December would have resulted in more than 90 percent of the total energy savings originally possible under the national energy plan. It would have removed the current uncertainty felt in the business community and convinced the rest of the world that we can take decisive action to deal with our energy problems. It is only the continued struggle over natural gas legislation that has prevented this from happening.

The legislation on which the conferees have acted are meaningful proposals.

H.R. 5037, the Energy Conservation Act, puts a Congressional stamp of approval on the need to end wasteful uses of energy. The United States is the world's most profligate user of energy, with a per capita consumption rate that far exceeds that of other industrial nations, including those with standards of living equally as comfortable as our own. It is essential that we change our habits, both through voluntary conservation efforts and by adopting measures that will make our homes, buildings, machines and automobiles as energy efficient as possible.

The Energy Conservation Act addressed these concerns in a number of ways. First, under the conference agreement, large gas and electric utilities are required to inform their residential customers about ways to save energy, suggesting the installation of certain kinds of equipment and estimating possible energy savings from such improvements. They must also provide their customers with lists of businesses that will finance, supply or install suggested energy conserving measures. Utilities, at the request of their customers, will further be required to undertake home inspections and advise customers specifically about what can be done to their residences to save energy. Customers can also request their utilities to act as "conservation managers," arranging for the installation and financing of desired residential conservation devices. Loan and installation fees can then be paid monthly, along with payments for utility bills.

Second, the legislation makes available low interest loans for families whose incomes fall below $15,000 who choose to take energy conserving steps, as well as to families at all income levels who install solar heating, hot water or cooling equipment. In addition, it extends existing Department of Energy grants for low income families who take conservation steps in individual residences, as well as making grant money available to improve the energy efficiency of multi-family, public housing proj-

ects for moderate income, elderly and handicapped people. Funding for grants for weatherizing public and private nonprofit schools and hospitals, for inspections and technical assistance to local governmental buildings, and for continuation of state energy conservation programs is also authorized.

Finally, the bill addresses the energy efficiency of new industrial equipment and home appliances and requires the Federal Government itself to set an example for the nation by practicing what it preaches in the Federal establishment.

H.R. 5146, the Coal Conversion Act, is a key component of the national energy plan because greater utilization of coal is essential if this Nation is to approach energy self-sufficiency. Right now, coal is America's major alternative to oil and gas. It will play a crucial role in the transition from dependence on foreign petroleum products to reliance on adequate supplies of domestic energy.

Currently, about one-fourth of all oil consumed in the United States is burned by utilities and industrial facilities, and 60 percent of all natural gas is consumed in a similar fashion. Oil and gas are essential for only a limited fraction of these uses, and conversion of such facilities to coal—our most abundant domestic energy resource—could significantly reduce the nation's oil and gas consumption.

The coal conversion bill agreed to by the conferees sets the foundations for this shift by requiring new utilities and industrial facilities, as well as existing plants which are capable of burning coal, to switch to this alternative fuel or other substitutes for oil and gas, if those are considered preferable.

To ease the transition, the bill provides for financial assistance to areas affected by increased coal or uranium production, processing and transportation. Loan guarantees for coal preparation facilities to reduce the sulfur content of coal are also provided. Last year, as chairman of the Transportation Appropriations Subcommittee, I was responsible for earmarking money for local roads adversely affected by mining operations. Recent reports on Appalachian mining areas indicate that roads in heavily mined areas are in a dangerous state of disrepair. I will examine this issue quite closely again this year when the subcommittee considers the Department of Transportation Appropriations bill.

H.R. 4018, the electric rate reform bill, is designed to achieve three broad goals: conservation of capital and energy, efficient use of utility powerplants, and equitable rates to consumers. To achieve these goals, the bill requires State regulatory commissions to consider rate reforms that offer incentives for reduction of energy consumption. For example, utilities have traditionally offered discounted rates to customers as their use went up, thus encourgaging increased use of electricity rather than conservation. And few have offered reduced rates to customers who consume most of their energy during off-peak periods. The legislation requires State utility commissions to take these considerations into account when considering proposed rate schedules and to make information available to the public about the cost of electricity at different times of the day and to different types of customers.

The utility bill also addresses the issue of power sharing among different utilities, to see that electric generating capacity in one location will not be lying idle while other areas suffer shortages or build additional facilities at expense to their consumers. It also encourages the use of cogeneration techniques—the use of waste heat from industrial facilities to generate electricity—a technique widely used throughout Western Europe—thus reducing demand for oil, gas, or coal.

Finally, the bill requires DOE action on a number of festering consumer issues: Examination of ratemaking procedures with the hope of eliminating the practice known as pancaking—the filing by a utility of new rate schedules while previous applications are still pending; periodic review of automatic fuel adjustment clauses—the major means by which utilities raise rates—to determine whether they reflect actual fuel cost increases and encourage efficient management of utilities; provision for consumer intervention in rate cases; and prohibitions against including costs for promotional or political advertising in utility rate structures.

Mr. President, nobody knows how long the natural gas conference will continue. The Senate conferees have made a proposal to the members of the conference from the House. In turn, House conferees have made a counterproposal to Senate conferees. The coalitions offering both of these proposals are fragile. Billions of dollars are at stake in the decision. Feelings run high on both sides.

In the meantime, the energy tax bill lies dormant and those affected by energy policy are being stymied, unable to make decisions, because of the uncertainty prevailing with respect to energy legislation. It is time for the Congress to act on the work we have completed to date on the President's energy package. I urge the rest of my colleagues to join us in this appeal to the President to free up those sections of energy package on which the conferees have completed action so that America can get about its business.●

## AMERICAN PUBLIC FAVORS IMPROVEMENT OF RAILS

● Mr. McGOVERN. Mr. President, I have long believed that rebuilding our Nation's rail system should be one of the top priorities of the Federal Government. Rail transportation is one of the most energy efficient, nonpolluting and inexpensive modes of transportation available.

Transportation is one of the fundamental prerequisites to a growing, fluid economy. By building up the U.S. rail system to the point of pre-eminence it deserves, we can help meet our growth and productivity goals. Without this effort, we can only continue to struggle. Not so incidentally, we can put thousands of people back to work doing this important job.

A recent poll conducted by the respected Louis Harris, confirms that a substantial majority of the American people favor improvements in the quality and the availability of rail travel. The poll also pointed out that a growing percentage of Americans say they will travel by rail more in the future.

Mr. President, I ask that the March 15, 1978, Washington Post article entitled "Harris Study Says Public Wants Better Rail Service" be printed in the RECORD.

The article follows:

HARRIS STUDY SAYS PUBLIC WANTS BETTER RAIL SERVICE

(By William H. Jones)

Although few Americans would choose passenger trains today for trips over 100 miles, a majority favor improvements in the quality and availability of rail travel, pollster Louis Harris reported yesterday.

Detailing results of a nationwide public opinion sampling, conducted by Louis Harris & Associates at the request of Amtrak, the pollster told a National Press Club news conference that a growing percentage of Americans believe they will travel by train more in the future.

The Harris report was based on telephone interviews between Feb. 11 and Feb. 22 with a national sample of 1,600 persons plus more extensive samples of persons residing in five intercity rail corridors.

Publication of the data comes as Amtrak, the government-subsidized National Rail Passenger Corp., is facing the prospect of cutting back on services if federal financial aid is not expanded.

According to Harris, 56 percent of those persons polled would choose a car for trips over 100 miles, 28 percent would pick airplanes, 8 percent favor buses and 6 percent would choose trains. For travelers living in areas where train service is available, the percentage favoring trains increases to 9 percent, he said.

But 60 percent of the persons surveyed favor improvements in rail service (up from 54 percent in a 1972 Harris survey) and 51 percent favor more federal spending to achieve improved service.

From a list of nine proposed improvements in U.S. transportation, persons interviewed by the Harris team ranked auto safety first followed by better commuter mass transit and better intercity rail travel. New highways, new airports and faster airplanes were at the bottom of the list, Harris said.

"If and when energy shortages or the threat of energy shortages become more salient, the public mandate and demand for mass transportation and intercity trains will further intensify. The readiness of mass transportation to bear this greater loan will depend on the priorities the government sets today," he added, in an assessment of the sampling.

Generally good marks were given to Amtrak by those surveyed. The service's "performance rating" was 55 percent positive and 38 percent negative compared with the 1972 survey when 40 percent were positive and 42 percent negative.

In the Boston-Washington corridor, Amtrak got a 67 percent positive rating.●

## VOTER INITIATIVE AMENDMENT

● Mr. ABOUREZK. Mr. President, last July, Senators HATFIELD, GRAVEL, and I introduced the voter initiative amend-

ment, Senate Joint Resolution 67. Since that time we have received a substantial amount of editorial opinion from newspapers all over the country about this constitutional amendment. It has recently come to my attention that the Chicago Tribune, on February 6, joined in the discussion that has been generated by the introduction of this amendment. I ask that the Tribune editorial be printed in the RECORD.

The editorial follows:

YOU AS A LAWMAKER

Senators James Abourezk (D., S.D.) and Mark Hatfield (R., Ore.) are proposing to change the United States Constitution in a startling manner. Under their bill, Senate Joint Resolution 67, federal laws could be proposed and passed by the people, without Congress' acting on them at all; on rare occasions, in fact, the voters at large could function as a kind of super-Congress on issues big enough to merit nationwide attention.

At first sight this seems mere populist moonshine, and in fact there are cogent objections to the idea. Yet it becomes harder to dismiss the longer one looks at it.

The amendment, introduced last July, is the first serious attempt to put the voter-initiative process to work on the national level. That is its only really novel element. Twenty-three states including Illinois now have voter-initiative systems in some form [South Dakota has had such a law since 1898], and they have worked well enough to become a standard, accepted part of their government machinery.

Part of Sen. Abourezk's case is that, if voters can settle statewide issues intelligently, there is no reason to think they couldn't do the same with national ones—which surely would have been thrashed out more exhaustively before coming to a vote.

Another argument is that such direct public participation in the lawmaking process would be an effective way of countering the growing sense of indifference and distrust that so many Americans feel toward government. It is easy to lose interest in a vast, impersonal machine that seems to run by its own rules; it is less easy to ignore one that you are invited to help run.

Under SJR 67, voter initiative would work this way:

A group of citizens, convinced that Congress had short-changed the public in some way by its handling [or nonhandling] of a bill, would unite to draft legislation of its own. This in itself would take long preparation. Such a group normally would have to work closely with members of Congress sympathetic to their cause, and would need expert help with legal language and other technicalities. It could not deal with certain matters that are exempted from voter initiative, including constitutional amendments, declarations of war, confirmations of nominees, and ratification of treaties.

Once drafted, the bill would go to the U.S. attorney general, who would make sure of its validity, then prepare a title and summary to appear on signature-collecting petitions.

Proponents then would have 18 months to collect enough signatures to qualify the proposal for a vote. They would need the equivalent of 3 percent of those who voted in the previous Presidential election—or about 2.5 million signatures—plus a distribution of 3 percent in at least 10 states.

Once the signatures were collected, the attorney general, with the help of state election officials, would have to validate them as legal. [Since some would be invalidated, the backers would actually have to collect one or two million over the minimum to provide a cushion.] When the attorney general certified that the required number of valid signatures had been collected, the proposal would be placed on the ballot at the next congressional election. A simple majority vote would be needed to pass it, and the law would take effect 30 days after enactment.

For two years after a law was passed by voter initiative, Congress would be able to repeal or amend it only by a two-thirds vote; after that a simple majority would be enough. Laws passed by initiative would be subject to judicial review like any others.

Sen. Abourezk argues that this is not a replacement of our representative form of government, but a complement to it—one that would increase both the accountability of government and the citizens' knowledge of public affairs. In any event, he says, long testing in the "laboratory of states" has shown voter initiative to be a workable and democratic process.

Opponents, however, find all this much too glib. Sen. Birch Bayh (D., Ind.)—who like Mr. Abourezk is a liberal and a member of the Judiciary subcommittee studying the proposal—makes these points against it:

Holding a referendum throughout the 50 states would be a vastly complicated project. An issue that called for such a vote would probably be complex in itself and subject to misunderstanding [how for instance, would the average citizen be able to vote knowledgeably on a national energy policy?]. Much would depend—as polls show—on how a proposition was worded on the ballot. The vote would be subject to high-pressure media campaigns that would oversimplify the issues and appeal to emotions rather than facts.

Mr. Abourezk has answers to these objections; their essence is, "You can trust the people." That does not settle the matter. The question is likely to be with us for a long time, and to attract more and more discussion as time goes on. We might as well start thinking about it.●

## PRESIDENT CARTER'S STATEMENT ON NEUTRON WEAPONS

● Mr. PELL. Mr. President, I rise to support President Carter's decision to hold up production of neutron weapons and to request that the Soviet Union respond seriously to this American example of restraint.

The President's decision puts the onus on the Soviet Union to put its money where its mouth is on these weapons. Over several months now, the Soviets have expressed concern about neutron weapons and have charged that these weapons are part of an American effort to create more and more means of mass destruction. The Soviets have also stated that they favor "reducing arms and easing military confrontation." Now is the time for them to demonstrate that these are more than words.

If the Soviets meant what they said, they should now respond in a suitable fashion. In this connection, the Soviets should bear in mind that the reason that neutron weapons were developed and other plans made to moderize our tactical nuclear forces in Europe was because of the massive Soviet threat to Western Europe, represented in particular by the large tank disparity in the Soviets' favor. Reducing that threat would, in my view, be an appropriate Soviet action.

If the Soviets do nothing, then we have the option of moving ahead with neutron weapons. In this connection, it is my belief that the lack of a Soviet response would generate formal NATO support for modernizing its tactical nuclear weapons in Europe with neutron warheads.

In conclusion, I believe that President Carter is to be commended for his decision on neutron weapons and for his actions in SALT and other arms control negotiations to curb the arms race and to avoid nuclear proliferation. There is also perceptible a decent concern on the part of the President for the much overburdened American taxpayer.●

## PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD at this point the two notifications I have just received. A portion of the notifications, which is classified information, has been deleted for publication, but is available to Senators in the office of the Foreign Relations Committee, Room S–116 in the Capitol.

The material follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
*Washington, D.C., April 10, 1978.*

HON. JOHN J. SPARKMAN,
*Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding under separate cover, Transmittal No. 78–26, concerning the Department of the Air Force's proposed Letter of Offer for major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
*Lieutenant General, USA.*

[Transmittal No. 78–26]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) *Prosepective Purchaser:* [Deleted]

(ii) *Total Estimated Value:*
Major defense equipment* [Deleted]
Other [Deleted].

## AN EXCEPTION TO THE RULES

● Mr. ABOUREZK. Mr. President, the most recent outbreak of violence in the Middle East once again calls strongly for an examination of the difficult questions of ethical judgment, or as Michael Walzer poses them, "When is the resort to violence justified in international affairs and what acts are legitimate in the conduct of war?" We usually think of terrorism as entirely divorced from government which, as Michael Walzer points out, is not the case of Israel which engages in terrorism even when there is no threat to her destruction. I want to share with my colleagues a review of Michael Walzer's book, Just and Unjust Wars, by Noam Chomsky and ask that it be printed in the RECORD.

The article follows:

AN EXCEPTION TO THE RULES

(By Noam Chomsky)

When is the resort to violence justified in international affairs? What acts are legitimate in the conduct of war? These questions raise difficult problems of ethical judgment and historical analysis. Michael Walzer insists, quite correctly, that beyond merely "describ[ing] the judgments and justifications that people commonly put forward, [we] can analyze these moral claims, seek out their coherence, lay bare the principles that they exemplify." His aim is to develop a certain conception of our "moral world," and to draw from it both specific judgments on historical events and operative criteria for resolving future dilemmas.

There are certain beliefs on these matters that are so widely held as to deserve to be called "standard." With regard to the question of resorting to violence, the standard doctrine holds that it is justified in self-defense or as a response to imminent armed attack, often construed in the words of Daniel Webster in the *Caroline* case, which Walzer quotes: ". . . instant, overwhelming, leaving no choice of means, and no moment for deliberation." This part of the standard doctrine Walzer calls "the legalist paradigm." With regard to the exercise of force, another part of the standard doctrine constitutes what Walzer calls "the war convention," consisting of such principles as, for instance, that prisoners should not be massacred and civilians should not be the direct objects of attack.

The standard doctrine, which is codified in various international conventions, holds that both the resort to war and the means employed in warfare fall within the realm of moral discourse. There has been extensive discussion of these issues in the context of the Vietnam War, the conflict that prompted Walzer's concern. While the standard doctrine is regularly violated, it remains a worthwhile endeavor to evaluate and refine it.

Walzer argues that the legalist paradigm is too restrictive in certain respects. In other respects, however, he interprets it strictly, as he does the war convention. Walzer takes the anti-Axis effort in Europe in World War II to be "the paradigm . . . of a justified struggle"; Nazism, he believes, "lies at the outer limits of exigency, at a point where we are likely to find ourselves united in fear and abhorrence." Nevertheless he condemns as illegitimate under the legalist paradigm Churchill's decision to mine the territorial waters of neutral Norway in order to prevent ore shipments to Nazi Germany, and he considers the terror bombing of German cities to be a serious violation of the war convention. As those examples illustrate, he construes the standard doctrine strictly, even in the extreme case of the struggle against Nazism.

Walzer points out that it is impossible within the confines of his study to present an elaborate historical argument an elaborate historical argument, but to me, at least, the above conclusions seem reasonable. Furthermore, Walzer is right to challenge widely accepted views, for example with regard to terror bombing. It is enough to recall the fundamental moral flaw of the Nuremberg tribunal, graphically revealed by Telford Taylor's observation, in Nuremberg and Vietnam, that "there was no basis for criminal charges against German or Japanese" leaders for aerial bombardment because "both sides had played the terrible game of urban destruction—the Allies far more successfully." As it turns out, the operational definition of a "crime of war" is a criminal act of which the defeated enemies, but not the victors, are guilty. The consequences of this moral stance were soon to be seen in Korea and Vietnam. It would be naive to suppose that a serious moral critique would have prevented further criminal acts of the sort condoned (or ignored) under the Nuremberg principles. Nevertheless, the example illustrates the seriousness of the enterprise in which Walzer is engaged.

Even the most profound justification of the standard doctrine would be of limited import, since it is in any case widely accepted in principle, if not in practice. Hence the major interest of Walzer's study lies in the modifications and refinements he proposes, as in his restrictive interpretation of the war convention. Since the burden of justification rests on those who employ force, the still more significant part of his study lies in those departures from the standard doctrine which advocate its relaxation. These relate only to the legalist paradigm of the justified use of force.

Walzer suggests four modifications that extend the legalist paradigm. Three of these revisions "have this form: States can be invaded and wars justly begun to assist secessionist movements (once they have demonstrated their representative character), to balance the prior interventions of other powers, and to rescue peoples threatened with massacre." These extensions are discussed under the heading of "humanitarian intervention." Walzer states that "clear examples of what is called 'humanitarian intervention' are very rare. Indeed, I have not found any, but only mixed cases where the humanitarian motive is one among several." He cites the Indian invasion of Bangladesh as a possible example (the only one excited), since "it was a rescue, strictly and narrowly defined," and the Indian troops "were in and out of the country . . . quickly."

There then remains to be considered one serious proposal for relaxing the restrictions of the standard doctrine; and thus much of the significance of Walzer's study lies in this crucial case. It is the case of "preemptive strikes." Walzer accepts "the moral necessity of rejecting any attack that is merely preventive in character, that does not wait upon and respond to the willful acts of an adversary" (hence his condemnation of the mining of Norwegian waters). But he feels that the Caroline doctrine is too narrow. Preemptive strikes are justified, he proposes, when there is "a manifest intent to injure, a degree of active preparation that makes that intent a positive danger, and a general situation in which waiting, or doing anything other than fighting, greatly magnifies the risk."

A single example is offered: the Israeli preemptive strike of June 5, 1967. This, Walzer holds, is "a clear case of legitimate anticipation," the only one cited—in this review of 2500 years of history—to illustrate the point that states may use military force even prior to the direct use of military force against them. Israel was "the victim of aggression" in 1967, Walzer claims, even though no military action had been taken against it. What is more, we can have "no doubts" about this case, as Walzer states in the following extraordinary passage:

The Egyptian "challenge" to Israel is thus a clear case of "aggression," on a par with the direct use of armed force in each of the other cases cited. The legalist paradigm fails, according to Walzer, because, given the Caroline doctrine, it does not condone Israel's response to this "aggression."

Note the crucial nature of this case for Walzer's argument. In a review covering 2500 years, Egypt's 1967 challenge is the single example cited of "aggression" involving no direct resort to force; nevertheless, it is not an ambiguous example, but one that raises "no doubts." Israel's preemptive strike is the one historical example adduced to illustrate the need to modify the legalist paradigm to permit "anticipations." Furthermore, this is the only modification covering supposedly unambiguous historical examples that involves a *relaxation* of the standard doctrine. What Walzer is proposing here, as he notes, is a "major revision of the legalist paradigm. For it means that aggression can be made out not only in the absence of a military attack or invasion but in the (probable) absence of any immediate intention to launch such an attack or invasion." Given the burden carried by this example, a serious inquiry into the historical facts would certainly appear to be in order, but Walzer undertakes no such inquiry. He merely asserts that Israeli anxiety "seems an almost classical example of 'just fear'—first, because Israel really was in danger . . . and second, because (Nasser's) military moves served no other, more limited goal."

Israeli generals take a rather different view. The commander of the air force at the time, General Ezer Weizman, stated that he would "accept the claim that there was no threat of destruction against the existence of the State of Israel. This does not mean, however, that one could have refrained from attacking the Egyptians, the Jordanians and the Syrians. Had we not done that, the State of Israel would have ceased to exist *according to the scale, spirit and quality she now em-*

*bodies* . . . We entered the Six-Day War in order to secure a position in which we can manage our lives here according to our wishes without external pressures" [my italics].

The Israeli correspondent of *Le Monde*, Amnon Kapeliouk, citing corroboratory statements by General Matityahu Peled and former Chief of Staff Haim Bar-Lev, wrote that "no serious argument has been advanced to refute the thesis of the three generals." This assessment is confirmed by American intelligence sources, who found no evidence that Egypt was planning an attack and estimated that Israel would easily win no matter who struck the first blow. The chairman of the Joint Chiefs of Staff reported to the President on May 26 that Israel could remain mobilized for two months without serious trouble. "In a military sense, then, time did not seem to be running out" (William Quandt, *Decade of Decisions*).

General Weizman's justification for the preemptive strike bears comparison to the argument advanced by Bethmann-Hollweg, the German Chancellor, after the attack on Belgium in 1914:

"France stood ready for an invasion. France could wait, we could not. A French attack on our flank on the lower Rhine might have been disastrous. Thus we were forced to ignore the rightful protests of the Government of Belgium . . . He who is menaced as we are and is fighting for his highest possession can only consider how he is to hack his way through."

Walzer properly dismisses this justification, pointing out that nonmilitary options had not all been foreclosed and deriding the reference to Germany's "highest possession," which he takes to mean "honor and glory" (compare Weizman's "scale, spirit and quality"). "The mere augmentation of power," Walzer insists, "cannot be a warrant for war or even the beginning of warrant." No doubt one can find differences, possibly even decisive ones, between the Israel and German attacks, or between the Israeli strike and the Russian invasion of Finland—another clear case of aggression, even though, as Walzer concedes, the defense of Leningrad from possible future German attack was at stake and Russia's invasion after Finnish refusal to territorial exchange may have saved Leningrad from encirclement when the Nazis did attack. But two points deserve mention. First, Walzer does not seriously address the relevant historical background. This is a remarkable oversight given the crucial role of the Israeli strike in his argument, and given also his insistence that the Israeli attack on the one hand, and the German and Russian attacks on the other, are all "clear cases," falling on opposite sides of the moral divide. Second, a serious analysis of the 1967 case would quickly reveal that there are indeed doubts and ambiguities, contrary to Walzer's claim.

Walzer presents only the Israeli version of events leading to the 1967 war. He ignores not only the Arab version, but also the well-known analyses of commentators committed to neither side. He does not mention the Israeli attack on the Jordanian village of Es-Samu in November 1966, leaving 18 dead, a "reprisal" after terrorist attacks allegedly originating in Syria (censured by the UN, including the United States). Nor does he discuss the exchange of fire on April 7, 1967, which "gave rise to intervention first by Israeli and then by Syrian aircraft, [then to] the appearance of Israeli planes over the outskirts of Damascus and to the shooting down of six Syrian planes" with no Israeli losses (Charles Yost, Foreign Affairs, January 1968; Yost takes this to have been "the curtain-raiser to the Six-Day War").

Walzer's unqualified assertion that Nasser's moves served no more limited goal than to endanger Israel is sharply at variance with the judgment of many other observers. Yost, for instance, notes various inflammatory Israeli statements that "may well have been the spark that ignited the long accumulating tinder" and discusses the problem that Nasser faced "for his failure to stir at the time of the Es-Samu and April 7 affairs." Walzer mentions that Egypt expelled the UN Emergency Force from the Sinai and Gaza and closed the Strait of Tiran to Israeli shipping. He fails to mention that Israel had never permitted UN forces on its side of the border and refused the request of the UN secretary-general to allow them to be stationed there after Egypt ordered partial evacuation of the UN forces from its territory. (Egypt did not order the UN forces out of Sharm el Sheikh.) As for the closing of the Strait of Tiran, if we apply the reasoning that Walzer feels is appropriate in the case of the German attack on Belgium, we see that there remained unexploited possibilities for peaceful settlement. For example, the matter might have been referred to the International Court of Justice, as Egypt had been requesting since 1957. This proposal was always rejected by Israel, possibly because it agreed with John Foster Dulles that "there is a certain amount of plausibility from the standpoint of international law, perhaps, to (the Arab) claims" (though the United States disagreed with this conclusion).

It also seems that Nasser may have had some legitimate cause for concern when he heard Levi Eshkol, the Israeli Prime Minister, declare that "we shall hit when, where, and how we choose," or when he learned that the Israeli chief of intelligence, General Yariv, had informed the international press that "I think that the only sure and safe answer to the problem is a military operation of great size and strength" against Syria. Nasser alluded to these statements in his May 23 speech, in which he noted various Israeli threats against Syria. And his concern may have been augmented—quite understandably—by the memory of the surprise Israeli attack of 1956, at a time when Egypt was making serious efforts to quiet the border.

My remarks here only scratch the surface of the issue. The point is that the historical record is far more complex and ambiguous than Walzer makes it out to be. His statement that Egypt's "challenge" is a simple and indubitable case of "aggression," on a par with the Nazi conquests in Europe, can hardly be taken seriously. Furthermore, he ignores the aftermath of the Israeli attack. Quite unlike the case of Bangladesh, the Israeli army did not leave. Rather, it prepared for a continuing occupation, with a clearly stated policy aimed at the eventual annexation of some areas, the actual annexation of eastern Jerusalem, and a program of settlement and integration of the occupied territories—a program that continues in the face of nearly unanimous international condemnation.

Some 200,000 West Bank Arabs fled during the Israeli attack in 1967, and about the same number fled or were forcibly expelled after the cease-fire. For many months afterward, UN Chief of Staff General Odd Bull reports. "The Israelis encouraged their departure by various means, just as they had in 1948." As late as the following November, he adds, "There can certainly be no doubt that many thousands of Arabs at this time fled across the Jordan to the East Bank, even though there may be no precise evidence of the methods that were employed to ensure their departure." Thus the land was "liberated"—freed of a large part of its population. The Israelis instituted a military regime in the conquered areas that differs from others of the same type primarily in the favorable press that it has enjoyed in the United States. All of these subsequent developments seem relevant to an evaluation of the Israeli attack, as Walzer would surely see the relevance of similar developments in other cases he discusses.

I focus on this particular example because of its crucial role in the structure of Walzer's presentation of his "moral world." With this case removed, Walzer is left with no historical example of any substance to indicate that his recommended departures from the legalist paradigm are more than academic—that is, that they cover actual historical events. This is not to say that the discussion is worthless; even a purely abstract discussion of these issues is of some interest. But we no longer have "a moral argument with historical illustrations," as the book's subtitle states, at least in the crucial case of relaxing the restrictions of the standard doctrine. Rather, what we have is a mere moral assertion lacking any connection to clear historical cases.

Walzer's analysis of "peacetime reprisals" might also be taken to imply a relaxation of the standard doctrine. He argues that "reprisals are clearly sanctioned by the practice of nations, and the (moral) reason behind the practice seems as strong as ever." The moral argument he presents seems weak; it barely goes beyond assertion. His single example of a "legitimate reprisal" again involves Israel: this time, the 1968 Israeli raid on the Beirut airport in which 13 civilian planes were destroyed in retaliation for an attack on an Israeli plane by two terrorists in Athens. In fact, the reprisal was hardly efficacious: It "aroused considerable sympathy for the Palestinians in Lebanon and brought their activities more into the open" (John Cooley, Green March, Black September), as could have been anticipated. Walzer might have strengthened his point by drawing some of the natural conclusions of his position: For example, that it would be quite proper for Cuban commandos to destroy commercial aircraft at Washington National Airport in reprisal for the acts of terrorists organized in the United States.

Walzer also gives an example of an illegitimate Israeli reprisal, namely, the commando attack in which more than 40 villagers were killed in the Jordanian village of Qibya in 1953, in response to a terrorist murder in Israeli that had no known connection to this village.

Walzer concludes that in this case "the killings were criminal," but the strongest judgment he allows himself is that "particular Israel responses have indeed been questionable, for it is a hard matter to know what to do in such cases." Walzer never explains why his condemnation of terrorist acts *against* Israel is not similarly nuanced. For example, in March 1954, 11 Israelis were murdered on a bus in the Negev; it was the most serious Arab terrorist act since the establishment of the state. In response, the Israeli army attacked the Jordanian village of Nahaleen (which was in no way involved), killing nine villagers. Walzer regards the Israeli retaliation as merely "questionable." But then why was not the original Arab attack also just "questionable"? Or why not also describe the Israeli commandos as "thugs and fanatics," Walzer's term for Arab terrorists (in the *New Republic* article from which this account of terrorism is drawn)? The actual perpetrators of the ambush-massacre of the people on the bus were, as was known at the time, from a Bedouin tribe that had been driven into the desert by Israeli troops. More than 7000 of these Bedouins were expelled from 1949 to 1954, as Israel encroached on the demilitarized zones. Surely Walzer should grant that it is also a "hard matter to know what to do" when people are driven from their homes and their traditional grazing and watering grounds, and left destitute in the desert—as it is a "hard matter to know what to do" when

thousands of peasants are expelled from their bulldozed villages in the same region in the past few years—actions that continue as I write, though the American press is silent.

Walzer does discuss terrorism, but his account is deeply flawed. He makes the important point that the tendency to restrict the term "terrorism" to "revolutionary violence" is "a small victory for the champions of order, among whom the uses of terror are by no means unknown." It is indeed remarkable to see how the term has been restricted in recent years so as to exclude state-organized terrorism. Walzer asserts that "contemporary terrorist campaigns are most often focused on people whose national existence has been radically devalued: the Protestants of Northern Ireland, the Jews of Israel, and so on." He then develops the following "precise historical point: that terrorism in the strict sense, the random murder of innocent people, emerged as a strategy of revolutionary struggle only in the period after World War II."

His "precise historical point," however, is precisely false, as a look at his favored example suffices to show. In just three weeks in July 1938, the Irgun Zvai Leumi, dedicated to the ideals of Menachem Begin's mentor Ze'ev Jabotinsky and later headed by Begin himself, killed 76 Arabs in terrorist attacks on Arab markets and other public places. There were many similar pre-World War II examples: bombs placed in Arab movie theaters, sniping at Arab quarters and trains carrying Arabs, and so on. The propagandists of the Jewish terrorist groups gloried in these triumphs. One of the heroes of the Herut, the party of the current prime minister of Israel, is a man hanged by the British for firing on an Arab bus.

(And while the main paramilitary force of the Jewish community in Palestine did not systematically resort to random terror, it did not disdain it entirely. To cite one case, the same page of the official history that describes the Haganah assassination of the orthodox Jewish poet Dr. Israel Jacob de Haan in 1924 goes on to describe how the Haganah destroyed the house of an Arab near the Wailing Wall in Jerusalem in retaliation for harassment of Jewish worshippers by Arab youths; the bomb caused no injuries "because by chance the inhabitants of the house were away" [Toldot Hahaganah, the official history of the Haganah].)

Contrary to Walzer's claim, random murder of innocent people is no postwar invention of the Provisional IRA and the PLO. His point about "people whose national existence has been radically devalued" is very well-taken—but it applies to Palestinian Arabs no less than to "the Jews of Israel."

The special place of Israel in Walzer's "moral world" is also revealed in his discussion of the war convention—the set of principles that apply once war is under way. He contrasts orders given at My Lai with those issued to Israeli troops entering Nablus during the June 1967 war, citing a book of conversations among Israeli soldiers. It is perhaps less obvious than he assumes that this is the most objective source of evidence concerning the humane practices of the Israeli army. But putting that question aside, he might have selected other examples from the same book, examples concerning, say, the village of Latrun, destroyed by Israeli troops, whose inhabitants were driven into exile. He might have even taken a further step and quoted the eyewitness account by the Israeli journalist Amos Kenan, describing the bulldozing of Latrun and neighboring villages under the command of officers who told their troops, "Why worry about them, they're only Arabs." He might have even quoted Kenan's prophetic conclusion: "The fields were turned to desolation before our eyes, and the children who dragged themselves along the road that day, weeping bitterly, will be the fedayeen of 19 years hence."

In another section of the book, Walzer comments briefly on the pacifist critique of the standard doctrine in an afterword, making the familiar point that nonviolent measures appeal to "the essential humanity of the enemy," in A. J. Muste's phrase, and are therefore of doubtful relevance when the appeal will not be heeded. Much pacifist theory relies on a dual psychological doctrine: Nonviolence will strike a responsive chord, and violent resistance will so shape the character of those who choose it that the distinction between aggressor and resistor will be erased. As Muste put it, "kindness provokes kindness" and "the problem after a war [even a just war] is with the victor. He thinks he has just proved that war and violence pay. Who will now teach him a lesson?" Walzer does not directly address these basic premises of the theory of nonviolent resistance. To me it seems that they cannot be easily dismissed, though ultimately they cannot be sustained. I've written about this elsewhere (American Power and the New Mandarins) and will not pursue the question any further here.

Many other difficult and important questions are raised in Walzer's study, and much of the discussion is literate and richly textured. The examples I have focused on, however, reveal a crucial moral and intellectual flaw, which undermines much of the argument. No doubt Walzer expresses a broad consensus in American society when he assigns a special status to Israel and reconstructs the "moral world" accordingly, but this simply reflects the pathology of the times. Comparable judgments on the exceptional status of Soviet Russia would not have been unusual in an earlier period. Consensus is no criterion of truth or justice.●

## THE IMPORTANCE OF HYDROELECTRIC POWER

● Mr. HATHAWAY. Mr. President, the New York Times on April 8 published an excellent article by Steven Rattner on hydroelectric power in New England.

The potential of small hydroelectric sites throughout Maine and the rest of the Northeast is enormous. The oil savings are substantial but the cost of refurbishing and installing turbines in many of these sites is high. In order to encourage development of these alternative energy sources, I sponsored an amendment to the energy tax bill to give tax credits for the equipment needed to convert small dams into viable energy sources.

The time is long overdue for action in developing a strong national energy plan. We must reduce our dependence on imported petroleum and develop nonpolluting, renewable energy alternatives for the future.

I ask that Mr. Rattner's article be printed in the RECORD.

The article follows:

NEW ENGLAND AGAIN TURNS TO ITS STREAMS FOR ENERGY

(By Steven Rattner)

BELFAST, MAINE.—To a first-time visitor, the Goose River looks mostly like a small stream, meandering unobtrusively through six miles of coastal Maine. Years ago when William McKinley was President, a dozen small industrial plants dotted its tree-lined banks, all drawing their power from water wheels and small dams set against the coursing waters.

Over the years, however, cheap oil and mass production made uneconomical small, water-powered plants employing only 5 or 10 workers. By last December, all that remained of the Goose River's ax factories, paper mills, leather processors and grist mills were overgrown foundations.

Now, with oil prices up fourfold in four years, the power of such streams is again being tapped, although somewhat timidly and with a new goal—electric generation—in mind. The grandly titled Maine Hydroelectric Development Corporation has refurbished one of Goose River's dams and for more than two months has been sending enough power to light 70 homes into the system of the Central Maine Power Company.

"You have to understand the potenial here," said Lawrence Gleeson, the 36-year-old founder, president and—with his wife—staff of Maine Hydroelectric. "It may not look like much, but it adds up."

The various projects now under way may soon begin to add up, particularly for New England, where most of the potential lies. Mr. Gleeson has several more projects in Maine and Pennsylvania on the drawing board. David E. Lilienthal, the first chairman of the Tennessee Valley Authority, is working with the city of Paterson, N.J., to restore electric generation to a dam on the Passaic River and on a number of similar projects.

The town of Springfield, Vt., with 10,000 residents, is spending $58 million to restore its hydroelectric facilities and the city of Bangor—just up the road from here—is considering a somewhat less ambitious effort to refurbish its deteriorated 103-year-old dam.

Businessmen are interested in hydroelectricity as well. A small instrument manufacturer in Duxbury, Vt., recently spent about $20,000—some of it from the state—on a hydroelectric project expected to cut its electric bill by 30 to 40 percent.

On the largest scale, utilities in New England—which ironically were largely responsible for the abandonment of hydroelectric facilities—are themselves now developing new hydroelectricity. The Niagara Mohawk Power Corporation has begun a 14-year, $175-million project to develop 15 sites. Unlike most other new hydroelectric developments, some of Niagara Mohawk's projects would involve building new dams.

Small scale hydroelectricity at existing dams is basically a motherhood and apple pie issue. It saves costly imported oil, it does not involve disruptive local economic impacts, and best of all, it requires only the addition of generators to capture the energy in water now rushing freely past. That means no noxious emissions and no new construction of landscape-altering dams.

With this firmly in mind, Congress has voiced its enthusiastic support. The House and Senate energy conference now considering President Carter's national energy plan has added a three-year, $330 million program for loans and grants for small-scale hydroelectric development. The Department of Energy is already broadening its efforts; a hydroelectric group with a $10 million annual budget is now in place.

RENEWABLE AND NONPOLLUTING

"The beauty of it is that it's decentralized, renewable and nonpolluting," said Representative Richard L. Ottinger, Democrat of Westchester and sponsor of the new program. Mr. Ottinger reported that utilizing 10 percent of New York State's potential could provide enough electricity for Albany and save 2.27 million barrels of oil a year.

Nationally, the Army Corps of Engineers recently calculated that installation of generating equipment at existing dams could add 54,600 megawatts of capacity, equal to the current capacity in New York and all of

New England and enough to save 727,000 barrels of oil a day.

To be sure, the marvels of small-scale hydroelectric power can be easily overstated. For one thing, to achieve the 54,000 megawatts of additional power, hydroelectric equipment would have to be installed at 49,500 dams. Moreover, the report by the corps acknowledged that it did not include "detailed consideration of engineering, economic, financial or environmental feasibility."

For some of the potential projects, economic feasibility is clearly an issue. Mr. Gleeson, for example, is paid 2 cents a kilowatt hour for his power by the Central Maine Power Company—triple the usual rate. In January, that amounted to the lordly sum of $360.

PRECARIOUS FINANCIAL STRAITS

Against this, Mr. Gleeson has invested about $40,000 over the last year, not including large amounts of his own time. The drain has put Mr. Gleeson in precarious financial straits. For months, he, his wife, and their two sons lived in the tiny, one-room office next to the millrace. His savings from his former employment at the Sun Company are gone, as are the proceeds from the sale of his house in Pennsylvania, money he had hoped to use as a downpayment on a Maine home.

But Mr. Gleeson has been fascinated by small-scale hydroelectric power for most of his life. A photograph of an old Connecticut mill near his hometown hangs in the paneled office, and even while working as an engineer, Mr. Gleeson made dozens of trips through Maine and Pennsylvania looking for potential sites.

"These water-powered mills gave New England much of its economic strength in the last century," he said recently, noting that 100 years ago, Waldo County's population was double today's level. "I think hydroelectricity can be viable once more," he added.

Recently, Mr. Gleeson's prospects seemed to have improved. Months of persistence finally persuaded the Department of Energy to award an $18,000 grant for the effort. And Mr. Gleeson says that some of the funds he has already spent could save money later as he develops three other prime sites along the Goose River, sites that could produce a further 400 kilowatts of power, enough for nearly 300 more homes.

ONCE SERVED A GRIST MILL

The other sites are strung along the river's six miles, beginning at Swan Lake, a lake created in large part by the Swan Lake Dam, which once served a grist mill. Mr. Gleeson has no commercial plans for that dam, but hopes someday to have a waterwheel and picnic area to interest visitors in hydroelectric power.

But farther down the river, amid overgrown underbrush and saplings, sit Mason's Dam, once part of a paper mill, and Kelley's Dam, formerly the home of the Kelley Ax factory. The dams, built in the early 1800's, are rock-filled and are in almost perfect condition, even down to the release gates, Mr. Gleeson said as he drove a visitor through this semiagricultural, semiresort, semipoor coastal community.

Another dam, downriver from the now-operating Mill Dam, was refurbished in 1908 by the Penobscot Bay Electric Company to generate electric power but was abandoned about 55 years later.

CAREFUL CONTROL NECESSARY

Release gates are important to run even just Mill Dam; the water level upstream to Swan Lake must be carefully controlled. Two variables are important in determining how much power a dam can generate: the head, the distance from the top of the dam down to the turbine, and the flow, the amount of water racing through.

Actually, the water pouring off the top of the Mill Dam is not generating any power; the useful water cannot be seen. A "penstock pipe" opens into the reservoir near the top of the dam, drawing water down a sort of long chute into the turbine below. The turbine, built in 1887 and still spinning away, is connected to a generator and the power leaves Mr. Gleeson's shed by means of an ordinary looking electric cord.

As with most any energy project these days, the Federal Government regulates hydroelectricity with a heavy hand. Technically, Mr. Gleeson is breaking the law these days, for he has not received any of the required Federal Energy Regulatory Commission permits. But the commission is several years behind and "I'd be out of business by then," Mr. Gleeson said.●

## TOWARD A BETTER UNDERSTANDING OF BUSINESS AND GOVERNMENT

● Mr. INOUYE. Mr. President, deeply embedded in American political thought is the dogma that politics should consist of contentious groups locked into an adversarial position. This view is reflected in the development of not only our political system, but even more graphically in our legal system, in which the adversarial relationship is institutionalized.

As we near the conclusion of the 20th century, this view of society as a struggle among conflicting forces should come under closer scrutiny. Without denying the desirability of competing in the marketplace of ideas, one sees too often the degeneration of that competition into an uncivil, suspicious, and bitter struggle marked by misunderstanding and antagonism. The time has come to call a temporary truce to reexamine the feasibility of that view in a world threatened by strife and swelling political and economic insecurity.

In few other areas has this gulf been greater than in political-business relationships. There are too many individuals in both the business and political worlds who are eager to attribute the worst motives to those with whom they disagree. We need fewer knee jerk reactions and more understanding of the beliefs and concerns of the other parties.

Mr. Walter E. Hoadley, executive vice president and chief economist of the Bank of America, recently addressed himself to this matter in a thoughtful and fair article entitled "Business-Government Relations: Both Sides Must Change" which appeared in the March issue of Dun's Review. He suggests the toning down of the shrill rhetoric on both sides and searching out the grounds for agreement to enhance the public interest. He makes a number of thoughtful suggestions which I commend to the attention of my colleagues.

I ask that the article be printed in the RECORD.

The article follows:

BUSINESS-GOVERNMENT RELATIONS: BOTH SIDES MUST CHANGE

(By Walter E. Hoadley)

As the 95th Congress moves into its second session, businessmen should recognize the fact that elected officials also have a bottom line—votes—which has a profound influence on industry's own more traditional one: after-tax profits. The most immediate issue of concern to business is a tax cut that will offer more incentive for investment and job expansion. But there's more involved.

Elected officials now confront a slowing economy that responds less and less to conventional macro-fiscal and monetary policy measures and has an inflationary bias the public abhors. Business leaders in turn fear more and more interference with their management freedoms and incentives. Frustration abounds, but it may in fact help all concerned.

It would be naive to assume that cooperation between the public and private sectors is going to improve very much very soon. But there's now a chance that somewhat closer working relationships can be achieved, because at least a few individuals on both sides are beginning to see the necessity for better understanding.

No one should underestimate the fundamentally differing points of view of most business executives and most government officials.

The typical successful business executive is well educated technically and trained in the practical profit-and-loss bottom-line approach. He or she is forced to meet actual market conditions, impatient, results-oriented, authoritarian with a chain-of-command mentality, and intolerant of disloyal or poor performing individuals on his or her team.

In contrast, most top government leaders are well educated professionally, trained and experienced in law and public policy oriented. He or she is short on practical economic experience, sensitive to public opinion and voter wrath, skilled at compromise, reconciled to delay, subject to little direct day-to-day accountability, and accustomed to civil service inertia in weeding out poor performers.

To improve their ability to communicate with and persuade government executives to take more positive views on business-related problems, corporate managements are going to have to:

Modify their tendency to give orders in their discussions with public officials, because few will listen seriously.

Stop measuring success in government affairs largely by the number of "bad" bills killed, and take more positive legislative initiatives to help resolve real problems plaguing the public.

Modify the idea that to merit business support, an elected official must vote consistently for whatever business considers the right approach.

Move aggressively to uncover problems of political interest at an early stage in order to negotiate the parameters of the problem and help find alternative solutions.

Avoid trite use of traditional free-enterprise shibboleths and concentrate more government attention on the "how" and "why" of the actual functioning of markets.

Spend more time considering elected officials' needs to satisfy often highly diverse constituencies in order to remain in office.

Recognize that a business proposal is likely to be legislatively rejected unless government officials feel a majority of their constituents agree.

Insure that their corporate executive corps includes many more men and women who understand the second bottom line and how our political process actually works.

Use a more liberal disclosure policy to disarm critics in government who contend that many business practices cannot stand the light of public scrutiny.

Similarly, many elected officials sooner or later are going to have to:

Admit that using business as a convenient scapegoat undermines general public confidence, and hence economic and social progress.

Recognize that more accountability is inevitable for the actual versus the promised results of new laws.

Accept as fact that the weight of excessive government interference in the economy is impeding progress and threatens a compliance breakdown.

Openly admit the costly failures of many massive government programs, in which the primary direction comes from Washington.

Strive harder to encourage the private sector to help get more needed tasks done in the public interest.

Temper the power of non-elected government staff who often accept authority without having the responsibility for the results of their decisions.

Insist that all important government programs be tested thoroughly under actual operating conditions before being launched on the nation.

Reexamine the extensive Congressional hearings process to determine the real value and cost of sessions attended by very few committee members.

Ask pointedly what should be the proper role of government in supporting U.S. business as it competes in world markets with more and more organizations that represent either direct government ownership or subsidy.

As business pursues profits and politicians seek votes this year, each should be prepared to answer a fundamental question. Business should be prepared to tell politicians what difference a tax cut will make to anticipated profits and plans for the future. At the same time, elected officials must assess how a further decline in business-investor confidence and outlays will affect their constituents—and their reelection prospects.

The answers may show the need for closer government-business cooperation.●

## FEDERAL HEALTH MANPOWER POLICY: THE NEED FOR A NEW APPROACH

● Mr. KENNEDY. Mr. President, last week the American Medical Association sponsored the 31st National Conference on Rural Health in Denver. Senator CLARK, a leader in Congress on rural health matters, addressed the conference on the future direction of Federal health manpower policies. His speech is provocative, informative, and insightful. The Subcommittee on Health and Scientific Research plans to begin a review of Federal health manpower programs in the next several months and Senator CLARK's views will therefore, be especially useful.

I ask that this speech, entitled "Federal Health Manpower Policy: The Need for a New Approach," be printed in the RECORD.

The speech follows:

FEDERAL HEALTH MANPOWER POLICY: THE NEED FOR A NEW APPROACH

It's a great honor and pleasure for me to have the opportunity to address you this morning, at this, the American Medical Association's 31st National Conference on Rural Health.

The American Medical Association should be commended for bringing together people from across the country, and from many different walks of life, to rally behind the issue of making health services more available to rural Americans, on behalf of all of us here—we thank you for this opportunity to get together.

The very fact that this conference is necessary, and that it is in its 31st year, clearly demonstrates that the problems of rural health care are still with us:

The health status of rural people still falls well short of the status of other Americans;

Many rural communities still face severe shortages of health personnel and facilities; and

Financing health services is still a problem for rural Americans, given their general inadequate health insurance coverage.

The best we can say is that we're now much better informed about the nature and extent of those problems. However, despite extensive research, few effective solutions have been found, and even these have not been fully implemented.

In fact, some health policy-makers and many citizens in rural communities are developing and initiating programs on the basis of obsolete assumptions.

For example:

That solo physician arrangements is the most appropriate mode of practice for rural areas;

That physicians can be attracted to rural communties through financial incentives; or

That health status can be improved merely through the introduction of medical services in a rural area. Other things, such as environmental and nutritional services are also critical.

Vigorous leadership is critical. We need aggressive leaders who will channel the energy of the many active, but not yet organized people in the field who are pursuing strategies to improve rural health conditions.

The current leadership vacuum is truly discouraging.

Why is it that even now we can point to only a handful of states that have initiated programs to expand primary care services in rural areas?

Why it is that county officials prefer to get absorbed in the problems of potholes rather than of poor sanitation?

Why is it that Congressional committees have been reluctant to deal with rural health problems in a comprehensive way? And why is it that the Federal Government lacks an Office of Rural Health, where policy can be developed and implemented?

I think the time is ripe to change this atmosphere—to make it one of commitment rather than one of indifference. We're just beginning to see signs of a possible emergence of leadership and action. For example, last year, both Houses of Congress unanimously passed the first exclusively rural health measure—the Rural Health Clinic Services Act. It provides for payment of medical services furnished by nurse practitioners and physician assistants in rural health clinics. Besides meeting an urgent need, the Act promotes and legitimizes a new direction in the delivery of rural health care.

The simple premise of this law is that every American, regardless of the size of his or her community, should have a local entry point into the health care system, and that this care should be reimbursed—wherever necessary.

The model upon which the legislation is based is one that is increasingly evident in the more remote areas of rural America, and especially in the smallest communities within those areas.

Briefly, the model looks like this: A community clinic, staffed by a nurse practitioner or physician assistant, would provide basic, routine medical and other health services to people in the surrounding area. Some of these clinics—including many in Appalachia—are community owned and operated; others, like many in the Midwest, are satellites from physician practices in adjacent larger towns. Contact with physicians typically takes the form of continual phone communication and weekly physician visits.

The new law brings to the surface a question that few rural advocates have been willing to address: Does every community need immediate access to a physician? Is this an appropriate public policy to pursue? I've struggled with this question myself, especially whenever I'm approached by Iowans who feel their communities are desperate for a doctor.

It's very difficult to convince rural people that more physicians may not be the best solution to their delivery problems. It becomes especially difficult to do so, given the acknowledged inequities in physician distribution between urban and rural communities.

Available statistics, for example, show that nearly 90 percent of all non-Federal physicians are located in the nation's 300 major metropolitan counties, while 145 rural counties possess no doctor at all.

And if there's a single issue that brings rural people together, it's the issue of physician maldistribution. So a policy that moves us in a different direction may, in the short run, hamper efforts to organize around rural health issues.

In spite of this short-run risk, I'm convinced that some of our current efforts are mis-directed and perhaps even counter-productive. To put my theme in a few words, health manpower should not necessarily mean physician manpower.

I know that several arguments have been made against the model I propose:

That small communities deserve doctors as much as the suburbs do;

That non-physicians provide second-class care and thus place the health of their patients in jeopardy;

That physicians should be forced to practice in small towns if they can't be encouraged to do so voluntarily.

I'd like to take a few moments to consider these reservations concerning the use of health personnel other than physicians.

First, my remarks are directed at the problems in communities with critical shortages of health manpower. These tend to be small communities of fewer than 5,000 people. It is most appropriate and feasible for larger communities to attract physicians for primary care. In fact, my proposal is unworkable unless Federal health manpower policy promotes physician placement in medium-size rural communities. I shall return to this subject in a few minutes.

Second, around 80 percent of the problems that come to a physician's office are of the routine type that can be handled by a nurse. Typically, a patient sees a doctor for just a few minutes.

This system is most efficient, because it allows the doctor to concentrate on the more acute health problems. Routine problems can then be handled by others with the appropriate training and skills.

Is there any logical reason why the smallest towns and remote rural areas should need 24-hour a day, 7 day-a-week doctor availability, when a nurse practitioner or physician assistant could handle locally the bulk of the medical problems that arise?

Considered in terms of economics and health needs, the "physician for every town" concept is one that wastes scarce health resources. Of course, by the same token, there is no more reason why urban residents should have unnecessary access to physician care for most of their medical problems. Any Federal policy that encourages this is likewise misdirected.

Third, and my final point, is that rural areas would be better served, not worse served if they were to adopt this model. Are the people who live in those 145 doctorless

counties truly better off now, traveling many miles to receive physician care, than they'd be with access to a local health clinic, staffed by a nurse practitioner or physician assistant? I think not.

The nurse practitioner and physicians assistant professions abide by high standards of quality health care, with education and training requirements that are established at the State and national levels. No community should fear that the care furnished by these health personnel is inadequate, they must know their limits, but so must a general practitioner.

The key to the success of this model is that it requires a system of care with linkages built between the clinic, with the physician in an adjacent larger community, with the hospital, and with other forms of health services.

As long as there are adequate transportation services and emergency procedures, a patient in a small town should be just as confident of receiving all the care he needs—the same as the patient in the city who must cross town to enter a hospital or go to a physician's office.

Of course, an integral and necessary part of this model is the rural family practice physician who would work in the medium size rural town. He would be a member of a group practice, overseeing one or more small satellite clinics in the surrounding area. Federal health manpower policy must be directed toward the objective of producing more primary care physicians of this type. The University of Iowa College of Medicine, supported by federal funds, has an excellent program to promote primary care.

Starting in 1963—15 years ago—Federal health manpower efforts were directed at increasing the total number of physicians in this country. The hope behind this effort was to increase the supply of doctors and thereby produce a better distribution throughout the country.

These efforts succeeded beautifully in their main objective. However, although the physician-to-population ratio increased roughly by 20 percent between 1965 and 1975, the gap between urban and rural areas widened. Obviously, most of these new physicians have located in metropolitan areas.

The most recent health manpower legislation, enacted in 1976, began to focus the federal impetus toward combating geographic maldistribution. Unless federal policies are modified, there will be increasing reliance in the coming years upon such efforts as family practice residency programs, area health education centers, and the National Health Service Corps to get primary care physicians into rural areas.

I think the time has come to question the wisdom of this emphasis. We should take a particularly close look at the National Health Service Corps' potential for effectiveness.

The premise underlying the Corps is that young physicians will be more likely to establish private practices in rural areas if they are subsidized for two years by the federal government. The record of the Corps has been less than successful in attaining this goal. Moreover, I'm apprehensive about the future, when more and more medical students will face financial constraints, forcing them to opt for practice in the National Health Service Corps as a condition for receiving federal scholarships.

What will be the likely outcome of this occurrence, and how will it affect the situation in rural America?

First, we should not be optimistic about the projected increase of future Corps members going to rural areas. Most of this increase will likely be swallowed up by the newly-designated urban sites in inner-city neighborhoods, hospitals, and other institutions.

Second, I'm pessimistic about the risks of sending to rural areas young graduating physicians whose primary reason for practicing there is to fulfill a financial obligation. A rural community does not want a Corps doctor, if he is just marking time until he can move into a more lucrative urban or suburban practice.

The other federal programs, including training programs in family practice and primary care specialties, and the area health education centers program—which trains and supports all types of health personnel in rural areas—are effective and deserve additional federal support. Even these programs, however, fail to intervene at an early-enough stage in physican training.

The federal government should do all it can to assist those most likely to practice medicine in rural areas. However, we should realize that by the time a physician chooses a location, he or she may already be predisposed to an urban practice. This pre-disposition is based on both a selection process which determines who will attend medical schools, and an urban-oriented educational process within medical school.

We must ask the following questions:

Why aren't more high school students from rural areas expressing an interest in the medical profession?

Why aren't more college students from rural areas entering medical school? And

Why are so few medical schools acquainting students with rural practice?

These are the critical questions. By the time a physician is in residency, it may well be too late to ask why he or she isn't interested in being a family practice physician in Malvern, Iowa. We need to expose the Malvern High School student, the Iowa State undergraduate, and the University of Iowa Medical School student to rural care if we're really serious about getting doctors to rural areas.

Furthermore, strategies to increase the number of health professionals in rural America should not concentrate on personnel alone. We must place equal emphasis on promoting the type of environment in which a young physician would feel comfortable. Few graduating doctors, for example, are now willing to set up a new practice on their own in a small community.

The Federal Government does have the resources to help develop such health care delivery systems, into which the physician can enter and thrive. The largest effort is the Community Health Centers program, which supports approximately 500 centers in urban and rural medically underserved areas.

However, like many federal programs, funding of community health centers is heavily weighted toward urban areas. Despite the fact that three-fifths of this nation's medically underserved people reside in rural areas, less than one-third of the health center funds are channeled there. The recently-announced urban strategy of the Carter Administration will target an even greater proportion of these funds to urban areas.

Meanwhile, another federal program, the Health Underserved Rural Areas program, will be phased out soon unless Congress acts this year to continue it. It supports 88 demonstration projects in rural underserved counties.

To fight these inequities, I'm joining Senator Schweiker, ranking minority member of the Senate Health Subcommittee. Our purpose is to strengthen the program and to provide more equitable funding between rural and urban areas for the community health centers program.

We must also keep in mind that many of the most important decisions affecting future health manpower and resources in rural America will be made not in Washington, but rather by the regional health systems agencies; it's therefore essential for rural people to become active participants in the health planning process, thereby making it more relevant and responsive to rural needs.

At this point, 25 Senators are co-sponsoring a bill I introduced, S. 2487, which would provide more attention to rural health needs within the health planning process. In fact, Senator Kennedy's Health Subcommittee will hopefully include this bill as an amendment to health planning legislation being drafted this week. I spoke with Senator Kennedy about it last evening.

I need your support for these efforts; otherwise we will fail to achieve our common goals. As I learned last year through my experience with the Rural Health Clinic Service bill, grass roots pressure is absolutely essential to get results in Congress. This pressure is also needed at the State, county, and local levels. Rural voices will not be heard unless you organize; rural voices will be drowned out by others unless you actively pursue your objectives. I look forward to working with you to accomplish these objectives.

Thank you.●

## COMMENTARY OF G. W. BOLLENBACK ON DIETARY GOALS

● Mr. McGOVERN. Mr. President, in February 1977, the Select Committee on Nutrition and Human Needs published "Dietary Goals for the United States," which set forth prudent dietary recommendations for the general population based on current scientific knowledge. Throughout 1977 the select committee continued its investigation. In addition to hearings and staff research, the select committee solicited the opinions of many of our leading experts on human nutrition, as well as concerned health and industry leaders.

In November 1977, the select committee published, "Dietary Goals for the United States—Supplemental Views," which is 869 pages in length and contains actual comments received. Due to an oversight, the evaluation of the first edition of the dietary goals report by Dr. G. N. Bollenback, scientific director of the Sugar Association, Inc., was not included in the supplemental views report.

Therefore, I request that Dr. Bollenback's comments and pertinent sections on the consumption of refined and proccessed sugars from the second edition of "Dietary Goals for the United States," which was published by the select committee in December 1977, be printed in the RECORD.

The material follows:

DIETARY GOALS FOR THE UNITED STATES

The importance of nutrition to the American public is great. Thus, any document such as "Dietary Goals for the United States" should be composed as objectively and scientifically as possible.

In constructing the report the Committee Staff had access to a voluminous literature and any number of consultants. The Staff, in our opinion, could not be expected to sift available information and separate opinion from referenced fact without assistance. However, their scientific advisors, had they represented a proper balance of qualified personnel, should have been able to filter fact away from opinion and recommend that the Staff consult primary references to insure accuracy rather than rely on opinions, secondary references and inadmissable nonreferences such as newspaper articles. Use of all three of the latter are evident in the report.

Unfortunately, strong biases also surfaced in this report. These include those against the food processing industry, against sugar and in favor of so-called "natural" (unprocessed and unrefined) foods.

Indeed, the tenor of the rationales or explanation of goals strongly suggests that the goals were preconceived and the bases for them then developed by selecting appropriate materials and advice. This procedure seemed particularly evident in Goals 1 and 5, which deal with carbohydrates and sugar, our particular areas of expertise.

Unfortunately, too many people will read only the goals set out in the report. Too few will read the report. Even fewer will study it.

We have studied the report with particular attention to Goals 1 and 5. Numerous questions are provoked by the "explanation of goals. Goal 1," Pages 14–29. Further, the confusion evident in the rationale behind it (Pages 43–47) essentially self-destroys Goal 5.

As a preliminary comment, we would point out that in the Introduction of the printed report, Page 9, note is made of the "overconsumption" of fat, cholesterol, sugar, salt and alcohol in domestic diet being related to various diseases such as coronary heart disease, cancer, diabetes and cirrhosis of the liver. So far as sugar is concerned, there is no evidence that the amount of sugar consumed by the American public qualifies as "over-consumption." More important, there is no evidence that sugar bears a causal relationship, as implied on Page 9, to any of the diseases mentioned, while fat, cholesterol, salt and alcohol are all recognized as important risk factors for one or another of these diseases. Sugar belongs in different company.

On Pages 12–13 of the report where "U.S. Dietary Goals" and subsequent recommended changes in food selection are listed, one is left with the clear impression from Goal 5, "Reduce sugar consumption by about 40 percent to account for about 15 percent of total energy intake," and change in food selection 6, "Decrease consumption of sugar and foods high in sugar content," that the term sugar is meant to be read as sugar (sucrose), the product derived from sugar cane and sugar beets. This is further emphasized by the repetition of Goal 5 on Page 43 and the "Guide to Reducing Sugar Intake," Page 45.

However, Figure 1, Page 12, shows the current diet as having 24 percent sugar as an energy source. This figure, as arrived at by the Staff, refers to all sugars and not specifically sugar (sucrose). The impression given by Figure 1, namely, that our diet consists of 24 percent sugar (sucrose) is not only wrong, it essentially negates Goal 5.

Your attention is not drawn to that section of the printed report dealing with the "explanation of goals," Pages 14 ff. Detailing comments leads to inordinate complexity. We therefore offer our comments in a brief manner which can be expanded on if need be.

Goal 1. Increase carbohydrate consumption to account for approximately 55 to 60 percent of the energy (caloric) intake.

Use of the term "complex carbohydrates" to mean "fruits, vegetables and grain products" (Page 9) is an evident and questionable expansion of the word "starch" as used by Page and Friend (see, for instance, Figure 3, Page 15). "Starch," in this usage by Page and Friend was defined to mean grain products and vegetables (Sugars in Nutrition, Page 96; NFS–150, Nov. 1974). Apparently a documental home was needed for the purposes of introducing fruits in order to urge their increased usage and expanding the word "starch" to "complex carbohydrates" seemed useful for this purpose.

In building a case for Goal 1, putting the emphasis of increased consumption of fruits, vegetables and cereal grains ("complex carbohydrates") effectively buries issues of real importance.

The Drs. Connor are strongly referenced on Pages 17 and 18 in discussions on heart disease and diabetes. Rather than underlining increased consumption of complex carbohydrates, the Connors say in the reference cited that, "In the diabetic patient, as in the hypertriglyceridemic patient, adiposity is a chief cause of the problem. Thus, the total energy intake from all sources is important to control obesity."

The case for increasing fiber in the U.S. diet is at best based on very preliminary findings. As the report states on Page 18, fibers' role in the diet is a postulate of Burkitt's. The report's citation of Van Soest is highly appropriate: "It is probable that both kinds of fiber are important to nutrition, but relatively little is known about the properties of fiber and its role in nutrition." There is no good reason, then for including fiber in discussions at various points within the report other than to promote the case of increasing the consumption of fruits and vegetables. This case, as put, is not very convincing.

The section of the report dealing with "complex carbohydrates" as vitamin and mineral sources is primarily opinion and philosophy. The first paragraph on Page 20 is probably most descriptive of the situation. "It is important to note that knowledge of the full range of micro-nutrients has not been developed. For example, inquiry is only beginning into the function of elements such as chromium, selenium, vanadium and others, which appear to have important regulatory functions in and between cells. Furthermore, there is only limited knowledge of human requirements for most nutrients, as shown in Appendix C, prepared by the Department of Agriculture."

In suggesting "complex carbohydrates" increase as an aid in the treatment of obesity on Page 20, the report is again primarily offering opinion and overlooks the generally agreed on proposal that obesity will develop if caloric intake exceeds calorie outgo, no matter the source of energy.

The "Guide to increasing complex carbohydrate consumption," which starts on Page 20 of the report, deserves short comment. It is a most evident boost for "natural" versus processed and refined foods, curiously using fruits and vegetables, especially the potato as an example of a "refined" food. Presumably this was to completely exemplify "processed and refined" foods phrasing. The section is socio-economically unrealistic in not addressing such questions as the cost of fresh produce out of season, the shelf life of such produce under whatever storage conditions and the demand of the consumer for products convenient to her lifestyle.

On the whole, the "explanation" for establishing Goal 1 of the Dietary Goals has a very weak factual foundation. While one may not argue against increasing fruit, vegetable and cereal grain consumption, the rationale proposed in the report comes off as a promotion for "natural" versus processed and refined foods with little consideration for socio-economics. Further, in emphasizing such an increase the writers most effectively obscure such real issues as the importance of total caloric intake in obesity, the overpowering importance of obesity in heart disease and diabetes and the lack of proof of importance of fiber in the diet.

Goal 5. Reduce Sugar Consumption by about 40 percent to Account for about 15 percent of Total Energy Intake.

As noted before, in Figure 1, Page 12 of the Staff Report, the carbohydrate breakdown of the "current diet" into 22 percent complex carbohydrates and 24 percent sugar is apparently arrived at by multiplying 46 (percent carbohydrates) times the starch-sugar ratio for 1976 as found in Figure 3, Page 15 (47.1 percent starch 52.9 percent sugars).

The conversion of Page and Friend's term "starch" to "complex carbohydrates" might be tolerable even in the face of the liberal use of the term complex carbohydrates throughout the Report. However, Page and Friend leave no doubt that the term "sugars" is not "sugar" (implying sucrose), as shown in Figure 1 of the Staff Report, but includes "all sugar, that occurring naturally in food such as milk, fruit, syrups and honey as well as refined cane, beet and corn sugar" (NFS–150, Nov. 1974, Page 29). Page and Friend also state that sugar and syrups account for about two-thirds of the sugars. On this basis, sugar (sucrose) is less than 16 percent of the calorie content of the "current diet." This is equal to or less than the percent of sugar recommended as a dietary goal. We append USDA statistics concerning this point.

According to Page and Friend, lactose (from milk) and sugars in fruits each contribute about 3 percent to the 24 percent sugars (Sugars in Nutrition, Page 97). The residue is from other sources. All these figures are recognized as approximations. If, as anticipated, it is anathema to reduce sugars' content of the American diet by reducing lactose (milk) of sugars in fruits than the proposed reduction to the dietary goal remains as a reduction of sugar (sucrose) and syrups from beet, cane and corn although the Staff is obviously restricting their viewpoint to sucrose.

Let us note at this point that we are aware that in the time between the issuance of the original Committee report (January 1977) and the release of the final printed copy (February 1977) there was an admission, tacit and apparently reluctant, on the part of the architects of the report that they had seriously misapplied USDA data. Some adjustments were made.

One might suggest that such adjustments in proceeding from the original to final form of the report were an acknowledgment of an error or oversight. Such a suggestion seems invalid because the final report retains many statements contained in the original that leave no doubt that sugar as sucrose is being selectively treated.

It is perfectly obvious that the writers and advisors of the report, despite briefly and obscurely acknowledging misinterpretation of published data, have thought to construct such a case against sugar (sucrose) (not sugars) that a 40 percent reduction (a dietary goal) is reasonable and well founded. Such manipulations are reprehensible from a scientific point of view. To those not versed in the details treated they can only lead to blind acceptance or complete confusion.

A prime example of promoting, and perhaps reflecting, confusion is in the printed version of the report, Pages 43–44, where a case against current levels of sugar usage is presumed to be built. Here there is a complete interchange of various definitions of "increase use of sugar" or its equivalent. The definitions are:

1. Increase in per-capita consumption of sugar (sucrose);

2. Increase in the ratio of sugars to starch in the national food supply;

3. Increase in the ratio of use of sugar (sucrose) in food products and beverages to use in direct household consumption.

A look at the facts behind these three different definitions of sugar (sucrose) use shows that (1) there have been no significant increases in sugar uses, certainly over the past 50 years. Per-capita consumption has been relatively steady. (2) The shift in type of carbohydrate in the national diet has been primarily due to a decrease in starch consumption with sugar staying constant. (3) The shift of major sugar user from household to food processor is most probably a result of increased affluence with the consequent reduction in home baking, canning, etc., and increased call for convenience items.

In discussing details of the "impact on health of these increase in sugar use . . ." (Page 44) (without recognizing there are no increases) the Staff uses as a prime reference Sugars in Nutrition. This is a good secondary reference source. The other references in this section are non-reference newspaper articles and one is appalled at the use of the New York Times and Los Angeles Times as sources of reliable scientific data.

One can add to this observation that of the references under Goal 5 only Dr. Connor can be considered as being objective. Drs. Cohen, Mayer and Yudkin are so outspokenly anti-sugar that an unbalanced presentation and consequent foundation for establishing Goal 5 had to be a foregone conclusion.

In the specific section on Goal 5, Pages 43–47, many important references, which could have given balance to the discussion, are missing. These include:

1. AER Report No. 48 which discusses factors which may influence the decline in the proportion of sugar delivered directly to households. (Ref. 1)

2. Sugar Reports 241 covering influences on the distribution of nutritive sweeteners. (Ref. 2)

3. The HANES report and the Ten-State Survey which describe nutritional deficiencies in various segments of the U.S. population. (Ref. 3)

4. A good biochem textbook explaining the use of thiamin in carbohydrate metabolism.

5. Articles by Grande, Walker, Keys and others which so discredit Yudkin as to make the citation of his work a severe handicap to the report. (Ref. 4)

6. Diabetes reports by the National Council on Diabetes which describe the major risk factors for diabetes. (Ref. 5)

7. Articles by Medalie on diabetes epidemiology which discount Cohen's work and hypotheses. (Ref. 6)

8. Fogarty Center sponsored conferences on obesity reporting the status of thinking in this field. (Ref. 7)

9. Programs published by the NIDR which are a much more reliable and authoritative information source on caries than Mayer. (Ref. 8)

10. Beverage Industry 1976–1977 Annual Manual which gives a complete list of beverages consumed and not a selected few. (Ref. 9)

11. NFS–156, May 1976, which points out that decreased milk consumption can be related to a decreased proportion of children. (Ref. 10)

The most glaring omission of a reference so far as sugar is concerned is the FASEB report prepared for the FDA in which the health aspects of sucrose are evaluated. The conclusions in this report are

"1. Reasonable evidence exists that sucrose is a contributor to the formation of dental caries when used at the levels that are now current and in the manner now practiced.

"2. Other than the contribution made to dental caries, there is no clear evidence in the available information on sucrose that demonstrates other hazards to the public when used at the levels that are now current and in the manner now practiced. However, it is not possible to determine without additional data, whether an increase in sugar consumption—that would result if there were a significant increase in the total of sucrose, corn sugar, corn syrup, and invert sugar, added to foods—would constitute a dietary hazards."

In the face of this mountain of untapped resources, Goal 5 has no foundation whatsoever in the Dietary Goals for the U.S.

The evident imbalance serving as bases for Goals 1 and 5 provoke the natural reluctance to accept other parts of the report. They also provoke the suspicion that a proper balance of consultants was as sorely missing in helping to construct this report as was a proper balance of reference material.

Finally, there is much in the report that implies the food industry is ripping off the consumer (explanation of Goals 1 and 5). To us this attitude reflects a remarkable lack of understanding of marketing, supply and demand and the necessity for maintaining a continuing supply of food.

It also suggests the surfacing of that perpetual cry of people for a simple unqualified answer to a complex question (e.g., fiber and gastrointestinal diseases). This is a call for black or white, an ideal but unrealistic situation that requires little thinking. Living is primarily gray, requires thoughtful problem solving and does not often produce panaceas. It is more than unfair to suggest otherwise to the consumer.

Certainly these proposed dietary goals must be reconsidered with the assistance of objectivity, reason and practicality. Certainly they must be reconsidered with the help of a balanced group of scientific advisors and data. And most certainly they must be reformulated with a minimum of bias and in the absence of preconception, both of which are clearly evident in the current report.

GOAL NO. 2

Change: "Increase carbohydrate consumption to account for 55–60 percent of the energy (caloric) intake."

To: "Increase the consumption of complex carbohydrates and 'naturally occurring' sugars from about 28 percent of energy intake to about 48 percent of energy intake."

The intent of this goal is primarily to increase the consumption of complex carbohydrates as indicated in the food selection recommendation, "Increase consumption of fruits, vegetables and whole grains." In addition, "naturally occurring" sugars are obtained from fruits, vegetables and whole grains, as well as from milk products. The wording of the goal has been altered to provide greater accuracy and clarity.

GOAL NO. 3

Change: "Reduce sugar consumption by about 40 percent to account for about 15 percent of total energy intake."

To: "Reduce the consumption of refined and processed sugars by about 45 percent to account for about 10 percent of total energy intake."

In reviewing the responses pertaining to the sugar recommendation in this report, it was clear to the Select Committee that there needed to be more preciseness provided to the consumer than was available by solely using the generic term, sugar. In particular, while the text described the various sugars, the graph on page 12 in the 1st Edition comparing the current American diet with the

recommended dietary goals lumped all sugars together under the generic term sugar.

The new graph (p. 5) will break down the current consumption of 24 percent of total caloric intake from sugars into: (1) 6 percent occurring naturally in fruits, vegetables and milk products; and (2) 18 percent refined (cane and beet) and processed (corn sugar, syrups, molasses and honey).

The recommended dietary goal is adjusted to 10 percent of total caloric intake from refined and processed sugars. The specific amount of sugars occurring naturally in foods that a person consumes will be dependent on his or her selection of foods in the category of complex carbohydrates and "naturally occurring" sugars.

Goal 3. Reduce the consumption of refined and other processed sugars by about 45 percent to account for about 10 percent of total energy intake.

Figure 3 (p. 12) from an article by Louise Page and Berta Friend, of the U.S. Department of Agriculture, appearing in "Sugars in Nutrition" published by the Nutrition Foundation, shows that various kinds of sugar accounted for only 32 percent of total carbohydrate consumption in the period 1909 to 1913. However, by 1976, sugars had replaced starch and other complex carbohydrates, as the predominate carbohydrate source. Thus the consumption of all types of sugars has increased from 18 percent of total caloric intake to approximately 24 percent, and the consumption of refined sugar (cane and beet) has increased from 12 percent of total caloric intake to approximately 18 percent. Figure 8 indicates per capita consumption in pounds of refined and processed sugars since 1875, and Table 7 details per capita consumption of caloric sweeteners, 1960–76.

[1] U.S. Department of Agriculture, Sugar and Sweetener Report, SSR vol. 2, February 1977.
[2] Dry basis. Recent corn sweetener consumption may be understated due to incomplete data.
[3] Preliminary.
[4] Estimate.

The largest components in the sugars category are refined sugar (cane and beet), which accounts for 14 percent of total calories, and processed sugars (corn sugar, syrups, molasses and honey), which account for 4 percent of total calories. The other 6 percent of total calories consumed as sugar are obtained from fruit, vegetables and milk products.

The greatest impetus for the increased use of sugars apparently has come from the addition of refined sugar (cane and beet) to processed foods. Figure 9, also from the Page/Friend article, shows the dramatic increase in the use of refined sugar added outside the control of the consumer.

Page and Friend report:

"Use in processed food products and beverages has increased more than threefold from nearly 20 to 70 lbs., while household purchase has dropped one-half from a little more than 50 to about 25 lb. Currently, food products and beverages account for more than two-thirds of the refined sugar consumed—70 lb. out of a little over 100 lb. Moreover, beverages now comprise the largest single industry use of refined sugar, accounting for over one-fifth of the total refined sugar in the United States diet, or nearly 23 lb. Furthermore, the amount used in beverages has increased nearly sevenfold since early in the century when 3½ lb./person/year was used in these products. Use of refined sugar in beverages is now second only to household use."

Table 8, provided by Page and Friend, shows changes in refined sugar used in this century:

TABLE 8.—REFINED SUGAR, ESTIMATED PER CAPITA CONSUMPTION BY TYPE OF USE, SELECTED PERIODS, 1909-13 TO 1971 [1]

[In pounds]

| Type of use | 1909–13 | 1925–29 | 1935–39 | 1947–49 | 1957–59 | 1965 | 1971 (preliminary) |
|---|---|---|---|---|---|---|---|
| In processed foods: | | | | | | | |
| Cereal and bakery products | 4.5 | 7.7 | 9.7 | 12.9 | 15.4 | 15.6 | 17.6 |
| Confectionery products | 6.5 | 8.0 | 8.2 | 9.8 | 9.6 | 10.4 | 11.0 |
| Processed fruits and vegetables [2] | 3.0 | 4.6 | 4.4 | 9.0 | 9.8 | 9.5 | 10.4 |
| Dairy products | 1.5 | 2.3 | 2.4 | 4.6 | 4.9 | 5.3 | 5.8 |
| Other food products [3] | .3 | .7 | 1.2 | 1.5 | 1.7 | 2.5 | 2.6 |
| Total food products | 15.8 | 23.4 | 25.9 | 37.8 | 41.4 | 43.4 | 47.4 |
| Beverages (largely in soft drinks) | 3.5 | 5.0 | 5.2 | 10.6 | 12.6 | 16.9 | 22.8 |
| Total processed food and beverages | 19.3 | 28.4 | 31.1 | 48.4 | 54.0 | 60.2 | 70.2 |
| Other food uses: | | | | | | | |
| Eating and drinking places [4] | 4.5 | 5.7 | 6.3 | 7.7 | 7.3 | 6.2 | 5.5 |
| Household uses [5] | 52.1 | 65.0 | 58.8 | 37.4 | 33.1 | 28.2 | 24.7 |
| Institutional and other uses [6] | .5 | .9 | .9 | 1.3 | 1.0 | 1.4 | 1.1 |
| Total | 57.1 | 71.6 | 66.0 | 46.4 | 41.4 | 35.8 | 31.3 |
| Total food use | 76.4 | 100.0 | 97.1 | 94.8 | 95.4 | 96.0 | 101.5 |
| Nonfood use [7] | .3 | .4 | .4 | .4 | .7 | .6 | .9 |
| Total consumption | 76.7 | 100.4 | 97.5 | 95.2 | 96.1 | 96.6 | 102.4 |

[1] Prepared by Food Consumption Section, Economic Research Service, U.S. Department of Agriculture.
[2] Canned, bottled, and frozen foods (processed fruit and vegetable products); jams, jellies, and preserves.
[3] Includes miscellaneous food uses such as meat curing, and syrup blending.
[4] Includes hotels, motels, restaurants, cafeterias, and other eating and drinking establishments.
[5] Household use assumed synonymous with deliveries in consumer-sized packages (less than 50 lb).
[6] Largely for military use.
[7] Includes use in pharmaceuticals, tobacco, and other nonfood use.

Source: "Sugars in Nutrition," Levels of Uses of Sugar in the United States, L. Page, B. Friend 1974.

This increased use of refined sugar is traceable in large part to the desire of food manufacturers to create unique food products with a competitive edge. Just recently, for example, Nabisco introduced an Oreo cookie with double the amount of sugar filling. Robert Buzzell and Robert Nourse in "Product Innovation in Food Processing" report that the addition of sugar to cereal in 1948 was the direct cause of recovery of slumping cereal sales. Since then, the varieties of sweetened cereals have grown dramatically. The profusion of varieties of cereals, soft drinks and other products represent efforts to protect market shares.

DENTAL DISEASE

Sugars, particularly foods that contain sticky forms of refined and processed sugars (taffy-like candies, sugar-coated cereals, granolas, raisins and other dried fruits) have been implicated in tooth decay, which may be the most widespread disease related to nutrition. The consumption of sugars can lead to cavities (caries) in children and adults, and gum disease and eventual loss of teeth (periodontal disease) in adults. Dr. Mayer, citing a government survey, said in the *Times* article:

"In nations of the Far East, where sugar intake per person per year ranged (at the time) from 12 to 32 pounds, the national averages for decayed, missing or filled teeth in adults 20 to 24 years old ran from 0.9 to 5. By contrast, in South American nations, where sugar intake was high (44 to 88 pounds per person annually) the averages for decayed, missing or filled teeth in the same age group ran from 8.4 to 12.6. As for the United States today, it has been estimated that 98 percent of American children have some tooth decay; by age 55 about half of the population of this country have no teeth."

NUTRIENT DANGER

The most important problem, perhaps, is the danger in displacing complex carbohydrates which are high in micro-nutrients, with refined sugar, which is essentially an energy source offering little other nutritional value. This not only increases the potential for depriving the body of essential micro-nutrients but, noted Dr. Jean Mayer in an article in the New York Times Magazine in June 1976, sugar calories may actually increase the bodys need for certain vitamins:

(Sugar calories) increase requirements for certain vitamins, like thiamin, which are needed (for the body) to metabolize carbohydrates. They may increase the need for the trace mineral, chromium, as well.

Thus, a greater burden is placed on the other components of the diet to contribute all the necessary nutrients—other foods need to show extraordinary nutrient density to compensate for the emptiness of the sugar calories.

DIABETES

The role of refined sugar in the development of diabetes is unclear, largely because the cause or causes of diabetes are still unknown. Many researchers who have been before the Select Committee believe there is no relationship between the level of refined sugar consumption and the occurrence of diabetes.

On the other hand there are a few researchers who believe there is a connection between the increasingly larger proportion of refined sugar calories in the diet and the higher incidence of diabetes. Dr. A. M. Cohen and associates report in "Sugars in Nutrition" that rats with a genetic predisposition to diabetes will develop the disease when exposed to high refined sugar diets and that they can be prevented from contracting it with a sugar-free diet. It is not yet known whether or not some humans may have a genetic tendency comparable to that reported by Dr. Cohen in his rat experiments.

Dr. Mayer noted in an article in the Los Angeles Times in October 1975, that several epidemiological studies indicate a connection between high refined sugar use and diabetes. For example, Yemenite Jewish immigrants to Israel had a low incidence of diabetes until they had consumed a Westernized diet high in sugar for several years. However, other simultaneous changes such as an increased energy intake might also have contributed to the increased incidence of diabetes among these Yemenites.

These considerations have led to a number of governmental and professional health organizations in the United States, and other nations, cited earlier, to recommend a general decrease in sugar consumption (Appendix B).

In "Sugars in Nutrition," Dr. Arvid Wretlind, of the Nutrition Unit, Karolinska Institutet, Stockholm, writing about refined sugar usage in Europe, suggests that sugar consumption be reduced to 10 percent of calories:

"In Europe there has been, and in some countries still is, a continuous increase in sugar consumption. In some of these countries the sugar content of the diet has reached a level between 15 and 18 percent of calories. The increase in sugar consumption, followed by an increased fat intake will, generally speaking, result in a decreased content of essential nutrients and in a reduced consumption of other foods which contain not only energy but also valuable nutrients. The conclusion is that the amount of sugar in a moderate diet should be moderate. A maximum level of 10. cal/percent is proposed."

Reducing the consumption of refined and processed sugars to about 10 percent of caloric intake is an equally reasonable goal for the United States, and would return the consumption of such sugars to a point slightly below that of the early 1900's.

GUIDE TO REDUCING THE INTAKE OF REFINED AND PROCESSED SUGARS

In reviewing ways of cutting the consumption of refined and processed sugars, the most obvious item for general reduction is soft drinks. Total elimination of soft drinks from the diet, for many people, would bring at least half the recommended reduction in the consumption of such sugars.

Soft drink consumption in the United States doubled between 1960 and 1975, rising from 13.6 gallons a year to 27.6, as shown in Table 9 from the Department of Agriculture "Sugar and Sweetener Report," September 1976. This translates into 221 sixteen-ounce cans and 21.5 pounds of refined and processed sugar a year.

TABLE 9.—SOFT DRINK SALES, PER CAPITA CONSUMPTION AND AMOUNTS AND VALUE OF SUGAR USED IN MANUFACTURE, 1960–75

| | Sales (millions) | Per capita soft drink consumption | | Per capita sugar consumption (pounds) | Value of sugar (millions) |
|---|---|---|---|---|---|
| | | 16 oz | Gallons | | |
| Year: | | | | | |
| 1960 | $1,857 | 109 | 13.6 | 11.3 | $188 |
| 1965 | 3,195 | 154 | 19.2 | 15.2 | 274 |
| 1970 | 5,016 | 193 | 24.1 | 19.2 | 420 |
| 1975 | 9,426 | 221 | 27.6 | 21.5 | 1,218 |

Source: Sugar and Sweetener Report, vol. 1, No. 8, September 1976 Economic Research Service, U.S. Department of Agriculture.

This increase has evidently been made at the expense of increases in some more nutritious beverages. As Table 10 shows, between 1962 and 1975, soft drinks became the second most highly consumed beverage, displacing milk. Currently, soft drinks compete with coffee for first place.

TABLE 10.—TRENDS IN BEVERAGE CONSUMPTION

[Gallons, per capita, per year]

| Beverage | 1962 [1] | 1975 |
|---|---|---|
| Coffee | 40.4 | 31.6 |
| Milk | 25.6 | 24.4 |
| Soft drinks | 16.8 | 31.4 |
| Juices | 4.3 | 6.2 |

[1] Earliest data available.

Another source of concern is the caffeine in cola soft drinks, which account for about 65 percent of total drink consumption (at least one non-cola also contains caffeine). Medical World News, of January 1976, reports that suspected connections between caffeine and ulcers, heart disease and bladder cancer have been investigated but that evidence is not strong enough to cause caffeine to be adjudged a risk factor in these diseases. There have been findings of withdrawal symptoms of headache, nervousness and irritability among subjects deprived of normal coffee doses as well as similar symptoms among those who may have ingested too much caffeine. The report said colas are of special concern since they are the major caffeine source for most children.

(Doctors particularly pediatricians) have reported signs—including irritability, headaches, and nervousness—of what has come to be known as "caffeinism" among cola-guzzling youngsters whose total caffeine intake (30 mg per 8-oz. can) may be boosted by cocoa or hot chocolate (up to 50 mg per 5-oz. cup) and chocolate bars (25 mg).

Reduction in soft drink consumption also offers the advantage of reducing consumption of non-nutritive additives, colors, flavors, and preservatives.

The second major area for consideration in cutting the consumption of refined and processed sugars is baked goods, reported by Page and Friend to be the second highest source of sugar use. In this area, as in others, home preparation provides greater control over refined and processed sugars, as well as fat use.

Finally, it is important to remember, that refined and processed sugars have been added to a wide range of products. Although labeling regulations do not currently require the content of the different sugars to be described, if some kind of sugar (corn syrup, fructose sugar, dextrose, honey, etc.) is listed as one of the first two or three ingredients, then one can reasonably assume that there is a lot of sugar added to the product. As noted earlier, use of fresh food enables greater protection against hidden refined and processed sugars.●

## BYELORUSSIAN INDEPENDENCE DAY

● Mr. WILLIAMS. Mr. President, I would like to take a few minutes to call attention to a day of great significance for Americans of Byelorussian descent. On March 25, 1978, Byelorussians throughout the world observed the 60th anniversary of the proclamation of independence for the Byelorussian Democratic Republic.

The chaotic conditions in Russia which resulted from the turmoil of the First World War allowed Byelorussian nationhood to bloom for the first time. After having suffered for centuries under the yoke of czarist oppression, the Byelorussian people. through their freely elected representatives in the First All-Byelorussian Congress, established the Byelorussian Democratic Republic on March 25, 1918. The republic quickly began functioning as a genuine national government and moved to revitalize an economy devastated by war.

This flowering of Byelorussian nationhood, however, proved to be tragically short. In callous disregard of the right of national self-determination, the Bolsheviks in 1919 invaded Byelorussia, eventually settling for partial control of Byelorussia after a partition of that country with Poland. By the end of the

Second World War, the Soviet Union had extended its control over all of Byelorussia.

The almost 60 years of Soviet control over Byelorussia have been marked by a continuous policy of forced Russification. Byelorussian intellectuals were purged in the interests of ideological purity, and millions of Byelorussian peasants were either deported or executed in the process of forced collectivization. Moreover, this campaign of cultural genocide is not a thing of the past. Soviet officials maintain their stranglehold over all aspects of Byelorussian intellectual, social, and cultural life today.

In spite of the many years of Soviet oppression, the spirit of the Byelorussian people and their desire for independence remains strong and unbroken. Mr. President, the 60th anniversary of Byelorussian independence is an occasion for Americans to join all other freedom loving people of the world in expressing our continuing admiration and support for the struggle of the courageous Byelorussian people.●

## H.R. 8423—THE END STAGE RENAL DISEASE BILL

● Mr. DOLE. Mr. President, I feel that the end stage renal disease legislation presented yesterday for your consideration is a most valuable contribution to the field of health care. It attempts to create a program that will be responsive to the needs of those who depend on it for survival, as well as insure that our program funds are used in a cost effective manner.

### RISING COSTS

The medicare end stage renal disease program has given hope to thousands of individuals. It has also protected them from possible financial disaster caused by the prohibitive costs of dialysis and transplantation. However, problems do exist: The cost of the Federal Government has increased at a faster rate than had been forecast. Current estimates by the department indicate that the cost of the program in fiscal year 1978 will be $0.9 billion and will continue to rise to an anticipated $3.6 billion in 1987. Our concern has been to determine ways to reduce costs without placing the patient's welfare in jeopardy. The increase in the use of home dialysis is a step toward solving this problem.

### HOME DIALYSIS

The cost of home dialysis is considerably lower than that of institutional dialysis after the first year. Moreover, home dialysis enables the patient to build dialysis treatments around his/her life rather than building his/her life around dialysis. This is a most important aspect in the treatment of any major illness. The legislation we are presenting removes the fiscal disincentives to home dialysis that existed previously. Our intent was not to mandate one form of treatment over another, but rather to remove deterrents. The choice between home dialysis or institutional dialysis clearly remains that of the patient and the physician. In addition, it had become necessary to reexamine our method of reimbursing dialysis units, the coverage we provide to transplant patients, as well as other program issues. I believe our bill meets that need.

### CONCLUSION

End stage renal disease is a frightening, lifelong condition for a great number of people. This bill will do much to improve our assistance to these individuals. I thank my colleagues for their support of this legislation, and I thank the distinguished Senator from Georgia (Mr. TALMADGE) for his work and leadership in this area.●

## REGULATORY REFORM

● Mr. CANNON. Mr. President, there are a number of myths about what will happen to the air transportation system should regulatory reform legislation be enacted. These myths are given a great deal of attention for many of them foretell the destruction of that industry. One of the most prevalent of these myths is that if S. 2493 is passed, small communities around the country will experience a mass exodus of their air carriers so that more lucrative routes may be flown, leaving those communities without air service. Like most myths that preach destruction, people become afraid and that fear makes the truth about the current system and the truth about this legislation that much harder to hear. But the voices of those who have experienced the kind of poor service to communities under the present system and those who have studied carefully this legislation are not silenced. A number of newspaper editorials have come to my attention and I would like to read to you what people around the country are saying about the present system and about regulatory reform.

An editorial appearing in the New York Times points to the fallacy in the argument that small- and medium-sized communities will lose service under a less regulated environment:

> The strongest political case against reform concerns the service to small cities along lightly booked routes. Airlines contend they serve such cities in return for the healthy profits they garner on major routes. A study by the Department of Transportation discovered, however, that only 29 of the 394 cities with scheduled flights would lose by the test of profitability.

The notion that airlines pay for their unprofitable routes from revenues generated by lucrative markets bespeaks a magnanimity uncharacteristic of any profit-oriented enterprise. Futhermore, the fact of internal cross subsidy in the airline industry is not fully substantiated. Looking at the traffic generated by one community in isolation, the service may not seem profitable. But these communities provide valuable feeder traffic to the airlines which makes the community a valuable part of the carrier's route structure and a key factor in that carrier's profitability statement.

In addition, those communities that cannot generate enough traffic to make service financially rewarding are served by providing subsidy to the airlines. Today's subsidy system is appalling for it awards subsidy not on what the community's needs are but on the needs of the carrier. In another editorial appearing in the Ohio Press, the myth of good service to small communities under the present system is exploded:

> One of the most alarming arguments raised by the airlines against deregulation is that it would mean the loss of service to small communities. But two volumes recently published by the American Enterprise Institute argue that just the opposite will occur—that a reduction in regulation will eventually lead to better service for small communities.
>
> In any event, small communities are not currently being protected by the CAB. In the last 16 years, the CAB allowed airlines to drop service to 175 communities.
>
> In addition, the new legislation guarantees that every community now receiving air service will continue to have it for at least 10 years, even if federal subsidies are necessary.

It is clear from these editorials and others like it that not only will communities not lose service under this bill, but that communities will be better served as a result of this legislation. I ask unanimous consent that these editorials be printed in the RECORD.

The editorials follow:

[From the New York Times, Feb. 28, 1977]

MAKING THE FRIENDLY SKIES MORE FRIENDLY

New York to Los Angeles by air for $89? World Airways wants to offer scheduled service at that price, but the Civil Aeronautics Board won't allow it. Similar bargains would be available between other cities, were it not for Federal regulation that chokes off airline competition. Don't take our word. Ask the General Accounting Office, which estimated last week that competitive pricing could save passengers nearly $2 billion a year.

Most major air carriers are unhappy with that report and the support for regulatory reform that has been building in the past few years. Under current law, the aeronautics board sets fares and restricts the number of companies flying each route. Such regulation is necessary, the airlines argue, to insure fair profits and maintain service to smaller communities. If fares were determined by the free market and routes were opened to all comers, the big carriers would drive small fry from the skies through cutthroat pricing, and dozens of cities would lose scheduled flights altogether.

The airlines are right; hefty fares haven't meant hefty profits. Competition over frequency of service and myriad frills—the only competition now permitted—has frittered away potential earnings. Travelers can now choose among six nonstop flights from New York to Los Angeles between 4 and 6 P.M., listen to nine channels of stereo, and expect to find plenty of empty seats nearby to stow their briefcases—but it costs them $100 more than World Airways wants to charge.

The airlines may or may not be correct that weak carriers would lose in unbridled competition. Lower fares are expected to increase airline use greatly—deregulation in Texas and California confirms this—so lines with half-empty jumbos may actually benefit the most. But even if competition creates distress for some companies, that's hardly reason to extort consumer dollars to keep them in business.

The strongest political case against reform concerns the service to small cities along lightly booked routes. Airlines contend they serve such cities in return for the healthy profits they garner on major routes. A study by the Department of Transportation discovered, however, that only 29 of the 394 cities with scheduled flights would lose by the test of profitability. Economists wonder whether the general flying public has much stake in retaining routes that can't pay their

own way. But even if it is necessary to sustain such routes, direct subsidies would be a much cheaper means to the desired destination.

The case for business-as-usual at the aeronautics board has collapsed under the weight of common sense and consumer politics. Senators Kennedy and Cannon are sponsoring legislation that would open up domestic fares and routes, putting the burden on the airlines to justify further restrictions. With the promised White House support, some version of the Kennedy-Cannon plan is likely to become law this year.

Much less certain is the time when travelers will find reform translated into cash. The new law would not abolish the aeronautics board; it would only require it to encourage competition. A hostile board could sabotage reform for years. But three of five board seats fall vacant this spring—a majority; thus the Administration's appointees will have as much to say about future air fares as the Congress. Mr. Carter has promised to get Government out of places it does not belong. This is a good place to begin.

---

[From the Cleveland Press, Aug. 31, 1977]

PLANE FARES SHOULD BAIL OUT

(By Marianne Means)

If you are dreaming on a trip to Europe, you must be delighted by the trans-Atlantic air-fare war.

Trans World Airlines and Pan American, scared by a new foreign budget airline, have suddenly found they can fly round-trip passengers overseas for roughly $250 less than they are now charging for their basic excursion plan, which in turn is cheaper than their regular fare.

The Civil Aeronautics Board must approve the new rates, and there is considerable confusion about how much is actually saved, because the airlines deliberately offer a dazzling array of travel arrangements and costs, depending upon how much inconvenience one is prepared to tolerate.

But the airfare war may be the final push needed to get Congress to substantially reduce federal regulation of the airline industry, for it tends to undermine the pitiful complaints of airline executives that without CAB's rigid protection they would face bankruptcy from the low prices which would result from the new competitive pressures.

President Carter is pushing a measure to deregulate the airlines and congressional momentum for the legislation appears to be growing. It would give carriers more discretion to set their own fares and abandon unprofitable markets, and make it easier for new carriers to enter the field.

The airlines would have the freedom to lower their fares by as much as 35% and raise them as much as 10%, but only on routes on which there is competition.

The General Accounting Office has estimated that airline fares could be $1.4 to $1.8 billion lower each year with greater competition.

The CAB has received 79 applications for charters from new airline hopefuls and rejected everyone. The largest four or five trunk carriers in recent years have controlled almost 70% of the air transportation industry.

One of the most alarming arguments raised by the airlines against deregulation is that it would mean the loss of service to small communities. But two volumes recently published by the American Enterprise Institute argue that just the opposite will occur—that a reduction in regulation will eventually lead to better service for small communities.

In any event, small communities are not currently being protected by the CAB. In the last 16 years, the CAB allowed airlines to drop service to 175 communities.

In addition, the new legislation guarantees that every community now receiving air service will continue to have it for at least 10 years, even if federal subsidies are necessary.

Airline regulatory reform, and the lower fares it promises, has been warming up on the apron long enough. It's time that the reform took off. We travelers on limited budgets are eagerly waiting.●

---

## UNITED STATES LOSES $43 BILLION ANNUALLY TO ALCOHOLISM; PUBLIC AWARENESS AND ACTION KEYS TO SOLUTION

● Mr. RANDOLPH. Mr. President, America faces a serious alcohol problem. Almost daily, the public is reminded of a society fueled by alcohol in all facets of the media, even in the comic strips. Within the past decade, the Federal Government created a National Institute on Alcohol Abuse and Alcoholism to assume needed leadership in this complex and serious societal problem.

In its latest report to the Congress, the institute revealed that the Nation loses almost $43 billion annually to the alcoholism problem. Almost $20 billion of that enormous figure is a result of lost production, and another $13 billion going to health care costs.

Dr. Morris E. Chafetz, president of the Health Education Foundation, recently posed a critical question. He asked: "Does America have to be Alcoholic?" Dr. Chafetz presents a searching analysis of the scope of the problem and possible ways to ameliorate it, in an address before the Commonwealth Club of San Francisco.

Mr. President, I ask that the cogent counsel of Dr. Chafetz on one of the major behaviorial problems of our society, be printed in the RECORD.

The address follows:

DOES AMERICA HAVE TO BE ALCOHOLIC?

(By Morris E. Chafetz, M.D.)

There is no question that the United States is a country with a serious alcohol problem. Contemporary publications raise some aspect of the alcoholic issue so frequently that business, government, the family—all facets of American society are intensely aware of the problem of alcoholism and alcohol abuse.

The federal government within this present decade was forced to create a new Institute—The National Institute on Alcohol Abuse and Alcoholism—to assume the leadership of this complex and serious societal problem. The Third Report to the Congress on Alcohol and Health reveals that the Nation loses almost $42 billion dollars annually to the alcoholism problem. Almost $20 billion of that enormous figure is due to lost production, while another $13 billion is spent on health care costs.

Alcoholism and alcohol abuse are without a doubt serious problems for the American people. But I did not come across this continent to San Francisco to overwhelm you with the frightening facts of yet another problem. It is true that some 10 million Americans do have an alcoholic problem; we are, therefore, considered to be an alcoholic nation. But serious and important as that fact is, we will not make the progress I will propose to you today by lamenting that fact. For it is my contention that, although we are indeed an alcoholic nation, we have no need to be so. I shall develop my thesis for finally coming to grips with this issue by hopefully developing for you what I consider a practical and obvious way of preventing many of our national alcohol problems by first showing you how we have created a system which creates alcoholic victims and how that system sustains them as alcoholic victims.

Let us begin our discussion with an examination of how people are diagnosed as alcoholic by professionals and what it can reveal to us. In a careful study of physicians—first-rate physicians—we found that they would tend not to make the diagnosis of alcoholism (in spite of overwhelming evidence to its presence) in patients if the following facts pertained:

If the person is married.

If the person is gainfully employed.

If the person has health insurance.

If the person sought help for an alcohol problem voluntarily.

If the person is accompanied by a member of the family.

If the person's drinking pattern at all approximates that of the doctor doing the diagnosing.

It does not require great scientific wisdom to quickly see that these scientifically derived findings show us that these physicians used the image of the skid row derelict person in their minds when they made the diagnosis of alcoholism. (I might add, parenthetically, that when they were interviewed later about their attitudes and perceptions of alcoholism, they readily stated that alcoholism could occur in any socio-economic group. But when they operated as diagnosticians, it was the skid row image which was operational; not their stated intellectual attitudes. This is living proof again that when it comes to alcoholic people, a wide gap exists between what we say and how we behave toward them.)

Now, I would be the first to confess that epidemiologic studies in alcoholism leave something to be desired. But no researcher or clinician in this field that I know contends that derelict alcoholics makes up any more than 3-5 percent of the total alcoholic population of this Nation. Therefore, ladies and gentlemen, carrying this finding one step further, 95 to 97 percent of the alcoholic people of this Nation go unrecognized and therefore untreated until they more nearly approximate the condition of the skid row alcoholic. A skid row alcoholic is a condition in which all the economic, physical, social and emotional resources that we all require to adapt to life and to recover from any illness, have been dissipated. It would be equivalent to the circumstances in cancer care wherein no one would recognize or treat cancer until it was widely spread throughout the body. Such a circumstance would lead surely to an enormous sense of helplessness and therapeutic nihilism in us all toward dealing with cancer, and would make it most unlikely that persons suspected of having cancer would ask for or accept such a diagnosis. But that is the state of America's reality concerning alcoholism.

Secondly, there are today in this country limited treatment resources for alcoholic people, and even those that do exist, reinforce, in the main, the common stereotype of a "down-n-outer" as the only kind of alcoholic person. But our limited resources reinforce the unhappy fact of our willingness to maintain the national image that alcoholic people do not respond to treatment. We in the field, find ourselves in the circumstance that the professionals and public still believe alcoholism is untreatable in spite of study after study reemphasizing how alcoholism is successfully treated. This is analogous—with our meager treatment resources—to providing only 3,000 units of penicillin to treat pneumonia when we know it requires 300,000 units, and concluding that pneumonia is untreatable and that penicillin does not work.

We diagnose alcoholic people late and do not provide them the proper treatment they

need, and then we blame them for their lack of recovery.

But there is more in our tragic tale of making sure that alcoholic people remain alcoholic: our setting of unrealistic treatment goals that guarantees failure. When we take an alcoholic person into treatment, we believe that the only real measure of success is achieved when the person goes to the grave without ever having taken another drink of alcohol. It happens, I'm sure, but it is the wrong goal to stress and an almost impossible goal to set up for people with a problem. Would you feel down-in-the-dumps again, would you feel like a failure if, after you recovered from pneumonia, sometime later you developed a cough from whatever cause? Or would you feel like a failure if your diabetic control went out of whack because of something that happened to you or something you did? You would not be considered a failure by the medical professional nor would you be labeled untreatable UNLESS, that is, you were alcoholic.

Take, for example, the person who was treated for alcoholism and is doing well for six months, six years or sixty years and then takes a drink, gets drunk or what have you. Because they've lost a job, spouse or something important to them, and then handle their pain by regressing to the use of that neat drug-alcohol, you will have a living example of why we make people get seriously ill with alcohol and then keep them seriously ill with alcohol. Set unattainable goals and you guarantee failures. If we doctors used such strict measures of cure for all the conditions we treat, as we expect of our alcoholic patients, we would all be on bread lines. It's another way of creating and maintaining our alcoholic victims.

But as I have said: It doesn't have to be this way. After almost twenty-five years in this field, how can I conclude that?

I can come to such a conclusion by observing an obvious fact: there are other nations made up of people who have genetic problems, physical disturbances, emotional difficulties and social upheavals. They, too, have urbanization, advertising, a liquor trade, changing values, a breakup of the family as we know it, and almost every single stress condition that confounds and confuses our lives. And they drink. . . . Why not alcoholism?

I believe that they do not have alcoholism because by design or accident, their society has clearly defined rules of alcohol use and it will not tolerate the abuse of alcohol. Note please, ladies and gentlemen, that I differentiate carefully between use and abuse. In this country use and abuse of alcohol are used interchangeably and without clear distinction. I emphasize it because I consider this lack of differentiation to be a major cause of our difficulty. There is nothing wrong that I know of—if you choose to drink—with the moderate use of alcohol. There is nothing wrong that I know of if you choose not to drink. There is a hell-of-a-lot wrong with you and more especially with your group, if you are allowed to abuse alcohol.

What do I mean when I say abusing alcohol? Certainly, getting drunk is abusing alcohol. Getting drunk is overdosing with a drug; overdosing is abuse (too much water or oxygen—those essentials of life—is dangerous, destructive and abusive). Yet, in this country, we accept, in word and deed, getting drunk as part of acceptable drinking behavior, and we laugh at portrayals of the drunken state, which is, by the way, a form of approval (we do not laugh at an epileptic convulsion; we do laugh at alcoholic disorganization). Yet they are not that different. We applaud, furthermore, the prowess of those who consume huge amounts of alcohol furthering excessive drinking; we look askance at those who choose not to drink at all, making them feel strange and different; we know little about alcohol and its effects, especially those of us who are heavy drinkers. In sum, we are a nation of confused, conflicted drinkers who really do not know how to drink.

If we in fact knew how to drink, we would derive alcohol's great benefits. If we chose to drink, and avoid its disasters, we would see that those who chose not to drink felt at ease, and we would eliminate, by social ostracism abusive drinking and loss of control with alcohol. If you don't believe me that what is expected and tolerated determines outcomes in drinking, then think of this: all things being equal, the same number of drinks shared with your closest friend will produce an entirely different outcome than you would have, if those drinks are consumed—for example—in the White House. Why is that? There are no instructions on the White House walls telling you how you may or may not behave. But the rules of and limits on your behavior are transmitted clearly by any number of mechanisms including expectation as they are in every social circumstance and human encounter. Wherever you are or whatever you do, you almost immediately learn what will and will not be tolerated; what is expected and not expected of you.

It would follow in my judgment, therefore, that if in your immediate environment or in your larger society there is alcohol abuse and alcoholism, it is present because you and I tolerate its existence and implicitly give it permission to be there. It cannot be any other way, because we have examples of societies that have gone from being alcohol problem free to having serious alcohol problems and vice versa. For too long we have blamed and focused on the substance, and thereafter on the alcoholic person. It is not the substance or the alcoholic we should focus on trying to prevent alcoholism—neither, given a choice, would choose to be abused or alcoholic—it is us. We seem to need so far the alcoholic and the magic of alcohol to be attracted to, and be repelled by.

But it does not have to be. Instead of coming up with slick superficial tricks such as banning advertising, pouring on excessive taxes, raising age limits, moaning about those ""drunks", let us begin to solve the problem by looking about ourselves. What do we do by our expectations and tolerance to create and maintain alcohol abuse and alcoholism? What do we do that permits a spouse, a child, a colleague, a society to manifest the pain of passing through life with alcohol abuse and alcoholism? The answer is not intended to be embedded in fear, guilt or hysteria. I do not wish to cause you or our alcoholic victims more torment. I'm merely suggesting that a little compassion, a lot of concern, and a commitment to make some changes in what we expect and tolerate can go an enormous way to bringing about the sort of milieu that will minimize our alcohol problems. It will not require either bureaucracies or big budgets. It will only require people who are willing to be aware and who are willing to care.●

## THE GENOCIDE CONVENTION: ONE STEP OF A COORDINATED HUMAN RIGHTS POLICY

Mr. PROXMIRE. Mr. President, day after day for the past 11 years I have taken the floor in support of the Genocide Convention. I believe as firmly today as I did in January 1967 that the ratification of this treaty is an important step in a foreign policy that is concerned with human rights. As the first rights treaty drafted in the post-World War II era, it has a symbolic influence that even exceeds the very important goal that this treaty embodies.

But the ratification of this treaty and the other human rights treaties now pending before the Senate is only one step in a coordinated human rights policy. Today I would like to take a minute to praise the important work of Ed Mezvinsky, who is serving as the U.S. Representative to the U.N. Human Rights Commission. The U.N. Human Rights Commission has been notable in the past primarily for its inactivity. This year there is a difference. We have an administration that is determined to make use of this international machinery and we have a very able and articulate spokesman—a former Member of the House of Representatives, I might add—at the head of our delegation.

I particularly want to call to my colleagues attention a statement Ed made on March 7. In this statement he outlines the pressing human rights problems facing the Commission and presents three concrete guidelines to guide the Commission's deliberations.

First he notes, we need to end the policy of picking on just a few nations as scapegoats for human rights violations. These violations take place without respect to ideological persuasion, region, or continent and the Commission must not ignore any allegation that comes before it.

Second, the Commission needs open hearings—a point I cannot emphasize enough.

And finally, we need to explore ways to make the national and regional human rights mechanisms effective.

His full statement reads like a breath of fresh air for those of us who have felt for many years that human rights has never been accorded its proper place in our foreign policy. I commend the administration for this important turn and, particularly, Ed Mezvinsky for his able and articulate leadership.

This effort deserves the support of all Members of the Senate.

But there are steps we can take here in this Chamber that Ed cannot. We can give him the tools with which he can further his work. Ratification of the human rights conventions now pending before the Senate, beginning with the Genocide Convention, is essential if our efforts in the U.N. Human Rights Commission are to be effective.

Mr. President, I ask unanimous consent that Ed Mezvinsky's statement of March 7 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HUMAN RIGHTS—LET THE VOICES IN

Today there are millions of suffering people throughout the world crying out for help, crying to be heard out of despair. They are asking us to represent them.

There are, it is true, very few governments which, from top to bottom, follow a policy hostile to any decent approach to human rights. But in most governments in the world, even governments that are judged by the outside world to be oppressive, there are good people who want to do what is right. These officials are looking to us for help in arguing with their colleagues for a more humane approach to the universal problem of human rights.

As representatives of the Human Rights Commission, we are called upon to do some-

thing to protect human dignity against systematic and massive violations of human rights. I ask myself: Isn't it our task to bring our influence to bear to help those governmental officials around the world who want to end serious violations of the very basic human rights of their citizens?

Torture abounds in the world and too often we hear the testimony of those who have suffered stark physical pain—the horror stories of man's cruelty to his fellow man.

There are no words that can adequately describe these abuses. How can we comprehend the pained anguish of a political prisoner in a Middle Eastern country who writes: "They tie you to the upper bed on your back, and with the heat coming from a torch or small heater they burn your back . . . sometimes the burning is extended to the spine, as a result of which paralysis is certain."

In at least one Latin American country they take prisoners and hang them upside down by a rope tied to their feet and then submerse them in vats containing water, blood, vomit, and human excrement.

We are smugly deceiving ourselves if we feel satisfied that we have completed our task here. Our work is not done, and no nation can be so self-righteous as to be insulated from charges of human rights violations. We cannot allow a privileged category of states always to be free from scrutiny.

For example, we should be deeply troubled by reports of persecution of religious believers in the Soviet Union. How do we answer the Priest whose only appeal now is for a Bible while serving a harsh 15-year sentence in a Soviet labor colony?

How do we respond to the disturbing reports of anti-Semitism in the official Soviet publications and in the media?

And should we not be equally concerned about the arrests of some fifteen Soviet citizens whose only crime was to monitor their Governments implementation of the Helsinki Final Act?

Shouldn't all citizens be permitted to live within the boundaries of their country in accordance with internationally accepted standards of human rights? And if they find they cannot, should they not be permitted to leave and settle in another country, a right clearly set forth as basic in the Universal Declaration of Human Rights?

Despite signs of progress, we do not find this right fully and consistently respected in the Soviet Union.

And who here has not been moved by the recent reports of suffering in "Democratic" Kampuchea?

There appears little doubt that the Cambodian authorities have flagrantly violated fundamental human rights. Extensive killings have taken place and supporters of the previous regime have been massacred.

In one village it was reported that over 200 men, women and children attempted to leave the country and seek refuge elsewhere. They were shot down by machinegun fire, leaving only a few survivors to escape across the border.

Let us recognize that an investigation is needed in Cambodia.

Next, how are we going to answer the relatives of political prisoners and of those who have mysteriously vanished in some countries of Latin America? We have provided a partial response by our consideration of human rights violations in Uruguay, Paraguay, and Chile. But there are other situations which must be addressed.

We welcome the release of some Americans from Cuba, but that country still holds large numbers of political prisoners.

We welcome the recent release of prisoners in Argentina and the publication of lists of detainees, but the human rights abuses in that country continue. Large numbers remain imprisoned without trial and the tragic disappearances have continued as exemplified by the mass abduction on December 8 from a church in Buenos Aires of mothers and wives of those who have disappeared. In addition, two nuns were carried away.

I have cited these examples because it is important to remember that our mandate is to protect the human rights of people wherever they are. We in this Commission are at the crossroads. Either we must listen to these voices of anguish and despair and act or honestly admit that human suffering will continue to be ignored.

I believe that we can still fulfill our mission.

First, we cannot continue to pick on just a few nations and make them scapegoats for us all. No region, no continent is immune. Our examination of separate country situations can be used to identify the most prevalent abuses. We then should concentrate on the most horrifying abuses, such as torture, and on measures to eradicate the abuses wherever they might occur. There are other basic rights in the economic as well as in the civil and political fields which could stand a similar concentration of our attention.

Second, we need open hearings so the world knows what we are doing. Let us provide a time each year when this Commission can hear directly from representative persons whose human rights have been violated, and who can show us the depth of the problems we are discussing here. Such meetings should be public and need not conflict with our confidential procedures, because only an informed world opinion in every country will enable us to meet the test.

Third, we need to devote the maximum effort possible to discover how each nation and region can develop its own human rights institutions. National and regional institutions are essential. We should stimulate their creation and growth, and work from the grass roots up. Interaction among various viewpoints can enlist human rights monitoring groups in every nation, aware of the fact that they are part of a world movement. We must encourage national monitoring groups.

We are representatives of our governments but in another sense we are here as representatives of the peoples of the world.

The most powerful weapons we have for combatting violations of human rights are truth and knowledge. We must not be afraid to face reality about others, to look into the mirror which reflects ourselves.

What we must do is let the voices in, let the people who have suffered such misery and injustice come before the United Nations Commission on Human Rights and tell us in their own words how their human rights have been violated.

We are the ones who must be in the vanguard in the struggle for human rights, a key challenge of today's world.

Let us hear real people—let us act in the real world.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum and yield the floor.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate Select Committee on Small Business be authorized to meet during the session of the Senate on Friday, April 14, to hold confirmation hearing on Milton Stewart for the position of Chief Counsel of Advocacy at the Small Business Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Surface Transportation Subcommittee of the Commerce, Science, and Transportation Committee be authorized to meet during the session on the Senate on Thursday, April 13, to consider S. 2788, to provide additional authorization for ConRail.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, do we have any orders for the recognition of Senators on tomorrow?

The PRESIDING OFFICER. The Senator from New Mexico (Mr. DOMENICI) is to be recognized for 15 minutes.

Mr. ROBERT C. BYRD. I thank the Chair.

## ORDER FOR RECESS UNTIL 10:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 10:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR PERIOD FOR ROUTINE MORNING BUSINESS TOMORROW AND RESUMPTION OF CONSIDERATION OF PANAMA CANAL TREATY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that following the order for the recognition of the Senator from New Mexico tomorrow there be a period for the transaction of routine morning business, as in legislative session, with statements limited therein to 3 minutes, the period not to extend beyond the hour of 11 a.m., and at the hour of 11 a.m. the Senate then resume its consideration of the treaty.

The PRESIDING OFFICER. Without objection, it is so ordered.

## PROGRAM

Mr. ROBERT C. BYRD. Mr. President, may I inquire of the Chair? There will be a vote in relation to the amendment by Mr. HELMS at 11 a.m. under the order previously entered; am I correct?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. Mr. President, that will be a rollcall vote. The yeas and nays have not yet been ordered, but there will be a yea-and-nay vote on a tabling motion or on the amendment up or down, whatever the vote may be in relation to that amendment.

And there will be rollcall votes during

the afternoon of tomorrow in relation to the treaty and by Thursday, the close of business, of course, the Committee of the Whole will have completed its work on the treaty and will rise, and on Friday the Senate will proceed to the consideration of the resolution of ratification.

I guess that about wraps it up for today.

### RECESS UNTIL 10:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 10:30 a.m. tomorrow.

The motion was agreed to; and at 6:34 p.m., the Senate, in executive session, recessed until tomorrow, Wednesday, April 12, 1978, at 10:30 a.m.

# HOUSE OF REPRESENTATIVES—*Tuesday, April 11, 1978*

The House met at 12 o'clock noon.

Rev. Francis G. Gallagher, Our Lady of Ransom Roman Catholic Church, Philadelphia, Pa., offered the following prayer:

In the name of the Father and of the Son and of the Holy Spirit, Amen. O God, who created us, God who created heaven and Earth, who created the universe and everything in it, we ask Your help this afternoon. Help us overcome indifference, indecisiveness, and lack of enthusiasm. We would like with Your help, O Lord, to be enthusiastic and make our decisions.

I believe that God is everywhere. I believe that God is here and that God dwells with us. Having with us a background of believing that God is with us at all times, I call upon God for spiritual guidance and courage that people in authority when they act and they do something, they do it for the good of our Nation.

God bless you, God love you, and God be with you. Amen. In the name of the Father and of the Son and of the Holy Spirit.

### THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

### MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 8423. An act to amend titles II and XVIII of the Social Security Act to make improvements in the end stage renal disease program presently authorized under section 226 of that act, and for other purposes.

### TRIBUTE TO REV. FATHER FRANCIS G. GALLAGHER

(Mr. EILBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EILBERG. Mr. Speaker, for the past 36 years the Reverend Francis G. Gallagher has been a priest of the Roman Catholic Church, ministering to the spiritual needs of his parishioners in a manner which has been a source of great inspiration to all who know him.

Father Gallagher was born in West Philadelphia 60 years ago, and was ordained to the priesthood in 1942. For 23 years, now, he has served in various parishes in the Fourth Congressional District of Pennsylvania, which I have the privilege of representing in the House. Father Gallagher is, at the present time, an associate pastor of Our Lady of Ransom Church in my congressional district.

I have been privileged to know Father Gallagher for some time, and I share the high regard which his parishioners have for him, and the high esteem in which he is held by all who have been fortunate enough to meet him.

If I may be permitted a light note, Mr. Speaker, there is probably not a single day that goes by, but that Father Gallagher is not mistaken by strangers for the Speaker of the House of Representatives, the distinguished gentleman from Massachusetts (Mr. O'NEILL). I quite agree that the resemblance is uncanny. I trust, Mr. Speaker, that we have not confused our colleagues in the House today, by having two of them appear in the Chamber at the same time.

It has been our honor, Mr. Speaker, to have Father Gallagher lead us in prayer today, and I am certain that his thoughtful words have been as much an inspiration to my colleagues as they have been to me.

### PERMISSION FOR SUBCOMMITTEE ON SURFACE TRANSPORTATION OF THE COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO SIT DURING 5-MINUTE RULE TODAY

Mr. EDGAR. Mr. Speaker, I ask unanimous consent that the Subcommittee on Surface Transportation of the Committee on Public Works and Transportation may be permitted to sit during the proceedings under the 5-minute rule today.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was not objection.

### PRESIDENTIAL COMMISSION RECOMMENDATIONS ON MILITARY RETIREMENT COULD ENDANGER DEFENSE PROGRAM

(Mr. SIKES asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SIKES. Mr. Speaker, the Presidential Commission reviewing the military retirement system has recommended sweeping changes in the name of reform. These changes, if placed in effect, could be dangerous to the Defense program. There already is widespread concern in the Armed Forces about constant efforts to erode the benefits which historically are a part of military service. Retention of personnel, which is essential to avoid costly recruiting and expensive training, obviously will be more difficult if service in the military forces becomes less attractive. There will be increased problems in obtaining adequate numbers under the all-volunteer system. There is little likelihood that present-day thinking in the Congress and in the administration would support a return to the draft. Therefore, enlistments and retention are doubly important to a strong defense and to America's security.

A key recommendation of the Commission is the end of the 20-year retirement plan in order to achieve "savings." In the words of the Chairman of the Commission, "The system now costs too much money." Compared to what? In reality, there is nothing to compare the military or its retirement system to. Look at the facts.

First of all, let us not ignore the fact that those presently serving have a contract. Cancellation of this contract would appear to be an extremely poor procedure even if it were legal. Congress should look long and carefully at any erosion of the present benefits of military service. It could be much more costly than the savings which the Commission anticipates.

### ELATED AT CHINA WHEAT PURCHASE

(Mr. FINDLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FINDLEY. Mr. Speaker, I am elated at China's purchase of 600,000 tons of U.S. wheat on the heels of the Illinois Agriculture Mission to the People's Republic of China. This is the People's Republic's first U.S. grain purchase in 3 years.

As chairman of the mission, which concluded its work Sunday, I was told by Chinese officials that the People's Republic would be buying grain. Our mission emphasized the value of U.S. wheat and soybean oil in particular, and I am hopeful that the purchase of wheat announced yesterday is just the first step in an expanded trade relationship.

Our mission was met with great warmth throughout our tour by officials of the Ministry of Foreign Trade and the Ministry of Agriculture, and I am convinced our work laid the foundation for a rising level of sales of U.S. grain and other items to China.

Vice Minister of Foreign Trade Chen told us explicitly that China wants the development of trade with the United States despite the lack of normal diplomatic relations.

In my opinion, the Chinese purchase is more than a coincidence. It shows, I believe, that missions of this sort can yield immediate as well as long term benefits to U.S. producers.

## CALL OF THE HOUSE

Mr. LEVITAS. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 207]

| | | |
|---|---|---|
| Ambro | Diggs | Pike |
| Ammerman | Dingell | Pritchard |
| Anderson, Calif. | Drinan | Rhodes |
| | Flippo | Rodino |
| Andrews, N.C. | Ford, Mich. | Runnels |
| Archer | Gudger | Santini |
| Ashley | Harsha | Shuster |
| Brademas | Hillis | Spellman |
| Buchanan | Howard | Steers |
| Burke, Calif. | Jacobs | Symms |
| Burton, Phillip | Johnson, Calif. | Teague |
| Cederberg | Jones, N.C. | Thompson |
| Chappell | Kazen | Thone |
| Clawson, Del. | Krueger | Tucker |
| Cohen | Mann | Udall |
| Collins, Ill. | Meeds | Whitley |
| Conyers | Mikva | Young, Alaska |
| Crane | Moss | |
| Dent | Nix | |

The SPEAKER. On this rollcall 380 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

## ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 3(b) of rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

After all motions to suspend the rules have been entertained and debated, and after those motions, to be determined by "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

## RIVERSIDE COUNTY, CALIF., LAND CLAIMS AMENDMENTS

Mr. RONCALIO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 7101) to amend certain provisions of law relating to land claims by the United States in Riverside County, Calif., based upon the accretion or avulsion, and for other purposes.

The Clerk read as follows:

H.R. 7101

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the first section of the Act of October 23, 1970, entitled "An Act to render the assertion of land claims by the United States based upon accretion or avulsion subject to legal and equitable defenses to which private persons asserting such claims would be subject" (84 Stat. 1106; Public Law 91–505) is amended by striking out "13.17" and inserting in lieu thereof "13.19".

The SPEAKER pro tempore (Mr. BROWN of California). Is a second demanded?

Mr. JOHNSON of Colorado. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Wyoming (Mr. RONCALIO) and the gentleman from Colorado (Mr. JOHNSON) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker. H.R. 7101 would amend the boundary limitation contained in Public Law 91–505, relating to land claims by the United States in Riverside County, Calif., to include two additional landowners. Public Law 91–505, which became law on October 23, 1970, waived the sovereignty rights of the Federal Government within specified points along the Colorado River to permit an equitable settlement in court of a dispute between private individuals and the Federal Government regarding title to accreted or avulsed lands. H.R. 7101 would change the river point boundary limits from 13.17 to 13.19 so that the provisions of the existing public law would apply to this small addition.

In extending the boundary limits, Congress would not be deciding the legal title ownership, but would be granting the private claimants the opportunity to use all legal and equitable defenses in court. However, these claimants would have to meet all of the requirements contained in Public Law 91–505 before obtaining this relief.

Prior to completion of the Hoover Dam, the lower Colorado River was a constantly shifting stream. The result was continual uncertainty concerning the ownership or accreted or avulsed lands. Until 1962, title to those lands was considered to be held by the private individuals in possession and was not disputed by the Federal Government. It was not until 1965 when the United States filed suit against those individuals to gain possession.

When Congress originally considered legislation to provide relief for these land ownership claims, specific boundary points were set out to limit the scope of waiving the Government's sovereignty rights. However, in an effort to exclude a landowner who did not meet the requirements of the legislation and to include only lands in Riverside County, the boundary points were moved too far up the Colorado River thereby excluding the two claimants of H.R. 7101. It was through this oversight that the two claimants of H.R. 7101 were excluded from the original legislation, and necessitates passage of H.R. 7101.

Mr. Speaker, I urge my colleagues to support passage of H.R. 7101.

Mr. JOHNSON of Colorado. Mr. Speaker, I yield such time as she may consume to the sponsor of the bill, the gentlewoman from California (Mrs. PETTIS).

Mrs. PETTIS. Mr. Speaker, H.R. 7101, which I introduced, amends an existing statute, Public Law 91–505, and is limited in its operation and effect to approximately 340 acres of land on the west side of the Colorado River in the southern part of Riverside County, Calif.

Public Law 91–505 permits landowners in an area within 3 miles west of the Colorado River between river boundary points 13.00 a nd 13.17 to plead and prove their equitable defenses in court in actions brought by the Federal Government in which Federal ownership of land is claimed under the theories of avulsion and accretion.

H.R. 7101 extends the effect of Public Law 91–505 to lands between boundary points 13.17 and 13.19. This change in the law will serve to include the farms of two landowners whose situations and circumstances are similar to those of the landowners now included under Public Law 91–505.

I have had submitted to me by these landowners, documents, reports, maps, and other evidence which have convinced me that they were and are in the same situation as those now included in existing law; that they are equally entitled to the same relief; and, consequently, H.R. 7101 is an appropriate piece of legislation to achieve a fair and just result.

I am also convinced that this bill will neither give to those landowners any undeserved benefits or relief nor will the bill deprive the Federal Government of any property to which it is justly or equitably entitled.

Mr. Speaker, I urge my colleagues to support this measure.

Mr. JOHNSON of Colorado. Mr. Speaker, I yield such time as he may consume to the ranking minority member of the committee, the gentleman from Kansas (Mr. SKUBITZ).

Mr. SKUBITZ. Mr. Speaker, I rise in support of H.R. 7101. Simply stated, this bill corrects an oversight in Public Law 91–505 passed in October of 1970.

That law allowed certain individuals between specific boundary points to raise legal and equitable defenses in title disputes with the U.S. Government. The ownership of the land in question is uncertain due to accretion and avulsion of the Colorado River prior to the completion of the Hoover Dam.

This bill enlarges the boundary points slightly to include land claimed by two individuals which should have been included in the first place.

No precedent is set by this legislation regarding the waiver of sovereign immunity nor is any change in Public Law 91–505 made except to expand the boundary points to correct an inequity.

I urge my colleagues to support this bill.

Mr. JOHNSON of Colorado. Mr. Speaker, I have no further requests for time, and I urge and recommend to my colleagues passage of the bill.

Mr. RONCALIO. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the bill H.R. 7101.

The question was taken.

Mr. MOTTL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3, rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

## GENERAL LEAVE

Mr. RONCALIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the following bills considered today: H.R. 7101, H.R. 2497, and H.R. 11092.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

## RECOGNITION OF INDIAN TRIBES

Mr. RONCALIO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2497) to reinstate the Modoc, Wyandotte, Peoria, and Ottawa Indian Tribes of Oklahoma as federally supervised and recognized Indian tribes, as amended.

The Clerk read as follows:

H.R. 2497

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) Federal recognition is hereby extended or confirmed with respect to the Wyandotte Indian Tribe of Oklahoma, the Ottawa Indian Tribe of Oklahoma, and the Peoria Indian Tribe of Oklahoma, the provisions of the Acts repealed by subsection (b) of this section notwithstanding.

(b) The following Acts are hereby repealed:

(1) the Act of August 1, 1956 (70 Stat. 893; 25 U.S.C. 791–807), relating to the Wyandotte Tribe;

(2) the Act of August 2, 1956 (70 Stat. 937; 25 U.S.C. 821–826), relating to the Peoria Tribe; and

(3) the Act of August 3, 1956 (70 Stat. 963; 25 U.S.C. 841–853), relating to the Ottawa Tribe.

(c) There are hereby reinstated all rights and privileges of each of the tribes described in subsection (a) of this section and their members under Federal treaty, statute, or otherwise which may have been diminished or lost pursuant to the Act relating to them which is repealed by subsection (b) of this section. Nothing contained in this Act shall diminish any rights or privileges enjoyed by each of such tribes or their members now or prior to enactment of such Act, under Federal treaty, statute, or otherwise, which are not inconsistent with the provisions of this Act.

(d) Except as specifically provided in this Act, nothing contained in this Act shall alter any property rights or obligations, any contractual rights or obligations, including existing fishing rights, or any obligation for taxes already levied.

SEC. 2. (a)(1) The Modoc Indian Tribe of Oklahoma is hereby recognized as a tribe of Indians residing in Oklahoma and the provisions of the Act of June 26, 1936, as amended (49 Stat. 1967; 25 U.S.C. 501–509), are hereby extended to such tribe and its members. The Secretary of the Interior shall promptly offer the said Modoc Tribe assistance to aid them in organizing under section 3 of said Act of June 26, 1936 (25 U.S.C. 503).

(2) The provisions of the Act of August 13, 1954 (68 Stat. 718; 25 U.S.C. 564–564w), hereafter shall not apply to the Modoc Tribe of Oklahoma or its members except for any right to share in the proceeds of any claim against the United States as provided in section 6(c) and 21 of said Act, as amended (25 U.S.C. 564e and 564t).

(3) The Modoc Indian Tribe of Oklahoma shall consist of those Modoc Indians who are direct lineal descendants of those Modocs removed to Indian territory (now Oklahoma) in November 1873, and who did not return to Klamath, Oregon, pursuant to the Act of March 9, 1909 (35 Stat. 751), as determined by the Secretary of the Interior, and the descendants of such Indians who otherwise meet the membership requirements adopted by the tribe.

(b) The Secretary of the Interior shall promptly offer the Ottawa Tribe of Oklahoma and the Peoria Tribe of Oklahoma assistance to aid them in reorganizing under section 3 of the Act of June 26, 1936 (49 Stat. 1967; 25 U.S.C. 503), which Act is re-extended to them and their members by this Act.

(c) The validity of the organization of the Wyandotte Indian Tribe of Oklahoma under section 3 of the Act of June 26, 1936 (49 Stat. 1967; 25 U.S.C. 503), and the continued application of said Act to such tribe and its members is hereby confirmed.

SEC. 3. (a) It is hereby declared that enactment of this Act fulfills the requirements of the first proviso in section 2 of the Act of January 2, 1975 (88 Stat. 1920, 1921), with respect to the Wyandotte Tribe of Oklahoma, the Ottawa Tribe of Oklahoma, and the Peoria Tribe of Oklahoma.

(b) It is hereby declared that the organization of the Modoc Tribe of Oklahoma as provided in section 3(a) of this Act shall fulfill the requirements of the second proviso in section 2 of the Act of January 2, 1975 (88 Stat. 1920, 1921).

(c) Promptly after organization of the Modoc Tribe of Oklahoma, the Secretary of the Interior shall publish a notice of such fact in the Federal Register including a statement that such organization completes fulfillment of the requirements of the provisos in section 2 of the Act of January 2, 1975 (88 Stat. 1920, 1921), and that the land described in section 1 of said Act is held in trust by the United States for the eight tribes named in said Act.

SEC. 4. The Wyandotte, Ottawa, Peoria, and Modoc Tribes of Oklahoma and their members shall be entitled to participate in the programs and services provided by the United States to Indians because of their status as Indians, including, but not limited to, those under the Act of November 2, 1921 (42 Stat. 208; 25 U.S.C. 13), and for purposes of the Act of August 16, 1957 (71 Stat. 370; 42 U.S.C. 2005–2005F). The members of such tribes shall be deemed to be Indians for which hospital and medical care was being provided by or at the expense of the Public Health Service on August 16, 1957.

The SPEAKER pro tempore. Is a second demanded?

Mr. JOHNSON of Colorado. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Wyoming (Mr. RONCALIO) will be recognized for 20 minutes, and the gentleman from Colorado (Mr. JOHNSON) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. Mr. Speaker, H.R. 2497 provides for the restoration of Federal recognition to four Indian tribes of Oklahoma. These tribes lost the Federal status by acts of Congress passed in the 1950's during the era of the so-called termination policy of Congress.

The Ottawa, Peoria, and Wyandotte tribes were terminated by separate acts passed in 1956. The Modoc Indians were terminated by the 1954 act terminating the Klamath Indians of Oregon, with which they were affiliated.

The termination policy was adopted by the Congress in the early 1950's as the most effective means of resolving the "Indian" problem. Termination meant withdrawal of Federal recognition as an Indian tribe and a governing body; sale of tribal assets and distribution of the proceeds per capita; and withdrawal of special Federal services to Indians, such as services of the Bureau of Indian Affairs and the Indian Health Service.

The theory was that this process would make Indians first-class citizens and that they would progress economically and socially with the rest of the population.

The policy was a dismal failure. Experience showed that not only did members of terminated tribes fail to keep up, economically and socially, with the general population, but also did fail to keep pace with progress of Indians of tribes which were not terminated.

Congress explicitly recognized the failure of the policy when it restored the Menominee Indians of Wisconsin in the 93d Congress and the Siletz Indians of Oregon in this Congress.

The record made in the committee convinced us that restoration of these four tribes is necessary if the decline in economic and social condition of these Indians is to be stopped and reversed.

I urge passage of the bill, as amended by the committee.

Mr. JOHNSON of Colorado. Mr. Speaker, I yield to the gentleman from Kansas (Mr. SKUBITZ) such time as he may consume.

Mr. SKUBITZ. Mr. Speaker, I rise in support of H.R. 2497.

This bill reestablishes Federal recognition of four Oklahoma Indian tribes—the Ottawas, Peorias, Wyandottes, and Modocs.

All four tribes were previously recognized but their status was terminated

under a well-intended but later discredited Federal policy of the 1950's.

This bill restores these tribes to full participation in Federal programs available to the Indian people.

I urge support of this legislation.

Mr. JOHNSON of Colorado. Mr. Speaker, I have no further request for time, but I would say briefly I urge my colleagues as expeditiously as possible to pass this bill.

I believe it is the intention of the sponsor of the bill to speak further on it.

Mr. RONCALIO. Mr. Speaker, I yield to the gentleman from Oklahoma (Mr. RISENHOOVER), our colleague who sponsored this bill and a member of our committee, such time as he may consume.

Mr. RISENHOOVER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in support of H.R. 2497, which reinstates the Modoc, Wyandotte, Peoria, and Ottawa Indian Tribes as federally supervised and recognized Indian tribes.

Late in the year of 1956, the Wyandottes, Peorias, and Ottawas were effectively terminated while the Modocs termination was signed in 1954. The administration, at that time, believed this would help Indian people find their rightful place in our society. Over the years, we who live in northeastern Oklahoma, have seen the members of these tribes fail to gain a rightful share of the bounty of our land.

In a word, termination was a failure. This bill seeks to right the wrong.

It would be difficult to measure the socioeconomic situations of these people as compared with the average American or other tribes which never were terminated. However, if you live in the area—you can see and feel the difference.

Passage of this legislation would restore these tribes to full participation in the Federal programs and services which are enjoyed by other Indian people. It is fair; it is just, it is important.

Additionally, these Indian people strongly desire to regain Federal recognition—as provided in this bill.

Through the two decades of termination, they have kept their tribal identity and under difficult economic circumstances have remained in confederation.

The effect of this bill will be to return the services and assistance which other Indian tribes are receiving from the Federal Government. It will return a formal acknowledgement to historic groups of people.

As the report shows, the costs of this legislation are nominal. It will cost about $15,000 to enroll the tribal members and about $100,000 next year to include these people under programs already provided their Indian brethren. It is estimated that, in total, not more than 6,000 people are members of these four tribes.

The Indian Health Service soon will open a new clinic in Miami, Okla. It will be available for the Cherokees and other federally recognized tribal members. However, it will not be open to the Modocs, Wyandottes, Peorias, and Ottawas unless we enact this bill. It is simply unfair. They need these health services and the incremental costs to IHS would be minimal.

There will be some education and welfare programs under the Bureau of Indian Affairs which these people will become qualified to enjoy. If they take advantage of these programs—the investment will be a wise use of these resources to help deserving people.

But, most of all, these four tribes—each with its own proud history which contributes richly to the homogenous mixture of people which make our country rich and great—deserve the formal and legal recognition which they will inherit with enactment of this bill.

I urge my colleagues to vote for this legislation and, with that vote, correct an error of the 1950s and help four great Indian tribes find their rightful place in the law and in history.

Thank you.

Mr. RONCALIO. Mr. Speaker, I have no further requests for time, and I yield back the remainder of my time.

Mr. JOHNSON of Colorado. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the bill, H.R. 2497, as amended.

The question was taken.

Mr. ASHBROOK. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 3, rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

---

## INCREASING AUTHORIZATION FOR NAVAJO-HOPI INDIANS RELOCATION

Mr. RONCALIO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 11092) to increase the authorization of appropriations under the act of December 22, 1974 (88 Stat. 1712).

The Clerk read as follows:

H.R. 11092

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 25(a)(5) of the Act of December 22, 1974 (88 Stat. 1712, 1723) is amended by deleting the figure "$500,000" therein and inserting, in lieu thereof, the figure "$1,000,000".

The SPEAKER pro tempore. Is a second demanded?

Mr. JOHNSON of Colorado. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

Mr. RONCALIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like at this time to announce that I believe our beloved friend and colleague, the gentleman from Arizona (Mr. UDALL) is recovering from his emergency appendectomy operation that occurred about a week ago tomorrow. I sent him some flowers and sent him my sympathies and wishes for a rapid recovery. Happily, I believe he will be back tomorrow. In his absence I am happy to handle for him this legislation which was reported out of the full Committee on Interior and Insular Affairs.

Mr. Speaker, H.R. 11092 provides that the authorization of appropriations for the Navajo-Hopi Relocation Commission's administrative expenses shall be increased from $500,000 to $1,000,000 per year.

The Commission was created by the act of December 22, 1974, to administer the provisions of that act providing for the removal and relocation of Navajo and Hopi Indians from lands subject to partition by the U.S. district court.

As some of the members may remember, the 1974 act resolved a long-standing dispute between the two tribes to approximately 1,800,000 acres of land which was held by the two tribes in joint, undivided, and equal ownership.

The partition of that land will result in the necessity of between 1,100 and 2,300 families, predominantly Navajo, being relocated. This will be a monumental task and is already fraught with bitterness and controversy.

Experience has shown that the $500,000 per annum allotted to the Commission to carry out this sensitive assignment is inadequate. All H.R. 11092 does is to increase the authorization for the administrative expenses of the Commission commensurate with its task.

Mr. Speaker, on behalf of the chairman of the full Committee on Interior and Insular Affairs the gentleman from Arizona (Mr. UDALL) I urge passage of this legislation.

Mr. JOHNSON of Colorado. Mr. Speaker, I yield such time as he may consume to the gentleman from Kansas (Mr. SKUBITZ).

Mr. SKUBITZ. Mr. Speaker, I rise in support of H.R. 11092, which increases the authorization for relocation of the Navajo and Hopi Tribes.

In the act of December 22, 1974, Congress directed the U.S. district court for the District of Arizona to partition land jointly owned by the two tribes.

The court has completed its partition order and now members of one tribe residing on the other's land must relocate under the 1974 law. Some 400 families have volunteered to move, some 1,500 others must be surveyed, and all real property appraised for a relocation plan to be submitted to Congress within the next 12 months.

In light of these facts the increased authorization is justified and I urge the bill's adoption.

Mr. JOHNSON of Colorado. Mr. Speaker, this bill has been clearly explained. I see no reason why we should go into any further detail. I urge its immediate passage.

Mr. RONCALIO. Mr. Speaker, I yield back the remainder of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the bill, H.R. 11092.

The question was taken.

Mr. GUYER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3 of rule XXVII and the Chair's prior announcement, further proceedings on this motion will be postponed.

## PERMISSION FOR SUBCOMMITTEE ON ADVANCED ENERGY TECHNOLOGIES AND ENERGY CONSERVATION, DEVELOPMENT, AND DEMONSTRATION OF COMMITTEE ON SCIENCE AND TECHNOLOGY TO SIT DURING SESSION TODAY

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the Subcommittee on Advanced Energy Technologies and Energy Conservation, Development, and Demonstration of the Committee on Science and Technology be allowed to sit this afternoon from 2 until 4, notwithstanding the fact that the House will be in session.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

## PERMISSION FOR SUBCOMMITTEE ON SCIENCE, RESEARCH, AND TECHNOLOGY OF COMMITTEE ON SCIENCE AND TECHNOLOGY TO SIT DURING SESSION TODAY

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the Subcommittee on Science, Research, and Technology of the Committee on Science and Technology, be allowed to sit this afternoon from 2 until 4, notwithstanding the fact that the House will be in session.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

## "EDUCATION DAY, U.S.A."

Mr. LEHMAN. Mr. Speaker, I move to suspend the rules and pass the joint resolution (H.J. Res. 767) to authorize and request the President to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A.".

The Clerk read as follows:

H.J. RES. 767

Whereas the Congress recognizes a need for the Nation to set aside on the calendar a day devoted to the importance of education to the lives of its citizens and to the general well-being of the Nation; and

Whereas the Lubavitch Movement, which conducts educational activities at more than sixty centers in twenty-eight States as well as around the world, is especially committed to the advancement of education and has proposed the establishment of an "Education Day, U.S.A."; and

Whereas world Jewry marked in 1977 the seventy-fifth birthday of the revered and renowned Jewish leader, the head of the worldwide Lubavitch Movement, Rabbi Menachem Mendel Schneerson, who proclaimed on that occasion a "Year of Education"; and

Whereas the seventy-sixth birthday of this celebrated spiritual leader will occur on April 18, 1978, thus concluding the year of Lubavitch Movement activities dedicated to the "Year of Education" and the Lubavitcher Rebbe's milestone birthday: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President is authorized and requested to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A."

The SPEAKER pro tempore. Is a second demanded?

Mr. ROUSSELOT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida (Mr. LEHMAN) will be recognized for 20 minutes, and the gentleman from California (Mr. ROUSSELOT) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution may be a little controversial. Hopefully, I will answer as many of the questions that are going to be raised in my statement.

House Joint Resolution 767 calls upon the President to proclaim April 18, 1978, as "Education Day, U.S.A."

Pursuant to the policy established by the Committee on Post Office and Civil Service for consideration of commemorative legislation, the resolution has obtained the requisite 218 endorsements.

Mr. Speaker, over a year ago a resolution similar to the one we are considering today was introduced and referred to the subcommittee. The staff determined that the original bill clearly violated the committee's guidelines on several points, and the sponsor of the bill was so informed. Almost 10 months passed before a revised bill was introduced. Substantial changes were made over the earlier version. Nevertheless, certain clauses in the bill still recognize the contributions of the Lubavitch movement and its spiritual leader, Rabbi Menachem Mendel Schneerson in the field of education. However, the important factor to remember is that the enacting clause is the only part of the resolution which becomes law, and this relates solely to education. Notwithstanding these modifications, the staff apprised the bill's proponents of a potential conflict with the committee's policy over the reference to a living person and religious organization.

Nevertheless, supporters of this resolution were able to enlist the cosponsorship of a majority of the House.

I realize that some Members may feel that this resolution violates provisions of the committee's policy. In this instance, however, I think the support of over a majority of the House overrides any questions that may be raised against this legislation.

Furthermore, the bill is not aimed at paying tribute to a single organization or individual who is sponsoring educational programs throughout the country. Instead, it focuses on the important and continuing role education generally plays in the lives of all Americans at nearly all age levels.

Last fall the National Center for Education Statistics estimated that approximately 61 million persons across the Nation were enrolled in all categories and levels of instruction. That is an incredible number and worthy of congressional recognition, in my view.

I, therefore, urge my colleagues to support this resolution. Mr. Speaker, I think the questions involving an individual and a particular organization being named are valid. I can recognize the fact it is coming pretty close to the point of disregarding to the policy of our committee. But, I leave it to the wisdom of the House to work its will in relation to this particular resolution.

Mr. Speaker, I now yield such time as she desires to my colleague, the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Speaker, I reluctantly rise in opposition to this legislation.

Mr. Speaker, the Post Office and Civil Service Committee has a policy for consideration of commemorative legislation. This measure does not fall under the adopted criteria. Proposals concerning living persons may not be reported by the committee. In addition, resolutions are to be considered only three times a year—in February, June, and October. The policy follows:

COMMITTEE POLICY FOR CONSIDERATION OF COMMEMORATIVE LEGISLATION

(Amended on April 1, 1976)

It shall be the policy of the Committee that legislation providing for designation of commemorative days or other periods shall be considered only three times each year during the months of February, June and October.

The following types of proposals shall not be reported:

(a) Any proposal concerning a commercial enterprise, specific product, or fraternal, political or sectarian organization;

(b) any proposal concerning a particular state or any political subdivision thereof, city, town, county, school, or institution of higher learning;

(c) any proposal concerning a living person; and

(d) any proposal providing for recurring annual commemorations.

All other proposals with national appeal and significance, which shall be demonstrated by co-sponsorship of the resolution or written endorsement, or a combination thereof, by a majority of the Members of the House, may be reported.

This resolution is being brought up on the floor of the House purporting to designate April 18, 1978, as "Education Day, U.S.A." In fact, its intention is to commemorate the 76th birthday of the head of the worldwide Lubavitch Movement, Rabbi Menachem Mendel Schneerson. I am not opposed to the celebration of Rabbi Schneerson's birthday, but I am opposed to the consideration of a resolution honoring it, such consideration removes the thumb from the dam which has been holding back the flood of such resolutions to the floor in the past 3 years.

"American Education Week" is generally observed during the third week of

November. This week is endorsed by the National Education Association, the U.S. Office of Education, the Parents and Teachers National Conference (PTA), and the American Legion. The resolution we have before us duplicates commemorations.

Mr. Speaker, there are over 220 Members of the House supporting this proposal. I know I am going against the will of the House, however, I would like to bring to my colleagues' attention some of the other events which occurred on April 18 and which we let ourselves in for consideration of when we breach the standards:

1636: Sir Julius Caesar, an English barrister, died.

1775: Waiting until he spots a lantern blinking from the North Church in Boston, Paul Revere starts out on his famous midnight ride to wake the sleepy Americans with his message, "The British are coming!"

1857: Clarence S. Darrow, a famous lawyer, was born.

1864: The Confederates surrendered at Durham Station in North Carolina.

1882: Leopold Stokowski, a symphony conductor, was born.

1906: San Francisco was devastated by earthquake and fire.

1922: Barbara Hale, an actress, better known as Della Street in the Perry Mason series, was born.

1925: Mrs. Calvin Coolidge opened the first Women's World Fair at Chicago.

1932: Ford Model B, last of the original 4-cylinder cars was introduced.

1944: League of Nations ended, giving its physical assets to the United Nations.

1946: Actress Haley Mills was born.

1955: Albert Einstein, physicist, died.

1965: Opera singer Marian Anderson retired.

1970: World Clam-Gulping Championship at Port Townsend, Washington, took place.

Mr. Speaker, there is an old saw that the Nation is not safe when Congress is in session. Maybe that saying should read, "The Nation is not safe when Congress is in session, unless it is acting on commemorative legislation." If this resolution is adopted, we may be certain that the Nation will be safe more of the time. We will have little time for anything but these resolutions.

Mr. ROUSSELOT. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Speaker, I rise in support of House Joint Resolution 767, and I would like to state first that it is always an education to work with the gentleman from California (Mr. ROUSSELOT).

Mr. Speaker, I am pleased to add my support to House Joint Resolution 767 emphasizing the importance of education to the lives of our citizens.

Although this resolution was not formally considered by our committee under its regular procedure, I think in this case an exception to the committee rule is warranted and so I am pleased to join with the chairman of our committee in bringing this matter directly to the House.

This resolution designates April 18, 1978, as Education Day, U.S.A., a date which coincides with conclusion of the Year of Education and the 76th birthday of the sponsor of this worldwide movement, Rabbi Menachem Mendel Schneerson.

More than a majority of the House have cosponsored this resolution, a demonstration of support that is well-founded.

Mr. ROUSSELOT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I, too, rise in opposition to this joint resolution, because it is just plain unnecessary.

That does not mean that we lack respect and admiration for Rabbi Schneerson, who is commemorated in this resolution. This action does, however, run counter to the rule that we set up some time ago that living people would not be honored by resolutions. That policy was adopted because it had become very difficult for Members of the House to be constantly put through the process of considering all kinds of resolutions honoring many worthy people in our country. In addition, it becomes extremely hard for the committee to exhibit some form of rational justification if we are to take up every single resolution that commemorates some group or individual.

I would like to point out additionally that there is no report on this resolution, because it never came out of the full committee. Further, the committee has really given this resolution no consideration at all. That does not mean this has not happened on other occasions, but I just do not believe that is an appropriate way to do business. The legislative process should be respected.

Further, Mr. Speaker, the opening language of this joint resolution requires the President to issue a proclamation designating April 18 as "Education Day." That requires no action on our part. The President has full authority to issue proclamations any time he deems it essential and appropriate to do so.

Mr. Speaker, I just do not believe this is a necessary resolution. It is unfortunate that we are put in a position of having people say, "Well, you're against Education Day if you oppose this resolution." But it is basically an unnecessary resolution.

We vote on education matters all the time here; the fact is that we vote out billions of dollars in various authorization and appropriation bills.

Mr. Speaker, I am really not convinced that this resolution is needed.

Mr. LEHMAN. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. RYAN).

Mr. RYAN. Mr. Speaker, I rise in opposition to a measure of which I am a coauthor. The reason I oppose the measure of which I am a coauthor is because I was not aware, as is so often the case, of exactly what I was signing, except that it seemed like a good idea and it seemed like a harmless matter.

This resolution itself is harmless. There is no reason not to vote for this resolution except for this one fact: The resolution was tried last year as a simple recognition of a rabbi in Philadelphia who has done some marvelous things to develop Jewish education in this country. For that he should be commended by this body, because he has done those things.

But more important than that fact is the principle involved here. We have set up in the Committee on Post Office and Civil Service a means by which all resolutions can be channeled, funneled, or taken care of so that this House does not begin to spend its time doing just what we are doing right now.

If this passes, I will promise the Members that I will put in a resolution within the year commending certain people in California who I think have done significant things in the field of education. Then I will ask that the resolution be brought out on this floor and passed for the same reason this is being passed. And the Members should not vote against my resolution without being unfair to me or to any other Member who put in a similar resolution on this particular topic or any other topic.

The question here is really this: Do we now again open this up to general use on this floor so that the House becomes a kind of larger Chamber of sighs and whims than it is already. I do not think we should do that.

It is not, then, for the intrinsic value of the resolution itself that I ask the Members to vote no, but for the principle that is being set here today. Approval of this resolution will inevitably force this Chamber to engage in activities which are not properly before it in the manner in which this resolution is before us today. Reluctantly, then, with great respect for my great friend and distinguished colleague, the gentleman from Florida (Mr. LEHMAN), who is carrying this, I intend to vote "no" on the resolution.

Mr. LEHMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I have listened carefully to the comments of the ranking Republican of the subcommittee, the gentleman from California (Mr. ROUSSELOT), the distinguished gentleman from California (Mr. RYAN), and the gentlewoman from Colorado (Mrs. SCHROEDER). They certainly make a very interesting and strong point in discussing this particular resolution and how it endangers certain procedures of this body. But, the situation is that this resolution has obtained 218 or more cosponsors in this very Chamber. And even though this resolution, as I noted before, has certain characteristics that raise concerns, still, the enacting clause, which is the only part of this bill which becomes law, does not mention any names, does not mention any institution, and only says:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President is authorized and requested to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A."

Mrs. SCHROEDER. Mr. Speaker, will the gentleman yield?

Mr. LEHMAN. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. I thank the gentleman for yielding.

Mr. Speaker, I think the problem with that is, as the gentleman knows, we have asked other committees which have done

this same thing, where they had enacting clauses which said one thing and the body which says something else, to please honor our jurisdiction and not do that. I think what we are doing is saying we are not that serious about our own merits. If we use that loophole what we do is decide who we want to honor in our district, and then we have the generic enacting clause so that we can put the flowery language afterward. And I think that is a serious infringement on jurisdiction.

Mr. LEHMAN. Mr. Speaker, I certainly respect the gentlewoman's opinion, and I think the point is well taken. However, I just want my colleagues in this body to know that there was no effort to circumvent, by this subcommittee or by the full committee, any kind of policy. This was done with the belief or intention that with the 218 signatures this body in its own judgment could work its will.

Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. ROSENTHAL).

Mr. ROSENTHAL. Mr. Speaker, I rise in support of House Joint Resolution 770, which authorizes and requests the President to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A."

I take special pride in this resolution as one of its original sponsors, but the credit must go to the Lubavitch movement which proposed the resolution and has worked so vigorously for its passage.

Incidentally, there is an important symbolism in the number of the resolution before us today—House Joint Resolution 770. It was pure coincidence that when I introduced it on March 1, it was assigned the number 770. But to the Lubavitchers, it is more than coincidence. That is the number of their world headquarters—770 Eastern Parkway, Brooklyn, N.Y. That address—770—is as well known to Lubavitchers throughout the world as the address 1600 Pennsylvania Avenue is to Americans.

The Lubavitch Movement actively promotes educational programs at more than 60 centers in 28 States, including my own State of New York, as well as throughout the world. April 18 marks the conclusion of the movement's own "Year of Education," and in addition it will be the 76th birthday of Rabbi Menachem Mendel Schneerson, the renowned leader of the Lubavitch Movement.

In his 27 years as world leader of the Chabad-Lubavitch movement, Rabbi Schneerson has launched extensive educational, social and rehabilitative programs that for many Jews have brought a new awareness of and a rededication to Torah-true Judaism.

He is the seventh leader of the Chabad-Lubavitch movement, which was founded in the 18th century by Rabbi Schneur Zalman of Liadi (1745–1812), author of the basic work of Chabad philosophy—"Tanya," and the "Shulchan Aruch"—the Code of Jewish Law.

Rabbi Schneerson was born in 1902 in Nikolaev, Russia, the son of the renowned Kabbalist and Talmudic scholar, the late Rabbi Levi Yitzchak Schneerson, and the great-grandson of the third Lubavitcher Rebbe, his namesake, Rabbi Menachem Mendel of Lubavitch. His father-in-law was the previous Lubavitcher Rebbe, Rabbi Yosef Yitzchak Schneersohn.

The present Rebbe emigrated to the United States in 1941 and took over leadership of the movement upon his father-in-law's death in 1950. Under him, educational programs and opportunities have been greatly expanded and diversified, reaching increasing numbers of young men and women not only throughout the United States but in Europe, Africa, South America and Australia as well.

This resolution marks the importance of education not only to the Lubavitch Movement, but, in the secular sense, to the entire Nation. It recognizes the need for the country to set aside a day devoted to the importance of education to the lives of our citizens and to the general well-being of the Nation.

I wish to commend the Lubavitch Movement for its dedicated work, to congratulate Rebbe Schneerson on his 76th birthday, and I call on my colleagues to join me in voting for passage of the "Education Day, U.S.A." resolution.

The text of the resolution follows:

H.J. RES. 770

Whereas the Congress recognizes a need for the Nation to set aside on the calendar a day devoted to the importance of education to the lives of its citizens and to the general well-being of the Nation; and

Whereas the Lubavitch Movement, which conducts educational activities at more than sixty centers in twenty-eight States as well as around the world, is especially committed to the advancement of education and has proposed the establishment of an "Education Day, U.S.A."; and

Whereas world Jewry marked in 1977 the seventy-fifth birthday of the revered and renowned Jewish leader, the head of the worldwide Lubavitch Movement, Rabbi Menachem Mendel Schneerson, who proclaimed on that occasion a "Year of Education"; and

Whereas the seventy-sixth birthday of this celebrated spiritual leader will occur on April 18, 1978, thus concluding the year of Lubavitch Movement activities dedicated to the "Year of Education" and the Lubavitcher Rebbe's milestone birthday: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President is authorized and requested to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A.".

Mr. ROUSSELOT. Mr. Speaker, I yield 2 minutes to my colleague, the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, I have listened with great interest to the protestations here that we are in some way waiving a hard and fast rule to consider this legislation. We do that almost every day on various topics of legislative activity that have a far greater impact on the United States and its people. A broad principle is involved here, the need for education of the people, and certainly that has something to do with the welfare of the American people, particularly, minorities and younger citizens. It is a problem that we must face in view of our present educational system.

This joint resolution simply calls upon the Congress of the United States to recognize one day of the year when we express our approval for solving the problems of education.

A few weeks ago the House allowed the consideration of the Humphrey-Hawkins Act. It purported to address a very broad problem. The bill amounted to a statement of intent that Congress approved of solving the unemployment problem. That act waived the Budget Act. The bill dealt with, certainly, the welfare of the American people. It involved economic problems that the Nation faces and wants to solve. A majority believed it to be effective.

Mr. Speaker, if this House can pass the Humphrey-Hawkins Act certainly it seems odd to me that we would now be so upset by Congress recognizing Education Day.

Mr. Speaker, I intend to support this joint resolution.

Mr. LEHMAN. Mr. Speaker, I yield myself such time as I may consume.

I thank the gentleman from Maryland (Mr. BAUMAN) for his remarks.

I just wanted to add one additional comment, and that is that the distinguished chairman of the Committee on Post Office and Civil Service, the gentleman from Pennsylvania (Mr. NIX) strongly supports this joint resolution.

Unfortunately, Mr. Speaker, he is not here today to lend his own voice in support of this resolution because he is away on official business. However, I did want to let my colleagues know that the distinguished chairman of the committee joins me in support of this joint resolution.

Mr. ROUSSELOT. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, I am absolutely captivated by the remarks of my distinguished colleague, the gentleman from Maryland (Mr. BAUMAN), and his overwhelming desire to help education.

We supposedly help education here in this Congress at least four or five times a year with all kinds of authorizations and appropriations of billions of dollars for education. We will get a chance to vote, I am sure, on a tax credit of some kind.

However, Mr Speaker, my main argument is that this joint resolution is wholly unnecessary. Nobody was able to show that it was needed. It is not that it is the most crucial issue of the day or that education is going to rise or fall on the basis of this resolution. Obviously, it is not.

My other concern is that it associates the whole issue of education with one movement.

Mr. Speaker, I do not know whether the gentleman from Maryland (Mr. BAUMAN) belongs to the Lubavitch Movement.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I will in just a minute.

Mr. BAUMAN. Mr. Speaker, the gentleman has mentioned a movement to which he says I belong.

The SPEAKER pro tempore. The gentleman from California (Mr. ROUSSELOT) has the floor.

Mr. ROUSSELOT. To continue, Mr. Speaker, I really do not know why we have to say that the only way in which we can celebrate Education Day is to give such great attention to the Lubavitch Movement and that they are really the only ones concerned with educational activity. I am pleased to learn that my colleague, the gentleman from Maryland, is so close to that movement, and perhaps he can explain later why he became so attentive to its part in education.

Mr. ASHBROOK. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to my distinguished colleague, the gentleman from Ohio.

Mr. ASHBROOK. Mr. Speaker, I would have to concur with everything that the gentleman from California (Mr. ROUSSELOT) has said. With some reluctance, I suppose, one could support Education Day. It is a little bit similar to what a Senator said some time ago when we were in the Vietnam war. He said, "Let us just declare that we won it and get out."

Perhaps, in the same spirit, we can declare an Education Day and say we really do have education.

Of course, I graduated from school at a time when one of the requirements was that a student could read and write, so I really do not relate too much to education nowadays.

The SPEAKER pro tempore. The time of the gentleman from California (Mr. ROUSSSELOT) has expired.

Mr. ROUSSELOT. Mr. Speaker, I yield myself 2 additional minutes.

Mr. ASHBROOK. Mr. Speaker, will the gentleman yield further?

Mr. ROUSSELOT. I yield to the gentleman from Ohio.

Mr. ASHBROOK. To continue what I was saying, Mr. Speaker, we have had so many changes in education, and I am sure that we should reward education with an Education Day.

When I was young, if a student failed it was because he was dumb. Now if a student fails, it is because the courses do not relate to anything in which he is interested or the teachers are dumb or the taxpayers have not provided education with enough money.

Perhaps, Mr. Speaker, for all of these reasons we should have an Education Day.

Mr. BAUMAN. Mr. Speaker, now will the gentleman yield?

Mr. ROUSSELOT. Now I yield to my very dear colleague, the gentleman from Maryland, who is associated with the Lubavitch movement.

Mr. BAUMAN. Mr. Speaker, I want to disclaim association with any movement. I am not even a member of any organized political group. I am a Republican.

Mr. ROUSSELOT. Mr. Speaker, I have no further comment on that pronouncement.

Mr. BAUMAN. I would say to the gentleman that I have no particular association with the Lubavitch Movement, although I am sure it is a worthy educational cause.

In my judgment, I think it is well that our Jewish friends are active in the field of education.

Mr. ROUSSELOT. Absolutely.

Mr. BAUMAN. Just as are Protestants and Catholics.

Mr. ROUSSELOT. Absolutely, but there is no Protestant group mentioned in this resolution.

Mr. BAUMAN. We should recognize them as well.

Mr. ROUSSELOT. What about the Catholic movement?

Mr. BAUMAN. They, too, deserve recognition for their educational system.

Mr. ROUSSELOT. They are all left out.

Mr. BAUMAN. All I am saying is that a House that passed a resolution recogizing "Sun Day" ought to be able to recognize education as important.

Mr. ROUSSELOT. Was that not an exciting bit?

Mr. BAUMAN. Every day is going to be Sunday by and by, I have been told in the words of a much loved hymn.

The SPEAKER pro tempore. The time of the gentleman from California has again expired.

Mr. ROUSSELOT. Mr. Speaker, I yield myself an additional 2 minutes.

Mr. BAUMAN. Will the gentleman let me complete my statement?

Mr. ROUSSELOT. Oh, absolutely.

Mr. BAUMAN. I just want the House to understand that because the gentleman from California and the gentleman from Maryland have this momentary disagreement, it is not a sign of weakness in that growing movement, the conservative movement, of which we are both members.

Mr. ROUSSELOT, Oh, is that a large group?

Mr. Speaker, I would now like to yield to my colleague from Connecticut, who is an important Member of this House, chairman of the Budget Committee. I would ask the gentleman, does this affect the budget?

Mr. GIAIMO. Could I first please suggest to the gentleman that it is not called the Lubavitch Movement——

Mr. ROUSSELOT. I am not very good on pronunciation.

Mr. GIAIMO. It is the Lubavitch Movement, and if the gentleman came from my part of the country he would find that it is a very excellent educational system.

Mr. ROUSSELOT. I am sure it is.

Mr. GIAIMO. As for whether or not it affects the budget, we have voted on so many suspension bills here lately that affect the budget, such as yesterday, when we voted on a multibillion-dollar—multibillion-dollar, I repeat—SBA disaster loan bill on suspension.

Mr. ROUSSELOT. The gentleman and I did not vote for it.

Mr. GIAIMO. I know we did not vote for it, but the great, overwhelming majority of the House supported the bill.

It is a pleasure to be able to vote for something which does not carry a dollar sign with it, but which merely recognizes an outstanding educational movement in the United States. In my home district we have one of the finest schools, the Hebrew Day School, run by Rabbi Hecht of the Lubávitch Movement. Rabbi Schneerson is the head of that. He is one of the outstanding men in America.

I recognize that we should not be coming forth, as the gentlewoman from Colorado says, that we should not proliferate the numbers of resolutions that come to this floor commending this person and that person and everything that comes to mind. I think it is a bad practice.

The SPEAKER pro tempore. The time of the gentleman from California has again expired.

Mr. ROUSSELOT. Mr. Speaker, I yield myself 2 additional minutes.

Mr. GIAIMO. Mr. Speaker, will the gentleman yield further?

Mr. ROUSSELOT. I would be absolutely delighted to yield.

Mr. GIAIMO. I am grateful to the gentleman. I recognize that we should not proliferate the number of resolutions which come to this floor, but I think in this instance that this is a good exception. American education is embattled in many areas of our country, and for many reasons. Here is a school system that I can tell the gentleman about, the Hebrew Day School in Orange, Conn., that is one of the outstanding schools in the Nation. It points out the ways in which we should go educationally.

Let me say to my conservative friends that they should be all for this educational system, because it is not in any sense a modern liberal system. It is a solid conservative form of education, and one in which I think we can all agree that a great deal of good is coming from. So, I would say that we should support this resolution.

Mr. ROUSSELOT. I thank my colleague.

Mr. JOHN L. BURTON. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to my distinguished colleague from California.

Mr. JOHN L. BURTON. Mr. Speaker, I would like to associate myself with the remarks of the gentleman from Connecticut; with the remarks of the gentleman from California; with the remarks of the gentleman from Maryland; with the remarks of the gentleman from Ohio; with the remarks of the gentlewoman from Colorado, and with the remarks any other gentlepersons or gentlewomen might make on behalf of or in opposition to this resolution, because I think it is something that should be fully debated and discussed.

I went to a public school, and I would like that to be in the record.

Mr. ROUSSELOT. Mr. Speaker, that is certainly an all-educational remark, and I appreciate it.

Mr. Speaker, I have fully explored all the ramifications of this highly important resolution in a slightly humorous vein, however, this is a serious issue.

It is with regret and some trepidation that I rise in opposition to House Joint Resolution 770, to establish April 18, 1978, as "Education Day, U.S.A." My colleagues know that this bill has been cosponsored by 220 Members of this body. My colleagues are also aware of the

fact that the resolution violates Post Office and Civil Service Committee policy, and House policy in a number of ways. One, my distinguished colleague on the Census and Population Subcommittee, Mrs. SCHROEDER, failed to mention is that no proposal shall be reported concerning a sectarian organization.

Mr. Speaker, I believe most of us present today supported the establishment of specific, strict rules governing the introduction and consideration of commemorative legislation. We should not deviate from established policy even for a worthy cause or occasion.

This bill purports to proclaim April 18, 1978, as "Education Day, U.S.A.," when, in fact, the legislation actually is intended to celebrate the natal day of one Rabbi Menachem Mendel Schneerson, the founder of the worldwide Lubavitch Movement.

Mr. Speaker, I wish the good Rabbi a very happy birthday and I hope the day will be suitably celebrated by his family, friends, colleagues and supporters. However, I must join with the gentlelady from Colorado in opposing this "opening of the floodgates" for commemorative legislation. With the enactment of House Joint Resolution 770, which so clearly violates established policy, we remove all the protection from the constant lobbying and pressure for more and more commemorative days and weeks which we gained when we adopted the Committee on Post Office and Civil Service policy in the last Congress.

Mr. Speaker, the distinguished Congresswoman from Denver has given us a brief catalog of other very noteworthy events occurring on April 18. At the risk of giving some energetic and patriotic Member of the House a bright idea, I would like to add to the list begun by my colleague:

FAMOUS PEOPLE BORN ON APRIL 18

William Williams, signer of the Declaration of Independence.

Richard Harding Davis, journalist, novelist (Soldier of Fortune).

Sam "Wahoo" Crawford, Baseball Hall of Fame.

Max Weber, painter.

George O'Brien, well-known actor, born 1900.

Steven Longstreet, motion picture writer.

Huntington Hartford, A&P heir, art patron.

Wendy Barrie, actress.

The Honorable Henry Hyde, Member of Congress.

Queen Mother Frederika of Greece, born 1917.

NEWSWORTHY EVENTS

Palm Sunday celebrated in Egypt, 387 AD.

Foundation stone for new St. Peter's Basilica laid in the Vatican, 1506 AD.

British attack San Juan, Puerto Rico, 1797.

Union troops evacuate Harper's Ferry, 1861.

Salona, Guatemala wrecked by earthquake, 1902.

General Doolittle and company bomb Japanese cities, 1942.

Ernie Pyle, journalist of WW II killed, 1945.

Ireland established as a republic, 1949.

Prince Rainier marries Grace Kelly, 1956.

First laundromat in United States opens in Fort Worth, Texas, 1934.

Mickey Mantle, age 21, hits a homerun in Griffith Stadium Washington, that travels 565 feet, believed to be longest ever measured in major leagues, 1953.

Finally, Mr. Speaker, I must warn my colleagues that a comparable list of important events could be compiled for any of the 365 days in our year. Many of the events are worth remembering and celebrating, as is Rabbi Schneerson's birthday. However, our mission in Congress is not to find a purpose for such celebrations. We recognized our broader legislative mission when we adopted formal procedures and rules for the consideration of commemorative legislation. I must urge the defeat of House Joint Resolution 770 on the grounds that the bill is in serious and substantial violation of established policy.

The SPEAKER pro tempore. The time of the gentleman from California has again expired.

Mr. ROUSSELOT. Mr. Speaker, I yield myself 2 additional minutes.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank my distinguished colleague, the gentleman from California (Mr. ROUSSELOT), for yielding.

Mr. Speaker, I rise in support of House Joint Resolution 767 which authorizes and requests that the President proclaim April 18 as "Education Day, U.S.A."

The Lubavitch movement has a center in St. Paul and the effects of its good works are felt throughout our entire Twin City metropolitan area. The good citizens who participate in, and support, its activities are a credit to the movement and its leader, Rabbi Menachem Mendel Schneerson, the Lubavitcher Rebbe.

Mr. LEHMAN. Mr. Speaker, I yield 1 minute to the gentleman from Montana (Mr. BAUCUS).

Mr. BAUCUS. Mr. Speaker, as I pondered the passage of this legislation designating April 18 as Education Day U.S.A., I checked my files and found that since I have been in Congress I have corresponded with over 5,000 Montanans about one sort of education problem or another. That is not surprising, especially when you consider that during this decade Americans have put roughly $40 billion each year into the elementary and secondary education of their children. And, do not forget that as fast as the costs of elementary and secondary education have grown in recent years, the costs of higher education have been growing even faster.

I strongly believe that these funds, to the extent they are used wisely and effectively, are investments—perhaps the wisest investments that our society can make. Yes, Mr. Speaker, education is a key to improvements in our quality of living. And, lest we be complacent, I would remind my colleagues how shocked our Nation was when the first Soviet Sputnik launch reminded us that we must compete intellectually and technically with a less than friendly world.

I would also remind my colleagues that while education is funded for the main part by non-Federal Government sources, it is still the second largest target of public financing. While the total cost of paying for all parts of our defense effort add up in recent years to about 11 percent of our gross national product, 4 to 5 percent of our GNP is devoted to education.

Concerns about education have grown at an unprecedented rate as economic success and social achievement have become inexorably linked with formal schooling in the public mind. In my own State of Montana, the first schools were started in mining camps in the early 1860's, and within 4 years of achieving statehood, the legislature provided for free schools.

As concern with education has grown, increased participation has naturally followed and in the school year ending 1977, more than one person in four was enrolled as a student at an educational institution somewhere in this country.

The combination of four trends—increased concern, widespread participation, record investment, and soaring expectation—places enormous responsibility on those of us in Congress as Americans turn to us to supply Federal aid in support of their educational aspirations. The long and the short of it is that narrow State and local tax bases are not sufficient to adequately fund even the most essential of this educational activity.

The case for Federal support of education is now well established and well understood. A stable and democratic society depends on literacy, knowledge, and widespread acceptance of certain values. Since State and local governments differ in their abilities to finance quality education and equality of educational opportunity, the Federal Government has recognized its responsibilities to subsidize education for a democratic society.

EDUCATIONAL ACTIVITY IN THE 95TH CONGRESS

The 95th Congress is fortunate to serve within an administration which appears to share many of our educational goals. With several important exceptions, such as impact aid and library and counseling funding, President Carter has submitted sound budget requests for education. This is a welcome change from the preceding two administrations which vetoed so many of our proposals in support of education. Yes, for the first time since 1973, the White House has asked for an increase in spending on education from the previous year.

During the first session, Congress authorized $1.1 billion to be spent in the next 5 years for the Education of All Handicapped Children Act. We have passed a bill to extend summer feeding programs in schools through 1980 and authorize Federal grants of 50 cents per child for a national nutritional education program. The Vocational Education Act was amended to include a provision permitting the use of Federal funds for local and State administration support, and another law was enacted increasing aid to higher education. School construction under Federal grants for local public works was authorized and the Career Education Act appropriated $275 million over the next 5 years for career education programs in elementary and secondary schools.

These accomplishments are important, but the current session of Congress will test our skills as responsible legislators even more severely. Most Federal programs to assist elementary and secondary schools will expire in fiscal 1978. Reauthorization of these programs should be accompanied by extensive scrutiny to make certain they are feasible as designed and funded.

Crucial programs that cannot succeed without increased appropriations must be given added support. We cannot afford half-hearted efforts that spend money and produce no results. Nor, can we allow waste in any program regardless of how noble are its goals.

Administration of Federal programs must be simplified. Costly redtape must be cut to maximize the effectiveness of each dollar spent. Legislators must be mindful that in spite of increased public demand for Federal aid to education, the tax-paying public is growing weary under the double burden of inflation and taxation. No program should be authorized before it is designed to operate efficiently.

A case in point is education for the handicapped. A laudable aim most of us share, it carries an expensive price tag. Smaller classes will be essential; teachers will need specialized training or assistance from specialists, and changes in plant and equipment will be needed to make the program work. Before Washington dictates detailed policy to local school districts on the education of the handicapped, some questions must be asked: Can those districts afford it? Can the States afford it? Where the answer is no, the next question must be: Will the Federal Government pay? What are the best ways for pursuing education for the handicapped which keep local school districts in control of these programs and limit Federal redtape and paperwork burdens? It does not make sense to jump head over heels in pursuit of any program without answering such questions as these.

IMPACT AID

When we consider impact aid and the administration's plans for reform of this program, we must ask even louder, can the States and local districts afford these reforms? Impact aid, like all Federal programs, needs periodic scrutiny and reform. But reform should be made with an eye toward strengthening this valued program and making it more effective. One such reform would be the requirement of early payments (by October) with subsequent adjustment based on actual current year figures.

Impact aid has a longer history than any other education program with the exception of aid to land-grant colleges and vocational education. I cannot stress too vigorously its importance to a State like Montana. Deprived of corporate taxes or even property taxes on the 30 percent of our land which is federally owned, without impact aid our local and State taxes would have to rise exorbitantly to keep pace with the inflationary costs of education. Moreover, impact funds are particularly important as they are discretionary funds and thus may be used for educational needs unique to each area.

So, while the Carter administration deserves high marks for its efforts in support of education, congressional vigilance must not be reduced. Our responsibility remains to insure equal opportunity to quality education without inflationary spending and to strike an equitable partnership between the Federal, State, and local governments.

Above all, we must leave the job of teaching to the experts—teachers. Congress is a legislative body, and should not be in the business of undermining local control of schools. Schools cannot be wantonly used to achieve social and political ends. Education is as important, perhaps more important, than many of the goals we have asked our schools to seek.

I am confident that the American people will continue to strongly support whatever must be done to maintain our strong educational system. There is a stable base of support in this country for elementary school, our secondary schools, vocational education, the research, service, and educational activities of our colleges and universities, and adequate financial support for our students, parents, and educational activity in general. However, I hasten to add that such things as the new demand for national competency tests show that Congress and government at all levels must produce clearer, cost-effective results for this high level of expenditure.

Mr. LEHMAN. Mr. Speaker, I yield to the gentleman from Minnesota (Mr. VENTO) such time as he may consume.

Mr. VENTO. Mr. Speaker, I rise in strong support of the resolution.

Mr. Speaker, the House of Representatives will have the opportunity today to act on a joint resolution authorizing and requesting the President to proclaim April 18, 1978, as "Education Day, U.S.A." I urge my fellow colleagues to join with me in support of this resolution, not only to signify the importance of education in the United States, but also to reaffirm our commitment to realizing the best educational system possible for our Nation's youth.

The impetus for designation of April 18 as "Education Day, U.S.A." has come from leaders of the Lubavitch Movement—an internationally renowned organization which has labored hard to promote educational activities at more than 60 centers in 28 States and a number of countries throughout the world. April 18 will mark the conclusion of the Lubavitch Movement's own "Year of Education" and, in addition, will be the 76th birthday of Rabbi Menachem Mendel Schneerson, the respected leader of the Lubavitch Movement.

I am personally aware of the fine work that has been accomplished at the Lubavitch House in St. Paul, Minn. It is an exciting learning center which radiates enthusiasm for learning which is so essential to education today. I applaud the efforts of Rabbi Moshe Feller who heads the Lubavitch Center in St. Paul, and endorse the continued activities of the Lubavitch Movement in our country.

I urge all Members of Congress to support this resolution and call upon President Carter to designate April 18 as "Education Day, U.S.A."

Mr. LEHMAN. In conclusion, Mr. Speaker, when this resolution was first brought to my attention and people in the Lubavitch Movement first came to me and wanted me to present this, I said, "There is no way in the world you are going to get 218 signatures on this." The representative of the movement said to me: "Do not worry. We have to have faith. God willing we will get the signatures." Well, if there is ever anything that proves there is something good in faith, it is the fact that we have the 218 signatures, and that recommends in itself this resolution.

I yield back the balance of my time.

● Mr. GREEN. Mr. Speaker, I am pleased to rise in support of House Joint Resolution 767, to authorize and request the President to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A."

This resolution has been proposed by the Lubavitch Movement, which actively promotes educational programs at more than 60 centers in 28 States, including my own State of New York. Since April 18, 1977, the Lubavitch Movement has been observing a "Year of Education," proclaimed on the occasion of the 75th birthday of the noted spiritual leader and head of the worldwide Lubavitch Movement, Rabbi Menachem Mendel Schneerson.

It is appropriate that we, as a nation, set aside a day to consider the importance of education to the welfare and progress of the United States. Education clearly holds the key to our future as a nation and to the continued vitality of our institutions and of our way of life.

I think it is fitting that the day we observe "Education Day, U.S.A." coincides with 76th birthday of the beloved Lubavitcher Rebbe. His devotion, and that of the Lubavitch Movement, to the advancement of education will serve as a special inspiration to all Americans on that day.

I urge my colleagues to vote in favor of House Joint Resolution 767.●

● Mr. CONTE. Mr. Speaker, I rise today in support of House Joint Resolution 767, which will designate April 18, 1978, as "Education Day, U.S.A." The education of our citizens is not only a worthy endeavor, but a healthy necessity. How else is our country to progress but for the continued and expanded knowledge obtained through the process of education.

I would urge my colleagues to recognize Rabbi Menachem Mendel Schneerson's unfailing efforts and achievements in the field of education by supporting this resolution.

Rabbi Schneerson, the renowned head of the Lubavitch Movement who is now marking his 76th birthday, has been a deeply devoted leader in the spiritual movement of the Jewish people through-

out this country and indeed throughout the world for many years. It is fitting that we conclude both his 75th year and the year the Lubavitch Movement devoted its activities to education with this tribute. Dedication of this kind is not often seen and must be acknowledged and commended.●

● Mr. LUKEN. Mr. Speaker, I rise today to express my support for House Joint Resolution 767, a resolution authorizing and requesting that the President designate April 18, 1978, as "Education Day, U.S.A."

April 18 marks the 76th birthday of the renowned Jewish leader, Rabbi Menachem Mendel Schneerson, the head of the worldwide Lubavitch Movement. This day concludes the year of the Lubavitch Movement dedicated to the Year of Education.

The Lubavitch Movement has a special commitment to the advancement of education, and conducts educational activities at more than 60 centers in 28 States as well as around the world. In Cincinnati, the Lubavitch Movement is represented by the Chabad House, which offers educational and spiritual enlightenment to young people in need.

The Lubavitch Movement is totally dedicated to the development of all education, and recognizes the need for our Nation to set aside one calendar day devoted to the importance of education to the lives of our citizens and to the general well-being of our Nation.

As one of the sponsors of this legislation, I fully support the advancement and development of education, and the intent of the Lubavitch Movement in declaring April 18, 1978, as "Education Day, U.S.A." I support this legislation, and urge my colleagues to do likewise.

Thank you.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. LEHMAN) that the House suspend the rules and pass the joint resolution (H.J. Res. 767).

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the joint resolution was passed.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. LEHMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Joint Resolution 767.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules.

Pursuant to clause 3, rule XXVII, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 7101, H.R. 2497, and H.R. 11092, on each of which the yeas and nays are ordered.

The Chair announces that the Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

## RIVERSIDE COUNTY, CALIF., LAND CLAIMS AMENDMENTS

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 7101.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the bill H.R. 7101, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 390, nays 14, not voting 30, as follows:

[Roll No. 208]

| Gudger | Reuss | Whitley |

The Clerk announced the following pairs:

On this vote:

Mr. Thompson and Mr. Udall for, with Mrs. Spellman against.

Until further notice:

Mr. Rodino with Mr. Del Clawson.
Mr. Runnels with Mr. Buchanan.
Mr. Nix with Mr. Hillis.

Mrs. Burke of California with Mr. Symms.
Mr. Teague with Mr. Dent.
Mr. Howard with Mr. Gephardt.
Mr. Conyers with Mr. Cohen.
Mr. Jones of North Carolina with Mr. Gudger.
Mr. Whitley with Mr. Reuss.
Mr. Kazen with Mr. Conable.
Mr. Mann with Mr. Leggett.
Mr. Krueger with Mr. Crane.
Mr. Nedzi with Mr. Thone.

So (two- thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 3(b)(3), rule XXVII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings.

## RECOGNITION OF INDIAN TRIBES

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 2497, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the bill, H.R. 2497, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 368, nays 33, not voting 33, as follows:

[Roll No. 209]

The Clerk announced the following pairs:

Mr. Udall with Mr. Symms.
Mr. Thompson with Mr. Conable.
Mrs. Spellman with Mr. Dent.
Mr. Rodino with Mr. Cohen.
Mr. Runnels with Mr. Gudger.
Mr. Jones of North Carolina with Mr. Buchanan.
Mr. Whitley with Mr. Crane.
Mr. Kazen with Mr. Thone.
Mr. Mann with Mr. Del Clawson.
Mr. Krueger with Mr. Leggett.
Mr. Teague with Mr. Gephardt.
Mrs. Burke of California with Mr. Reuss.
Mr. Ashley with Mrs. Heckler.
Mr. Nix with Mr. Howard.
Mr. Conyers with Mr. Hillis.
Mr. Wiggins with Mr. Young of Alaska.

Mr. DICKS changed his vote from "yea" to "nay."

So (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. RONCALIO. Mr. Speaker, I ask unanimous consent for the immediate consideration of a similar Senate bill (S. 661) to restore Federal recognition to certain Indian tribes, and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

Mr. DICKS. Mr. Speaker, reserving the right to object, I just want to make sure which tribes.

Mr. RONCALIO. Mr. Speaker, will the gentleman yield?

Mr. DICKS. I yield to the gentleman from Wyoming.

Mr. RONCALIO. Mr. Speaker, this is a similar bill that passed the Senate, and we are considering it. We will insert the provisions of the House-passed bill just voted on. It involves the Wyandotte, Ottawa, Peoria, and Modoc Tribes of Oklahoma.

Mr. DICKS. Further reserving the right to object, is there any difference from the last bill we just considered?

Mr. RONCALIO. If the gentleman will yield, the subject matter is similar to the bill just passed by the House.

Mr. DICKS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wyoming?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 661

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. (a) Federal recogntiion is hereby extended or confirmed with respect to the Wyandotte Indian Tribe of Oklahoma, the Ottawa Indian Tribe of Oklahoma, and the Peoria Indian Tribe of Oklahoma, the

provisions of the Acts repealed by subsection (b) of this section notwithstanding.

(b) The following Acts are hereby repealed:

(1) The Act of August 1, 1956 (70 Stat. 893; 25 U.S.C. 791–807) relating to the Wyandotte Tribe;

(2) The Act of August 2, 1956 (70 Stat. 937; 25 U.S.C. 821–826) relating to the Peoria Tribe; and

(3) The Act of August 3, 1956 (70 Stat. 963; 25 U.S.C. 841–853) relating to the Ottawa Tribe.

(c) There are hereby reinstated all rights and privileges of each of the tribes described in subsection (a) of this section and their members under Federal treaty, statute, or otherwise which may have been diminished or lost pursuant to the Act relating to them which is repealed by subsection (b) of this section. Nothing contained in this Act shall diminish any rights or privileges enjoyed by each of such tribes or their members now or prior to enactment of such Act, under Federal treaty, statute, or otherwise, which are not inconsistent with the provisions of this Act.

(d) Except as specifically provided in this Act, nothing contained in this Act shall alter any property rights or obligations, any contractual rights or obligations, including existing fishing rights, or any obligation for taxes already levied.

SEC. 2. (a)(1) The Modoc Indian Tribe of Oklahoma is hereby recognized as a tribe of Indians residing in Oklahoma and the provisions of the Act of June 26, 1936 (49 Stat. 1967, as amended; 25 U.S.C. 501–509), are hereby extended to such tribe and its members. The Secretary of the Interior shall promptly offer the said Modoc Tribe assistance to aid them in organizing under section 3 of said Act of June 26, 1936 (25 U.S.C. 503).

(2) The provisions of the Act of August 13, 1954 (68 Stat. 718; 25 U.S.C. 564–564w), hereafter shall not apply to the Modoc Tribe of Oklahoma or its members except for any right to share in the proceeds of any claim against the United States are provided in sections 6(c) and 21 of said Act, as amended (25 U.S.C. 564(c) and 564t).

(3) The Modoc Indian Tribe of Oklahoma shall consist of those Modoc Indians who are direct lineal descendants of the Modocs removed to Indian territory (now Oklahoma) in November 1873, and who did not return to Klamath, Oregon, pursuant to the Act of March 9, 1909 (35 Stat. 751), as determined by the Secretary, and the descendants of such Indians who otherwise meet the membership requirements adopted by the tribe.

(b) The Secretary of the Interior shall promptly offer the Ottawa Tribe of Oklahoma and the Peoria Tribe of Oklahoma assistance to aid them in reorganizing under section 3 of the Act of June 26, 1936 (49 Stat. 1967; 25 U.S.C. 503), which Act is reextended to them and their members by this Act.

(c) The validity of the organization of the Wyandotte Indian Tribe of Oklahoma under section 3 of the Act of June 26, 1936 (49 Stat. 1967; 25 U.S.C. 503), and the continued application of said Act to such tribe and its members is hereby confirmed.

SEC. 3. (a) It is hereby declared that enactment of this Act fulfills the requirement of the first proviso in section 2 of the Act of January 2, 1975 (88 Stat. 1920, 1921), with respect to the Wyandotte Tribe of Oklahoma, the Ottawa Tribe of Oklahoma, and the Peoria Tribe of Oklahoma.

(b) It is hereby declared that the organization of the Modoc Tribe of Oklahoma as provided in section 3(a) of this Act shall fulfill the requirements of the second proviso in section 2 of the Act of January 2, 1975 (88 Stat. 1920, 1921).

(c) Promptly after organization of the Modoc Tribe of Oklahoma, the Secretary of the Interior shall publish a notice of such fact in the Federal Register including a statement that such organization completes fulfillment of the requirements of the provisos in section 2 of the Act of January 2, 1975 (88 Stat. 1920, 1921), and that the land described in section 1 of said Act is held in trusted by the United States for the eight tribes name in said Act.

SEC. 4. The Wyandotte, Ottawa, Peoria, and Modoc Tribes of Oklahoma and their members shall be entitled to participate in the programs and services provided by the United States to Indians because of their status as Indians, including but not limited to those under the Act of November 2, 1921 (42 Stat. 208; 25 U.S.C. 13), and for purposes of the Act of August 16, 1957 (71 Stat. 370; 42 U.S.C. 2005–2005F). The members of such tribes shall be deemed to be Indians for which hospital and medical care was being provided by or at the expense of the Public Health Service on August 16, 1957.

MOTION OFFERED BY MR. RONCALIO

Mr. RONCALIO. Mr. Speaker, I offer a motion. The Clerk read as follows:

MR. RONCALIO moves to strike out all after the enacting clause of S. 661 and insert in lieu thereof the provisions of H.R. 2497, as passed.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "To reinstate the Modoc, Wyandotte, Peoria, and Ottawa Indian Tribes of Oklahoma as federally supervised and recognized Indian tribes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 2497) was laid on the table.

## INCREASING AUTHORIZATIONS FOR NAVAJO-HOPI INDIANS RELOCATION

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 11092.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wyoming (Mr. RONCALIO) that the House suspend the rules and pass the bill H.R. 11092, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 361, nays 43, not voting 30, as follows:

[Roll No. 210]

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF CONFERENCE REPORT ON H.R. 6782, TO PERMIT MARKETING ORDERS TO INCLUDE CERTAIN PROVISIONS

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1047), on the resolution (H. Res. 1121) providing for consideration of the conference report on the bill (H.R. 6782) to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion, which was referred to the House Calendar and ordered to be printed.

## PROVIDING FOR CONSIDERATION OF H.R. 11662, ESTABLISHMENT OF LOWELL NATIONAL HISTORICAL PARK

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1113 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1113

*Resolved*, That upon the adoption of this resolution it shall be in order to move, section 401(a) of the Congressional Budget Act of 1974 (Public Law 93–344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11662) to provide for the establishment of the Lowell National Historical National Park in the Commonwealth of Massachusetts, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interior and Insular Affairs, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Interior and Insular Affairs now printed in the bill as an original bill for the purpose of amendment under the five-minute rule and said substitute shall be read for amendment by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore (Mr. MCFALL). The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Illinois (Mr. ANDERSON), pending which I yield myself such time as I may consume.

Mr. Speaker, the resolution (H. Res. 1113) provides for the consideration of the bill (H.R. 11662) to provide for the establishment of the Lowell Historic Park in the Commonwealth of Massachusetts and for other purposes.

Mr. Speaker, this is a 1 hour open rule which provides for the committee amendment in the nature of a substitute now printed in the bill to be considered as an original bill for the purpose of amendment.

The rule also provides for the bill to be read for amendment by title and waives a point of order against consideration of the bill under section 401 (a) of the Congressional Budget Act of 1974. The act prohibits consideration of any legislation providing contract authority unless such legislation specifies that such authority is to be effective for any fiscal year only to such or in such amounts as are provided in appropriation acts. Although H.R. 11162 did not so provide, the committee substitute cures the Budget Act violation. Since it is that text which is placed before the Committee of the Whole by the rule, the Committee on the Budget concurred that the waiver was only technical and recommended that the waiver be granted.

Mr. Speaker, recently a motion was offered to suspend the rules and pass the bill (H.R. 11662). Although supported by a large majority the motion failed of the requisite two-thirds vote. I believe there was general agreement to the concept although there was some controversy over the scope of the site and certain administrative provisions. The resolution recommended by the Committee on Rules would adequately protect the right of any Member to address these concerns by amendment. Although, I would oppose any amendments, this is an open rule and permits the full House to make that judgment.

There is a strong realization that this is our only opportunity to accurately preserve a physical model of the development of the Industrial Revolution. The legislation before us would establish a National Historic Park at Lowell and a Commission which would jointly acquire and maintain the locks, canals, and old factories there.

This is a bill of vast historic importance and I believe the rule provides a fair and orderly procedure for consideration of this bill. Mr. Speaker, I urge the adoption of House Resolution 1113.

Mr. ANDERSON of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1113 is a 1-hour open rule providing for the consideration of H.R. 11662 which would establish the Lowell National Historical Park in the Commonwealth of Massachusetts.

As my colleagues will remember, this bill was originally before the House under suspension of the rules on Monday, April 3, but it failed to receive the necessary two-thirds vote required for passage on a 228–132 rollcall vote.

The chairman of the Interior Committee (Mr. UDALL) subsequently wrote to the Rules Committee asking for a 1-hour open rule. And on Wednesday, April 5, the Rules Committee granted such an open rule by a voice vote.

My colleagues will also notice that this rule makes the committee substitute in order as an original bill for the purpose of amendment, and it waives section 401 (a) of the Budget Act. Section 401(a) of the Budget Act prohibits consideration of any bill providing new contract authority which is not provided for in appropriation acts. Section 203 of the original bill fails to limit the availability of such contract authority, and the bill thus violates the Budget Act. But, during markup on the bill, the Interior Committee adopted an amendment which eliminates this Budget Act violation, and that amendment is contained in the committee substitute which will be considered as an original bill for the purpose of amendment. Nevertheless, the waiver is still necessary since a point of order would lie against the original bill which this rule makes in order. In view of this situation, the Rules Committee has received a letter from the chairman of the Budget Committee (Mr. GIAIMO) in which he recognizes the existence of this technical violation of the Budget Act but goes on to state that, since "the new provision completely cures the Budget Act violation in the original bill, I have no objection to a waiver of section 401 of the Budget Act to permit consideration of the bill."

H.R. 11662 is aimed at preserving the most historic parts of Lowell, Mass., founded in 1822, and considered to be the

first planned industrial city in the United States. The bill would do this by establishing the Lowell National Historical Park as part of the National Park System and designating a preservation district; and creating the Lowell National Historical Park Commission, under the jurisdiction of the Department of Interior, to administer and protect the park and district in conjunction with the National Park Service. These provisions implement the recommendations of the Lowell Historic Canal District Commission which was established by Congress in 1975. The bill authorizes $40 million in fiscal year 1979, of which $18.5 million is for National Park System acquisition and development, and up to $2.5 million is for Commission acquisition and development.

Some concern was expressed during the debate last week that this might be an urban renewal bill in disguise. I think the additional hour provided for general debate by this rule, plus the opportunity for amendment under this rule, provides ample opportunity for such concerns to be aired and acted on if necessary. I therefore urge adoption of this rule.

Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

## PERMISSION FOR COMMITTEE ON RULES TO FILE A PRIVILEGED REPORT

Mr. MOAKLEY. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file a privileged report.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

## ESTABLISHMENT OF LOWELL NATIONAL HISTORICAL PARK

Mr. PHILLIP BURTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11662) to provide for the establishment of the Lowell National Historical Park in the Commonwealth of Massachusetts, and for other purposes.

The SPEAKER pro tempore (Mr. McFALL). The question is on the motion offered by the gentleman from California (Mr. PHILLIP BURTON).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 11662, with Mr. MURTHA in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from California (Mr. PHILLIP BURTON) will be recognized for 30 minutes, and the gentleman from Kansas (Mr. SEBELIUS) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. PHILLIP BURTON).

Mr. PHILLIP BURTON. Mr. Chairman, I yield such time as he may consume to our distinguished colleague, the gentleman from Massachusetts, (Mr. TSONGAS) the author of the legislation.

Mr. TSONGAS. Mr. Chairman, H.R. 11662 would establish a Lowell National Historical Park and an adjacent Lowell Historic Preservation District.

The purpose of this bill is to preserve and interpret certain sites, structures, and districts in Lowell; historically and culturally, the most significant planned industrial city in the United States.

Lowell's nationally significant resources include the 5.6-mile power canal system; seven original mill complexes; 19th century commercial and municipal buildings; social, labor, and educational institutions; mill residences; and early transportation facilities.

Another of the city's significant resources is its people. The Yankee "mill girls" were Lowell's first textile workers. They were replaced beginning in the 1850's by immigrants from throughout Europe. Scores of ethnic neighborhoods developed, cemented by the customs and heritage of the residents' former countries. These traditions remain today in Lowell.

On February 17, 1978, National Park Service Director William J. Whalen testified in support of a Lowell National Park before a House subcommittee. He stated:

> Lowell—more so than any other city—(can) portray the beginning of commerce and industry in America. Lowell presents an opportunity for preservation that should not be lost.

Historian Margaret Terrell Parker has written:

> The city's origin and growth constitute the first instance in America of the development of a city of the primarily industrial type.

According to historian Harry C. Dinsmore:

> The energy supplied by its carefully controlled waterpower gave birth and enduring life to the industrial revolution in this country.

The structures of the Industrial Revolution remain in Lowell. Quoting from the Interior Department report that designated Lowell a national historic landmark:

> Lowell occupies an especially significant place in the nation's history. The virtually unaltered waterways, together with the surprisingly little altered mills and their machinery, form what is probably the most historically significant aggregation of early 19th century industrial structures and artifacts in the United States.

The ways of work and life of the American Industrial Revolution can best be preserved in Lowell. And designation as a national park can help to bridge a serious gap. In a study conducted by the National Park Service, it was concluded that the theme America at Work, "is the most poorly represented of any in the national park system." A second theme relating to Lowell, that of Society and Social Conscience, is described as, "clearly one of the weak areas of the system's representation." In fact, of 13 subthemes represented in Lowell, 5 are partially or poorly represented, and 8 are not represented at all.

The preservation strategy in this bill is based on an intensive 2-year study by the Lowell Historic Canal District Commission, as mandated by Congress in 1975. This legislation also reflects hundreds of hours of consultation with the National Park Service. The bill has been further modified by the House Interior Committee to insure that preservation activities will be directed solely toward significant historical and cultural properties.

Major preservation and intensive visitor use would be directed towards a nationally significant 2-by-5 block area. Preservation responsibilities would be shared by various levels of government within this "historic core area." Every building here relates directly to the corporate system of early Lowell and was built between 1825 and 1880 (with the exception of the nearly 1900 Lowell High School extension). Efforts would be made to restore the structures here to their 19th century appearance. A canal barge, trolley system, and pedestrian trail would link visitor sites.

This 2-by-5 block area, plus the canal system and associated structures, would constitute the Lowell National Historical Park. Lands directly adjacent to the park, containing a high concentration of historic properties, have been included in the Lowell Historic Preservation District.

This bill divides preservation, restoration, and management responsibilities between the National Park Service and a federally funded Lowell Historic Preservation Commission, established under the Department of Interior.

Within the park, the Commission would:

Use easements, grants, and agreements (and acquisition as a last resort) to provide for the preservation of 10 designated sites in the 2-by-5 block area; and

Establish standards and criteria for construction, preservation, alteration, and use of all properties; with the consent of the Secretary;

Within the preservation district, the Commission would—

Establish standards and criteria with the consent of the city manager of Lowell.

The Commission would also develop a park and preservation district plan detailing the Commission's future development, management, and budgetary proposals. A draft plan would be due in 1 year, a final plan in 18 months. Final approval of the Secretary is required. The plan would also include the establishment of an index of significant properties in order to determine eligibility for grants, loans, agreements, easements, and, as a last resort, acquisition. The city of Lowell would also be required to notify the Commission in the event that a building permit or zoning variance is pending for an historic index property.

The Commission would consist of seven local, five Federal, and three State appointees. It would have its own staff and an annual operating budget.

H.R. 11662 is intended to encourage a high level of cooperation between Federal, State, and local governments. The Commonwealth, in establishing the $10 million Lowell Hertiage State Park, has taken anticipated Federal participation into consideration. This State commitment is centered around Lowell's canal system and rivers. City and private sector historic preservation improvements have also been designed in a manner consistent with the national park theme.

Perhaps it would help to explain how the roles of the National Park Service and the Commission were determined. It first must be understood that the Lowell Park strategy is a direct result of the unique nature of the resource represented in Lowell.

Historic Lowell is not connected with famous people or specific political events. It is, rather, the embodiment of an era, a change in the American way of life by the development of industry and the creation of an industrial society. This idea cannot be illustrated with the utilization of a small number of isolated historic structures.

The essence of understanding the significance of Lowell is in the interrelationship of the scenic areas, rivers, canal system, and historic buildings which symbolize the cultural development of modern industrial America. The plan is concentrated in the historic core area where these relationships can best be seen.

The physical nature of the resource is also unique—without precedent for the National Park Service. The extent of nationally significant buildings is vast. Yet, traditional fee acquisition approaches to preservation are not well-suited for an urban area. Therefore, maximum preservation participation by the private sector is essential. The legislation designates historic areas and buildings which can maximize this process. Easements, grants, and loans can provide preservation incentives and extremely limit the need for acquisition.

Although the National Park Service strongly opposes any requirement that the agency purchase easements, enter into agreements, or administer a grants program, they did recognize the need for additional preservation activities. Therefore, the Park Service recommended acquisition of five structures and establishment of a supplemental $17.8 million NPS grant program to accomplish additional preservation tasks. The agency originally recommended that this supplemental preservation plan should be developed by the State and local governments, with oversight by a Federal advisory commission. However, on March 8, 1978, a compromise was reached with the Park Service and H.R. 11662 was introduced as a substitute bill.

The alternative to the Commission is for the Federal Government to shoulder greater financial and local leadership tasks. No one would find this acceptable. Furthermore, a solution that simply limited federal activity to scattered sites would make standards unenforceable and encourage incompatible use of adjacent properties.

The Lowell Historic Canal District Commission considered alternatives to the proposed commission structure with Federal, State, and local officials. They concluded that—

The entity could not simply be advisory;

State or local sponsorship was not feasible or desirable; and

Existing preservation mechanisms were inadequate

Furthermore, they found that the Commission could offer the distinct advantages of —

Centralizing fund approval authority and reporting through the Secretary of Interior;

Limiting National Park Service involvement to those functions for which the agency is best equipped; and

Broadening the participatory base for planning and implementation.

It should be made clear that the Park Service has always taken the position that purchase and operation of five sites alone would not preserve and interpret the story of the American Industrial Revolution in Lowell.

On April 4, I wrote to the Director of the Park Service to ask for an official position regarding this approach.

Director Whalen referred to the statement of Deputy Director Ira J. Hutchison on April 6, 1978, before a Senate subcommittee. He testified:

> The Administration realizes that no precedent exists for our recommendation that supplemental grants be made by the National Park Service. However, we believe that the precedent is warranted in Lowell due to its unique ability—more so than any other city—to portray the beginning of commerce and industry in America.

Director Whalen's letter continued:

> As I testified before the House, the differences between the Administration's position and H.R. 11662 are not over whether we should employ a unique approach to preservation but rather concerns about the size of the Federal commitment of dollars and the scope of the Federal partnership responsibilities . . . The genius of the approach of H.R. 11662 is that although it could have proposed that this area be administered as a "traditional park," it does not. Instead, the proposal envisions a genuine partnership of Federal, State, and local efforts to conserve a living historical landscape.

Twelve years ago Lowell rediscovered its identity. The city recognized that this identity was important to the Nation and its people. Hundreds of persons deserve credit for this effort. It is indicative of the spirit of Lowell that this initiative came from both labor and business, both descendants of immigrants and Yankees, and both Democrats and Republicans. In fact, it was my predecessors in Congress, F. Bradford Morse and Paul Cronin, both Republicans, who deserve credit for initiating and guiding this legislation through its formative stage.

Finally, I would like to quote from the report of the Lowell Historic Canal District Commission. It is a report which has received three national awards and it summarizes the concept of a Lowell Park with these words:

> Lowell dramatically illustrates the transition from an agrarian to an industrial society which occurred early in the history of this country. The unprecedented scale of Lowell's industrial development fostered a new life style that changed the vision and self image of Americans. The physical artifacts of this period—the mills, the locks and canals, the machinery—can be converted to living and dynamic monuments to the epoch they represent. The city's multi-ethnic composition and rich collection of traditions and life styles is a microcosm of our modern society. Lowell, Massachusetts, provides an extraordinary opportunity for Americans to learn about America—how it is and how it was—while exploring the roots of their culture and their way of life.

I urge you to vote for this legislation.

Mr. PHILLIP BURTON. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Chairman, I would like to offer my commendations to the chairman of the Subcommittee on National Parks and Insular Affairs and to the gentleman from Massachusetts (Mr. TSONGAS) for having done an absolutely outstanding job, along with their colleagues on the subcommittee and with the cooperation of the National Park Service, in working out a new, creative, and innovative way of preserving one of the most important historical towns exemplifying the Industrial Revolution in America.

To me, one of the things that has been so exciting about the Lowell project is that here we have a community which is basically preserved intact in its original form a community which was created on a human scale, one which has as part of its industrial background a system of waterways, that is not only of great historic and functional interest but has a certain charm that is lacking in some of our later industrial towns.

It, therefore, has an antique quality and at the same time it has an historic significance which makes it truly unique.

I am particularly interested in the historic preservation aspect of this project because here we are not trying to preserve a single building or a single set of landscape features but a whole district, similar to some of the historic districts that have been preserved and recognized in the past by the Federal Government.

Long before I came to Congress I was actively interested in the cause of historic preservation. I found that one of the hardest things to get across to people is the importance of preserving not only a particular historic structure but the setting in which it existed and the importance of keeping that setting intact as far as possible or returning that setting to its original appearance at the time of the significant events that the particular building or structure represents.

One of the geniuses of the Lowell plan is that it is neither an urban renewal program nor is it merely a plan to preserve some buildings in a static condition. It is a plan to preserve them in a going community and to harmonize activities in the historic part of that community so that the whole area retains both an antique and a lifelike quality.

Mr. Chairman, I would like to ask the gentleman from Massachusetts (Mr. TSONGAS) a couple of questions.

Mr. Chairman, under H.R. 11662, as I understand it, the Lowell Historic

Preservation Commission would develop a park and preservation plan which, among other things, would contain an index of significant properties to determine eligibility for grants, loans, agreements, easements, and acquisition. However, as I understand it, the Secretary of Interior would have to certify the eligibility of the properties. Are there any criteria for the Secretary to use in making that certification?

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Massachusetts.

Mr. TSONGAS. Mr. Chairman, the answer to the gentleman's question is "yes."

Under the National Park Service's management policies, the criteria would be the same as is now used for historic districts; and that is this:

> Historic districts composed of structures not sufficiently significant individually by reason of historical association or architectural merit to warrant recognition, that, when preserved or restored as integral parts of their environment, are of historical significance to the Nation in commemorating or illustrating a way of life in its developing culture.

Mr. SEIBERLING. Would that mean that a modern building that does not relate in any way to early Lowell would not qualify?

Mr. TSONGAS. The gentleman is correct.

Mr. SEIBERLING. Mr. Chairman, as I understand it, the philosophy behind the plan is to help protect the federally owned properties as well as to protect the interrelationship of the scenic areas, rivers, canal system and historic buildings. Would the Secretary be expected to be guided by this philosophy in making his certification of eligibility?

Mr. TSONGAS. Yes, he would.

Mr. SEIBERLING. Mr. Chairman, I thank the gentleman for his response.

I think it is really important to emphasize that this is a plan for preserving in its entirety the historic features of an entire area of a city. One of the important aspects of this plan, aside from the historic preservation aspect, is that the location is sufficiently near large population centers—indeed it is a population center of a moderate size in itself—so that it is not remote from the people.

There is an old saying that a nation that forgets its past has lost its soul. It seems to me that in all too many cases in this country we have failed to recognize until it was too late that what were once everyday buildings that people worked in and lived in had historic value. As time went by, these structures became more and more unique, and had an historic value, yet before we realized it we lost many of them. We are very fortunate in that Lowell is a city that by and large is intact in its 19th-century form.

It was a work-a-day city in those days, and it is still going to be a work-a-day city, but we are going to keep it so that people generations hence can see this part of 19th century industrial America long after most of the vestiges of early industrial America have gone elsewhere. I think we owe a great debt of gratitude to the chairman of the subcommittee and to the gentleman from Massachusetts for their devotion in helping make that possible. I hope my colleagues will give it the support it deserves.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Massachusetts.

Mr. BOLAND. I thank the gentleman for yielding.

Mr. Chairman, I want to join in the very eloquent and magnificent expression of the gentleman from Ohio (Mr. SEIBERLING) in support of this unique legislation. I also want to express my appreciation to the distinguished chairman of the subcommittee of the Interior Committee for his leadership here, and particularly I want to compliment my distinguished colleague, the gentleman from Massachusetts (Mr. TSONGAS) for the leadership he has displayed in this particular area. The significance of this particular program will not only impact Lowell, but in other areas of the United States, for years to come. This will be one of the leaders, actually, in determining what we will do with the historic preservation throughout the United States. I think that is significant.

Again, I want to compliment the very distinguished gentleman from Ohio for his very eloquent and magnificent statement with reference to this project.

Mr. Chairman, I want to associate myself with the remarks of the gentlemen from Ohio (Mr. SEIBERLING) in support of this legislation. In addition, I want to express my appreciation to the distinguished chairman of Interior and Insular Affairs Subcommittee on National Parks and Insular Affairs, Mr. BURTON, for the leadership he has displayed in the progress of this legislation. In particular, Mr. Chairman, I would like to compliment my distinguished colleague from Massachusetts, Mr. TSONGAS, for the tremendous amount of work and thought that he has done on this bill and the concepts that it embodies.

Mr. Chairman, the adoption of this legislation will be of tremendous significance not only for the city of Lowell and the Commonwealth of Massachusetts but I believe for the Nation as well. Lowell was one of the first planned industrial cities in the United States and is therefore important to the understanding of the roots of modern urbanized society. For too long we have tended to ignore this aspect of our history. As a result, we have lost the opportunity to preserve many examples of what life was like during the early days of the Industrial Revolution. Since so much of what we are today as a nation is linked to what took place in 19th century Lowell and the cities that followed it, I am glad that we are finally becoming aware of the necessity of insuring that future generations of Americans will have the opportunity to explore that aspect of their heritage.

This legislation represents an awareness on the part of the Federal Government that the restoration and rehabilitation of urban areas is compatible with the goals of the National Park Service. I believe that the Lowell National Historic Park will serve as a model for continued work in this area and I urge that the bill be adopted.

Mr. SEIBERLING. I thank the gentleman for his comments.

Mr. Chairman, let me simply say that the subject is an inspiring one, and I think it deserves all of the thought and the care we can give it.

Mr. PHILLIP BURTON. Mr. Chairman, I yield three minutes to the gentleman from Wyoming (Mr. RONCALIO).

Mr. RONCALIO. Mr. Chairman, I thank my eminent colleague and chairman of the subcommittee for bringing out this legislation.

There are innumerable reasons why this is an excellent piece of legislation, and I am grateful to my friends on the full committee and on the Subcommittee of National Parks and Insular Affairs for coming up with this bill.

In listening to my esteemed friend, the gentleman from Ohio (Mr. SEIBERLING) just now, I heard him say that a nation which has forgotten its past, has lost its soul. He is correct.

I am speaking now aside from the Lowell program. I would like to think a nation which has forgotten its soldiers in wartime has also lost its soul. Also, a nation which berates its institutions, and its offices, as the U.S. Congress is being berated today, ought to stop and see where the devil it has been and where it is going.

The newspapers today say that 18 Congressmen are receiving extra checks for disability. I am a World War II dogface, with 42 months of infantry service. We have a man in the other august body who had an arm shot off, and he receives a modest pension. It is quoted in the Associated Press account. It also mentions the eminent gentleman from Texas, TIGER TEAGUE, who lost a leg as result of World War II action. It suggests there is wrongdoing in a man being a pensioned war veteran and being paid for being a Congressman, for Lord's sake.

Mr. Chairman, let us have good sense to start fighting for this Congress and defending what is right, or it may well become an institution not worth serving in.

Mr. SEBELIUS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I have had some problems with this bill in the past, but I am pleased to say that in the spirit of cooperation, both Mr. SKUBITZ, the ranking minority member of the Interior Committee, and I, as ranking minority member of the Subcommittee on National Parks and Insular Affairs, have worked out many of our differences with the bill's sponsor, Mr. TSONGAS, and he will be offering a series of amendments at the proper time which reflect our joint agreements on amendments to perfect the bill. The adoption of these amendments will make this bill much more acceptable to me, and while the bill still will not embrace all of the changes I would like, I do intend to support it and I plan to offer no further amendments to it.

Mr. Chairman, as I indicated the last time this same bill was on the floor of the House last week, this legislation constitutes a fairly bold new step for direct Federal involvement and financial sup-

port of large-scale historical rehabilitation and restoration efforts in a very urbanized downtown area of Lowell, Mass.

The gentleman from Massachusetts (Mr. TSONGAS) is certainly due a great deal of recognition and credit for his leadership in putting this concept together and bringing this bill before the House.

As I indicated before, I have visited this area twice, and am genuinely supportive of efforts to preserve the historic fabric of the old locks and canals and certain textile mill complexes which were such a dominant part of the early scene of the development of Lowell as one of America's first planned industrial cities.

Much, if not most, of these historic remnants have been surrounded and in many cases supplanted by more contemporary works of man. Many of the old structures have been significantly renovated for more modernized usage, whereby the old original character and fabric has been destroyed or covered over. Yet much of the original old fabric still remains in places, only waiting to be recaptured through restoration and interpretive efforts. Considering this mix of condition, a real challenge exists here to recreate the flavor of the old days, while permitting a living city to continue to operate in its more contemporary ways. This is the challenge of the restoration of part of old Lowell.

Mr. Chairman, due to the conditions I have described, the most serious need in a legislative remedy is to properly prescribe the roles of the various players, and their degree of involvement.

There were several changes made in this bill in committee which helped to clarify these matters somewhat. Nevertheless, there are numerous parts of this bill which still leave me concerned as to their implications and workability. This bill, as it comes to the floor today, could be a headache to administer. Hopefully, some of these problems will be solved or clarified by amendments which may be offered and hopefully adopted on the floor today. The role and function of the Commission is extremely pervasive, and since it has prescribed operational functions even within the boundary of the national historical park itself, it really seems to have more power and control than the National Park Service. It is interesting to note, for instance, that while separate funding amounts are specified for both the National Park Service and the Commission in section 103(a) (1) and (2), another section, section 205(a) (2) directs that all these funds be made available to the Commission for its work in implementing its duties under title III. Hence, the National Park Service must look to the Commission for its funding—a subservient role for the National Park Service I have never before seen.

The 15-member Commission is very heavy on appointments of local people. Seven—nearly half—are to be appointed from recommendations by local city bodies, and 10 from recommending entities within the State. Conceivably, most or nearly all appointments could be resident of Lowell or from very nearby. Such a Commission could develop a very parochial and self-serving view. It is worthy of note that the administration witness, in his statement before the committee, recommended that such a Commission be merely advisory in nature. Yet this Commission in H.R. 11662 is to be very active and operational, as much or more so than the National Park Service. Moreover, it will receive the largest share of the $40,000,000 of Federal funds to be appropriated between it and the National Park Service.

I remain concerned that the roles of both the National Park Service and the Commission are quite unclear, particularly as they interrelate, and the parameters of the way the $21,500,000 of 100-percent Federal grant funds given to the Commission are to be expended, are very imprecise. It is not clear that significant public benefit will derive from the use of all of these funds, and a modified urban renewal or privately owned building face-lifting program is part of what may be entailed here.

Mr. Chairman, I indicated before, my disapproval of such a large area of privately owned, downtown real estate being needlessly brought within the boundaries of the park itself, rather than being left outside and within the area to be operated by the Commission. The property within the so-called intensive use zone is still within the park boundary, and is intended to always remain substantially within private ownership. It, therefore, ought not to be included within the park boundaries. To create a national park unit of any type embracing such a substantial amount of permanent private ownership is a misnomer and a deception to the public, and a disservice to our national park system.

Mr. Chairman, all of these and further criticisms and reservations I have with this bill should and could have been worked out by the committee. I am sorry that this did not happen, because the good and worthy things which deserve to be aided in Lowell through this legislation have been unfortunately jeopardized by the numerous bad features included in this bill.

Some of these problems could possibly be resolved by floor amendments, but the bill cannot be properly reoriented to the degree it needs to be, by floor action. Unless the bill is recommitted to the committee for further work, I hope that the Senate will work the bill over more closely than did the House, building upon whatever improvements might be adopted here on the floor today.

I hope that the final legislation which is signed into law for Lowell will entail a proper resolution of these key issues which I have mentioned.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield for a question?

Mr. SEBELIUS. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Chairman, I have a great deal of respect for the chairman and the ranking minority member of the Subcommittee on National Parks, on which I have the honor to serve.

Is my understanding correct that some time earlier today, the gentleman from Massachusetts (Mr. TSONGAS) met with various minority members and their staffs and agreed to offer extensive changes in the bill, which will meet the complaints that were raised by both gentlemen from Kansas (Mr. SEBELIUS and Mr. SKUBITZ), particularly the aspects of the bill that might have permitted the use of this legislation to support a quasi-urban renewal project in Lowell, Mass.?

Mr. SEBELIUS. To answer the gentleman, Mr. Chairman, some changes have been made by agreement of the staff of the gentleman from Massachusetts (Mr. TSONGAS) and the minority staff of the committee.

I do not know precisely how much of the language it supplants, as each of the numerous amendments are short in text. Collectively, I believe these amendments will tighten the bill up considerably in the direction I have been concerned about.

Originally it was thought that the bill might involve some aspects of urban renewal. However, the bill, with these amendments now does respond more to that issue, and we do want the area to be a quality national historical park with its old features properly preserved. We do not want to create a large outer perimeter including a great deal of contemporary urban landscape, which will be called a national park.

Mr. Chairman, I think we have responded to that objection to some extent, and I think this bill is now a much more responsible one.

Mr. BAUMAN. If the gentleman will yield further, Mr. Chairman, I hope there will be a full explanation given to the committee of these amendments so that we may judge whether or not the bill should be supported.

Mr. SEBELIUS. I think that will happen.

Mr. SKUBITZ. Mr. Chairman, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from Kansas.

Mr. SKUBITZ. Mr. Chairman, I thank my colleague for yielding.

Mr. Chairman, when this bill was before us on the Suspension Calendar, I said at that time that I agreed to it, with a reservation. Despite the reservation at that time, I said I was going to support it.

Mr. Chairman, I want to say this: I still intend to support the bill. I want to say further that we should commend the gentleman from Massachusetts (Mr. TSONGAS) and the minority side.

After talking with them, the gentleman from Massachusetts (Mr. TSONGAS) had a number of amendments of his own which he felt should be added, providing certain safeguards in this bill.

I want to commend him for it, and I want to commend both staffs for working out amendments which we feel do remedy the defects in this bill and will make it a better piece of legislation. When these amendments are accepted here today.

I feel that—

We will have adequate protection in this legislation to assure that Federal

money will not go in to urban revitalization efforts, rather than strict public-benefit historic preservation work.

The powers and functions of the new Federal Commission which is created are limited as follows:

First. To funds for the preservation district principally, leaving the park funds authorizations under control of the Secretary and the National Park Service;

Second. The Secretary shall approve or disapprove any park preservation plan within 90 days after date of receipt from the Commission;

Third. Standards and criteria established by the Commission are subject to review and approval of the Secretary; and

Fourth. The Secretary shall make an annual report to Congress relative to loan and grants provided.

Mr. Chairman, with the adoption of the agreed upon amendments proposed for incorporation in the bill, I find the bill much more palatable and acceptable, and I shall support it.

Mr. SEBELIUS. Mr. Chairman, I yield such time as he may consume to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman. I am pleased to join in support of H.R. 11662, a bill to establish a national historical park in Lowell, Mass. As a native of Massachusetts, I can say with conviction and pride that Lowell, Mass., remains today a dramatic illustration of 19th-century industrial America and it is our intent by this legislation to preserve this heritage so that its unique cultural and historic resources may be enjoyed by the Nation.

The historical significance of Lowell's 19th-century industrial structures and artifacts including its intricate power canal system has received widespread publicity. The concept of a Lowell National Historical Park, determined by a local-State-Federal Commission created by the Congress in 1975 to be the appropriate action to take in order to preserve and interpret the city's special role in the American Industrial Revolution, has been well received at all levels of Government and by the private sector. This support is attested to by the more than $60 million already invested by the private and public sectors in park-related projects.

I believe we have an opportunity today to do something imaginative, something a little bit different with respect to our national park system but something that is well within the intent of the Congress when it established the national park system to preserve and interepret our natural and historic heritage.

I am hopeful that my fellow colleagues, who I am sure feel as strongly as I in our commitment to preserving America's essence, will recognize the opportunity before us and support H.R. 11662. Thank you.

The article follows:

SAVING THE LOWELL HERITAGE

The House this week can help preserve an important part of America's heritage by approving an imaginative project, the Lowell (Mass.) National Historical Park. Unlike most national parks, Lowell does not involve a precious natural resource or a site linked to famous people or political or military events. Instead, H.R. 11662 would rehabilitate a significant manmade site, the first planned industrial city in the United States. And it would help modern Americans understand the country's industrial development, the design and evolution of factory towns, the role of ethnic groups, and the growth of labor movements—elements that loom larger in many families' own histories than splendid landmarks and great events.

Lowell, on the Merrimack River near Boston, is the right place for that new kind of park. Founded in 1822, Lowell was the first American city built expressly for mass production and shaped by the new social order that factory work imposed. Although the textile industry has largely gone, many huge mill buildings remain. So do the intricate network of power canals and some of the schools, churches and boarding houses established for the Yankee "mill girls." Finally, the city's neighborhoods still reflect the cultural diversity of the thousands of immigrants who streamed there after 1850.

It is a place worthy of national attention. The tricky question has been to figure out how the federal government can bolster local and state efforts and concentrate the National Park Service's energies on the most important sites. A good answer has come out of years of discussion, a congressionally ordered study and the tireless work of Lowell's Democratic congressman, Paul Tsongas. That answer, embodied in H.R. 11662, is a complex partnership involving all levels of government, plus private interests. It is a promising way to preserve the past in the heart of a living city. In that sense, too, the Lowell National Historical Park could be a pacesetter, just as Lowell was during the 19th century.

Mr. SEBELIUS. Mr. Speaker, I yield 5 minutes to the gentleman from Washington (Mr. CUNNINGHAM).

Mr. CUNNINGHAM. Mr. Speaker, I think it is laudatory to be cognizant of historic values, a heritage that has allowed this country to reach the state it has. But, I also have concern that, after watching Congress recently place on the backs of the American workers the highest tax increase in the peacetime history of this country, if we really have a reserve of spending dollars that should authorize Congress at this time to go out and resort to funding a $40 million program. A local issue that, frankly, I think can be resolved within the private sector by not only the Corporation of Lowell, but by the Commonwealth of Massachusetts.

Certainly, even the chairman's city of San Francisco has within the private sector, in a magnificent manner, gone ahead and worked to maintain its historic preservation sites, such as along the waterfront and in the south.

I see here that there are buildings which we are authorizing the Secretary, if need be, to condemn so that they can be placed on the National Historic Register although—and if I am in error, I would ask the sponsor to correct me—I understand that some of these are not at present enrolled on the National Historic Building Register.

So, what I am really questioning, not to belittle the intent, but to simply ask, should we at this time, with a $60 to $80 billion deficit facing this Congress this year, with a President today explaining a new inflationary-fighter clause to the American people, with the American people faced with heavy taxes, high inflation, does this really fall within a top drawer congressional priority today? With that, I would yield to the sponsor to answer the questions concerning the historic buildings.

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. CUNNINGHAM. I yield.

Mr. TSONGAS. The amendments that have been worked out with both Mr. SKUBITZ and Mr. SEBELIUS, I think, go to the safeguards the gentleman is seeking. The structures that are to be condemned are two small modern structures adjacent to the old city hall, because they are inconsistent with the architecture. But, none of the modern or quasi-modern buildings will be preserved. If the gentleman will read the amendments to be offered by Mr. SKUBITZ, he will see that.

Mr. CUNNINGHAM. I will just claim my time to ask another question. Would the gentleman say that the priority of this falls well within the Presidential guidelines to fight inflation, and as a top drawer Government priority?

Mr. TSONGAS. Yes.

Mr. CUNNINGHAM. I am glad that the gentleman feels that way, because frankly my overtaxed constituents I think would take exception.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. CUNNINGHAM. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, is the gentleman familiar with the land and water conservation fund and the method by which it is financed?

Mr. CUNNINGHAM. To a certain degree, although probably not as familar as the gentleman from Ohio.

Mr. SEIBERLING. Let me say the primary source of revenue for the land and water conservation fund, which is $900 million each year set aside for national parks and recreational uses by the States and local governments, is the offshore oil royalties the United States gets from authorizing the exploitation of this wasting resource.

The concept behind the fund is that, since we are depleting the oil and some of our other natural resources the royalties for which go into this fund, we should take a part of the proceeds from those resources and put them into preservation of some of our other resources, both historical and natural. Lowell happens to be primarily a historical resource. If we do not do that in some form or other, someday it is all going to be gone, and after we have burned all the oil and used up all the minerals we will have nothing to show for it. So I suggest the legislation is compatible with the gentleman's viewpoint.

Mr. SEBELIUS. Mr. Chairman, I yield 1 minute to the gentleman from Kansas (Mr. SKUBITZ).

Mr. SKUBITZ. Mr. Chairman, I join with the gentleman in stating that, yes, I think this is worth preserving. We have to set aside some things like this for the future. After some of these things are gone they can never be brought back into being again.

As my colleague, the gentleman from Ohio says, the money for the park, al-

though I am not sure about the preservation district, comes out of the land and water conservation fund, not out of the general tax funds.

Mrs. HECKLER. Mr. Chairman, I strongly support this legislation for which the citizens of Lowell have so long fought, to establish a Lowell National Historical Park. I well remember when our former colleague, F. Bradford Morse, first introduced this concept and I am delighted to see it come to fruition.

Throughout Massachusetts there are reminders of the beginnings of the Industrial Revolution. These older urban centers once bustled with the business of manufacturing and the tremendous factories and elaborate transportation networks testify to a proud heritage. Yet, various economic factors have changed the industrial patterns of this country and, despite the efforts of small businesses to come back into urban areas, much of the vitality of these cities has vanished. Sadly, so have the individuals who worked in the mills and can best tell their story.

That is why the action we take on the House floor today is so important. This bill will synthesize the work of local, State, and the Federal Government in a massive effort to restore physically and to develop and interpret culturally one of the most critical periods in our Nation's history—a period that has never received that kind of treatment in a large-scale way. It is time that cities and industry join in celebrity with the battlefields, geographical phenomena, and birthplaces of national heroes.

In a State like Massachusetts where tourism is a major industry, the economic potential of this park is significant. Lowell is located less than an hour's drive from Boston and less than half that time from Lexington, Mass. The three localities will form a triangle of history and culture with Boston's Freedom Trail and Lexington's Minuteman National Park. Families will come from all over America to visit this living museum; children whose grandparents immigrated to Lowell will be able to see the mills at work and walk along the canals just as their ancestors did.

Mr. Speaker, without our help the hard work and planning the Commonwealth of Massachusetts and the city of Lowell will be for naught and the entire country will lose. The great buildings, architectural triumphs in their own right, will never be duplicated. Those now living who recall the mills operating at peak capacity will not be available to pass on their knowledge through the remarkable process of oral history. There is no better time than now to step forward and join the citizens of Massachusetts who are once again taking the lead to make a part of the past a part of the future.

● Mr. SKUBITZ. Mr. Chairman, when speaking on the floor last week regarding this same bill, I expressed some concern as to the criteria for funding the properties which will be aided by Federal grant funds for historic restoration purposes.

Now that amendments have been agreed upon relative to the funding for properties of "National Historical significance" in the Lowell National Historical Park and Preservation District, I feel that—

We have adequate protection in this legislation to assure that Federal money will not go into urban revitalization efforts, rather than strict public-benefit historic preservation work.

The powers and functions of the new Federal Commission which is created are limited as follows:

To funds for the "Preservation District" principally, leaving the park funds authorizations under control of the Secretary and the National Park Service;

The Secretary shall approve or disapprove any park preservation plan within 90 days after date of receipt from the Commission;

Standards and criteria established by the Commission are subject to "review and approval of the Secretary"; and

The Secretary shall make an annual report to Congress relative to loan and grants provided.

Mr. Chairman, with the adoption of the agreed upon amendments proposed for incorporation in the bill, I find the bill much more palatable and acceptable.●

● Mr. MOFFETT. Mr. Chairman, I strongly support the creation of the Lowell National Historical Park, and hope that it serves as an indication of a positive shift in our national park and recreation planning philosophy.

Besides being an invaluable historical resource, Lowell's industrial area is located both in and near urban areas. It is readily accessible to large numbers of people.

Congress and environmentalists are becoming increasingly aware of our need, not just for wilderness areas and large expanses of open space but for close by, perhaps smaller, interesting parks that can be used during weekends and even lunch hours.We need places to relax that do not require the expenditure of either lots of money or lots of energy to visit.

The environmental movement is expanding to encompass the cities and population centers. I applaud both the choice of Lowell as our first national historical park, and Congress effort to make accessible, human made resources available to us for relaxation and recreation.●

● Mr. DRINAN. Mr. Chairman, as a cosponsor of the legislation, I rise in enthusiastic support of H.R. 11662, providing for the creation of a National Historical Park in Lowell, Mass.

As my colleagues know, Lowell was the first planned industrial city in the United States, and remains to this day a living tribute to the architect and character of the American industrial revolution. Despite its historical significance, however, much of the city's physical heritage is threatened with significant deterioration or destruction. Unless a concerted and cooperative effort is made by local, State and Federal Government—an effort enabled by H.R. 11662—much of the city's physical history may be lost for future generations.

I wish to commend my friend and colleague from Massachusetts (Mr. TSONGAS) for focusing attention to this project within the Interior and Insular Affairs Committee, and for his outstanding leadership in orchestrating support for H.R. 11662 today on the House floor.●

Mr. SEBELIUS. Mr. Chairman, I have no further requests for time.

Mr. PHILLIP BURTON. Mr. Chairman, I do not have further requests for time, but I would like to restate that which I have stated on some other occasions and in other forums before. That is, I have seldom, if ever, been as impressed with the willingness to work and the effective application of intellect and the facts as we have seen demonstrated by our colleague, the gentleman from Massachusetts (Mr. TSONGAS). This legislation will not only stand as a monument and reminder to all in terms of our industrial history but also will similarly stand as a monument to the enormously effective legislative efforts of the gentleman from Massachusetts, Mr. PAUL TSONGAS.

A pertinent article follows:

[From the Washington Post, Apr. 10, 1978]

SAVING THE LOWELL HERITAGE

The House this week can help preserve an important part of America's heritage by approving an imaginative project, the Lowell (Mass.) National Historical Park. Unlike most national parks, Lowell does not involve a precious natural resource or a site linked to famous people or political or military events. Instead, H.R. 11662 would rehabilitate a significant manmade site, the first planned industrial city in the United States. And it would help modern Americans understand the country's industrial development, the design and evolution of factory towns, the role of ethnic groups, and the growth of labor movements—elements that loom larger in many families' own histories than splendid landmarks and great events.

Lowell, on the Merrimack River near Boston, is the right place for that new kind of park. Founded in 1822, Lowell was the first American city built expressly for mass production and shaped by the new social order that factory work imposed. Although the textile industry has largely gone, many huge mill buildings remain. So do the intricate network of power canals and some of the schools, churches and boarding houses established for the Yankee "mill girls." Finally, the city's neighborhoods still reflect the cultural diversity of the thousands of immigrants who streamed there after 1850.

It is a place worthy of national attention. The tricky question has been to figure out how the federal government can bolster local and state efforts and concentrate the National Park Service's energies on the most important sites. A good answer has come out of years of discussion, a congressionally ordered study and the tireless work of Lowell's Democratic congressman, Paul Tsongas. That answer, embodied in H.R. 11662, is a complex partnership involving all levels of government, plus private interests. It is a promising way to preserve the past in the heart of a living city. In that sense, too, the Lowell National Historical Park could be a pacesetter, just as Lowell was during the 19th century.

Mr. SEBELIUS. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the Clerk will now read the amendment in the nature of a substitute recommended by the Committee on Interior and Insular Affairs now printed in the bill as an original bill for the purpose of amendment, and said substitute shall be

read for amendment by titles instead of by sections.

The Clerk read as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

FINDINGS AND PURPOSE

SECTION 1. (a) The Congress finds that—

(1) certain sites and structures in Lowell, Massachusetts, historically and culturally the most significant planned industrial city in the United States, symbolize in physical form the Industrial Revolution;

(2) the cultural heritage of many of the ethnic groups that immigrated to the United States during the late nineteenth and early twentieth centuries is still preserved in Lowell's neighborhoods;

(3) a very large proportion of the buildings, other structures, and districts in Lowell date to the period of the Industrial Revolution and are important historical resources, including the five-and-six-tenths-mile power canal system, seven original mill complexes, and significant examples of early housing, commercial structures, transportation facilities, and buildings associated with labor and social institutions; and

(4) despite the expenditure of substantial amounts of money by the city of Lowell and the Commonwealth of Massachusetts for historical and cultural preservation and interpretation in Lowell, the early buildings and other structures in Lowell may be lost without the assistance of the Federal Government.

(b) It is the purpose of this Act to preserve and interpret the historically and culturally significant sites, structures, and districts in Lowell, Massachusetts, for the benefit and inspiration of present and future generations by implementing to the extent practicable the recommendations in the report of the Lowell Historic Canal District Commission.

DEFINITIONS

SEC. 2. For purposes of this Act—

(1) the term "park" means the Lowell National Historical Park, established by section 101(a)(1) of this Act;

(2) the term "preservation district" means the Lowell Preservation District, established by section 101(a)(1) of this Act;

(3) the term "Commission" means the Lowell National Historical Park Commission, established by section 301(a) of this Act;

(4) the term "Secretary" means the Secretary of the Interior; and

(5) the term "report of the Lowell Historic Canal District Commission" means the report submitted to the Congress by the Lowell Historic Canal District Commission pursuant to an Act entitled "An Act to provide for a plan for the preservation, interpretation development and use of the historic, cultural, and architectural resources of the Lowell Historic Canal District in Lowell, Massachusetts, and for other purposes", approved January 4, 1975 (88 Stat. 2330).

TITLE I—ESTABLISHMENT OF PARK

ESTABLISHMENTS; BOUNDARIES

SEC 101. (a)(1) To carry out the purpose of this Act, there is established as a unit of the National Park System in the city of Lowell, Massachusetts, the Lowell National Historical Park. There is further established in an area adjacent to the park the Lowell Preservation District, which will be administered by the Secretary and by the Commission in accordance with this Act. The boundaries of the park and preservation district shall be the boundaries depicted on the map entitled "Lowell National Historical Park, Massachusetts", dated March 1978, and numbered "Lowe-80,008A". Such map shall be on file and available for inspection in the office of the National Park Service, Department of the Interior, and in the office of the city clerk, city of Lowell.

(2) The Secretary shall publish in the Federal Register, as soon as practicable after the date of the enactment of this Act, a detailed description and map of the boundaries established under paragraph (1) of this subsection.

(b) The Secretary may make minor revisions of the park and preservation district boundaries established under subsection (a)(1) of this section, after consulting with the Commission and the city manager of Lowell, by publication of a revised drawing or other boundary description in the Federal Register; but no waters, lands, or other property outside of the park or preservation district boundaries established under such subsection may be added to the park or preservation district without the consent of the city manager of Lowell and the city council of Lowell. A boundary revision made under this subsection shall be effective only after timely notice in writing is given to the Congress.

COOPERATION OF FEDERAL AGENCIES

SEC. 102. (a) Any Federal entity conducting or supporting activities directly affecting the park or preservation district shall—

(1) consult with, cooperate with, and to the maximum extent practicable, coordinate its activities with the Secretary and with the Commission; and

(2) conduct or support such activities in a manner which (A) to the maximum extent practicable in consistent with the standards and criteria established pursuant to section 302(e) of this Act, and (B) will not have an adverse effect on the resources of the park or preservation district.

(b) Any applicant for a required Federal license or permit to conduct an activity within the park or preservation district shall provide in the application to the entity issuing such a license or permit a certification that the proposed activity will be conducted in a manner consistent with the standards and criteria established puruant to section 302(e) of this Act and that such activity will not have an adverse effect on the resources of the park or preservation district. No such license or permit shall be granted by any such entity if the Secretary finds that the granting of such license or permit will have an adverse effect on such resources.

AUTHORIZATION OF APPROPRIATIONS

SEC. 103. (a) There are authorized to be appropriated for fiscal years ending on or after September 30, 1979, such sums as may be necessary to carry out this Act, except that—

(1) the total of the amounts authorized to be appropriated for all fiscal years for the purpose of acquisition and development under the park management plan established pursuant to section 201(b) of this Act and emergency assistance under section 205(a)(1) of this Act shall not exceed $18,500,000; and

(2) the total of the amounts authorized to be appropriated for all fiscal years for the purpose of carrying out section 302(b)(2) of this Act, for the payment of grants and loans under section 303 of this Act, for the acquisition of property under section 304 of this Act, and for carrying out any transportation program and any educational and cultural program described in section 302(c) of this Act shall not exceed $21,500,000.

(b) Funds appropriated under subsection (a) of this section shall remain available until expended.

SPENDING LIMITATIONS

SEC. 104. Notwithstanding any other provision of this Act, no authority to enter into agreements or to make payments under this Act shall be effective except to the extent, or in such amounts, as may be provided in advance in appropriations Acts.

TITLE II—ROLE OF THE SECRETARY

PARK MANAGEMENT PLAN

SEC. 201. (a) The Secretary shall submit a statement to the Congress, within two years after the date on which funds are available after the date on which funds are made available to carry out this Act, which—

(1) reports on the progress that the Secretary intends to use these properties; designated for acquisition under section 202 of this Act, and describes the way the Secretary intends to use these properties;

(2) designates the properties within the park and preservation district respecting which the Secretary has entered into or intends to enter into agreements relating to interpretive exhibits or programs under section 203(a) of this Act;

(3)(A) reports on the progress of the Secretary in leasing a portion of the Lowell Manufacturing Company, located on Market Street, for the purpose of establishing a visitors' center in close proximity to parking and other transportation facilities, and (B) designates any other property within the park which the Secretary has leased or intends to lease for purposes of the park;

(4) reports any other activities which the Secretary has taken or intends to take to carry out the purpose of this Act; and

(5) contains a tentative budget for the park and preservation district for the subsequent five fiscal years.

(b)(1) Not later than three years after the date on which funds are made available to carry out this Act, the Secretary shall establish and submit to the Congress a park management plan containing the information described in subsection (a) of this section. Such plan shall, upon request, be available to the public.

(2) After consulting with the Commission, the city manager of Lowell, and the Commonwealth of Massachusetts, the Secretary may make revisions in the park management plan established pursuant to paragraph (1) of this subsection by publication of such revisions in the Federal Register. A revision made under this paragraph shall be effective 90 days after written notice of the revision is submitted to the Congress.

ACQUISITION OF PROPERTY

SEC. 202. (a)(1) The Secretary shall acquire the properties designated in paragraph (2) of this subsection, or any interest therein, by donation, purchase with donated or appropriated funds, condemnation, or otherwise. Any property or interest therein owned by the Commonwealth of Massachusetts or any political subdivision thereof may be acquired only with the consent of the owner. The Secretary may initiate condemnation proceedings under this paragraph only after making every reasonable effort to acquire property through negotiations and purchase, and consulting with the Commission (if established) and the city council of Lowell.

(2) The properties referred to in paragraph (1) of this subsection are the following:

(A) The Linus Childs House, 63 Kirk Street.

(B) The H and H Paper Company (commonly referred to as Boott Mill Boarding House), 42 French Street.

(C) Old City Hall, 226 Merrimack Street.

(D) Merrimack Gatehouse, 269 Merrimack Street.

(E) The Warnalaucit Textile Company, 562 Suffolk Street.

(F) The structures containing the Jade Pagoda and Solomon's Yard Goods, 210 and 200 Merrimack Street.

(b) Until the date on which the Commission conducts its first meeting, the Secretary may acquire any property within the park or preservation district not designated in subsection (a)(2) of this section, or any interest therein, if such property—

(1) is identified in the report of the Lowell Historical Canal District Commission as a property which should be preserved restored, managed, developed, or maintained in a manner consistent with the purpose of this Act;

(2) is listed in the National Register of Historic Places, as maintained by the Secretary pursuant to section 101(a) of the Act entitled "An Act to establish a program for the preservation of additional historic properties throughout the Nation, and for other purposes", approved October 15, 1966 (16 U.S.C. 470a), and section 2(b) of the Act entitled "An Act to provide for the preservation of historic American sites, buildings, objects, and antiquities of national significance, and for other purposes", approved August 21, 1935 (16 U.S.C. 462); or

(3) is determined by the Secretary to be of national significance;

and would be subject to demolition or major alteration in a manner inconsistent with the purposes of this Act unless acquired by the Secretary. Such property may be acquired only as provided in subsection (a)(1) of this section.

(c) The Secretary may acquire easements within the park for the purpose of carrying out this Act. Such easements may be acquired only as provided in subsection (a)(1) of this section.

AGREEMENTS AND TECHNICAL ASSISTANCE

SEC. 203. (a) The Secretary may enter into agreements with any owner of property within the park to provide for interpretive exhibits or programs. Such agreements shall provide, whenever appropriate, that—

(1) the public may have access to such property at specified, reasonable times for purposes of viewing such property or the exhibits or attending the programs established by the Secretary under this subsection; and

(2) the Secretary may make such minor improvements to such property as may be necessary to enhance the public use and enjoyment of such property, exhibits, and programs.

(b)(1) The Secretary shall provide, upon request, technical assistance to—

(A) the city of Lowell to assist the city in establishing regulations or laws consistent with the standards and criteria established pursuant to section 302(e) of this Act; and

(B) the Commission to assist the Commission in establishing the index and the standards and criteria required by section 302 of this Act.

(2) The Secretary may provide to any owner of property within the park or preservation district, the Commission, the Commonwealth of Massachusetts, the city of Lowell, and any other Federal entity or any institution such technical assistance as the Secretary considers appropriate to carry out the purpose of this Act.

WITHHOLDING OF FUNDS

SEC. 204. (a) The Secretary may refuse to obligate or expend any money appropriated for the purposes described in section 103(a)(1) of this Act or section 103(a)(2) of this Act if the Secretary determines that—

(1) the city of Lowell has failed to establish regulations or laws consistent with the standards and criteria established pursuant to section 302(e) of this Act within one year after the date such standards and criteria have been established, except that the Secretary may extend such one-year period for not more than six months if the Secretary determines that the city has made a good faith effort to establish such regulations or laws;

(2) the city of Lowell has failed to notify the Commission of (A) applications for building permits or zoning variances respecting any property which is included in the index established pursuant to section 302(d) of this Act, or (B) any proposals of the city of Lowell to change the regulations or laws described in paragraph (3)(A) of this subsection;

(3)(A) during the period before the city of Lowell has established regulations or laws consistent with the standards and criteria established pursuant to section 302(e) of this Act, the city of Lowell has granted any building permit or zoning variance or has taken any other action respecting any property within the park or preservation district, which both the Secretary and the Commission consider to be inconsistent with such standards and criteria;

(B) after the city of Lowell has established the regulations or laws described in subparagraph (A) of this paragraph, the city of Lowell has granted any building permit or zoning variance or has taken any other action respecting any property within the park or preservation district, which both the Secretary and the Commission consider to be inconsistent with such regulations or laws; or

(4) the Commission has not made good faith efforts to (A) provide for the preservation, restoration, management, development, or maintenance of property within the park and preservation district or (B) carry out the park preservation plan approved under section 302 of this Act.

GENERAL ADMINISTRATIVE FUNCTIONS

SEC. 205. (a)(1) The Secretary, acting through the National Park Service, shall take appropriate actions to implement to the extent practicable the park management plan established pursuant to section 201(b) of this Act. In carrying out such plan, the Secretary shall administer the park in accordance with laws, rules, and regulations applicable to the national park system. Before the date on which the Commission conducts its first meeting, the Secretary may take any other action considered necessary to provide owners of property within the park or preservation district with emergency assistance for the purpose of preserving and protecting their property in a manner consistent with the purpose of this Act.

(2) Subject to sections 204 and 302(b) of this Act, the Secretary shall make available to the Commission any funds appropriated under section 103(a) of this Act for the purpose of carrying out title III of this Act.

(b) Notwithstanding any other provisions of law, the Secretary may accept donations of funds, property, or services from individuals, foundations, corporations, and other private entities, and from public entities, for the purpose of implementing the park management plan.

(c) The Secretary may sponsor or coordinate within the park and preservation district such educational or cultural programs as the Secretary considers appropriate to encourage appreciation of the resources of the park and preservation district.

(d) The Secretary may acquire such leases respecting property within the park as may be necessary to carry out the purpose of this Act.

## TITLE III—ROLE OF THE COMMISSION

ESTABLISHMENT OF LOWELL NATIONAL HISTORICAL PARK COMMISSION

SEC. 301. (a) There is established within the Department of the Interior a commission to be known as the Lowell National Historical Park Commission which shall administer the park and preservation district in accordance with this title. The Commission shall consist of fifteen members appointed by the Secretary as follows:

(1) Three members who are members of the city council of Lowell, appointed from recommendations made by the mayor of Lowell.

(2) Three members appointed from recommendations made by the city manager of Lowell of persons who are representative of organized labor, the business community, local neighborhoods, and cultural institutions, and who are not elected officials.

(3) One member appointed from recommendations made by the president of the University of Lowell.

(4) Three members appointed from recommendations made by the Governor of the Commonwealth of Massachusetts.

(5) One member appointed from recommendations made by the Secretary of Commerce.

(6) One member appointed from recommendations made by the Secretary of Transportation.

(7) One member appointed from recommendations made by the Secretray of Housing and Urban Development.

(8) Two members who are qualified to serve on the Commission because of their familiarity with programs of the Department of Interior involving national parks and historic preservation.

(b) If any member of the Commission who was appointed to the Commission under paragraph (1) or (4) of subsection (a) of this section as a member of the city council of Lowell or any other government leaves that office, or if any member of the Commission who was appointed from persons who are not elected officials of any government becomes an elected official of a government, such person may continue as a member of the Commission for not longer than the thirty-day period beginning on the date such person leaves that office or bcomes such an elected official, as the case may be.

(c)(1) Except as provided in paragraph (2) of this subsection, members shall be appointed for terms of two years. A member may be reappointed only three times unless such member was originally appointed to fill a vacancy pursuant to subsection (e)(1) of this section, in which case such member may be reappointed four times.

(2) Of the members first appointed pursuant to subsection (a) of this section, the following shall be appointed for terms of terms of three years:

(A) The members appointed pursuant to paragraphs (2), (3), and (8) of such subsection.

(B) One of the members appointed pursuant to paragraph (4) of such subsection, as designated by the Secretary at the time of appointment upon recommendation of the Governor.

(d) The chairman of the Commission shall be elected by the members of the Commission. The term of the chairman shall be two years.

(e)(1) Any vacancy in the Commission shall be filled in the same manner in which the original appointment was made.

(2) Any member appointed to fill a vacancy shall serve for the remainder of the term for which his predecessor was appointed. Any member may serve after the expiration of his term for a period not longer than thirty days.

(f) Eight members of the Commission shall constitute a quorum, but a lesser number may hold hearings.

(g) The Commission shall meet at least once each month, at the call of the chairman or a majority of its members.

(h)(1) Except as provided in paragraph (2) of this subsection, members of the Commission shall each be entitled to receive $100 for each day (including travel time) during which they are engaged in the performance of the duties of the Commission.

(2) Members of the Commission who are full-time officers or employees of the United States, the city of Lowell, or the Commonwealth of Massachusetts shall receive no additional pay on account of their service on the Commission.

(3) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses,

including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5 of the United States Code.

PARK PRESERVATION PLAN AND INDEX

SEC. 302. (a)(1) Within one year after the date on which the Commission conducts its first meeting, the Commission shall submit to the Secretary a draft park preservation plan meeting the requirements of subsection (c) of this section. The Secretary shall review the draft park preservation plan and, within ninety days after the date on which such plan is submitted to the Secretary, suggest appropriate changes in such plan to the Commission.

(2) Within eighteen months after the date on which the Commission conducts its first meeting, the Commission shall submit to the Secretary a park preservation plan which meets the requirements of subsection (c) of this section. The Secretary shall, within ninety days after the date on which such plan is submitted to the Secretary, approve or disapprove such plan. The Secretary may not approve such plan unless the Secretary determines that such plan would adequately carry out the purpose of this Act.

(3) If the Secretary disapproves a park preservation plan, the Secretary shall advise the Commission of the reasons for such disapproval together with the recommendations of the Secretary for revision of such plan. Within such period as the Secretary may designate, the Commission shall submit a revised park preservation plan to the Secretary. The Secretary shall approve or disapprove any revised park preservation plan in the same manner as required in paragraph (2) of this subsection for the approval or disapproval of the original park preservation plan.

(4) If the Secretary approves a park preservation plan, the Secretary shall publish notice of such approval in the Federal Register.

(5) If the Secretary fails to approve or disapprove a park preservation plan within ninety days after the date on which the Secretary receives any such plan from the Commission, such park preservation plan shall be considered to be approved, and the Secretary shall publish notice of such approval in the Federal Register.

(6) Any park preservation plan or draft plan submitted to the Secretary under this subsection shall, upon request, be available to the public.

(7)(A) No changes other than those specified in subparagraph (B) of this paragraph may be made in the approved park preservation plan without the approval of the Secretary. The Secretary shall approve or disapprove any proposed change in the approved park preservation plan, except for any change specified in such subparagraph (B), in the same manner as required in paragraph (2) of this subsection for the approval or disapproval of the original park preservation plan.

(B) Any change in the approved park preservation plan relating to the index established pursuant to subsection (d) of this section or the standards and criteria established pursuant to subsection (e) of this section may be made by the Commission in the same manner specified in such subsections. The Commission shall promptly notify the Secretary of any change made under such subsections.

(b)(1) Except as provided in paragraph (2) of this subsection, the Secretary shall not make any funds available to the Commission to carry out section 303 or 304 of this Act until a park preservation plan has been approved under subsection (a) of this section.

(2) Before a park preservation plan is approved under subsection (a) of this section, the Secretary may make available to the Commission such funds as the Commission may request to—

(A) carry out activities to preserve, restore, manage, develop, or maintain any property designated in subsection (c)(1) of this section;

(B) take any action the Commission considers necessary to provide owners of property within the park or preservation district with emergency assistance for the purpose of preserving and protecting their property in a manner consistent with the purpose of this Act; or

(C) acquire in accordance with section 304 of this Act, any property within the park which—

(i) is identified in the report of the Lowell Historic Canal District Commission as a property which should be preserved, restored, managed, developed, or maintained in a manner consistent with the purpose of this Act;

(ii) is listed in the National Register of Historic Places, as maintained by the Secretary pursuant to section 101(a) of the Act entitled "An Act to establish a program for the preservation of additional historic properties throughout the Nation, and for other purposes", approved October 15, 1966 (16 U.S.C. 470a), and section 2(b) of the Act entitled "An Act to provide for the preservation of historic American sites, buildings, objects, and antiquities of national significance, and for other purposes", approved August 21, 1935 (16 U.S.C. 462); or

(iii) is determined by the Secretary to be of national significance;

and would be subject to demolition or major alteration in a manner inconsistent with the purpose of this Act unless acquired by the Commission.

(c) Any plan submitted to the Secretary under subsection (a) of this section shall—

(1) describe the manner in which the Commission, to the extent practicable in accordance with the recommendations in the report of the Lowell Historic Canal District Commission, proposes to provide for the preservation, restoration, management, development, or maintenance of—

(A) the Welles Block, 169 Merrimack Street;

(B) the Jordan Marsh Company Building, 153 Merrimack Street and 15 Kirk Street;

(C) the Yorick Club, 91 Dutton Street;

(D) the Lowell Gas Light Company, 22 Shattuck Street;

(E) St. Anne's Church and Rectory, 237 Merrimack Street;

(F) Lowell Institution for Savings, 18 Shattuck Street;

(G) the Ahepa Building, 31 Kirk Street;

(H) Boott Mill, Foot of John Street;

(I) Lowell Manufacturing Company on Market Street; and

(J) the structure commonly referred to as the Early Residence, 45, 47, and 49 Kirk Street;

(2) identify the properties included in the index established pursuant to subsection (d) of this section;

(3) designate the properties which the Commission intends to acquire under section 304 of this Act and specify how such properties shall be used;

(4) include the standards and criteria established pursuant to subsection (e) of this section;

(5) provide a detailed description of the manner in which the Commission intends to implement the grant and loan programs under section 303 of this Act, including information relating to the estimated amount of such grants and the manner in which such grants shall be awarded by the Commission;

(6) provide for a transportation program by which the Commission shall provide, directly or by agreement with any person or any public or private entity, transportation services and facilities for park and preservation district visitors, including barge equipment, docking facilities, and local rail facilities;

(7) provide for educational and cultural programs to encourage appreciation of the resources of the park and preservation district; and

(8) include a tentative budget for the subsequent five fiscal years.

(d) The Commission shall establish, within one year after the date on which the Commission conducts its first meeting, an index which includes—

(1) any property in the park or preservation district (except for any property designated in section 201(a)(2) of this Act) which should be preserved, restored, managed, developed, maintained, or acquired by the Commission because of its historical, cultural, or architectural significance; and

(2) any property which should be preserved, restored, managed, developed, or maintained in a manner compatible with the purpose of this Act because of its proximity to (A) any property referred to in paragraph (1) of this subsection, or (B) any property designated in section 201(a)(2) of this Act.

The index may be modified only by a majority vote of the members of the Commission, taken when a quorum is present.

(e)(1) The Commission shall establish standards and criteria applicable to the construction, preservation, restoration, alteration, and use of all properties within the preservation district with the advice of the Commonwealth of Massachusetts and of the Secretary, and the consent of the city manager of Lowell.

(2) The Commission shall establish the standards and criteria described in paragraph (1) of this subsection for any property within the park with the advice of the Commonwealth of Massachusetts and the city manager of Lowell and with the consent of the Secretary.

(3) The Commission shall establish standards and criteria under paragraphs (1) and (2) of this subsection within one year after the date on which the Commission conducts its first meeting. Such standards and criteria may be revised in the same manner in which they were originally established.

(4) The Secretary shall publish the standards and criteria established under paragraphs (1) and (2) of this subsection, and any revisions thereof, in the Federal Register.

LOANS, GRANTS, AND TECHNICAL ASSISTANCE

SEC. 303. (a) The Commission may make loans to the Lowell Development and Financial Corporation (established under chapter 844 of the Massachusetts General Laws) to enable the corporation to provide low interest loans for the preservation, restoration, or development of property listed on the index established pursuant to section 302(d) of this Act. The Commission may make any such loan to the corporation only after entering into a loan agreement with the corporation which includes the following terms:

(1) The loan to the corporation shall have a maturity of thirty-five years. At the end of such period, the corporation shall repay to the Secretary of the Treasury (in a lump sum) for deposit in the general fund of the Treasury the full amount of the loan without interest.

(2) The money received from the Commission, and any interest earned on such money, may be obligated by the corporation only for low interest loans made under paragraphs (6) and (7) of this subsection, except that the corporation may use such money to the extent the Commission considers reasonable to satisfy the costs of the corporation in administering the loan or procuring loan guarantees or insurance.

(3) Within five years after receiving the loan from the Commission, the corporation shall make loans under paragraphs (6) and (7) of this subsection which, in the aggregate, obligate the full amount of money re-

ceived from the Commission (minus any amount required to satisfy the costs described in paragraph (2) of this subsection).

(4) As loans made under paragraphs (6) and (7) of this subsection are repaid, the corporation shall make additional loans under such paragraphs with the money made available for obligation by such repayments.

(5) The corporation shall make available to the Commission and to the Secretary, upon request, all accounts, financial records, and other information related to loans made under paragraphs (6) and (7) of this subsection.

(6) Before the corporation approves any application for a low interest loan for which money has been made available to the corporation by the Commission, the corporation shall require the prospective borrower to furnish the corporation with a statement from the Commission stating that the Commission has reviewed the application and has determined that any loan received by the prospective borower will be spent in a manner consistent with—

(A) the standards and criteria established pursuant to section 302(e) of this Act, and

(B) the goals of the park preservation plan approved under section 302(a) of this Act.

(7) The corporation may approve any application for a low interest loan which meets the terms and conditions prescribed by the corporation with the approval of the Commission and for which money has been made available to the corporation by the Commission if—

(A) the prospective borrower furnishes the corporation with the statement described in paragraph (6) of this subsection;

(B) the corporation determines that such borrower has sufficient financial resources to repay the loan; and

(C) such borrower satisfies any other applicable credit criteria established by the corporation.

In order to determine whether the corporation has complied with this subsection, the Commission, or such other appropriate person or entity as the Commission may designate, shall conduct an audit at least once every two years of all accounts, financial records, and other information related to loans made under paragraphs (6) and (7) of this subsection. If the Commission determines, after conducting a hearing on the record, that the corporation has substantially failed to comply with this subsection, the outstanding balance of any loan made to the corporation under this subsection shall become payable in full upon the demand of the Commission.

(b)(1) The Commission may make grants to—

(A) owners of property included in the index established pursuant to section 302(d) of this Act for the preservation, restoration, management, development, or maintenance of such property in a manner consistent with the standards and criteria established pursuant to section 302(e) of this Act; and

(b) any person or any public or private entity to provide for (i) educational or cultural programs which encourage appreciation of the resources of the park and preservation district, or (ii) any planning, transportation, maintenance, or other services the Commission considers desirable to carry out the purpose of this Act.

(2) Grants under this subsection shall be made under agreements which specify the amount of the grant, the installments (if any) by which the grant shall be paid to the grant recipient, the purposes for which the grant may be used, and any other condition the Commission considers appropriate. No grant recipient may use a grant in any manner or for any purpose other than as specified in the grant agreement.

(3) Any grant recipient which the Commission, for the repayment to the Commiswith paragraph (2) of this subsection shall be liable, at the discretion of the Commission, for the repayment of the Commission of any funds awarded under this subsection which have been paid to such grant recipient. The Commission may bring a civil action for repayment of such funds. The Commission shall determine whether any additional funds awarded under this subsection shall be paid to such grant recipient.

(c) The Commission may provide technical assistance to—

(1) owners of property within the park or preservation district to assist such owners in (A) making repairs to or improvements in any property included in the index established pursuant to section 302(d) of this Act, or (B) applying for loans under subsection (a) of this section; and

(2) any other person or public or private entity to assist such person or entity in taking actions consistent with the purpose of this Act.

(d) The Commission shall make available to the Secretary, upon request, all accounts, financial records, and other information of the Commission relating to grants and loans made under this section.

ACQUISITION AND DISPOSITION OF PROPERTY

SEC. 304. (a)(1) The Commission may acquire any property included in the index established pursuant to section 302(d) of this Act, or any interest therein, by donation, by purchase with donated or appropriated funds, or by condemnation in accordance with paragraph (2) of this subsection.

(2) Only properties within the park may be acquired by the Commission by condemnation. The Commission may initiate condemnation proceedings only after making every reasonable effort to acquire any such property through negotiations and purchase and consulting with the city council of Lowell.

(b) The Commission may sell or lease any property which it acquires under subsection (a) of this section subject to such deed restrictions or other conditions as the Commission deems appropriate to carry out the purpose of this Act.

(c) Pursuant to a written agreement between the Commission and the Commonwealth of Massachusetts or between the Commission and the city of Lowell, the Commission may sell, donate, lease, or in any other manner the Commission deems appropriate make available to such Commonwealth or city any property which it has acquired under subsection (a) of this section in order to provide for the administration or maintenance of such property by such Commonwealth or city in a manner consistent with the purpose of this Act.

POWERS OF COMMISSION

SEC. 305. (a) The Commission may for the purpose of carrying out this Act hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission may deem advisable. The Commission may administer oaths or affirmations to witnesses appearing before it.

(b) When so authorized by the Commission, any member or agent of the Commission may take any action which the Commission is authorized to take by this section.

(c) Subject to section 552a of title 5, United States Code, the Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out this Act. Upon request of the chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(d) Notwithstanding any other provision of law, the Commission may seek and accept donations of funds, property, or services from individuals, foundations, corporations, and other private entities, and from public entities, for the purpose of carrying out its duties.

(e) The Commission may use it funds to obtain money from any source under any program or law requiring the recipient of such money to make a contribution in order to receive such money.

(f) The Commission may use the United States mails in the same manner and upon the same conditions other departments and agencies of the United States.

(g) The Commission may obtain by purchase, rental, donation, or otherwise, such property, facilities, and services as may be needed to carry out its duties. Any acquisition of property by the Commission shall be in accordance with section 304 of this Act. Upon the termination of the Commission, all property, personal and real, and unexpended funds shall be transferred to the Department of the Interior.

STAFF OF COMMISSION

SEC. 306. (a) The Commission shall have a Director who shall be appointed by the Commission and who shall be paid at a rate not to exceed the rate of pay payable for grade GS–15 of the General Schedule.

(b) The Commission may appoint and fix the pay of such additional personnel as the Commission deems desirable.

(c) The Director and staff of the Commission may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51, and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, except that no individual so appointed may receive pay in excess of the annual rate of basic pay payable for grade GS–15 of the General Schedule.

(d) Subject to such rules as may be adopted by the Commission, the Commission may procure temporary and intermittent services to the same extent as is authorized by section 3109(b) of title 5, United States Code, but at rates determined by the Commission to be reasonable.

(e)(1) Upon request of the Commission, the head of any Federal agency represented by members on the Commission may detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist it in carrying out its duties under this Act.

(2) The Administrator of the General Services Administration shall provide to the Commission on a reimbursable basis such administrative support services as the Commission may request.

Mr. PHILLIP BURTON (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read in full, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. Are there amendments to the bill?

AMENDMENTS OFFERED BY MR. TSONGAS

Mr. TSONGAS. Mr. Chairman, I offer several perfecting and clarifying amendments which are the result of agreements reached with the ranking minority members on the Committee on Interior and Insular Affairs and the National Parks Subcommittee, and I ask unanimous consent that these amendments may be considered as read, con-

sidered en bloc and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. BAUMAN. Mr. Chairman, reserving the right to object, I would hope that the gentleman from Massachusetts (Mr. TSONGAS) will explain each of these amendments in enough detail, because of the fact that not all of us are a part of the agreements that have been reached, so that we can understand exactly what changes are being made.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The amendments offered by Mr. TSONGAS are as follows: Page 33, line 18, insert "Historic" after "Lowell".

Page 33, strike lines 20 and 21, and insert in lieu thereof:

"(3) the term "Commission" means the Lowell Historic Preservation Commission established by section".

Page 34, line 15, insert "Historic" after "Lowell".

Page 45, strike lines 17 and 18, and insert in lieu thereof:

ESTABLISHMENT OF LOWELL HISTORIC PRESERVATION DISTRICT COMMISSION

Page 45, strike lines 21 and 22 and insert in lieu thereof: "Historic Preservation Commission which shall administer the preservation district and provide certain services within the park in accordance with this".

Page 45, line 1, insert "(2)" after "(a)".

Page 61, after line 11, insert the following new subsection:

(e) The Secretary shall make an annual report to the Congress describing the loans, grants, and technical assistance provided under this section and under section 203 of this Act. Such report shall specify the amount, recipient, and purpose of any loan, grant or technical assistance so provided and contain such additional information as the Secretary considers appropriate.

Title III, section 302(e)(2), page 56, lines 6–7, strike the words "with the consent of the Secretary," and insert in lieu thereof the words "subject to the review and approval of the Secretary".

Page 32, line 19, strike out "important" and insert "nationally significant" after "are".

Page 33, strike out line 7 and insert in lieu thereof the following: "pret the nationally significant historical and cultural sites, structures,".

Page 55, lines 10 and 11, strike out "historical, cultural, or architectural significance" and insert in lieu thereof "national historic or cultural significance".

Page 56, beginning on line 21, strike out "property" and all that follows through line 22 and insert in lieu thereof "any property described in section 302(d)(1) of this".

Page 59, strike out lines 18 and 19 and insert in lieu thereof:

"(A) owners of property described in section 302(d)(1) of this Act for the".

Page 61, strike out lines 14 and 15, and insert in lieu thereof: "property described in section 302(d)(1) of this Act, or any interest therein, by dona-".

Page 50, strike out lines 12 through 17.

Page 50, line 18, strike out "(6)" and insert in lieu thereof "(5)".

Page 50, line 21, strike out "(7)" and insert in lieu thereof "(6)".

Page 61, line 14, insert "designated in paragraph (3) of this subsection, any property" after "property".

Page 61, line 19, insert "or property designated in paragraph (3) of this subsection" after "park".

Page 61, after line 24, insert the following new paragraph:

(3) The Commission may acquire in accordance with paragraph (1) of this subsection the following properties, or any interest therein:

(A) World Furniture Building, 125 Central Street, and

(B) The Martin Building, 102–122 Central Street.

Mr. TSONGAS. Mr. Chairman, let me try to explain what these amendments are all about. The first group of amendments are those that we have worked out with the gentleman from Kansas (Mr. SKUBITZ) in his concern that the Federal moneys only be spent on those structures that are nationally significant in both their historic and cultural context. It was the gentleman's concern that the way the bill came out of the committee that that was not absolutely stated. So these various amendments relate to the nationally significant structures and they have been included to carry out the purposes of the bill and to exclude monies being spent on buildings that are not nationally significant. That is the rationale for those amendments.

The second group of amendments also have been worked out with the gentleman from Kansas (Mr. SEBELIUS) regarding his concern about the Lowell Historic Preservation Commission. The bill, as originally written, referred to the Lowell National Historic Park Commission and it was the gentleman's concern that, since the National Park Service does not have fee simple powers over these areas that to include the word "national" would be misleading. Therefore the changes, in essence, that are taking place, change the Lowell National Historic Park Commission to read Lowell Historic Preservation District Commission, which takes care of the problem of the word "national."

The other amendments are technical amendments which carry out the intent throughout the legislation. Third, there has also been worked out with the minority members that the two structures, which sit upon and cover the canal, would have to be removed, so that the first amendment does not jeopardize that necessity.

And the last is a request by the minority that the Secretary of the Interior report to the Congress once a year on the activities of the National Park Service and the Commission.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Massachusetts (Mr. TSONGAS).

The amendments were agreed to.

The CHAIRMAN. Are there further amendments to the bill?

Mr. TSONGAS. Mr. Chairman, I move to strike the last word.

Mr. TSONGAS. Mr. Chairman, I would like to make the following clarifying comments:

COMMISSION APPOINTMENTS

I would like to clarify the Federal appointments to the Lowell Historic Preservation Commission. These appointments would be made by the Cabinet Secretaries of the Departments of Commerce, Transportation, Housing and Urban Development, and Interior. The appointees would be from the various Federal departments as specified and not private citizens from Lowell.

THE INDEX, BUILDINGS IN PROXIMITY, SECTION 302(d)(2)

Only properties listed on the index pursuant to section 302(d)(1), that is; properties preserved, restored, managed, developed, maintained, or acquired by the Commission because of national historical cultural significance are eligible for use of easements, grants, and agreements, and acquisition as a last resort.

However, section 302(d)(2) is necessary to require that the city of Lowell notify the Commission of any building permits or zoning variances regarding properties in proximity to those designated on the index, pursuant to section 302(d)(1), in order to assure that these properties are managed in a manner consistent with the park. These properties would not be eligible for Commission funds.

This provision can protect against the alteration, demolition, or construction of properties that would be incompatible with the purposes of this act.

The CHAIRMAN. If there are no further amendments, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. SHARP) having assumed the chair, Mr. MURTHA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 11662) to provide for the establishment of the Lowell National Historical Park in the Commonwealth of Massachusetts, and for other purposes, pursuant to House Resolution 1113, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SEBELIUS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 326, nays 76, not voting 32, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Steiger for, with Mr. Jones of Oklahoma against.

Until further notice:

Mr. Waxman with Mr. Symms.

Mr. Rodino with Mr. Dent.

Mrs. Spellman with Mr. Horton.

Mrs. Burke of California with Mr. Del Clawson.

Mr. Udall with Mr. Conable.

Mr. Runnels with Mr. Gudger.

Mr. Jones of North Carolina with Mr. Crane.

Mr. Whitley with Mr. Mann.

Mr. Nix with Mr. Diggs.

Mr. Krueger with Mr. Miller of California.

Mr. Howard with Mr. Nolan.

Mr. Fascell with Mr. St Germain.

Mr. Teague with Mr. Ford of Michigan.

Mr. Kazen with Mr. Wolff.

Mr. BREAUX, Mr. MARRIOTT, Mrs. SMITH of Nebraska, Mr. THONE, and Mr. ABDNOR changed their vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. PHILIP BURTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed, H.R. 11662.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

## CONFERENCE REPORT ON H.R. 9179, OVERSEAS PRIVATE INVESTMENT CORPORATION AMENDMENTS ACT OF 1978

Mr. BINGHAM. Mr. Speaker, I call up the conference report on the bill (H.R. 9179) to amend certain provisions of the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. BRADEMAS). Is there objection to the request of the gentleman from New York?

There was no objection.

The clerk read the statement.

(For conference report and statement, see proceedings of the House of April 5, 1978.)

Mr. BINGHAM (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore. The gentleman from New York (Mr. BINGHAM) and the gentleman from Ohio (Mr. WHALEN) will be recognized for 30 minutes each.

The Chair recognizes the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conferees on H.R. 9179, legislation extending and revising the operating authority of the Overseas Private Investment Corporation (OPIC), met and reached agreement March 22. Last week the Senate approved the conference report by voice vote.

Mr. Speaker, the conference on behalf of the House were, I think, unusually successful in obtaining the consent of the Senate conferees to most of the provisions of the House bill. In particular, we were able to retain virtually all of the amendments adopted on the floor of the House, including the House amendment to bar any project that would adversely affect employment in the United States; the House amendment to concentrate OPIC programs in the poorest countries; the House human rights provision with a minor addition; effective antibribery language; and prohibition of projects involving copper, citrus, palm oil, and sugar.

Mr. Speaker, as to the small business amendment adopted by the House, the Senate conferees were adamantly opposed to the form of the House amendment. The Senators asserted that the effect of the amendment would be to make it impossible for OPIC to operate. The provisions adopted by the conference would, I sincerely believe, be more effective than the House language in

assuring maximum small business participation in OPIC's operations.

Let me develop that thesis, Mr. Speaker.

First, under the conference compromise, small businesses would receive not 50 percent, but 100 percent, of OPIC loans. All loans would go to small businesses. The OPIC loan program would be exclusively for small business projects.

Mr. Speaker, I would like to point out that in making the case for his amendment, the gentleman from Maryland (Mr. LONG) referred primarily and repeatedly to OPIC's loan program, not the insurance program; and on this I repeat: the conferees recommend that the entire loan program be devoted to small businesses.

Second, the conferees adopted a provision authorizing OPIC to devote up to 50 percent of its net profits to small business projects. This provision would enable OPIC to conduct outreach programs aimed at encouraging and facilitating small business investment abroad, without regard to the requirement that OPIC recoup the cost of such activity. Again, the conferees feel that this authorization will bring real and substantial benefit to small businesses interested in foreign investment in the spirit of the House provision.

So far as OPIC's insurance and guaranty operations are concerned, the conferees set 30 percent of the total as a goal for small business projects insured, reinsured, or guaranteed by OPIC. This places a burden upon OPIC to do better than they have done or are now doing in this regard without imposing an inflexible and impossible requirement. Particularly in view of the allocation of the entire OPIC loan program to small business, a 30-percent target for small business insurance seems reasonable.

The conferees agreed that "small business" should be defined as firms below the "Fortune 1000" level.

This means that the focus will be on businesses other than big business. The term "small business" means different sizes in different industries. For example, retail businesses can be one or two people. Farming can be very few people. However, manufacturing requires substantial capital and more employees, and mining, to which many OPIC projects are devoted, requires substantial capital. Thus, the Small Business Administration has many different definitions for its different programs.

The conference provisions will help the kinds of small businesses that are capable of engaging in foreign investment in the different fields. I repeat, I think that these provisions will do more to help small business get into the act, so to speak, of foreign investment, than the provision of the original House amendment.

Another difference between the Senate and House bills, Mr. Speaker, is that the conferees devoted considerable attention to the House provision precluding OPIC support of copper projects. The Senate had no similar provision and strongly objected to the House provision. The conferees finally agreed to a modified version of the House version precluding support of copper projects that would result in new or expanded projects before 1981, that is, this year or next year or the year after, and would preclude support of any project after that date, after January 1, 1981, if it would cause injury to the U.S. copper industry.

With respect to palm oil, sugar, and citrus, which was of great concern to a number of Members, the conferees accepted the House restriction against any support for such projects which result in exports. The statement of the managers clarifies the point, which is absolutely clear in the House legislative history, that the prohibition applies to projects which would result in exports to the United States.

On the issue of bribery, the conference committee was presented with a House provision requiring OPIC to deny claims on any project with respect to which an OPIC-insured investor had been found guilty of bribing a foreign official, and a similar but—by the time the conferees met—inoperative Senate provision. The Senate requirement that OPIC deny claims in such cases terminated upon enactment of the Foreign Corrupt Practices Act of 1977. That general antibribery legislation was enacted December 19, 1977.

The conferees on behalf of the Senate agreed, however, that it would be unseemly for a Government corporation like OPIC to pay claims in a case where bribery had occurred. They therefore accepted the House provision that claims should be denied provided the bribery were a cause of the loss for which the claims payment was sought.

The conferees agreed also that OPIC should suspend from eligibility for future OPIC coverage any OPIC investor convicted of bribery under the Foreign Corrupt Practices Act of 1977, with the flexibility for exceptions in the national interest and to set specific time periods for such suspensions.

On the matter of the expiration date for the extension of OPIC's authority, the Senate was very firm in insisting on their proposed date of September 30, 1981, and in fact they made this a condition of agreeing to the many concessions which it will be seen they did make to the House position. This represents a 9-month extension beyond the termination date in the House bill.

I might point out that the date of termination set in the House bill was originally set in the International Relations Committee bill reported out 6 months ago. At this much later date, the Senate argument that an expiration date of September 30, 1981, is appropriate is hard to resist.

Mr. Speaker, I hope that the House will see fit to approve the conference report.

Mr. WHALEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report on H.R. 9179, the Overseas Private Investment Corporation Amendments Act of 1978.

This report, as it came out of conference, deals effectively with many of the concerns raised during the course of committee hearings and floor debate.

The most important element of the legislation as it now reads is that small business is given a much greater preferential role in the OPIC program. OPIC will be required to allocate up to 50 percent of its annual net income, after making suitable provision for transfers and reserves, to fund and facilitate the development of projects by small business, cooperatives, and other small U.S. investors. This is a significant undertaking to bring small business into the export and foreign investment business. The applications by small business have in the past been relatively few, which has limited the participation of small business in OPIC programs—not through any intention of OPIC, but simply because no applications were being made on the part of small business.

Another important change in the legislation retained by the conference report is a clear prohibition on OPIC from supporting any project which would result in a significant reduction in U.S. employment.

Finally, to single out one other aspect of the language before us, OPIC will be required to prepare and maintain development impact profiles for each investment it supports. Furthermore, detailed guidelines are spelled out which will insure the provision of data to the Congress to enable us to more clearly evaluate the practical developmental effects of OPIC-assisted projects.

Mr. Speaker, let me point out that the essential provisions of all House floor amendments were retained in the conference version. The Senate, in a striking spirit of compromise, accepted time and again the House position, and on April 6 the full Senate ratified, without opposition, the conference product.

I urge my colleagues to support passage of the conference report on H.R. 9179.

Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Michigan (Mr. BROOMFIELD), the ranking minority member of the committee.

Mr. BROOMFIELD. Mr. Speaker, I rise in support of the conference report on H.R. 9179, the Overseas Private Investment Corporation Amendments Act of 1978.

OPIC is a self-sustaining quasi-governmental corporation established to complement the development assistance programs of the United States in developing countries. It insures U.S. investment against political risks of expropriation, currency inconvertibility, and losses due to war, revolution and insurrection, and has a limited program of financing private investment projects.

H.R. 9179 in its conference version extends OPIC's operating authority through September 30, 1981, and retains the core of all House amendments. These included the areas of development guidelines, small business preference, U.S. employment goals, restrictions on copper, palm oil, sugar and citrus project involvement, and human rights. It also modifies some basic authorities of the corporation on strictures imposed in 1974 regarding private insurance companies, and it provides that companies convicted of bribery under the Foreign Corrupt Practices Act of 1977 with re-

spect to an OPIC-assisted project lose insurance eligibility and be denied payment of claims.

I believe that OPIC's performance warrants renewal of its operating authority. In the past 3 years OPIC has provided productive capital, managerial and technical expertise, and training in industrial skills to 425 projects in 55 countries, representing $4.6 billion in total investment and important gains in jobs, revenues and foreign exchange for the host country. In turn, OPIC has provided economic benefits to the United States. The estimated 5-year benefits of the projects assisted in the last 3 fiscal years shows net cash flows of $2.3 billion in purchases of machinery and equipment and a net gain of some 37,500 man-years of employment in the United States contrary to the assertion of the AFL-CIO that OPIC exports American jobs. In addition, some of the OPIC-assisted projects have developed new sources of raw materials critical to the United States and world economies.

OPIC is a Federal program which does not require the appropriation of American tax dollars. OPIC charges substantial fees and premiums for its insurance policies as compared to the premiums and fees charged in similar programs by France, Germany, and Japan.

On April 6 the Senate ratified this conference report on H.R. 9179. The OPIC bill is strongly supported by the entire U.S. business community and endorsed by the Republican Policy Committee. Its continued existence is also favored by impartial groups like the League of Women Voters. I call on my colleagues to add their support to extending OPIC's statutory authority in the interest of maintaining U.S. economic presence in friendly developing countries and providing U.S. investors, especially small businesses, and companies lacking significant experience overseas, with an opportunity to expand and complete in the international economy.

Mr. WHALEN. Mr. Speaker, I reserve the balance of my time.

Mr. BINGHAM. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. RYAN).

Mr. RYAN. Mr. Speaker, it is at moments like this that I wish I had the eloquence and the acerbic tongue and wit of Wayne Hays, because I wonder sometimes, with a piece of legislation such as this, if this is not a good example of the reason why the Republican Party is the minority party.

This bill is a bad bill. The administration wants the bill. There is enough bad in this bill to warrant anybody taking it on, and my distinguished colleagues on the Republican side are mute in their criticism of what is in this legislation.

Is there room to be critical? Again I wish I were Wayne Hays. For example, I note that my distinguished colleague the gentleman from Ohio (Mr. WHALEN) refers to the fact that the Senate significantly added in the conference report to the contents of this bill by forbidding reductions in U.S. employment. That is very good, very good. We should have thought of that over here. The only trouble is who is to investigate it or to determine whether or not there is a reduction in employment in the United States? The fact is that the legislation itself causes reductions in employment in this country.

Let me give you a single example:

The gentleman from Arizona (Mr. UDALL), at his insistence, had written into this legislation an amendment, which was adopted, which exempted copper from the provisions of this legislation. The Senate put copper back in for all intents and purposes. The result now is that the gentleman from Arizona (Mr. UDALL), I am told by his staff—because the gentleman is now in the hospital—does not like the bill, and I have the feeling that if that gentleman were here he would be put back in the hospital after reading what is in the bill.

Mr. BINGHAM. Mr. Speaker, will the gentleman yield?

Mr. RYAN. I will be happy to yield to the gentleman from New York.

Mr. BINGHAM. Mr. Speaker, I discussed this matter with the chairman, the gentleman from Arizona (Mr. UDALL), by telephone this morning. He told me that he really had not had a chance to study the compromise and was not taking a position on the conference report one way or another.

Mr. RYAN. I am aware of that, and I did not say—and if I gave that impression. Of course, the gentleman from New York (Mr. BINGHAM) is right, the gentleman from Arizona (Mr. UDALL) has not seen it. But staff talking to staff indicated that they were unhappy with what has happened to the copper amendment that he put in to protect the copper industry in his country. An industry I might add, which is presently suffering from a worldwide depression in prices. Now we are going to continue more of the copper extraction industry overseas because of the Senate language which severely weakened the amendment that the gentleman from Arizona (Mr. UDALL) put in.

There were 285 Members of the House who voted for the amendment requiring that there be a 50-percent guarantee of this insurance to small businesses. That has been totally ignored in the conference committee and we are now back to where we were. There were some 285 Members, on the only vote taken prior to the conference, prior to the bill coming back for renegotiation, the only vote taken on the bill, and 285 Members voted for the amendment to help the small business community.

There are other matters. The date of the expiration of the legislation of September 1980 has been changed to add 1 more year to 1981, so as to give them that much more time before they have to come back to answer for whatever new devices and new changes they want to make, which are the only reasons to keep it alive.

I know that a conference committee ordinarily is for the purpose of saying, "We have done the best we can for this year. This is just a compromise. Let us vote for it and get it behind us and go ahead with the agenda." Ordinarily I would suggest we adopt that procedure on this legislation, but it has been unfortunate that the House lost so much in the conference committee. To me the position of the House has been shamefully amended, done away with and destroyed.

For those reasons I would suggest that every Member in the chamber vote against the conference committee report. I believe we can do better than we have done so far.

Mr. BINGHAM. Mr. Speaker, may I inquire how much time I have remaining?

The SPEAKER pro tempore. The Chair will state that the gentleman from New York (Mr. BINGHAM) has 17 minutes remaining.

Mr. BINGHAM. Mr. Speaker, I yield 5 minutes to the gentleman from Maryland (Mr. LONG).

Mr. LONG of Maryland. Mr. Speaker, I thank the gentleman from New York (Mr. BINGHAM) for yielding me this time.

Mr. Speaker, let me say I support fully the remarks made by the gentleman from California (Mr. RYAN). This is a bad bill. The so-called Senate-House compromise, is a sellout; it is a sham.

Certainly so far as the Long of Maryland amendment, which requires that at least half of OPIC's insurance and financing support go to small businesses is concerned. The conference managers have redefined small business. Small business means a firm with up to $2.5 million net worth or $7.5 million total assets.

Small business as defined by the OPIC legislation is any firm smaller than the Fortune 1,000 list of huge corporations. Any firm with $100 million in gross annual sales would be eligible for the OPIC small business program. Is this our idea of small business? Try to sell it to the small businessman in each of your districts.

This bill repeats the same ineffective exhortations to broaden small business particiation which is found in OPIC's 1974 authorization. Give more to small business. How effective has that exhortation been? In 1974, the big corporations on Fortune's list received 49 percent of OPIC's insured investments. So well had small business fared, that by 1976 the Fortune list of giant corporations received not 49 but 68 percent, increasing from less than half to two-thirds. This is how well small business is faring under the exhortation principle, whereas under the Long amendment small business would have at least $375 million of OPIC's insurance and financing support in 1977.

Under the conference report sellout small business could get no more than 50 percent of OPIC's net income, or no more than $24 million, and could get as little as zero. It is similar to protecting workers under a minimum wage. Assume you have said that the minimum wage is $2.50 an hour. Now you are going to make it a maximum. That is exactly what they have done here. They have converted a minimum into a maximum. They have converted a floor into a ceiling, and because the average Congressman is not listening very carefully, they hope they can sell this as a protection to the small business firm. They will keep saying it is unworkable. Many

times I have heard them say on the floor here, that these small business firms cannot operate abroad.

In the first place, over 50 percent of OPIC's projects were for insured investments of less than $1 million, well within the range of transactions for small business. Why the large multinational corporations need protection I do not know. Most of these corporations are as big in assets as the countries in which they are supposed to be trying to operate. It is the small business firm that needs protection against some of the terrors in operating abroad, not the big companies. But small business can make these investments abroad. They do need the protection, and this bill would take it away from them and restrict the protections of the Overseas Private Investment Corporation to big business. It was founded for big business, and that is what they want to keep it for.

Mr. Speaker, I urge that this conference report be voted down.

Mr. BINGHAM. Mr. Speaker, I yield 5 minutes to the gentleman from Iowa (Mr. HARKIN).

Mr. HARKIN. Mr. Speaker, when the OPIC bill came up on the floor earlier, there was quite an extensive debate surrounding the addition of an amendment which I had offered concerning human rights. That amendment was adopted on the House side. The Senate side did not in any way address this issue of human rights in its passage of its companion bill in the Senate. Therefore, when it went to conference, the only thing we had in the conference was the human rights amendment that had been adopted by the House. While the chairman of the committee, the gentleman from New York (Mr. BINGHAM), is correct that the human rights amendment is left in the bill in the conference report, I note some changes that have been made to it which raise some questions in my mind.

Basically, there is a proviso added on to the end of the human rights section which adds questionable language. The language speaks about waiving or permitting these OPIC programs to go into effect notwithstanding the provisions of section 116 if the national security interest so requires this project to go ahead. It says that the corporation may support this project regardless of section 116 if the national security interests are required.

What I would like to ask the gentleman from New York (Mr. BINGHAM) is how could a project be deemed to meet the national security requirements if, in fact, the provisions of section 116 apply?

Mr. BINGHAM. Mr. Speaker, will the gentleman yield?

Mr. HARKIN. I am glad to yield to the gentleman from New York.

Mr. BINGHAM. Mr. Speaker, may I point out that in the statement of the managers it is made very clear that the determination with respect to the national security must be made by the President. Beyond that let me say in answer to the question of the gentleman that, honestly, I cannot think of a situation where this kind of exception would need to be made. I do not think OPIC gets into that kind of situation. I have discussed this with the acting president of OPIC. I understand the gentleman in the well has also, and he agrees that this is not a situation that they conceive of arising. So, it was perhaps in an excess of caution that this amendment was added.

Mr. HARKIN. Mr. Speaker, therefore, the gentleman from New York assures me that so far as the gentleman is concerned on this added language, the gentleman cannot envision an instance when the project could go ahead, even though the provisions of section 116 do apply.

Mr. BINGHAM. Mr. Speaker, if the gentleman will yield further, that is correct. Let me say further that, as the chairman of the subcommittee involved in the oversight of OPIC activities, we will make very sure that the OPIC management does not seek to make use of this exception for purposes not envisioned or for purposes not now conceived of.

Mr. HARKIN. Mr. Speaker, I thank the gentleman from New York for those assurances.

It is true that I spoke recently on the phone a few minutes ago with Mr. Poats, the Director of OPIC, who also assured me that, No. 1, he was not, in fact, the author of this added language, that he also could not conceive of any instance when the corporation could use this added language, if, in fact, the provisions of section 116 do apply.

Personally, I would rather that the language were not in there. I think it opens up another loophole which could be used.

I hope that no instance would come up where it could be used to get around the strong provisions of section 116 which would apply here.

As I said, I would rather that the language not have been added; but with the assurances of the gentleman from New York and the executive director, Mr. Poats, I think the human rights amendment is basically intact.

The SPEAKER pro tempore. The time of the gentleman from Iowa has expired.

Mr. BINGHAM. Mr. Speaker, I yield 1 additional minute to the gentleman from Iowa.

Mr. HARKIN. I yield back the balance of my time.

Mr. WHALEN. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Speaker, I rise in support of the conference report concerning the extension and modification of the basic authorities of the overseas private investment corporation.

Mr. Speaker, it seems to me that an institution or agency such as OPIC represents the kind of foreign assistance program which the American people want and deserve. I firmly believe that many of the problem areas in the OPIC mandate have been corrected and that the many benefits which OPIC-financed projects provide to both the United States and the less-developed countries greatly overshadow any of its disadvantages.

OPIC is a self-sustaining enterprise which will not cost the American taxpayer one cent. In addition, OPIC helps create U.S. jobs, enhances U.S. access to strategic and critical materials, and encourages badly needed investment in less-developed countries.

Isn't this the model of what a foreign assistance program is supposed to be? To provide for trade, not aid?

Mr. Speaker, I submit that OPIC provides us with a foreign aid situation where we can have our cake and eat it too. Everyone, business, the poor countries, and the American taxpayer benefit from OPIC's existence.

Mr. Speaker, I urge my colleagues to support this conference report.

● Mr. FINDLEY. Mr. Speaker, I rise in support of the conference report on H.R. 9179 which extends and modifies the basic authorities of the Overeas Private Investment Corporation. And I commend the efforts of Congressmen BINGHAM and WHALEN as floor managers of this bill.

Although I can certainly sympathize with the reservations which some of my colleagues have concerning this bill, I believe that any drawbacks of this program are overshadowed by the many benefits it provides.

For example: OPIC will not cost the American taxpayer one cent. It is a self-sustaining enterprise which is earning a profit. In fact, the net contribution during fiscal years 1974–77 to the U.S. balance of payments resulting from OPIC-assisted investments was $1.3 billion.

There has been some criticism that OPIC operations result in a loss of American jobs. A close look at the situation shows that this is clearly not the case. In fact, it has been estimated that OPIC-assisted projects will, over a 5-year period, create more than 37,500 man-years of employment in the United States.

OPIC has also been very active in assisting projects which help develop additional sources of raw materials critical to the United States and world economic frameworks.

What more do the opponents of this measure want? OPIC is self-sustaining, promotes an increase in U.S. jobs, provides a means for U.S. access to valuable minerals, and aids the less developed countries. Is not this a model of what a foreign assistance program is supposed to be? To provide for trade—not aid. Everyone: business, the poor countries and the American taxpayer—benefits from this operation. I urge my colleagues to support the conference report.●

Mr. BINGHAM. Mr. Speaker, I have no further requests for time.

Mr. WHALEN. Mr. Speaker, I have no further requests for time.

Mr. BINGHAM. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. RYAN. Mr. Speaker, I object to the vote on the ground that a quorum is

not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 216, nays 185, answered "present" 1, not voting 32, as follows:

| Clay | Krueger | Teague |
| Cohen | Mann | Udall |
| Conable | Miller, Calif. | Whitley |
| Crane | Nix | Wilson, C. H. |
| Dent | Nolan | |

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Rodino against.

Mr. Jones of North Carolina for, with Mr. Shipley against.

Mr. Whitley for, with Mrs. Spellman against.

Mr. Conable for, with Mr. Crane against.

Mr. Howard for, with Mr. Carter against.

Until further notice:

Mr. Diggs with Mrs. Burke of California.

Mr. Brown of California with Mr. Cohen.

Mr. Clay with Mr. Symms.

Mr. Charles H. Wilson of California with Mr. Ford of Michigan.

Mr. John Burton with Mr. Del Clawson.

Mr. Udall with Mr. Dent.

Mr. Mann with Mr. Nolan.

Mr. Kazen with Mr. Krueger.

Mr. Miller of California with Mr. Nix.

Messrs. STOKES, LLOYD of California and D'AMOURS changed their vote from "yea" to "nay."

Mr. RAILSBACK changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the bill, H.R. 9179, just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

## PERMISSION FOR COMMITTEE ON INTERNATIONAL RELATIONS TO FILE REPORT ON H.R. 11832, AUTHORIZING APPROPRIATIONS FOR ARMS CONTROL AND DISARMAMENT AGENCY FOR FISCAL YEAR 1979

Mr. ZABLOCKI. Mr Speaker, I ask unanimous consent that the Committee on International Relations may have until midnight tonight to file a report on the bill H.R. 11832, to authorize appropriations for the Arms Control and Disarmanent Agency for fiscal year 1979.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

## PERMISSION FOR COMMITTEE ON INTERNATIONAL RELATIONS TO FILE REPORT ON H.R. 11877, AUTHORIZING SUPPLEMENTAL APPROPRIATIONS FOR FISCAL YEAR 1978 AND APPROPRIATIONS FOR FISCAL YEAR 1979 FOR PEACE CORPS

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on International Relations may have until midnight tonight to file a report on the bill H.R. 11877, authorizing supplemental appropriations for fiscal year 1978 and appropriations for fiscal year 1979 for the Peace Corps.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

## INTRODUCING LEGISLATION FOR WILDERNESS AREA IN COLORADO

(Mr. WIRTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WIRTH. Mr. Speaker, today the gentleman from Colorado, Mr. JIM JOHNSON, and I have introduced legislation for the wilderness area in Colorado. I recommend this legislation to my colleagues.

Mr. Speaker, today I am introducing legislation, along with my colleague from Colorado, Mr. JOHNSON, to protect the unique alpine lands of the Indian Peaks region of my State. In addition, this bill will create a national recreation area on part of the western slope of the Rocky Mountains.

Last fall I introduced a similar bill, H.R. 10068. That legislation granted Indian Peaks wilderness protection and mandated a study to determine the feasibility and desirability of revising the boundaries of Rocky Mountain National Park to include Indian Peaks. Since that time I have worked closely with my colleague, Mr. JOHNSON, on this matter. The bill we are introducing today incorporates all the provisions and lands of H.R. 10068. It also creates the Arapaho National Recreation Area which will border the Indian Peaks wilderness area on the west.

Mr. Speaker, in introducing this legislation I would like to pay tribute to the many, many Colorado citizens who have participated in its development. This is not just my bill. It represents over a year of careful study by superb citizen's group, the Indian Peaks Advisory Committee, and many other Coloradans. Without any motivation other than its concern for Indian Peaks, this group gave freely of its time and energy to study all sides of the issues: How much wilderness? How should it be managed? Which agency should be in charge? How would a wilderness affect the citizens of the adjacent areas? The committee members solicited ideas and criticisms from scores of persons and interested groups. Their work is a perfect example of the benefits of active citizen participation in Government and I am deeply appreciative.

The Arapaho National Recreation Area portion of the legislation is similarly the result of extensive citizen participation by the residents and elected officials of Grand Canyon. Their carefully documented study of the purposes of the NRA is an excellent example of the impact citizens have when they get deeply involved in their Government.

This legislation represents the balance approach needed in our land use policy. There are many desirable uses of Federal land, but they all cannot occur in the same place. Moreover, there are some lands which by their very nature require complete protection so that their unique beauty and the life systems they support will be preserved intact for our children and our children's children.

Mr. Speaker, this bill is a refinement of earlier proposals and will have a negligible impact on persons and organizations who represent uses which ordinarily would be in conflict with wilderness. It will protect unique and fragile regions of arctic peaks and alpine forests as yet unimproved and undamaged by man. At the same time, and contrary to what some persons believe, it will close off only 1 mile of recreational vehicle trail presently open for use. In addition, no significant commercial mining, grazing or timber resources will be affected. I cannot think of another area in our State more deserving of protection where the costs to the rest of society from making the area a wilderness are so low.

The creation of the Arapaho National Recreation Area by this legislation is further proof of this balanced approach. This 31,000 acres lying to the west of Indian Peaks around Lake Granby is at lower altitudes and is far more developed. The water resoures there make it particularly suitable for the emphasis on recreation given it by the bill.

Since I introduced H.R. 10068, it has received broadbased public support. Gov. Richard Lamm of Colorado, the Boulder City Council, numerous citizens' organizations, and hundreds of residents of Colorado have written to me endorsing the legislation.

The proposed Indian Peaks Wilderness Area is a spectacular alpine and arctic world bisected by the Continental Divide. The area is known for its jagged peaks and knife-edged ridges. Many soar over 13,000 feet in elevation, bearing the names of the great Indian tribes of the West—such as the Arapaho, Navajo, Shoshone, and Apache. Over 150 lakes of crystal clarity dot the valley floors. The only active glaciers in Colorado are found in the Indian Peaks area and Rocky Mountain National Park, to the north. These still grind and shape magnificent cirques and headwalls.

Wildlife and vegetation are as varied as the terrain itself. Deer, bear, elk, bobcat and cougar can be found, as well as the endangered greenback trout, a native cutthroat trout species.

For several decades, Coloradans have regarded the Indian Peaks area as a beautiful wilderness with outstanding recreational opportunities. But because Indian Peaks is only 60 miles from one of the largest metropolitan areas in the country, the City of Denver, the area demands prudent management and careful protection in order to preserve its wilderness values.

Wilderness designation for the Indian Peaks area is long overdue. Years ago, my predecessor, Donald Brotzman, successfully sought passage of a bill mandating a wilderness study for the area by the Secretary of Agriculture. This study is just being completed.

Along with wilderness designation, proper management of Indian Peaks and lands surrounding Rocky Mountain National Park has long been a subject of discussion and concern in Colorado. The Indian Peaks area, as well as other lands adjacent to Rocky Mountain National Park, were proposed for inclusion in the Park by its founder, naturalist Enos Mills, and again in 1920 by Park Superintendent Roger Toll.

It was with this historical background, and in consideration of the outstanding qualities of these lands, that I introduced H.R. 8360 in June 19, 1975, providing for inclusion of these lands within Rocky Mountain National Park. My purpose then was to provide a vehicle for discussion of the future of Indian Peaks. In the 2 years that followed, I invited a variety of interested persons and organizations to form a Rocky Mountain National Park Citizen Advisory Committee.

The Indian Peaks Advisory Committee evaluated management options for the lands surrounding Rocky Mountain National Park, and came to me, as have other Colorado citizens, urging both that a 74,850-acre Indian Peaks area be designated as wilderness, and that an opportunity be provided through legislation for the Secretary of the Interior to study the lands surrounding Rocky Mountain National Park in order to evaluate the desirability and feasibility of revising the boundaries of the park. The bill also continues extensive citizen involvement in these decisions by providing funds for local participation in the study.

I would like to clarify why a study by only the Secretary of the Interior is required. The Department of Agriculture's Forest Service is now finalizing a land management plan for the Indian Peaks area as part of its Boulder-Grand Divide planning unit study. The Secretary of the Interior's study provided for in the bill will give the citizens of Colorado an opportunity to compare the proposed management options of both the Secretary of Agriculture and the Secretary of the Interior so they can make a decision as to how this very beautiful and prized area should be managed to protect best its magnificent, yet delicate wild qualities.

In other words, this bill does not prejudge whether the boundaries of Rocky Mountain National Park should be revised. It merely seeks to develop detailed options for future decisions.

The Forest Service's recent effort has not involved an in-depth study of the impact of various land management options on the communities and lands on the periphery of Indian Peaks. That is why it is particularly important to the development of complete options that this portion of the Interior Department study be carefully coordinated with the Forest Service.

The preservation of Indian Peaks is a responsibility which can no longer be left for the future. I urge my colleagues to support this important legislation.

The text of the bill follows:

H.R. 12026

A bill to create the Indian Peaks Wilderness Area and the Arapaho National Recreation Area and to authorize the Secretary of the Interior to study the feasibility of revising the boundaries of the Rocky Mountain National Park

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assmbled,*

SHORT TITLE

SECTION 1. This Act may be cited as the "Indian Peaks Wilderness Area and Arapaho National Recreation Area Act".

FINDINGS AND PURPOSES

SEC. 2. The Congress finds that it is in the national interest—

(1) to include the land within the Arapaho and the Roosevelt National Forests known as the Indian Peaks Area in the National Wilderness Preservation System so as to protect the area's enduring scenic and historic wilderness character and its unique wildlife and to preserve the area's scientific, educational, recreational, and inspirational resources and challenges; and

(2) to create the Arapaho National Recreation Area within the Arapaho and the Roosevelt National Forests and the Colorado Big Thompson Project so as to preserve and protect the natural, scenic, historic, pastoral, and wildlife resources of the area and to enhance the recreational opportunities provided.

INDIAN PEAKS WILDERNESS AREA

SEC. 3. (a) An area of land comprising approximately 74,850 acres located in Boulder and Grand Counties, Colorado, within the Arapaho and the Roosevelt National Forests (as generally depicted as the "Indian Peaks

Wilderness Area" on a map entitled "Indian Peaks Wilderness Area and Arapaho National Recreation Area", dated April 1978) is designated for purposes of the Wilderness Act (16 U.S.C. 1131-1136) as a wilderness area and shall be known as the Indian Peaks Wilderness Area.

(b) The Indian Peaks Wilderness Area shall be administered by the Secretary of Agriculture (hereafter in this Act referred to as the "Secretary") pursuant to those provisions of the Wilderness Act which govern areas designated by that Act as wilderness areas, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

ARAPAHO NATIONAL RECREATION AREA

SEC. 4. (a) An area of land comprising approximately 31,767 acres located in Grand County, Colorado, within the Arapaho and the Roosevelt National Forests and the Colorado Big Thompson Project (as generally depicted as the "Arapaho National Recreation Area" on a map entitled "Indian Peaks Wilderness Area and Arapaho National Recreation Area", dated April 1978) is established as the Arapaho National Recreation Area.

(b) The Secretary shall administer the Arapaho National Recreation Area, in accordance with the laws and regulations applicable to the national forests, in such a manner as will best provide for—

(1) public recreation and enjoyment;

(2) the conservation and development of the scenic, natural, historic, and pastoral values of the area;

(3) the management, utilization, and disposal of natural resources such as timber, grazing, and mineral resources so that their utilization will not sustantially impair the purposes for which the recreation area is established; and

(4) the management of water resources to assure the highest quality water, including the control of aquatic vegetation in the reservoirs and the development of needed waste water systems.

(c) The Secretary shall develop an overall management plan for the Arapaho National Recreation Area. This plan shall be developed in consultation with State and local political subdivisions and other interested percal subdivisions and other interested persons.

ACQUISITION OF LANDS FOR THE ARAPAHO NATIONAL RECREATION AREA

SEC. 5. (a) (1) The Secretary is authorized to acquire by donation, purchase with donated or appropriated funds, exchange, or bequest, any lands or lesser interests therein, including mineral interests and scenic easements, which the Secretary determines are needed to establish and manage the Arapaho National Recreation Area.

(2) As used in this section, the term "scenic easement" means the right to control the use of land in order to carry out this Act, but shall not preclude the continuation of any use that is compatible with the overall management plan for the Arapaho National Recreation Area developed pursuant to subsection (c) of section 4.

(b) In exercising the authority conferred by this section to acquire lands, the Secretary shall give prompt and careful consideration to any offer made by an individual owning any land, or interest in land, within the Arapaho National Recreation Area. In considering any such offer, the Secretary shall take into consideration any hardship to the owner which might result from any undue delay in acquiring the property.

(c) In exercising the authority conferred by this section to acquire property by exchange, the Secretary may accept title to any non-Federal property, or interests therein, located within the Arapaho National Recreation Area the Secretary may convey in exchange therefor any federally owned property within the State of Colorado which is classified by the Secretary as suitable for exchange and which is under the Secretary's administrative jurisdiction. The values of any properties so exchanged shall be approximately equal, or if they are not approximately equal, they shall be equalized by the payment of cash to the grantor or to the Secretary, as the circumstances require. In the exercise of his exchange authority, the Secretary may utilize authorities and procedures available to him in connection with exchanges of national forest lands.

(d) Any land or interest in land owned by the State of Colorado or any of its political subdivisions may be acquired only by donation or exchange.

(e) Notwithstanding any other provision of law, any Federal property located within the Arapaho National Recreation Area shall be transferred without consideration to the administrative jurisdiction of the Secretary for use by the Secretary in carrying out this Act. Lands within the Arapaho National Recreation Area acquired by the Secretary or transferred to the Secretary's administrative jurisdiction shall become part of that recreation area and of the national forest within or adjacent to which they are located.

HUNTING AND FISHING IN THE ARAPAHO NATIONAL RECREATION AREA

SEC. 6. The Secretary shall permit hunting and fishing on lands and waters under the Secretary's jurisdiction within the boundaries of the Arapaho National Recreation Area in accordance with the laws of the United States and the State of Colorado, except that the Secretary may designate zones where, and establish periods when, no hunting or fishing shall be permitted for reasons of public safety, wildlife management, area general administration, or public use and enjoyment. Except in emergencies, any regulations made by the Secretary pursuant to this section shall be put into effect only after consultation with the appropriate State fish and game department.

PERMITS FOR FACILITIES AND SERVICES IN THE ARAPAHO NATIONAL RECREATION AREA

SEC. 7. The Secretary shall cooperate with other Federal agencies, with State and local public agencies, and with private individuals and organizations in the issuance of permits for facilities and services in the Arapaho National Recreation Area and the development and operation of those facilities and services.

APPLICATION OF STATE WATER LAWS TO THE ARAPAHO NATIONAL RECREATION AREA

SEC. 8. The jurisdiction of the State of Colorado and the United States over waters for facilities and services in the Arapaho National Recreation Area shall be determined by established principles of law. Any taking by the United States under section 5 of this Act of a water right, which is vested under either State or Federal law immediately prior to the enactment of this Act shall, entitle the owner thereof to just compensation. Nothing in this Act shall constitute an express or implied claim of denial on the part of the Federal Government as to exemption from State water laws.

FEASIBILITY STUDY OF REVISING THE BOUNDARIES OF ROCKY MOUNTAIN NATIONAL PARK

SEC. 9. (a) The Secretary of the Interior shall comprehensively study and evaluate the feasibility and desirability of revising the boundaries of Rocky Mountain National Park to include the Indian Peaks Wilderness Area, as established by this Act, and all or part of the additional areas designated as "Park Study Area" on the map entitled "Indian Peaks Wilderness Area and Arapaho National Recreation Area," dated April 1978.

(b) The Secretary of the Interior shall submit to the President and Congress no later than two years after the date of enactment of this Act a report of the findings and recommendations of the study required by this section, together with—

(1) a plan for the administration of the park study area, including the Indian Peaks Wilderness Area, indicating proposed boundaries, access or other roads, visitor facilities, if any, and proposed management options applicable to the area;

(2) an analysis of the impact of the plan described in paragraph (1) of this subsection on the factors listed in subsection (c) of this section;

(3) a statement of the estimated Federal cost for acquisition, development, and operation of the park study area;

(4) a coordinated study plan, developed after consultation with the Forest Service of the Department of Agriculture, regarding compatible management of adjacent Federal lands including assessment of offsite transportation, economic, and social impacts on landowners and local governments; and

(5) proposed legislation for establishment of such revised park boundaries.

(c) The findings and recommendations regarding revision of the boundaries of Rocky Mountain National Park and the plan for administering that area shall be developed after consultations with the Forest Service of the Department of Agriculture, with the affected State and local political subdivisions, and with other interested parties which may be affected and shall take into consideration—

(1) the environmental preservation of the area;

(2) the State and local economies;

(3) the natural, historical, cultural, scenic, and geologic environment;

(4) the management and protection of fish and wildlife habitats and resources;

(5) the management of timber, grazing, mineral and other commercial activities;

(6) the occupancy and development of existing homesites, campsites, commercial and public recreation enterprises, and other privately owned properties;

(7) the environmental impact on counties and local communities; and

(8) the interrelation between recreation areas, wilderness areas, forests, and parklands.

(d) There are authorized to be appropriated $100,000 for the fiscal year ending September 30, 1979, and $100,000 for the fiscal year ending September 30, 1980, to carry out the provisions of this section. The Secretary of the Interior may use up to $10,000 in the fiscal year ending September 30, 1979, and up to $10,000 in the fiscal year ending September 30, 1980, to support local participation in the preparation of the study, report, and plans prepared pursuant to this section.

FILING OF MAPS

SEC. 10. As soon as practicable after the date of enactment of this Act, the Secretary shall file a map and legal description of the Indian Peaks Wilderness Area and the Arapaho National Recreation Area with the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives and such description shall have the same force and effect as if included in this Act, except that correction of any clerical or typographical errors in such map and description may be made. Such map and the map entitled "Indian Peaks Wilderness Area and Arapaho National Recreation Area", dated April 1978, shall be on file and made available for public inspection in the office of the Chief of the Forest Service, Department of Agriculture.

STATE CIVIL AND CRIMINAL JURISDICTION

SEC. 11. Nothing in this Act shall diminish, enlarge, or modify any right of the State of Colorado, or any political subdivision thereof, to exercise civil and criminal jurisdiction

within the Indian Peaks Wilderness Area or the Arapaho National Recreation Area or of rights to tax persons, franchises, or property, including mineral or other interests, in or on lands or waters within those areas.

AUTHORIZATION OF APPROPRIATIONS

SEC. 12. Effective October 1, 1978, there are authorized to be appropriated to carry out all sections of this Act except section 9 $5 million for the acquisition of lands and interests in lands and $5 million for water quality and recreation development.

## THE AMERICAN FARM: ROOTS, VALUES, CHALLENGES

(Mr. EVANS of Colorado asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

● Mr. EVANS of Colorado. Mr. Speaker, I would like to bring to the attention of the House the following synopsis of a project application filed by the National Farmers Union with the National Endowment for the Humanities concerning rural America.

I commend the Farmers Union for their work in developing this proposal and the Endowment for encouraging it. I think the entire country, both urban and rural, will benefit from this endeavor.

The proposal follows:

THE AMERICAN FARM: ROOTS, VALUES, CHALLENGES

(A Project Synopsis)

The National Endowment for the Humanities funded a planning project sponsored by the National Farmers Union entitled "The American Farm: Roots, Values, Challenges". This led to an application for a long-term project which is now under consideration by the Endowment. Following is a description of that project.

Answers to the unique problems of rural America are ordinarily sought in the context of technology, economics, and/or politics, and the decisions seem to the people affected to be beyond their control, and often contrary to their interests. What is needed is consideration of rural America's problems in humanist terms—in the context of history, human values, and the challenge of the future of mankind. A so-called "humanities community" of deeply concerned academic and non-academic humanists, including historians, philosophers, scholars, writers, and others, has much to offer in this regard.

"The American Farm: Roots, Values, Challenges" will, during its first 15 months, attempt to begin a dialogue between the so-called "humanities community" and the people of rural America. The project will develop study materials that relate the humanities to four aspects of rural life: the land, economics, rural image, and rural people. A joint study of the issues will occur between selected humanists and 23 core couples of the Farmers Union (one couple from each state in which the Farmers Union has organized activities).

The core couples and some of the humanists (most of them, perhaps) will meet for the first time at a Rural America Institute at Southwest State University, Marshall, Minn. in June, 1978. Their contact will continue in four seminars to be held during the 15-month grant period. There will also be a "back home" program for participants during which they will carry out activities of various kinds with the assistance of state Farmers Union staff or leaders, and a representative of the humanities community in each state. These activities will include conducting seminars and discussion groups in the Farmers Union, and might include producing some work such as a history of some aspect of rural life in their community, or developing a community project of some kind.

Besides testing the concept of training core couples in the application of humanistic concerns of rural people so that they might share their knowledge and values with others, the project will test six formats or "packages" by which the humanities might be transmitted to rural audiences.

These are:

(1) The American Farm, a photographic exhibition of the history of American agriculture, will be purchased. It will be displayed at Southwest State University for use in seminars, and will later travel to Farmers Union conventions, rural fairs, and small towns in connection with this project.

(2) Local libraries will be tested as resource centers where material of the project might be located, displayed, and stored.

(3) The use of short video tapes will be tested as a basic program information source.

(4) The identification and eventual compiling of a series of annotated films on the history of the American farm will be tested as a format for transmitting the humanities to rural people.

(5) Filmstrips and slide presentations will be tested in carrying out the purposes of the project.

(6) An interpretive anthology for the four themes (land, economics, rural image, and people) will be developed. This would include guides for teachers or discussion leaders, along with reference material to promote and enhance wide dissemination of humanistic concerns as they relate to rural people and their problems.

Finally, the project will include an extensive and thorough evaluation process. The results will be studied as a basis for the future of the project, and by the National Endowment for the Humanities for developing general guidelines for other projects aimed at non-traditional audiences.

"The American farm: Roots, Values, Challenges" is envisioned as at least a three-year project under the sponsorship of the National Endowment for the Humanities. It is hoped that its effect on the Farmers Union and rural America will be permanent, and that the dialogue and the sharing of values and concerns between rural people and the so-called "humanities community" will continue.●

## NEUTRON BOMB DECISION PLACED IN PROPER PERSPECTIVE

(Mr. BADHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BADHAM. Mr. Speaker, Mr. George F. Will has focused his attention on the controversy surrounding the so-called neutron bomb in a column printed in this week's Newsweek magazine and the points he raises are well worth the attention of every Member of the House. He places the President's announced "decision" on deployment on enhanced radiation weapons in a proper perspective and examines the content of much of the controversy which has raged in the press and on this floor in the past weeks. I was particularly impressed with his statement:

Imagine the uproar if the tactical nuclear weapons now deployed in NATO were neutron weapons and if NATO proposed replacing them with the dirtier, more indiscriminate weapons that actually are deployed today.

Not too many weeks ago I witnessed a demonstration on the streets of a quiet town in the 40th Congressional District of California by people demanding: "Ban the neutron bomb." I wish each of those people could have read Mr. Will's column because I am sure they, as is the case with many Americans, simply do not know the facts of the matter. I certainly hope that a majority of my colleagues will read it and I include the article at this point in the RECORD:

WHIRL IS KING

(By George M. Will)

Controversy about neutron weapons boiled up last summer, heated by news reports about "killer" warheads that destroy people "rather than," or "while sparing," property. Such reporting reverberated in Congress, where one overwrought senator said a neutron weapon is "dehumanizing" because it "singles out people for destruction, choosing to preserve buildings instead." Soviet propaganda assailed "capitalist weapons" that respect only property. But Congress disregarded such tendentiousness and approved the Administration's request for funds for the weapons.

Like all weapons, neutron artillery shells or warheads are, indeed, "killers." They are not a new species of weapons; these "enhanced radiation" weapons are a subspecies of the nuclear species. They do not "choose" to "preserve" property. They produce all four lethal effects of nuclear explosions; blast, heat, radiation and fallout. But neutron weapons produce only about one-tenth the blast, heat and fallout of regular nuclear weapons, so neutron weapons do little collateral damage to civilians or structures away from battlefields. The radiation is more intense but less widely distributed; it can be confined to a radius of a few hundred yards. And the radiation is short-lived; people can safely enter a blast area the next day.

Deployed in Europe, neutron weapons could partially offset the enormous and expanding Soviet advantage in conventional forces, and especially in tanks. They would be the most effective defense against massed armor. The weapons' value to NATO can be gauged by the frenzy of Soviet propaganda against them. (Of course, the Soviets have many battlefield nuclear weapons of the "dirtier," less precise sort.)

But the history of war is full of ironies, such as the fact that the early fourteenth-century mortars were made possible by metal-casting skills developed for making church bells. Today's irony is that many people complain, in the name of moral sensitivity, that neutron weapons are not indiscriminate enough in dealing destruction. In the modern age, war has become a conflict of populations as well as armies. Since industrial might became the basis of military might, and especially since the development of air power, the theory of war has blurred the distinction between combatants and noncombatants and the practice of war has blended (as historian Michael Howard notes) mass participation and esoteric technology. But neutron weapons are one esoteric technology that diminishes the indiscriminate slaughter of war.

Critics argue that because neutron weapons have few collateral effects, the weapons "invite" use. The logic of this thinking is that weapons should be hideously destructive and dirty so that the nation possessing them will be deterred from using them (except perhaps in the most desperate circumstances). This doctrine of "self-deterrence" is especially dear to those, within the Administration and without, who believe that U.S. power is a threat to world peace.

But if NATO only has tactical nuclear weapons that would devastate the territory

it is designed to protect, NATO will be less attractive to Europeans and less credible to the Soviets. Carter's indefinite postponement of neutron weapons is destabilizing because it strengthens Soviet doubts about U.S. readiness to use existing tactical weapons. The Soviets already knew that the Carter Administration buckles under pressure, and makes unilateral and unreciprocated concessions. Now they have fresh grounds for contempt.

What NATO's members think of the Administration can be imagined (and in some cases is painfully clear). In Europe, as in the U.S., overwrought journalists, skittish politicians and leftist agitators have transformed neutron weapons into a political problem. (Imagine the uproar if the tactical nuclear weapons now deployed in NATO were neutron weapons, and if NATO proposed replacing them with the dirtier, more indiscriminate weapons that actually are deployed today.) In Europe, too, proper leadership is lacking. Officials who want the weapons have flinched from reasoning with their confused constituents.

For many months the Carter Administration shrank from endorsing deployment of neutron weapons. Rather than give forthright leadership to the alliance and to Western publics, the Administration privately urged NATO members, and especially West Germany, to support them. NATO governments, and especially that of West Germany, paid a political price for preparing to do so. When reports of Carter's reversal leaked, West Germany protested, politely. Now, some of Europe's most important leaders barely bother to disguise their disdain.

Carter says the *ultimate* decision about neutron weapons depends, in some unspecified way, on what the Soviets do in future deployments in Europe. But the weapons are needed *now* because of what the Soviets have *done*. At the end of last week's debacle, the Administration's fig leaf was the theory that the unproduced, undeployed weapons can somehow be a "bargaining chip." But that flimsy theory cannot hide the embarrassing truth, which is that the Administration's unilateral and unreciprocated decision against the weapons is just another in a series of similar decisions. The indefinite postponement of weapons designed for a theater in which the Soviet buildup has been especially ominous is a paradigm of Administration policy.

For a decade—approximately the span of the rise and fall of the idea of détente—it has been becoming increasingly difficult for persons so inclined to rationalize the Soviet buildup as something justified by defensive considerations. Today, the buildup of strategic and theater forces, and the concomitant adventurism, are alarming.

So is the Carter Administration. It has canceled the B–1 bomber, slowed other strategic programs (the MX missile, the submarine-launched cruise missile), refused to sustain a Minuteman 3 production capacity, retreated at a gallop from its SALT position of last spring, planned drastic shrinkage of the Navy in the face of rapid Soviet naval growth, announced an intention to withdraw ground forces from Korea and responded to Cuba's aggression in Africa by exchanging diplomatic missions with Havana.

It is unclear how, or why, this Administration devises its policies. Carter is President, but whirl is king. Carter's prevarication, to the blaring accompaniment of Soviet propaganda, has been dangerous. His decision to postpone production of neutron weapons is dangerous as military policy and dangerous as a diplomatic signal. Because Carter has not quite repudiated the weapons, some people may praise him for at least avoiding one mistake. Other people may recall Samuel Johnson's observation: "A horse that can count up to ten is a remarkable horse, not a remarkable mathematician."

## DEATHS OF FOUR COURAGEOUS MEMBERS OF THE SYRACUSE FIRE DEPARTMENT

(Mr. WALSH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALSH. Mr. Speaker, early Sunday morning, April 9, 1978, four courageous members of the Syracuse, N.Y. Fire Department gave their lives while attempting to find and rescue occupants reportedly still inside a burning building.

Each of them was a professional, fully trained, fully experienced, and fully aware of the risks involved in the most hazardous of professions. Yet each of them was young, each had a family, and each had planned the sort of future all of us would wish for our own.

To their colleagues, to their families, and to firefighters everywhere, their loss is something beyond measure. To the citizens of Syracuse, it is the greatest tragedy in nearly 40 years, since February 3, 1939, when nine firefighters perished in another tragic holocaust.

I know the depth of sorrow felt in Syracuse today, for in past tragedies two firefighters who gave their lives were relatives of my family.

As we meet in session here, Syracuse is planning the services tomorrow which will mark the final tribute for the four men who offered the supreme sacrifice—Stanley L. Duda, Frank Porpiglilo, Jr., Michael J. Petragnani, and Robert E. Shuler. I ask for your prayers. May they rest in peace.

We have before us an opportunity to recognize these firefighters, and all those throughout this Nation who have before them given their lives or been disabled in the line of duty. I refer to House Joint Resolution 727, introduced in February by Mr. TEAGUE of Texas, and cosponsored by myself and 148 Members of this body, which would authorize the President to designate the Sunday following Fire Service Recognition Day—always a Saturday in May—as memorial Sunday for firefighters who have been killed or disabled during the previous year.

The measure is strongly supported by the International Association of Fire Fighters, the International Association of Fire Chiefs, by other fire service organizations throughout the country and by religious leaders of all denominations.

You are all aware that a total of 218 members must join in the sponsorship of such resolution before it can be considered by the entire house. I can think of no more fitting tribute than to have us provide the additional sponsorship required to enact this legislation.

## REQUEST FOR NATIONAL ACADEMY OF SCIENCES TO STUDY FEASIBILITY OF ESTABLISHING A SINGLE NATIONAL CANCER ASSESSMENT POLICY FOR EVALUATING CARCINOGENICITY OF SUBSTANCES

(Mr. WAMPLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WAMPLER. Mr. Speaker, today I am introducing a bill amending the Federal Insecticide, Fungicide, and Rodenticide Act by directing the Administrator of the Environmental Protection Agency to request the National Academy of Sciences to study the feasibility of establishing a single national cancer assessment policy for evaluating the carcinogenicity of man-made and naturally occurring substances.

This 14-month National Academy of Sciences study would have one of two possible outcomes. If, on the one hand, it appears possible on the basis of scientific evidence for a standard cancer assessment policy to be constructed for regulatory purposes, then a recommendation as to possible courses of action would emerge. If, on the other hand, it is determined on the basis of the same scientific evidence that the state of the art is still not adequately developed to conclude that a reasonable cancer assessment policy can be constructed, a statement to that effect would be forthcoming.

The study would focus on two fundamental issues—the assessment of chemical carcinogenesis using animal species and extrapolation of the results of animal tests to humans. A full discussion of these issues and the many pertinent underlying issues—such as dose levels, thresholds, comparative metabolism, biological significance, statistical inference, definitions of terms and conflicting human data—is to be included in the National Academy of Sciences report to justify either position taken on the feasibility of implementing a cancer assessment policy at this time.

As I believe I have made clear, the emphasis of my bill is on cancer assessment. I share fully this body's recognition of its collective and individual responsibility of endowing the electorate with an environment free of known carcinogens. Indeed, I applaud the tireless efforts of our distinguished colleague from California (Mr. Moss) under whose leadership Congress has engaged in a war on cancer. Yet I am uneasy that some of the weaponry necessary to wage a successful war may even now be languishing in our scientific arsenal. I refer, of course, to valid and reproducible cancer assessment techniques. It may well be that such weaponry has not been developed.

However, can we afford not to look? Can we afford not to have our best scientists evaluate our present programs? The timely hearings of the gentleman from California has made apparent to the laymen, such as ourselves, the utter complexity of the scientific issues being uncovered; complexities that, unless put into perspective, must inevitably protract endless direct congressional involvement and in the process further heighten public concern. This concern cannot be ignored, even short term.

Mr. Speaker, I am not a cancer expert. As far as I am aware, there are none in Congress. And yet we have enacted legislation authorizing various agencies to regulate carcinogens. Except for food additives we do not say how. We say do

it; presuming, apparently, that the necessary expertise resides in these agencies. Perhaps it does. Perhaps the divergent proposals we observe emanating from the Environmental Protection Agency, Occupational Safety and Health Administration, Consumer Products Safety Commission, National Cancer Institute, and the Food and Drug Administration reflect honest differences of scientific opinion. More likely they reflect differences in administrative policy. Whatever the reasons, we simply do not have hard answers to an issue that is at once grave and complex; that has generated mixed and varied signals from our regulating agencies; and is of escalating concern to the electorate.

What my bill does is to provide for an in-depth evaluation of the current state of the art of chemical carcinogenesis by those most qualified to do so. It raises the question: Is the state of the art—the current aggregate of fundamental knowledge and technological know-how—sufficiently advanced to support the construction of a national cancer assessment policy? If so, why and what are the recommendations? If not, why and what needs to be done to standardize cancer assessment and put the problem in perspective?

Mr. Speaker, a positive response to the questions raised in this legislation would not suggest a cure for cancer nor even a complete understanding of its etiology. The weaponry in the scientific arsenal is evidently not yet that potent. However, its implications in the context of prevention of avoidance of chemical carcinogenesis could be substantial and the attendant benefits enormous, in terms of enhancing public safety, allaying public concern, and orienting the agencies along a common course, to avoid the adverse socioeconomic consequences that their present haphazard activities portend.

Even a negative response would not be without value. First, it would tell us where we are; what remains to be done. Second, it may well provide for more proper orientation of future research efforts; how to get from where we are to where we want to be. Lastly, it could be said that this body had left no stone unturned in an effort to truncate this period of doubt and anxiety in which our constituents find themselves.

## DENIAL OF BASIC HUMAN RIGHTS—EIGHTH ANNIVERSARY OF SLEPAK FAMILY TO EMIGRATE FROM SOVIET UNION

(Mr. BINGHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BINGHAM. Mr. Speaker, today marks the eighth anniversary of the day the Vladimir Slepak family applied to emigrate from the Soviet Union. Unfortunately Vladimir and Maria Slepak will commemorate that anniversary, and 8 years of harassment, in Moscow. They have not been permitted to leave.

For 8 years this family has been subjected to surveillance and interrogation. I saw Vladimir and Maria Slepak in Moscow in 1975. They were bearing up well under incredible pressures. Since that time the Slepaks have been without a decent livelihood. Neither Vladimir or Maria have been able to find employment since 1976.

In October 1977 the Slepak's older son, Alexander, was granted permission to emigrate. On his way to Israel he stopped in the United States to rally international support for his parents. In my Washington office, Alexander told me that his family's plight has worsened. His brother Leonid, has been drafted and has refused induction. Leonid considers himself a citizen of Israel and has been granted Israeli citizenship. He is currently in hiding from the KGB. The Slepak family is slowly being divided and destroyed.

On March 13 I received a letter from Vladimir Slepak which I now share with the whole House. Vladimir Slepak thanks me for my efforts on his behalf. I wish to say at this time that I will continue to do all I can to effect the reunification of the Slepak family. It is criminal that a mere generation after the holocaust we continue to see Jews being denied the most basic of human rights. As a member of the Helsinki Commission I pledge that the U.S. Congress will not forget the Slepak family. We shall continue to implore the Soviet Government to relent in its persecution of this family and to let the Slepaks go.

The Slepak letter is as follows:

Moscow, U.S.S.R.,
*February 12, 1978.*

Hon. JONATHAN B. BINGHAM,
*Congress of the United States, House of Representatives, Washington, D.C.*

DEAR SIR: I was very moved hearing from my son Alexandr about Your efforts in behalf of our family.

I remember our meeting in Moscow, when I was surprised with Your clear understanding of our problems.

Thank You very much for Your noble activity for Human Rights and for free future of our broken family.

With best wishes.

Respectfully,

VLADIMIR SLEPAK.

## HUMPHREY-HAWKINS FULL EMPLOYMENT BILL

The SPEAKER pro tempore (Mr. PANETTA). Under a previous order of the House, the gentleman from Pennsylvania (Mr. MARKS) is recognized for 30 minutes.

Mr. MARKS. Mr. Speaker, some of the most interesting debate thus far in the 95th Congress took place 2 weeks ago when the House considered the Humphrey-Hawkins full employment bill. Among the issues debated when the measure was before us were: inflation targets, distinguishing private sector employment from public sector employment, farm price support goals, a balanced budget, individual and corporate tax reductions, capital formation, and the special problems of youth unemployment.

I would like to take a few minutes to discuss key amendments to the Humphrey-Hawkins bill which involved all of these issues.

As approved by the House Education and Labor Committee, the Humphrey-Hawkins bill, H.R. 50, contained only one set of numerical goals, requiring within 5 years reduction of the unemployment rate to 3 percent of the adult work force—those aged 20 and over—and 4 percent of the overall work force—aged 16 and over. The committee specifically rejected setting numerical goals for other aspects of the economy.

I and several of my colleagues believed that a specific anti-inflation goal belonged in the bill. So an amendment was offered by my friend from Vermont, JIM JEFFORDS, to set a national goal of a reduction in the inflation rate to 3 percent. As Representative JEFFORDS pointed out on the House floor:

> We recognize that inflation is as bad a problem with respect to unemployment as anything else is, and that in order to bring the economy around and help reduce unemployment, we should have a specific goal in the area of inflation as we have a specific goal in the area of unemployment."

I voted for the 3 percent inflation goal amendment, which lost by a vote of 198 to 223. Nevertheless, an amendment was adopted to require the President to include in his annual economic report goals for reasonable price stability and to formulate policies to reduce inflation. While I also supported this amendment, in my opinion, setting a 3 percent inflation goal would have required a more serious commitment to reducing inflation.

A successful amendment which I supported would require the President's economic report to differentiate between employment in the private and permanent public sector and employment in temporary public service programs. This truth-in-reporting amendment helps to insure that the unemployment goals in the bill would not be met entirely through the creation of new public service jobs at the expense of private sector employment.

An amendment also was adopted to set as a goal movement toward 100 percent parity for American farmers. Farm incomes presently are around 65 percent of parity, the lowest rate since the Depression year of 1933. Proponents of the amendment noted that 100 percent of parity is not an attainable goal within 5 years, especially in view of the fact that farm prices reached 106 percent of parity in August 1973. What the amendment really boiled down to was that the administration would have to take into account the farm price situation as part of the overall picture with respect to unemployment and the economic well-being of the Nation.

One of the closest and most controversial votes occurred on the Ashbrook amendment that sought to make balancing the budget a goal and to require the President, in choosing means to achieve the unemployment goal, to first recommend policies and programs designed to achieve a balanced budget. The Ashbrook amendment failed by a vote of 205 to 215. Those who voted against the amendment contended that it would commit us to goals and timetables for reaching a balanced budget without allowing the flexi-

bility to achieve the other goals in the bill at the same time. However, since the administration claims that a balanced budget can and will be achieved by 1981, setting such a goal for 1983 did not seem unreasonable.

Following the defeat of the Ashbrook amendment, the House overwhelmingly—411 to 3—adopted a substitute amendment that declared that one of the purposes of the bill is achievement of a balanced budget consistent with achievement of the bill's unemployment targets. While I was pleased that this amendment sought to emphasize the importance of a balanced budget, it was considerably weaker than the defeated amendment which would have set a balanced budget goal for 1983.

Another important amendment was the Quie-Kemp amendment to set a goal of a permanent reduction in individual Federal income taxes by 10 percent a year for 3 years, accompanied by a 1 percent reduction in corporate taxes annually and an increase in the corporation surtax exemption to $100,000.

This amendment represented an effort by several at my colleagues on the minority side of the aisle and me, to add to the Humphrey-Hawkins bill the goal of implementing the provisions of the Kemp-Roth Tax Reduction Act—a major tax reduction proposal which I have supported since shortly after coming to Congress. The vote on this amendment was remarkably close, 194 to 216. It is interesting that 54 members of the majority joined with us to support this approach.

Those of us who voted for this amendment beleived that the best way to increase employment is to provide increased incentives for private sector saving and investment through tax cuts. Econometric projections indicated that the amendment's tax cuts would create millions of new private sector jobs: 4,000,000 in 1980 and 5,000,000 in 1983.

I was most disappointed that this amendment failed. The steadily increasing tax rates in the economy have reduced the supply of goods and services available. This has caused higher inflation and that has reduced the rate of investment. In 1965, we were taxing 29 percent of our national income. Today we are taxing at around 37 percent. This increasing tax burden has slowed down the rate of productive growth, and that has led to increased import penetration into our market and fewer domestic jobs. One cannot speak of increasing private sector jobs unless the private sector is freed from the tax burdens that prevent it from creating long-term jobs.

I offered my own amendment to the Humphrey-Hawkins bill to emphasize the importance of capital formation in the creation of jobs by mentioning capital formation specifically in the declaration of policy in the bill and by including capital formation in the current and foreseeable trends set out in the economic report of the President.

The Humphrey-Hawkins bill amends the important declaration of policy section of the Employment Act of 1946. The bill will establish priorities in the effort to expand jobs to the full employment level. Appropriately, the first priority is private sector jobs creation.

My amendment, which passed the House, would express this priority in the following manner:

> Expansion of conventional private jobs through improved use of general economic and structural policies, including measures to encourage private sector investment and capital formation.

In my opinion, capital formation truly is job creation. The ability of the country to create jobs and reduce unemployment depends upon its ability to equip workers with the tools of production.

The civilian labor force is expected to rise from 93 million in 1975 to 103 million in 1980. The total investment required to equip these new workers will require large amounts of capital spending. Today it costs more than $30,000 to provide one manufacturing job in American industry, twice what it cost 10 years ago.

According to a Department of Commerce study of December 1975, to create enough jobs to reduce unemployment to 5 percent by 1980—and the Humphrey-Hawkins bill sets a goal of 4 percent by 1983—the United States must devote 12 percent of its real GNP during the period 1975–80 to capital formation. However, between 1965 and 1974, business fixed investment averaged only 10.5 percent of GNP; and during 1975 and 1976, it averaged only 9.3 percent. Moreover, of the seven major industrialized countries, the United States ranks last in investment ratio, last in productivity growth, and the next to the last in output growth. In the Wall Street Journal of November 14, 1977, Irving Kristol summarized this predicament:

> American productive capacity is growing far more slowly than even the disappointing statistics on current capital investment indicate. And it is such slow growth that largely explains our unemployment problem.

Given the importance of private sector investment and capital formation to private sector jobs creation, I felt that they deserved explicit mention in the declaration of policy. The first part of my amendment provided for this. The second part required that the economic report of the President transmitted to Congress include current and foreseeable trends in capital formation.

I was pleased that my amendment was adopted and that it had the support of Chairman HAWKINS.

A substitute to the bill was offered by Congressman AL QUIE. The substitute also set a national goal of 4 percent unemployment, but specifically excluded the use of public service employment to reach the goal. It also included goals of a 3 percent inflation rate, reduction of tax rates, and a balanced Federal budget. To combat the most severe unemployment problem, the substitute would have established a Presidential task force on youth unemployment. The task force was to seek ways to reduce minority youth unemployment to that of nonminority youth, and all youth unemployment to the adult rate.

I felt this approach was better focused than that of the Humphrey-Hawkins measure. I especially favored its emphasis on the private sector. Unfortunately, it was defeated 137 to 276.

After the substitute, for which I voted, was defeated, I then reviewed the Humphrey-Hawkins bill as amended on the floor. The bill before me on final passage was considerably different from the earlier versions of the Humphrey-Hawkins proposal.

The final version did not contain proposals for sweeping national economic planning and massive public employment programs. It did not create any new programs at all, nor did it authorize any expenditures.

Rather, the bill set goals and expressed a national commitment to meet those goals. It would focus the nation's resources on reducing unemployment while controlling inflation.

I think it is important that we, as a nation, set targets for achieving solutions to the problems which continue to confront us. I believe it is vital to set a goal for unemployment and to try to achieve it, I regret that we were unable to set a similar goal for inflation and for a balanced budget when this bill was before the House. I would also like to see us fix targets for tax reductions and for energy independence.

The Humphrey-Hawkins bill on its own will not create any new job. It is my hope, however, that it can serve to stimulate the kind of Federal policies that will provide the incentives and encouragement necessary for the private sector to create lasting jobs for the unemployed. For this reason, I was one of the 257 Members who voted for it.

---

## THE NEUTRON BOMB

The SPEAKER pro tempore (Mr. PANETTA). Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 60 minutes.

GENERAL LEAVE

Mr. WEISS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today on the neutron bomb.

The SPEAKER pro tempore (Mr. PANETTA). Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. WEISS. I am pleased to yield to my colleague, the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Speaker, I thank my colleague the gentleman from New York (Mr. WEISS) for yielding to me.

I have asked the gentleman to yield so that I might mention to our colleagues in the House, those of them who may not have seen it, that a national television program took place last night during which our colleague, the gentleman from New York (Mr. WEISS) discussed the neutron bomb. I believe that the gentleman did an exceptionally fine job. I personally want to say that I have great pride in what the gentleman had to say.

Let me just make one comment to my colleagues in order to point out some comparable statistics compiled by the Stockholm Peace Research Institute. This shows that in 1975 only about $25 billion a year was spent for aid for the developing nations compared with approximately $250 billion for military expenditures—that was on the part of all of the nations of the world.

In 1972, the last figures that are available, about $4 billion went into medical research compared to $25 billion for military research.

We cannot reverse those figures overnight, but I believe if we could move gradually toward reducing those figures, we would be living in a world that would be more worthwhile for your children and for my children. The neutron bomb is supposed to give us a little more security, and as far as defense posture is concerned, it would. But, if I am not mistaken, it also would move us in the direction of a world with more and more bombs and more and more weapons. I believe that somehow or other we have to turn this around.

I believe that our colleague the gentleman from New York (Mr. WEISS) is to be commended for leading us in a discussion on a consideration of where we are going in this armaments race. Somehow, without in any way diminishing the security of this Nation and all other nations, we have to build a world of security not built upon weapons but built upon people who have food in their stomachs, who have hope and who have opportunity, and I do not think we are going to do that by developing more and more and bigger and bigger weapons systems.

Again I commend my colleague the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Speaker, the press last Monday contained an article which indicated that the President of the United States may, in fact, have made a decision not to proceed with the ordering of the production of the neutron bomb. That raised a great commotion basically and primarily among people within his own administration, many of them within the military services and some in the diplomatic services. Abiding by the press report, these administration officials seemed to think and imply that the President of the United States had done something which was at least improper, that he did something which was against the better interests of the United States of America and that he did something that was in some way deceitful and that he was vacillating.

I have had occasion to disagree with the President on numerous matters in the course of these past 15 months, both at the foreign policy and the domestic policy level, but I must say that in this instance the critics of the President, both inside the administration and outside the administration, have been unfair to the extent of totally distorting the situation as it exists. The fact is, Mr. Speaker, that last year the Congress of the United States was asked to consider both appropriation and authorization measures, including funding for the neutron bomb and enhanced radiation weapons. The appropriation measures came up first both in the House and in the Senate, and after great debate took place in the Senate, there was an amendment appended to the appropriation measure which in conference was agreed to by the House, and when the measure was finally passed, it contained the following provision:

*Provided further*, That none of the funds appropriated in this act shall be used for production of enhanced radiation weapons until the President certifies to Congress that production of these weapons is in the national interest;

*Provided further, however*, That after such certification is received, production may proceed unless within 45 days Congress by concurrent resolution disapproves such production.

Then it goes on to say the manner in which the debate would take place, how many hours would be provided for it, and so on. That was a matter of law signed by the President on August 7, 1977.

When in September of 1978 the House debated in full the authorization measure, we referred to that provision. It was carried in the papers. It was carried by the media. There is just no excuse for anybody to suggest now that the President, having made a decision previously, is now going back on his word. The fact is that not only did the President not make a decision, he could not make a decision that was binding until, according to the law, he submitted that decision to order production to both Houses of Congress, giving both Houses 45 days within which to adopt a resolution of disapproval.

The President's position on matters affecting nuclear weaponry have been very, very clear from the beginning. His inaugural message very clearly indicated that the prime concern he has in international relations in the course of his term of office is to try to deescalate the nuclear arms race to the extent where there will be no nuclear arms.

It is not only now that the President has deferred his decision to order production of neutron bombs. Initially it was expected that he was going to make his decision in October 1977—at the beginning of the new fiscal year. Without having announced it as such, he in fact deferred that decision. Whether he had come to a final or to a tentative decision to cancel, it is absolutely clear that the President was struggling toward his decision. He had not made a decision which he had broken. It seems to me that all those who are suggesting that in some way the President has done something wrong or improper, or vacillated—simply, I think, out of their own arrogance, having abrogated to themselves the decisionmaking process, having rushed back and forth trying to encourage the NATO governments to ask for deployment, the President having decided it the other way these people now are trying to cast such blame on the President when, in fact, the blame, if there is any, is theirs for proceeding without authorization from the President.

Mr. Speaker, I am pleased to yield now to the distinguished gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. I would like to congratulate my colleague, the gentleman from New York (Mr. WEISS) for taking this special order in opposition to the neutron warhead. I, too, was very distressed at the way the media treated the President's decision to defer making a decision with respect to production and deployment of the neutron bomb, but perhaps most distressed at I suspect what is indicated as a prior position in Congress in opposition to his decision, we ignoring the efforts of the gentleman from New York and many of the rest of us who supported his decision to not only defer production but eliminate production of neutron weaponry or enhanced radiation weaponry.

Perhaps I was most distressed at the aspect of it which indicated there was a tremendous outcry from Congress in opposition to his decision, completely ignoring the efforts of the gentleman from New York (Mr. WEISS) and many of the rest of us to support the decision to not only defer production, but to eliminate production of neutron weaponry or enhanced radiation weaponry. I believe, and the gentleman can confirm my recollection, that the gentleman was the leader in the circulation of a letter in which some 60 of our colleagues joined in urging the President to cancel the production of the neutron bomb altogether; is that correct?

Mr. WEISS. The gentleman is absolutely correct. I should say that we got that number of 62 within less than 24 hours.

Mr. OTTINGER. Mr. Speaker, if the gentleman will yield further, it seems to me that the press was quite remiss in not recognizing that in addition to those who support the neutron weapon, there is very substantial support in the House of Representatives and I am sure in the Senate as well for a decision to not proceed with the neutron bomb.

I think there are two very serious objections to deploying the neutron bomb.

I will later ask unanimous consent to revise and extend and put them in the RECORD in full; but two of them are that, first of all, it undermines the credibility of the President's efforts to get other nations to join us in controlling proliferation of nuclear weapons. That is, I think, one of the best initiatives that the President has embarked upon and most likely to enhance the security of the United States.

Second, a decision to deploy enhanced radiation weaponry or any other so-called tactical neutron weapon breaks down the barrier between nuclear and conventional weapons and makes it much more likely that nuclear weapons will be used. I cannot conceive, particularly in the European theater, where we would use a nuclear weapon and not expect escalation to full nuclear warfare. Indeed, I do not think the weapons would ever be used, knowing that the Russians would greet us with a response to our neutron weaponry, that our generals would realize they could not use them anyway and all this money would be wasted.

It is a sad concept, a dangerous one. I think it is an exceedingly important

topic. I appreciate the initiative shown by the gentleman from New York.

Mr. Speaker, worst of all, though, deployment of neutron bombs would seriously erode the barrier between nuclear and conventional weapons making it much more likely that nuclear weapons would be used in a crisis. This makes much more likely the destruction of modern civilization through major nuclear weapons exchanges.

It is impossible for me to imagine a scenario in which use of neutron bombs would not lead to a major nuclear exchange. These weapons are said to be designed as a deterrent against Russian attack in Europe. If the Russians did attack and we started to prevail against the attack with neutron bombs, surely Russia would make a nuclear reply, starting the Armageddon of escalating nuclear weapons use.

Indeed, in the European theater, knowing as we do of the Russian nuclear capability, it is hard to imagine that we would take the risk of using neutron bombs at all, risking a Russian nuclear response. The chances are overwhelming that we would resort in the first instance to strategic nuclear weapons, the real deterrent to a Russian attack. Thus, the huge investment in neutron bombs would be a total waste if not used, and an unacceptable danger if they are used. The sooner neutron bombs are rejected the better.

Mr. MITCHELL of Maryland. Mr. Speaker, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Speaker, I thank the gentleman for yielding. I want to compliment the gentleman for his courage and his wisdom in asking for his special order.

Let me indicate to the gentleman that I am coming at this from a slightly different angle. I read with mounting horror the analysis in one of our journals of the impact of the neutron bomb. It indicated that inside a 1,000-foot radius victims are disabled immediately and will die within 2 days.

Inside a 2,000-foot radius victims are disabled in minutes and will die within 6 days.

Inside a 4,000-foot radius of the explosion of a neutron bomb people are disabled and will die within several weeks.

I thought to myself, my God, let me just say that I think the intelligence of human beings derives from some sort of divine source and if we believe that source might be God, it is hard for me to conceive that God would want the intelligence of man used in a fashion to build such a horrible, horrible weapon of death and destruction.

I am very grateful that the President has deferred action on the neutron bomb. I would hope that we would take the other course instead and cancel the neutron bomb altogether.

It defies the imagination to think that we as civilized human beings have reached a point where our intelligent planning is directed in terms of this kind of awesome weapon of death.

Mr. Speaker, let me say that we are grateful to our colleague, the gentleman from New York (Mr. WEISS), and we thank him for his leadership.

Mr. WEISS. Mr. Speaker, I appreciate the gentleman's kind remarks, and I thank him for his contribution.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. WEISS. I am pleased to yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Speaker, I want to commend the gentleman from New York (Mr. WEISS) for his leadership on this very important issue and for the kind of enlightened debate that he inspired when we debated it last year. In fact, the chairman of the subcommittee who was managing the bill in which this issue was involved wrote me a note later—and perhaps he wrote it to other Members—saying that it was just about the finest debate he had ever heard on the floor of the House of Representatives on a particular subject.

I think the President has wisely decided to use this issue to try to get the Soviet Union to make corresponding adjustments of policies on its own side. However, let me say that everything that has happened, including the events immediately prior to the President's most recent decision, bore out the main point I made in our debate last fall. That point was that, in addition to the danger that this weapon would make nuclear war more probable and the likelihood that it would accelerate nuclear proliferation by smaller powers, a decision to make the weapon would be a political disaster. I said that it would be a political disaster because it would portray the United States as the initiator of another major step in the never-ending spiral of technological escalation of monstrous, inhumane, antipeople weapons. I think everything that has happened since then has demonstrated the fact that it was political disaster. Even seriously considering production of this weapon was a political disaster.

If the President should feel compelled at some future time to proceed with production of the neutron weapon, I would be very fearful that it would undo the positive image that he created when he announced last year that his goal was the eventual elimination of all nuclear weapons from this Earth. That statement evoked a wonderful response in the people of this country and all over the world. It should not be thrown away for some dubious military advantage which, when inevitably countered by the other side, will have left us even less secure. Let us hope that President Carter can use this as another "bargaining chip" to end the technological weapons development race. That will contribute far more to our security in the long run.

Mr. WEISS. Mr. Speaker, I thank the gentleman for his comments.

Mr. WEAVER. Mr. Speaker, will the gentleman yield?

Mr. WEISS. I am pleased to yield to the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. Mr. Speaker, I thank the gentleman for yielding.

Many of my constituents have asked me to speak out against the neutron bomb, and I do so willingly from the bottom of my heart.

My constituents have also asked me to commend the gentleman from New York (Mr. WEISS) for his great leadership in the House, and I want to thank him for carrying on his fight against this inhumane weapon.

If anyone thinks that Russian tanks will move across Europe and we will not be in a nuclear war, he has been misled, because, from the nature of our species, that would bring us one step closer to nuclear war. I believe also that the neutron bomb would bring us closer to a nuclear holocaust.

Mr. Speaker, this weapon should be forbidden and certainly not produced by this country.

Mr. WEISS. Mr. Speaker, I thank the gentleman for his remarks.

Ms. HOLTZMAN. Mr. Speaker, will the gentleman yield?

Mr. WEISS. I yield to the gentlewoman from New York.

Ms. HOLTZMAN. I thank the gentleman for yielding.

I wish to echo the commendations for my colleague, the gentleman from New York (Mr. WEISS), for his leadership on this very important issue.

I think this special order is urgent and important, because the press has failed to report to the country the sentiment of many Members of Congress who very much oppose the neutron bomb and its deployment. I have seen headline after headline claiming that Congress is opposed to the President's decision. Such statements ignore the views of over 100 Members of Congress who supported the gentleman's amendment when it was proposed in September, including the views of the Members here today and many of those who are not here today who support the President's decision not to go forward with the production of the neutron bomb.

I regret that there has been such serious misrepresentations of the point of view of many Members of this body.

I would also say that I continue to hope that the President will go further and renounce the use of the neutron bomb entirely.

I also wish that the Russians would not have responded to the President's decision with the kind of grunts and harsh words they have used. It is very disappointing that the Russians have insisted that they will not in any way diminish their military efforts.

I think the people of the world have a right not to see life jeopardized by nuclear holocaust, and that means not only Russian life and American life but all life on this earth. The neutron bomb and the deployment of countless unnecessary nuclear weapons will simply take us further down the road to such a holocaust.

I have been advised that the United States has approximately 30,000 nuclear weapons, 30,000 atomic warheads. How many more do we need? If our country is not protected by 30,000 nuclear war-

heads, will it be protected by 30 million nuclear warheads? I think the answer is clear. I think we had better rethink our commitment to producing additional nuclear weapons.

The neutron bomb is designed to fight tanks. If we cannot fight tanks with anything other than nuclear bombs and neutron bombs, then that raises great questions about our military capacity.

The neutron bomb is called a clean bomb. If we are going to be as casual as we are about radiation and its effects as the use of the neutron bomb would imply, then that is very sad. For example, Army magazine made the statement in support of the neutron bomb that dosages of less than 200 or 300 rads have a minimal effect on human beings. This is untrue. A number of employees of the United States who were exposed to only 10 rads of radiation which escaped from an underground explosion developed leukemia, and most Americans are cautioned by Government standards to be exposed to not more than 5 rads a year. The neutron bomb will have harmful effects on our own armed forces and on the European populations.

I think the neutron bomb portends disaster. I compliment and commend the President for his decision not to produce it.

Mr. WEISS. Mr. Speaker, I thank the gentlewoman for her very learned and eloquent statement.

Mr. MOFFETT. Mr. Speaker, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from Connecticut.

Mr. MOFFETT. Mr. Speaker, I thank the gentleman for yielding.

I congratulate the gentleman for his leadership on this issue.

I think that the response to the very fine debate we had on this issue earlier was overwhelming. I think it led people both inside and outside the House to think more seriously about the senseless, mad atmosphere that surrounds not only the arms race, but our treatment of it within the House.

What the antineutron sentiment means, is that there is a larger sentiment which would have us look at the overall issue of arms in a much more sensible, compassionate, future-oriented way.

How do we address the arms issue now? We address it in the midst of hysteria, in a kind of "the Russians are coming" atmosphere.

Mr. Speaker, as long as defense debates are conducted on this floor with the drums rolling and with threats that the Russians are about to land on Staten Island, with Maginot Line thinking, we will lose the possibility of changing the atmosphere and perhaps heading off a fatal confrontation in the future.

Mr. Speaker, I think that the gentleman from New York (Mr. WEISS) has exerted and exercised real leadership on this issue. I have been proud to join with him in that effort.

We can no longer take the genuine fears of the public about the future and "demogoguery" on those fears by suggesting that we have to build every new devastating weapon that comes along. The gentleman has sought to draw the line on this weapon, a weapon which simply does not make sense from a strategic or moral point of view. I commend him for that and am pleased to have taken part in this discussion with him.

Mr. WEISS. Mr. Speaker, I thank the gentleman for his very fine remarks and for his continued leadership and participation in these efforts.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Speaker, I thank my colleague for yielding.

I join with several of my other colleagues in commending the gentleman from New York (Mr. WEISS) for taking this particular special order on this important issue; and I would also like to reiterate our praise for the gentleman's having raised this issue several weeks ago on the floor of Congress.

At this particular moment, Mr. Speaker, I do not wish to attempt to reiterate the significant number of issues which I thought all of us raised with passion and reason on the floor of Congress in the debate which was described by several of our colleagues as the most sophisticated debate in the modern history of the U.S. Congress. Nonetheless, I still believe that while passion and reason was on our side—unfortunately, not reflected in the vote—we carried the day if one analyzes and evaluates carefully the range of argument that we presented against the madness of this particular weapons system.

Mr. Speaker, I have prepared for this moment a very brief statement. If the gentleman will yield further, I would like to read this statement into the RECORD.

Last January President Carter stated in his inaugural address, "It is my pledge to bring about an end to all nuclear weapons on the face of the Earth." I urge the President to keep that promise and stop production of the neutron bomb. It is time to look beyond the short term military use of the weapon and take a step toward the goal of peace and nuclear disarmament.

It is critically important that those of us who care about human life on the face of this Earth continue to maintain the mind set that nuclear war is unthinkable. But this is not what the neutron bomb does, because if we go forward with this insanity, we make nuclear war thinkable, acceptable and possible, and, I would submit, ultimately inevitable.

Let us be clear on what the weapon really does. The radioactive byproducts remain close to where the bomb was dropped, and are not spread over a wide area, so there is no fallout. However, the neutrons go just as far as in the ordinary A and H bombs so that people found within 1,400 feet of the bomb center receive terrible and usually lethal injuries. It does not kill instantly except at the place of impact but causes people to die a slow, lingering, often terribly painful death after weeks, months, and even years, depending on how close they are to the place where the bomb was dropped. It kills through radiation, thereby destroying life but leaving property untouched.

I might add parenthetically that I call it "the great capitalist bomb" on that particular point alone. While this is called a clean bomb, by its supporters, and therefore more acceptable, that is exactly why it is more dangerous and threatening. By being cleaner it is more likely to be used. For those of us who never want to see a nuclear bomb used again, it is extremely frightening.

My logic is very simple. If both the United States and the Soviet Union have big, dirty bombs, why do they build the small, clean bomb? It obviously means that it is the point that makes nuclear war thinkable. The way to survive is to never allow the concept of nuclear war to become thinkable at all. I believe that once we have started down the road toward nuclear war, it will result in global strategic nuclear war. I believe it is important to realize that the NATO countries were having a hard time convincing their people that the positioning of the neutron bomb on their territory was not a danger to them. I would ask every American how they would feel if these weapons were positioned in their city for possible use.

It is also interesting to note that some military analysts find it less effective than the weapons we have now because strategically the enemy could easily position its defenses in such a way that it would take many neutron bombs to destroy their forces.

With all the feelings that I have, from no idealogical perspective, but simply the desire to see human life survive and sustain itself on the face of the Earth, I urge my colleagues to support a decision against production and deployment of this weapon.

Mr. Speaker, I commend my distinguished colleague from New York. I realize that there are very many frustrated Members in this House with this reasoning. The philosophical values rest on our side, but the votes are on the other side. But, I would join my colleague in fighting to my last breath the continuing evolution of nuclear arms that ultimately, in my estimation, will mark the end of life on this earth. I believe a society that is not committed to its young is a society destined to die. Tomorrow belongs to our young people. It seems to me that we have a profound obligation to see to it that our children have a tomorrow that will allow them to assume their destination. We here today have a profound obligation to fight against all of those weapons that endanger our children's tomorrow, such as nuclear war, nuclear holocaust, the neutron bomb. These are factors that contribute to endangering our children's tomorrow.

I join my colleague in making sure that our Nation and the world shall be for our children, and seeing to it that we guarantee that they have a tomorrow.

Mr. WEISS. I thank the gentleman for his very articulate, logical, and profound statement. I had occasion to have brought to my attention a statement which appeared in the CONGRESSIONAL RECORD, a statement made by a Member of the other body, the Senate.

I would like to read a paragraph of it before I identify the Senator:

> Certain of the objections to the neutron bomb spring from the understandable desire to prevent the escalation of a limited military confrontation into allout thermonuclear warfare. The dominant philosophy in the administration at the moment, as I have pointed out, is that the only sure way to prevent such escalation would be to endeavor to contain the enemy with beefed-up conventional forces. According to this viewpoint, the use of even small tactical nuclear weapons on the battlefield would rapidly lead to a generalized use of nuclear weapons of all magnitudes, and we would have the war of total devastation that all of us desire to avoid. Despite its strikingly different properties, the neutron bomb is lumped together with existing tactical nuclear weapons whose use, so it is argued, would give the enemy license to expand the conflict into a war of mutual destruction.

That is the end of the quotation in the CONGRESSIONAL RECORD. That statement was not made in relation of President Carter's recently announced decision. It was made on March 7, 1963, by the late Senator Thomas Dodd when he was arguing against the then moratorium on testing of nuclear weapons, and he referred in that article to an earlier statement that he had made in 1960, again arguing for the development of the neutron bomb.

The concept of the neutron bomb goes back at least that far, and from Presidents starting with Eisenhower and through Kennedy and now through President Carter there has been an unwillingness to commit nuclear weapons to the use of field positions by field commanders.

Indeed, at one time apparently there was a piece of weaponry called the Davey Crockett, which was supposed to be used by the infantry. It was a sort of bazooka kind of nuclear weapon. It was a launcher for nuclear warheads by a soldier on the battlefield. After great deliberation that idea was discontinued.

The fact is that the conclusion, in spite of statements such as the one I have just read, in spite of the advice of some of the military and NATO advisers to the President, in the past the conclusion has been continually that the threshold for nuclear war would in fact be lowered if we put nuclear weapons, neutron bombs or any other kind, in the likely use of field commanders.

So the President of the United States is really following that tradition of demonstrating more caution because, as he has said and as referred to here and as the Secretary of Defense Mr. Brown has said, the overwhelming likelihood is that, once used, any nuclear weapons, neutron bomb or anything else, what would follow inevitably, as the gentleman from California has stated, is allout, full-scale nuclear war, nuclear holocaust.

We have, many of us, some direct personal recollection of the time when the first atomic bomb was dropped. We recall—I do—the horror of the world upon the dropping of the bombs upon Hiroshima and Nagasaki and the almost pledge taken by humanity that this kind of weaponry was really beyond the bounds for use and that over the years it was accepted by everyone that atomic and nuclear weapons would be used only as weapons of last resort.

To slide casually into a position where, if we listen to some of the President's critics, the neutron bombs and nuclear weapons are equated with hand grenades as almost normal conventional antitank weapons is in fact to become so calloused and cavalier as to accept the end of civilization as we know it. The fight that we are engaged in in supporting the President is really for the survival of the human race. I think all of those who participated in today's debate deserve commendation, and I want to give commendation to all my colleagues who participated in this discussion, in this special order today, because I think all of us have fulfilled a very important role in bringing again national attention to what some of the real issues and the concerns are in trying to stop production and promotion of nuclear bombs.

Ms. HOLTZMAN. Mr. Speaker, will the gentleman yield?

Mr. WEISS. I am happy to yield to the gentlewoman from New York.

Ms. HOLTZMAN. Mr. Speaker, the gentleman from New York (Mr. WEISS) has made a very fine point which I agree with entirely. I also think that one of the reasons that there has been such grave concern in Europe about the deployment of the neutron bomb is because it is perceived as lowering the threshold of nuclear war. And, of course, where will that war take place? On the battlefields of Europe.

The gentleman from California (Mr. EDWARDS) also made an extremely important point when he discussed press reports claiming that the NATO allies were concerned by the President's decision. But, I have yet to see a press report that showed how the people of the NATO countries reacted. In fact, there were not even reports on how all the governments were reacting to the development and the deployment of the neutron bomb, and the President's decision not to go forward with it.

My own suspicion is that most of the people in western Europe would be opposed to the deployment of the neutron bomb. But I have not seen any of our press devote any attention to this. All they do is write misleading headlines that suggest that the NATO allies are distressed just as they said that Congress was opposed to the President's decision. I think that this kind of reporting is irresponsible.

Mr. EDWARDS of California. Mr. Speaker, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from California.

Mr. EDWARDS of California. I thank the gentleman for yielding.

Mr. Speaker, I join my colleagues in appreciation for the gentleman's leadership on this very important issue. Mr. Speaker, I also want to applaud the President's decision to postpone production of the neutron bomb. At the same time the President is planning to modernize existing weaponry so that it could be adapted to enhance technology in the future. In doing so, President Carter is keeping all options open for negotiating realistic arms reduction with the Soviet Union.

However, to properly evaluate the President's decision we must continually focus on what role this weapon would play in the world arsenal. One of the major arguments advanced in favor of the production of the neutron bomb is that it will serve as a deterrent to a major Soviet invasion of Western Europe. However, this theory has credence only if the Soviets believe that the weapon would actually be used in the case of an invasion. The deterrence effect is weakened by President Carter's statement that the use of the neutron bomb would be viewed in the same way as deployment of any other nuclear weapon—that is, with extreme reluctance so as not to lower the nuclear threshold. If this is true and is accepted by the Soviets, the presence of the neutron bomb poses no additional deterrent.

I fear, however, that a far more likely scenario is one where those with the power to deploy this weapon will be prepared to use it in the face of an advancing invasion force which cannot be stopped by conventional means. In such a case, if the neutron bomb is available, it is likely to be used; and from that point on, the lines will have crossed over, the threshold will have been passed, and we will have uncontrollable nuclear warfare. There is no question in my mind that the availability of the neutron bomb will lower the nuclear threshold. In light of the dangers which are inherent in the use of the bomb, it was wise for President Carter to take a cautious approach regarding any decision to begin production.

In addition, Mr. Speaker, I do not think that the press accurately reflected the position of our NATO allies when the announcement was made by President Carter.

The Governments of Denmark and Norway are also NATO members, and they have reiterated their opposition to the siting of nuclear weapons on their territory. Further, a significant protest movement has already developed in Belgium.

In Britain, there has been no official government position. Prime Minister Callaghan has made supportive remarks, but those are unofficial remarks. The Government has taken no position.

The Germans have taken no position favoring production of the neutron bomb. Prior to President Carter's decision, the German Prime Minister said:

> The United States alone must decide on the production of such weapons.

The Germans would want to see agreement one way or the other by several other NATO nations before production would be started, so when the press says that the President's decision caused great distress to our NATO allies, I do not really think that that can be supported.

Mr. WEISS. Mr. Speaker, I thank the gentleman for his very fine remarks.

Mr. Speaker, as a matter of fact, in addition to the countries and populations whom the gentleman from California (Mr. EDWARDS) so very validly and accurately has cited, I would point out that in Holland the Dutch Parliament took an official position opposing authorization for deployment of the

neutron bomb in Western Europe. The fact is that not only have the people of those countries been opposed publicly—and I repeat, publicly—not a single national member of NATO has come forward and said, "Deploy it now." Not a single one.

And so now, after the fact, after the President has said—"Since you don't want it, and we are supporting those countries that we are supposed to be protecting, I am going to defend my decision on it"—now people within the administration are rushing forward and saying these countries were ready to agree to neutron bomb deployment, and it just happens not to be borne out by any evidence at all.

Further, George Kistiakowsky, who was a Presidential science adviser to President Eisenhower, President Kennedy, and President Johnson, has allowed us to use a manuscript which is going to be printed in the MIT Technological Review as of June 1. He points out that:

> Among the political-strategic think-tanks of German academia only one, which includes a retired General Kielmansegg endorsed the deployment of enhanced radiation weapons. The others, including such distinguished scholars as Weizsaeker, have opposed it on numerous occasions. Noteworthy is that several senior retired German military, including such high rank generals as Baudissin, Steinhoff and Heusinger are against the deployment of enhanced radiation weapons because they oppose the battlefield use of nuclear weapons, as leading to unacceptable collateral damage in Germany.

So, even in the country where there is supposed to be the greatest support for it, and the greatest public support for it, the facts seem to be to the contrary of those who, from inside the administration and from outside, are being critical of the President.

I think that we are going to have to continue our efforts to persuade the people who report on our activities hopefully to report more fully some of the activities that take place here and elsewhere on such momentous issues.

● Mr. DRINAN. Mr. Speaker, I am pleased to join today with my colleagues in commending President Carter for his decision not to go forward with the deployment of the enhanced radiation warhead—popularly known as the neutron bomb. This commendation, however, must be accompanied by serious reservations about the President's decision to proceed with the adaptation of launchers for use of the neutron bomb and to consider the deployment of the warheads as a bargaining chip in arms negotiations with the Soviets.

No weapon which significantly blurs the distinction between nuclear and conventional weapons (thereby making all-out nuclear war more likely) while adding little or nothing to our national security can be treated so lightly as to make its deployment contingent upon our perceptions of Soviet restraint.

Unfortunately, both the United States and the U.S.S.R. continually develop new and more dangerous conventional and nuclear weapons. At what point will the President perceive a degree of lack of restraint which will justify, by some logic as yet undefined, the introduction of the enhanced radiation warhead in the European theater or elsewhere? What criteria will he use? What effects of the neutron bomb will he consider? In spite of the President's wise and courageous decision not to deploy the neutron bomb now, these fundamental and troublesome questions remain unanswered.

The paramount danger presented by the neutron bomb is its capacity to lower significantly the nuclear threshold. The Pentagon tells us that the neutron bomb will deter all-out nuclear war because it is "small" and "clean" enough to use in response to a conventional Soviet attack. Knowing this, the argument runs, the Soviets will be less likely to attack than they would in a situation in which we could use only larger, dirtier, nuclear weapons—which we are less inclined to use for fear of escalation to all-out nuclear war. Thus, the Soviets would no longer entertain the notion that they could launch a massive conventional attack relatively secure in the knowledge that U.S. reluctance to cross the nuclear threshold would inhibit any nuclear response.

This argument is fallacious in several respects. Official Soviet military doctrine has never accepted any distinction between tactical and nuclear weapons—a position which is not so unreasonable when one considers that many of our tactical nuclear weapons are larger than the bombs which destroyed Hiroshima and Nagasaki. While we may unilaterally refuse to consider the enhanced radiation warhead a tiny nuclear weapon, there is little reason to expect the Soviets to do so—especially if the weapon is as effective as its proponents argue. At the very least, it would seem that use of the neutron bomb would invite a nuclear response of some kind by the Soviet Union—and then the almost inevitable escalation to strategic nuclear weapons and holocaust begins.

Another means by which the neutron bomb would lower the nuclear threshold is its perception by the military as a "clean" weapon; that is, one which causes little collateral damage. This perception invites the crossing of the boundary between conventional and nuclear weapons still further, and any blurring of this distinction brings closer the possibility of strategic nuclear war.

In fact, there is considerable debate as to just how little collateral damage the enhanced radiation warhead would cause. We are all familiar with the Pentagon's assurances during the Vietnam war that "surgical air strikes" would cause "minimal" civilian casualties. As it turned out, these casualties proved anything but minimal. While we may be able to draw a bit of comfort from the fact that buildings and crops would remain undamaged by the effects of the neutron bomb, the fact is that unless nearby friendly troops and civilians are in basements or bunkers beneath 3 feet of dirt, they would not be safe and, in fact, would likely suffer the ravages of slow death by radiation poisoning.

The lingering death, usually over a period of weeks, caused by less than immediate exposure to the effects of the enhanced radiation emitted by the neutron bomb, could conceivably violate the 1925 Geneva Protocol on the Conduct of War, according to Sir Rudolph Peierls, professor emeritus. Oxford University, and professor of physics, University of Washington. Professor Peierls, an expert on this subject cites the prohibition against the use of "asphyxiating, poisonous, or other gases, and of *all analogous liquids, materials, or devices*" (emphasis added).

The past pattern of the nuclear arms race is clear. Major technological advances by the United States are soon duplicated by the Soviet Union. From submarines capable of firing nuclear missiles to multiple, independently targeted re-entry vehicles (MIRV's), the pattern has continued. The deployment of the neutron bomb would almost surely prompt similar efforts by the Soviet Union, thus reducing the presumed deterrent value of the weapon to virtually nothing and blurring still further the distinction between conventional and nuclear weapons.

At a time when we are attempting to make this essential distinction even more clear and to reduce the pace of the arms race via the SALT negotiations, deployment of the neutron bomb is counterproductive in the extreme. The President is to be commended for his refusal to take this unwise step. At the same time, those of us in Congress and throughout the United States who oppose the introduction of this destabilizing weapon must make our opposition known lest the President proceed with his option to deploy enhanced radiation weapons. To do so would be to take a major backward step in efforts to put a cap on the arms race and prevent nuclear war.●

● Mr. CONYERS. Mr. Speaker, last week supporters of neutron weapons in and out of the Government launched an all-out campaign for their production. This campaign was triggered by newsstories that the President had decided to cease further development and oppose production of this weapons system. By week's end when the President announced his decision to defer production, the supporters of neutron weapons dug in even deeper in their attempt to convince the American people and the world that the future of Western civilization itself rested on the production of neutron weapons.

Nothing was spared in the attempt to win official and public support for neutron weapons. The media almost without exception disregarded entirely the very legitimate reasons for opposition to these weapons. They misrepresented critical facts about the impact of neutron shells and bombs on the civilian population close to the battlefield. The very serious issues of curbing the proliferation of nuclear weapons and slowing down the arms race were given little or no attention. The balance of opinion for and against neutron weapons was misrepresented, particularly opinion in Europe. The media, for example, never explained why the Dutch parliament voted to oppose the deployment of such weapons on Dutch soil, or why West Germany's leading party, the Social Democrats, in their

convention last November, decided to oppose the use of such weapons.

One of the most objectionable aspects of this campaign to sell the public on neutron weapons was the attempt to paint these weapons in bright, hopeful colors rather than the dull and grim ones they actually reflect. These weapons are cast in a positive light—as "clean" weapons; as "flexible" weapons; as "sanitized" substitutes for the bigger, grosser fission weapons already in the stockpile; as weapons that can be safely deployed on "friendly soil." Rarely has the humanization of machines proceeded so far and with such dangers. The fact of the matter is that neutron weapons are tiny hydrogen bombs whose radiation impact on human beings is highly deadly. One can only speculate that those who speak of these weapons in such positive terms are, unwittingly, embracing what surely are terrible machines in an effort to win them over to their side. The effort to humanize these weapons is, I believe, a necessary illusion for the proponents to entertain. We really should stop dignifying neutron weapons with polite adjectives for as the eminent social philosopher, Erich Fromm, has pointed out, by humanizing such machines, we are really dehumanizing ourselves.

What are the actual effects of neutron weapons on combatants and civilians? To answer this question I spoke to experts on nuclear weapons technology, among them Dr. George Kistiakowsky, professor emeritus at Harvard University, one of this country's leading scientists, the chief science and technology adviser in the Eisenhower administration, and one of the original group at Los Alamos working on the first atomic bomb.

The media reported erroneously this past week that civilians at a distance of a mile from the target would be "safe" from the weapon's effects. This is untrue. According to Dr. Kistiakowsky's research, the weapon would have the following effects:

At close-in combat, neutron weapons have similar blast and heat effects as the larger, nuclear fission weapons have; as one moves away from the immediate blast area the weapon's radiation causes incapacitation that lasts a relatively short time, but death within a day or so.

At 900 meters (one-half mile) harm to tank crews (or workers in nearby buildings) results in immediate incapacitation, recovery in about one-half hour, and then death within 2 to 6 days.

At 1,400 meters radiation impairs human functions within an hour, and death is inevitable.

At 1.7 kilometers (1 mile) radiation results in about 10 percent of the population dying from radiation sickness; and the remaining population the victim of all types of cancers.

At 2.1 kilometers (1½ miles) radiation causes delayed cancers and all types of genetic defects, particularly birth defects.

These effects are particularly alarming because it is generally agreed that neutron weapons, either in the form of artillery shells or else warheads on missiles, if used, will be used in large quantities.

The range of the radiation effects can conceivably cover a very large area, and, furthermore, Europe is one of the most densely populated areas in the world. To call any such weapon "clean" is rather outrageous when one considers that it is a nuclear weapon that is designed to destroy human life rather than property, and will most likely be employed in heavily populated areas. These factors go a long way toward explaining why the Dutch Parliament opposes neutron weapons, as do many of the leading political parties in Europe.

It is also rather bewildering to witness the frantic quality of the proponents' arguments for the indispensability of neutron weapons, militarily. We already have in place in Europe roughly 200,000 precision guidance antitank weapons, even more sophisticated versions of the weapons that worked so effectively against tanks on both sides in the 1973 Arab-Israeli conflict. Not only are neutron weapons not indispensable, but they also are not foolproof. The adversary can develop a defense against neutron weapons such as shields made of polyethylene plastic filled with water or pure hydrogen.

Last week's campaign to win support for neutron weapons also illustrated what is fundamentally wrong with the way the public's business is so often conducted in Washington. In this case, the public discussion on neutron weapons was orchestrated simply to put pressure on the President and the Congress, not to enlighten citizens and their leaders about the issues and stakes involved in a production decision.

The traditional fears of Soviet power, world communism, the so-called inherent weakness of Western democracies, falling behind in the arms race, opening up the floodgates against enemy aggression, being vulnerable to sneak attack, and so forth have been whipped up to stifle thought and dissent, not to promote it. The rather incredible impression was being created that America's existing nuclear and conventional arsenal is inadequate and that we are defenseless except for a decision to produce neutron weapons. It is on the same footing as the Defense Establishment's assertion that the congressional cuts of several billions over the past 5 years have weakened our national security, despite the outpouring of more than $330 billion in military appropriations during this period.

There is, of course, another perspective on weapons development, the arms race, the balance of terror, and neutron weapons. I personally think this perspective is far sounder, safe, and rational than the pronuclear weapons point of view. According to this perspective, the superpowers, and for that matter the entire world, is on a course toward disaster as long as governments continue to develop and produce any and all weapons systems that the technological mind of man conceives. There is no weapon we can produce that the other side cannot also produce.

We act on weapons, nuclear and conventional, as if we are saying to ourselves: Let these new weapons decide for us questions too momentous to decide for ourselves—whether or not we are increasing or decreasing the likelihood of nuclear war; whether or not we are reducing or increasing the harm and hazard to civilians by deploying such weapons; whether or not we (and other nations) can afford the massive diversion of resources to the military sector and away from human, social, and economic welfare.

I am reminded of a profound observation of Dr. Erich Fromm's on the antagonism between machines and men:

> The machine man built became so powerful that it developed its own program, which now determines man's own thinking (from Revolution of Hope).

The spectacle of last week's campaign for neutron weapons indicates that we may well be stuck in the ominous situation that Fromm outlines. Is there no reason and room for moving away from the impasse of blindly acceding to every justification contrived for further development and production of nuclear weapons?

Early last week the President pointed the way toward a new direction. He has shown the courage and wisdom to stimulate debate on neutron weapons, on other weapons systems on the drawing boards, and to raise fundamental questions on the long-term implications of further rounds in the arms race. I believe there exist prudent ways to reach agreements with other nuclear nations on curbing the proliferation of nuclear weapons and the development of yet more sophisticated and lethal nuclear weapons systems. I believe strongly that this Nation has the strength and wisdom to exercise leadership in moving the world toward arms reduction and away from resort to new destabilizing and menacing weapons that raise even higher the risks of nuclear war.

I support the President in his commitment to the ultimate goal of zero nuclear weapons in the world, and to his efforts in the short term to bring about a series of agreements on limiting nuclear weapons and making unnecessary, from any point of view, weapons such as the neutron ones.●

● Mr. STARK. Mr. Speaker, I am slowly becoming convinced that the doctrine of Mutual Assured Deterrence is indeed MAD. We have now developed the neutron warhead, a weapon that destroys people with minimum property damage, and it is hailed as progress. Though the existence of such a "selective" weapon commands a certain perverse fascination, we must recognize that the neutron bomb can only increase the chances of nuclear war. Through adherence to the MAD doctrine, we have now created a weapon whose sole merit is that it will frighten the other side because it is so usable This is supposed to contribute toward stability.

The bomb is designed to deter a conventional attack on our NATO allies. Should Soviet troops and tanks swarm across our lines, however, these eminently practical warheads could be shot toward them from as close a range as three-quarters of a mile. Having scared the other side sufficiently, we could then

regain control of our allies' soil and nary a farmhouse would have been damaged.

Right?

Wrong.

Once any nuclear weapons are used in battle, the barrier barring their use is destroyed. The use of neutron warheads would blur the distinction that exists between conventional and nuclear weapons and there would be nothing to stop further escalation. Moreover, even if we did try to deter an attack by conventional means, it is doubtful that a field commander whose lines of communication have been cut and whose troops are being theatened would hesitate to use the most "effective" weapon at his disposal.

It is my fervent hope that President Carter will be true to his first inclination and bar further funds for this dangerous weapon. We cannot allow advances in weapons technology at the cost of world peace and security. The continued development of the neutron bomb threatens both.●

## WANTED: A NEW FARM POLICY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 30 minutes.

● Mr. REUSS. Mr. Speaker, the conference report on H.R. 6782, the Emergency Agricultural Act of 1978, to be considered tomorrow, is not the answer to the farm problem. This legislation will accelerate the inflationary spiral and hurt consumers, without really helping those farmers who need help the most. It will simply compound the unfortunate results of years of tinkering with various kinds of price supports and payments to the farmers.

The patchwork of farm programs we have built up over the years has produced an unintended result: It has benefited the agri-business enterprises that do not need help, while doing very little for the bona fide family farms that really are in trouble. The agriculture bill which we are to take up tomorrow would only perpetuate the errors of the past. Some farmers do need help today—but not the kind of blunderbuss help which enriches those who do not need it and fails to target in on those who do.

We have not really analyzed what the farm problem in this country is. The Nation's farm income figures published by the Department of Agriculture are misleading. They show a 40-percent drop over 4 years in farmers' total net income. That would indeed suggest a very serious situation, calling for immediate and massive Federal support to the Farm Belt. However, the farm income situation is not quite what it seems.

There are three basically different kinds of farming operations. First, there are those conducted at what should more accurately be called rural residences—operations so small that their gross sales are $2,500 or less. Such farms are generally not full-scale farming operations, nor are they the full support of the family involved. In the past 30 years there has been a great transition of small farm families into jobs off the farm, while they continue to farm in a small way. When income earned off the farm is added in, these families appear reasonably well off in comparison with nonfarm families.

A second class of farm, the big commercial farm with sales of more than $40,000, is also generally reasonably well off. The families involved in these farm operations generally have incomes well above national family averages (though that is not true in all cases). What our present farm programs do is channel the bulk of payments to these already prosperous farm operations.

The third class of farm—the medium-sized farm with sales ranging between $2,500 and $40,000—is another story. As the farm protest movement today dramatizes, the income pressures on these farmers are severe. There are about 1.2 million farm families in this class, and it is their situation which really constitutes the present day farm income problem. They are suffering family incomes below the national average.

The income of these farm families has never risen above the U.S. average even in good years, and many of them are facing even more serious income problems in 1978.

Unfortunately, patching and fixing the traditional farm programs has not adequately helped these farmers in the past, and tinkering with price support and target levels will not do much for them now. Only a substantial revision of farm policy, to target more farm income support on the middle-size farm and less on the small part-time farm or the big commercial operation, can do the necessary job without sticking the consumer for even higher food prices.

At my request, the Congressional Research Service has recently completed a very thoughtful analysis of the farm policies that have led us into our present dilemmas, and suggests new directions which our farm policy might take. The study was prepared by Leo V. Mayer, senior specialist for agriculture. It suggests the following principles:

First, farm programs must be revised to reduce the assistance being given to farm operations that are large enough to be profitable without Federal assistance. There is only so much money available in the budget for agriculture support. As long as operations that are already reasonably prosperous are blanketed into the formulas for farm aid, the medium-size farm that is really hurting cannot be given the help it needs. There should be limitations on the size of Federal payments to farm operators, rather than the relaxation of restrictions which was embodied in the 1977 act.

Second, target prices could be raised enough so that the middle-size farm would receive amounts closer to the new maximums. Such higher target prices should be designed to give the medium-size-farm family an adequate level of income.

Third, the amount of credit any one farmer can receive from the Commodity Credit Corporation should be limited. At the same time, the interest rates farmers pay for this credit could be sharply cut. Again, this would reduce Federal support for the big farm but increase it for the medium farm.

Fourth, there are tax changes which could help even out farm income between good and bad years. Even without changes in the law, the Department of Agriculture should see to it that smaller operators, who often cannot afford sophisticated tax counsel, are fully informed about existing provisions for loss carrybacks and income averaging.

Fifth, terms for cerdit issued by the Farmers Home Administration could be adjusted to provide lower interest rates on the size of loans medium-size farms commonly utilize, and higher rates on amounts borrowed over a certain amount, say $50,000.

And sixth, the farm-to-consumer marketing program established in 1976, which enables farmers to increase their incomes by avoiding the middle-man, could well be expanded. This program has not yet received the attention it deserves.

Because of the additional burdens of taxation and inflation which its adoption would inevitably impose, I oppose the Emergency Agricultural Act of 1978. It is urgent that Congress turn its attention to strengthening the medium size family farm which has always been such a vital part of the social fabric.

AGRICULTURAL FINANCE ISSUES AND POLICY ALTERNATIVES BY LEO V. MAYER, SENIOR SPECIALIST FOR AGRICULTURE, CONGRESSIONAL RESEARCH SERVICE; PREPARED FOR REPRESENTATIVE HENRY S. REUSS, APRIL 11, 1978

INTRODUCTION

Farm protest in the winter of 1977–78 focused public attention on the financial condition of American agriculture. The protesting farmers forecast bankruptcy for one-quarter of American farmers if steps were not taken to improve their prices and incomes. Their recommendations were for an increase of about 50 percent in farm commodity prices, to gain the long-held goal of parity for American agriculture.

The reactions to their proposals, because of their extremeness, was almost uniformly negative.[1] Sympathy was expressed though for their economic plight and congressional action followed to determine the seriousness of the protesters claims. Both the House Committee on Agriculture and the Senate Committee on Agriculture, Forestry and Nutrition held hearings on the general agricultural situation. The results were not very conclusive.

The anomaly in the farm protest movement was that Congress had recently completed action on a new farm bill designed to provide financial assistance to farmers over the period 1978–1981. That farm bill was signed into law by President Carter only three months before the farm protest movement held its first national "tractorcade." The bill had represented a major legislative effort by Congress but the actions of the farm protest group suggested that the "best" farm bill Congress could pass was inadequate to meet the needs of financially-ailing farmers. The conflict posed several troublesome questions: were farm financial conditions worse than the national statistics indicated; were there special conditions faced by some farm groups that were not detected by national farm statistics; were there basic deficiencies in the long succession of farm programs that left financially-troubled farmers without assistance; were there other Government

Footnotes at end of article.

policies that encouraged serious financial problems for American farmers? This report examines these and other issues related to agriculture in the United States.

FARM INCOME CONDITIONS

One difficulty in assessing the farm situation and evaluating farm complaints is the wide range of "farm situations" that exist today. An accurate picture requires an examination of complex statistics well beyond simple national averages. Take, for example, the commonly cited national farm income figures published by the Department of Agriculture.

TABLE 1.—INCOME FROM FARMING

[In billions of dollars]

| | 1973 | 1974 | 1975 | 1976 | 1977 |
|---|---|---|---|---|---|
| Cash receipts from farm marketings | 87.1 | 42.4 | 89.6 | 94.3 | 94.3 |
| Government payments to farmers | 2.6 | .5 | .8 | .7 | NA |
| Nonmoney and other farm income | 5.8 | 7.0 | 6.8 | 7.2 | NA |
| Gross farm income | 45.5 | 100.0 | 98.2 | 103.6 | 105.5 |
| Farm production expenses | 65.6 | 72.2 | 75.5 | 81.7 | 85.5 |
| Farm operators' net income | 29.9 | 27.7 | 22.7 | 21.9 | 20.0 |
| Net change in farm inventories | 3.4 | −1.6 | 2.9 | −1.9 | −.2 |
| Farm operators' total net income | 33.3 | 26.1 | 25.6 | 20.0 | 19.8 |

Source: Department of Agriculture. Farm Income Statistics. July 1977.

These figures show a falling trend for farm operator's total net income; the 40 percent drop over four years suggests an extremely serious farm income situation. Data on average income per farm tends to substantiate that trend. Per farm income figures also show falling farm income during a period of rising prices which suggests a falling standard of living for the average farm family.

TABLE 2.—INCOME PER FARM FROM FARMING

[Dollars]

| | 1973 | 1974 | 1975 | 1976 | 1977[1] |
|---|---|---|---|---|---|
| Cash receipts from farm marketings | 30,616 | 32,662 | 31,361 | 33,950 | 34,300 |
| Government payments to farmers | 917 | 187 | 287 | 264 | 650 |
| Nonmoney and other farm income | 2,050 | 2,463 | 2,772 | 3,089 | 3,450 |
| Gross farm income | 33,583 | 35,312 | 34,420 | 37,303 | 38,480 |
| Farm production expenses | 23,054 | 25,511 | 27,010 | 29,418 | 31,100 |
| Farm operators' net income | 10,529 | 9,801 | 7,410 | 7,885 | 7,300 |
| Net change in farm inventories | 1,198 | −569 | 1,227 | 682 | −100 |
| Farm operators' total net income | 11,727 | 9,232 | 8,637 | 7,203 | 7,200 |

However, there are at least two more aspects of the farm income situation that should be considered before either the conclusion is drawn that all farm incomes are low or that more Government assistance is necessary. First, income earned from off the farm should be added to farm family incomes. This is necessary because many rural residences that are currently classified as farms, and included in per farm income calculations, are primarily just rural residents with off-farm occupations. Because these residents have very little farm income, their inclusion in the farm income calculations reduce the per farm income averages. Note what a difference it makes if income earned off the farm is added into the total income of farm families:

TABLE 3.—TOTAL INCOME PER FARM

[Dollars]

| | 1973 | 1974 | 1975 | 1976 | 1977[1] |
|---|---|---|---|---|---|
| Income per farm: | | | | | |
| From farming | 10,529 | 9,801 | 7,410 | 7,885 | 7,300 |
| From off-the-farm | 8,335 | 9,330 | 10,148 | 11,174 | 12,000 |
| Total per farm income | 18,864 | 19,131 | 17,558 | 19,059 | 19,300 |

[1] CRS estimates; other years are from the Department of Agriculture, Farm Income Statistics. July 1977.

The inclusion of off-farm income more than doubles the average income of farm families. But what exactly does this mean? Mainly, it means that neither the figures for income from farming nor the figures for off-farm income are very useful in developing an accurate assessment of the farm income situation. The farm income figures are biased downward by the inclusion of "farms" that are really just rural residences. The off-farm figures are misleading because many medium-sized commercial farms that fully employ the operator and his family do not have off-farm earnings. Thus, the farm income figures understate the incomes of full time farmers and inclusion of off-farm income tends to overstate the incomes of these same families. Whether one balances off the other is unclear. What is clear is that neither set of income figures provide a very useful measure of farm well-being.

One possibility for gaining a more accurate insight is by turning to another set of income data published by the Department of Agriculture. These data break all farms down into seven size categories. The size classification is based on amount of products sold annually with the largest size farms having sales over $100,000 and the smallest size farms having sales of less than $2,500 per farm.

The income figures for these different farm sizes (shown on the following page) indicate that the two largest classes of farms, those with sales over $40,000 and over $100,000, have high farm incomes (those shown are net incomes) as well as substantial off-farm income. (The off-farm income is probably from non-farm investments and businesses, farm advisory activities, boards of directors, consulting fees, etc.) Together, the families on these largest farms have total annual incomes well above the national family average.

While their incomes are considerably smaller, the total incomes of the smallest sales class of farms, those with farm product sales under $2,500, appear reasonably well in line with incomes of non-farm families. This is primarily the result of significant income from off the farm, probably jobs in local towns and communities. While their money incomes are below the national family average they are likely about equal if the lower cost of living in rural areas is taken into consideration. The remaining farms, those with sales between $2,500 and $40,000, have incomes that average about $12,000 annually. The incomes of these farm families are well below the national average.

TABLE 4.—SOURCES OF INCOME OF DIFFERENT SIZE FARMS

| Sales class | 1973 | 1974 | 1975 | 1976 |
|---|---|---|---|---|
| Net income per farm from farming: | | | | |
| $100,000 and over | $93,748 | $82,413 | $55,916 | $55,716 |
| $40,000 to $99,999 | 23,539 | 20,617 | 16,633 | 16,558 |
| $20,000 to $39,999 | 12,972 | 11,409 | 9,623 | 9,622 |
| $10,000 to $19,999 | 7,119 | 6,170 | 5,224 | 5,248 |
| $5,000 to $9,999 | 3,970 | 3,476 | 2,987 | 3,030 |
| $2,500 to $4,999 | 2,178 | 1,915 | 1,684 | 1,725 |
| Less than $2,500 | 1,575 | 1,614 | 1,727 | 1,921 |
| Income per farm from off-farm jobs and other sources: | | | | |
| $100,000 and over | 9,406 | 10,587 | 12,007 | 13,310 |
| $40,000 to $99,999 | 4,906 | 5,520 | 6,229 | 6,906 |
| $20,000 to $39,999 | 4,175 | 4,662 | 5,199 | 5,762 |
| $10,000 to $19,999 | 5,205 | 5,792 | 6,397 | 7,060 |
| $5,000 to $9,999 | 6,801 | 7,574 | 8,283 | 9,124 |
| $2,500 to $4,999 | 7,740 | 8,607 | 9,400 | 10,342 |
| Less than $2,500 | 11,824 | 13,280 | 14,223 | 15,360 |
| Total income per farm all sources: | | | | |
| $100,000 and over | 103,154 | 93,000 | 67,923 | 69,026 |
| $40,000 to $99,999 | 28,445 | 26,137 | 22,862 | 23,464 |
| $20,000 to $39,999 | 17,147 | 16,071 | 14,822 | 15,384 |
| $10,000 to $19,999 | 12,324 | 11,962 | 11,621 | 12,308 |
| $5,000 to $9,999 | 10,771 | 11,050 | 11,270 | 12,154 |
| $2,500 to $4,999 | 9,918 | 10,522 | 11,084 | 12,067 |
| Less than $2,500 | 13,399 | 14,924 | 15,950 | 17,551 |

Source: Department of Agriculture, Farm Income Statistics, July 1977.

These farms really represent the present-day farm income problem. The question is: how many of these farms are there? Are they receiving considerable Government assistance already? And, do they deserve special consideration?

TABLE 5.—NUMBER OF FARMS

[In thousands]

| Sales class | 1973 | 1974 | 1975 | 1976 |
|---|---|---|---|---|
| Commercial-plus farms: | | | | |
| $100,000 and over | 138 | 150 | 141 | 155 |
| $40,000 to $99,999 | 286 | 302 | 288 | 307 |
| Total | 424 | 452 | 429 | 462 |
| Commercial farms: | | | | |
| $20,000 to $39,999 | 325 | 325 | 322 | 320 |
| $10,000 to $19,999 | 322 | 312 | 315 | 302 |
| $5,000 to $9,999 | 321 | 310 | 314 | 298 |
| $2,500 to $5,000 | 338 | 326 | 330 | 313 |
| Total | 1,306 | 1,273 | 1,281 | 1,233 |
| Rural residence farms: Less than $2,500 | 1,114 | 1,105 | 1,098 | 1,083 |
| Total | 2,844 | 1,830 | 2,808 | 2,778 |

First, as shown above, there are about 1.2 million "commercial" farms that fall into the middle-sales-classes. The income of these farms never rose beyond the U.S. average family income even in the high farm income years (1973–75).[2] Most of them today, based on the data for 1976 which is the latest available, have incomes well below the national average family income (about $19,000). While their incomes are not as low as only their farm incomes figures suggest, yet their total family incomes do not come up to national standards. Many of these farm families are likely facing more serious in-

come problems in 1978 than the 1976 figures suggest because of lower crop prices and because drought affected some farming areas very adversely in 1977.

### Government Payment Levels and Distributions

The immediate question raised by income figures for the middle-sales-class of farms—those titled "commercial farms"—is how much financial assistance does the Government provide them? Are their incomes low despite large amounts of Government assistance or are they not receiving much financial assistance? Definitive answers are probably not possible but some indications can be found in data on Government payments published by the Department of Agriculture.

But first, it may help to explain that most payments to farmers are for two types of purposes: One is to offset losses caused by natural disaster (drought, floods, hail, etc.) and the second is to protect against economic disaster, mainly low grain prices. The first Federal program is called a "disaster program" and the second a "target price program." Both dispense payments according to the size of farms, or more accurately, according to the units of production on a farm. Thus, disaster payments are a function of the number of acres of a crop lost to natural disaster and the target price payments are based on the normal units of production for a farming unit. In both instances, the size of the payment increases with the size of the farm.

Footnotes at end of article.

Source: U.S. Department of Agriculture. Farm Income Statistics. July 1977.

The effect of the link between size of farm and size of payments is evident in the figures below. In 1972 and 1973, the last years of large payments to farmers (for which data are available), "commercial-plus" farms accounted for 13 percent of all farms and received 47 percent of all Federal farm payments. It goes without saying that these farms received the largest average payments per farm.

The question asked earlier though was how much Government assistance the "commercial farms" were receiving. These data show that in 1972 and 1973, these 48 percent of all farms received 46 percent of the farm payments. Their average payment was $1,140, almost identical to the national average. Their payments were, however, only one-fifth of the average payment ($5,343) of "commercial-plus" size farms.

The payments for 1974, 1975 and 1976 illustrate a different situation. In those years, most payments were made for "disaster programs." High market prices had made the target price programs inapplicable and no payments were made for these programs. These data illustrate, however, that a similar distribution pattern continued, although average payments per farm were reduced sharply. Commercial-plus farms, now 16 percent of all farms, received 59 percent of all Federal farm payments. Commercial farms, 45 percent of all farms, received 36 percent of all payments.

On this framework of farm sizes and payment distributions, the Government reinstituted target price payments in 1977. The payments were made to offset declining farm prices for grain and cotton. Checks to cover the Government's liability were sent to farmers at almost the same time that the farm "March on Washington" was taking place. The question is to which farms were the payments going?

One should be very cautious about basing an answer to this question on aggregate, previous year data like those shown above. Also, one should be cautious about drawing negative inferences from the fact that the largest payments have gone to the largest income farms. In all likelihood, there are large farms in the commercial-plus sales category that have low net incomes and suffered serious income problems in 1977. Similarly, there probably are many farms in the commercial farm category (middle sales, middle income farms) that experienced little income problem in 1977. So much depends on other factors—off-farm income, debt-commitments, etc. But it is probably true that, on average, most farmers in income difficulty in 1977 fell into the commercial category of farms, those farms with sales between $2,500 and $40,000; but some income problem farms certainly had sales above $40,000 though and this should be kept in mind.

Thus, one answer to where the payments are going is: Based on past records, the 1.2 million farms in the commercial sales category of farms probably received about one-third of all Government farm payments in 1977. If payments totaled $1.8 billion, their $600 million averaged out at about $500 per farm. By contrast, about 60 percent of the payments probably went to the commercial-plus category of farms for payments of about $2,340 per farm.

It seems useful to stress though that (1) these estimates are based on past distribution patterns and (2) one cannot conclude "hard and fast" that the smaller farms had greater need for the payments than the commercial-plus farms. Given the relative net incomes of the two groups as shown earlier, and the low incomes of the commercial farm groups even in high farm income years, this view seems reasonable though. The middle-sales-classes of farms have always fared poorly if these income statistics are accurate. The vast majority are probably moderate sized, family-operated businesses. They are the focus of efforts to maintain a family farm structure in the United States. However, $500 of Federal payments annually do not provide them with much "staying" power. And expansion of their average farm size is highly unlikely since they must bid against commercial-plus size farms for additional land.

Thus, it seems quite clear that (1) mid-size farms are experiencing below average family incomes and this eventually will encourage them or their children to seek other sources of incomes from other occupations, (2) if there is no increase in their average Federal farm payments they will slowly move out of farming and into the category of rural farm residences, and (3) the decline in number of small farms and the increase in size of large farms is not over in the United States. The 462,000 commercial-plus size farms currently produce and sell about 80 percent of all farm production in the United States.

### FARM ASSETS, LIABILITIES, AND EQUITIES

An aspect closely related to the farm income situation is the farm asset situation. Traditionally, farmers have operated their farms and supported their families on earned income in years of positive income and lived and operated on depreciation and capital gain based credit in years of low or negative income. The major collateral for obtaining credit usually has been farm real estate; if it were rising in value, farmers that owned land borrowed from banks or other credit institutions to survive the low income years. If real estate values were declining, the opportunity for more credit was limited. Fortunately, farm real estate has increased in value almost every year since the Great Depression.

TABLE 7.—FARM BALANCE SHEET

[Billion dollars]

| | End of year values for— | | | | |
|---|---|---|---|---|---|
| | 1973 | 1974 | 1975 | 1976 | 1977 |

| Equity | 412.1 | 445.7 | 502.0 | 568.2 | 610.9 |
| Debt to asset ratio (percent) | 15.2 | 15.5 | 15.3 | 15.3 | 16.3 |

Department of Agriculture. Agriculture Finance Outlook. November 1977.

In the period after 1973, farm real estate values escalated very rapidly, with a 63 percent increase over the four years from 1973 to 1977. Farm loans using real estate as collateral also increased but there was a slight decline in the percent debt was of real estate value. Overall, as shown below, both farm assets and liabilities have increased with the ratio of debt to assets increasing some in 1977. In earlier years, it had fallen to a low of 15.2 percent from 16.8 percent in 1970; it increased again to 16.3 percent by the end of 1977.

The increase in the debt-asset ratio in 1977 was a rather minor change compared to

the improvements in the financial condition of the average farm. As the data on the following page illustrate, the average farm in 1977 had total assets that exceeded a quarter million dollars with liabilities of less than 20 percent that amount. The average farm has a net worth that exceeded $200,000 with an annual income (shown earlier) of just under $20,000 (counting both farm and nonfarm income). One should keep in mind that these are averages with the same deficiencies as the income data shown earlier.[3]

Source: U.S. Department of Agriculture, Agricultural Statistics 1977 and Agricultural Finance Outlook 1977.

The strong financial situation of the average farm shown in these data contrasted sharply with the forecast by farm protest groups in 1977 that one-fourth of all farms faced bankruptcy in 1978. That forecast was not supported by the Department of Agriculture's annual survey of the Agricultural Finance Outlook in November 1977. That survey found a strong farm asset picture with some diversity among farm borrowers:

Bankers said that the overall quality of their farm loan portfolios averaged as strong in 1977 as in the previous year. Deterioration in loan quality occurred among borrowers in cash grain and beef cattle areas. However, improvements were indicated in the incomes, net worths, and repayment capacities of borrowers producing dairy products, other livestock (primarily hogs), and tobacco. Bankers believed that the quality of their farm loan portfolios in 1977 averaged somewhat better than that of their other business loans. However, they anticipated some decline in the quality of their farm loan portfolios during 1978.

The Department made several other points about the farm financial picture:

1. Farm indebtedness increased rapidly during 1977. The estimated $16 billion rise was a record by a sizeable margin.

2. Farm asset values increased by $59 billion, which gave a net equity gain of $43 billion, fourth largest on record.

3. Renewals and extensions of farm loans were much more common in 1977, with many non-real estate loans converted to real estate-secured loans.

4. Five percent of farm borrowers were viewed by lenders as having become unsatisfactory credit risks and would not be granted continued financing if current conditions persist. This proportion was only a little larger than normal.

In the Department's view, the favorable finance picture was offset by an equally unfavorable farm income picture. It noted that total net farm income had dropped slightly below $20 billion with the change reflecting "much less favorable returns for cash grain producers, following several good income years prior to 1977." But the income picture was not entirely one-sided:

Incomes of farmers other than cash grain producers changed less dramatically. Net returns to livestock producers improved a little and further gains appear likely next year. Livestock, poultry, and dairy producers, in general, are among the beneficiaries of the abundant feed supplies at lower prices.

The picture painted was of falling income and of rising asset values for the average farmer. Farmers were trying, some desperately, to hold onto their higher-valued assets as their incomes trended downward. For owner operators with equity in real estate to use as collateral, getting more operating credit apparently posed no problem. For renters, the declining income could be a serious threat to continuing their farm operations.

It also posed problems for rural businesses and communities. The USDA report noted that "Because of the relatively low farm product prices, farmers will probably borrow more for operating purposes, but they are expected to curtail their capital outlays." The report added that "Personal consumption and other cash uses of funds are also expected to be curtailed." It was little wonder that rural community businessmen supported the idea of a farm strike and the establishment of higher prices for farm commodities.

THE FARM PROBLEM REDEFINED

The farm financial picture described in the previous sections of this report differs substantially from the public perception of farms as small, poorly financed, with family incomes well below the national average. There are farm families that fit this description in substantial degree. There also are farms, producing about 80 percent of all farm output that are large businesses, well financed, with family incomes far above the national average.

Neither group of farms is socially undesirable; both represent chosen ways of living by large groups of rural people: The large (commercial-plus) farms include about a half million families, the smaller (commercial) farms include about 1.2 million families. There are also another million families living in rural areas, most working in off-farm jobs and farming in their spare time, that still meets the current definition of a farm although the majority have little economic dependence on agriculture. These families produce and sell $2,500 or less of farm products each year and clear about $2,000 annually from farming activities.

For many years, the low income of these smallest farms was used to justify Federal assistance programs for agriculture. More recently though, the Department of Agriculture has developed and published annual estimates of their incomes from off-farm sources and this has changed the perception of their financial situation rather sharply. Instead of poverty level incomes, these estimates show that their annual incomes are near the national average family income. Measured in rural purchasing power, their incomes probably provide an above average standard of living.

Thus, the current farm income situation turns out to be far more diverse than it was one, two or three decades ago. Today, there is a significant number of very large farms that control an increasing proportion of farm resources, sell a growing part of farm output; and have high family incomes.

The concentration of resources and output on these farms has been increasing rapidly in the past few years. In 1966, only 1.3 percent of all farms averaged net farm incomes over $50,000; those 43,000 farms sold 27.6 percent of all farm output and received 10.3 percent of all government payments. By 1976, 5.6 percent of all farms averaged net farm incomes above $50,000; those 155,000 farms sold 59.6 percent of all farm output and received 36.5 percent of all government payments. If this rate of increasing concentration continues, by 1986, 10 percent of all farms (250,000 on the present farm definition) will sell 92 percent of all farm output and receive 63 percent of all Government farm program payments.

The remaining farms primarily will be rural residences with off-farm occupations and a side-interest in farming. This continuing change can occur with such gradualness that no serious disruptions will occur in food production, marketing or retailing. Further, the national statistics still will show about 2,500,000 farms, given the present farm definition (or 2,000,000 on the new farm definition ($1,000 product sales equals a farm) adopted in the 1974 farm census.) However, only 200,000 to 250,000 will be significant suppliers of farm output.

It is this prospect of large farms increasingly taking over control of agricultural resources that underlies much of the uneasiness among economically-weak farmers.[4] Uneasiness like this led to the forecast of bankruptcy for one-fourth of all farms in late 1977 by the Farm Protest Group. While this forecast was unlikely to take place immediately, it was a long-term prospect for the 1.2 million farmers in the "commercial" sales class. For these farm families, the implication of the trends toward increasing farm size was clear. Most had already watched their affluent (commercial-plus size) farm neighbors slowly and gradually take control of farms "down the road," add it to their farm operation, and began to look for more farmland to rent or buy. These expansion-minded neighbors were on an upward "tread-mill"[5] that allowed them to take greater advantage of government farm programs, tax laws that allowed write-off of interest costs as a business deduction, investment tax credit programs, preferential taxation of capital gains, and cash-basis accounting.[6] Most "commercial" size farms were not in an income position that allowed them to take advantage of these special tax programs although the hope that they might someday find these programs useful has led them to support their continuation.[7] These 1.2 million "commercial" farm families face a rather bleak future, given their below average incomes, their lack of "expansion-power," and their inability to compete with their economically-stronger farm neighbors.

Thus, we arrive at a definition of the farm problem in the 1970's. In overall terms, it is who will continue to farm or in the terms of Land Grant University Economists, "Who will control U.S. Agriculture?" (See Appendix I). In more specific terms, the farm problem is the 1.2 million "commercial" farm families that have below average family incomes. In more positive terms, the farm problem is how to raise their incomes to levels that will allow them to compete with financially stronger farm interests for additional farm resources (land, machinery, livestock, etc.). Obviously, if the $1.8 billion of Government payments to farmers in 1977 had gone to these 1.2 million farmers, their incomes would have been slightly better (about $1,500 each). Instead, this group received about one-third of all farm program payments (about $500 per farm) which was insufficient to increase their economic bargaining power. Unless some additional assistance is provided these farms, most will slowly fade away. And if the assistance for these farms comes via farm prices—parity prices are one such goal—the improvements in their incomes will be small compared to the gains of larger farms and their competitive position will be worsened

Footnotes at end of article.

rather than improved.[8] Land and other asset prices would escalate to the point where small farms still faced relative economic weakness in the farm asset market. If the nation is serious about maintaining—perhaps we should say reestablishing—a family-farm structure, Federal farm assistance must be disbursed differentially. Current policies, to put it candidly, give too much to those with little need and too little to those with much need. The effect on farm structure has been obvious for two decades to serious students of agricultural trends.[9]

POLICY ALTERNATIVES

The description of the "new" farm problem outlined above is really not new. It is the farm problem as it has slowly and gradually evolved since World War II. For many years, the implicit "answer" imbedded in national farm policies was to allow families on small farms to transfer out of farming, thus removing excess labor from agriculture and supposedly employing it elsewhere in the economy. This "answer" was implicitly recognized as a necessary step if U.S. agriculture was to increase its efficiency and compete on a world market for foodstuffs. Fewer families in agriculture reduced the number of income claimants and allowed either higher incomes for those remaining or the same income for them and lower prices for the goods they sold. In terms of improved world competitiveness, lower prices were most useful and the natural competitiveness of U.S. agriculture assured this outcome. The economically-pressed farmers complained about the "cheap food policy" of the Nation but expansion-minded farmers increased their farm size and reduced their per unit costs of production.

By keeping a step ahead of the gradual decline in real farm commodity prices,[10] these farmers were able to earn reasonably acceptable incomes. This was more true if the increase in their asset values (capital gains) was taken into account[11] in the calculation of their incomes. Their average expansion from the post World War II period to the present has given the nation a three-part structure of agriculture. One part, the commercial-plus size group earns incomes well beyond the average non-farm family. These farms are competitive with or without government assistance. Many probably subscribe to the philosophy "get the government out of agriculture." The gains to them would be substantial if this happened because market pressure on economically-weak farm operators would force more to leave agriculture and thus release land to other operators.

The second part, the commercial farm group, is hard pressed financially by declining real farm prices (this is another way of saying they are hard pressed financially by inflation in the prices they pay for items used in production). To maintain their incomes, these have had to reduce their production costs or increase total units sold—and the latter generally has meant adding more acres of land, a physical impossibility for all farms and an economic impossibility for most farms in this group.[12] Most of these families have compensated for their declining real incomes by having some member of the family take an off-farm job.

| Sales class | Per farm: Cash receipts | Per farm: Production expenses | Per farm: Cost/dollar of sales |
|---|---|---|---|
| $100,000 and over | $370,807 | $319,581 | $0.86 |
| $40,000 to $99,999 | 63,753 | 50,407 | .79 |
| $20,000 to $39,999 | 30,453 | 23,472 | .77 |
| $10,000 to $19,999 | 15,679 | 12,808 | .86 |
| $5,000 to $9,999 | 7,906 | 7,252 | .92 |
| $2,500 to $4,999 | 3,850 | 4,460 | 1.14 |
| Less than $2,500 | 1,232 | 1,652 | 1.32 |

However, the intermediate size farms have too few units to sell to earn an adequate family income while the large farms earn high incomes on large sales despite the higher cost per unit of output. (Source of Data, Department of Agriculture. Farm Income Statistics. July 1977.)

The third part of agriculture has largely made the transition to non-farm jobs and conducts farm activities on a part-time, side-line basis. Some are partly retired and some were part of the urban exodus that came to rural areas in search of a more peaceful environment. This latter group's interest in agriculture is more nearly as a leisure activity rather than an economic dependence although many certainly utilize this income to supplement other earnings. The family incomes of this whole group are not greatly affected though by what happens to farm prices and incomes.

It seems reasonable to conclude, based on this review, that the 30-year transition by a large proportion of farm families to off-farm jobs (the proportion is so large that the average farm family earns more income off-the-farm than on-the-farm) has generally solved the traditional farm problem—a problem often described in past years as excess labor resources in agriculture. With the reduction in farm numbers and increase in farm size that has occurred, there now exists a commercial-plus group of farms that is extremely strong economically, measured in terms of incomes or of assets.

However, as the farm protest movement of 1977–78 indicates, the income pressures on another group of farmers remains very intense and very real. The traditional farm programs that have provided farmers with price support loans and supplementary income payments have helped ease the income problem of these farms but the large size of payments for larger farms probably worked as much to their disadvantage (in increased demand and higher prices for land, machinery, etc.) as the small payments did to their advantage.[13] Larger payments in the future will allow larger farms to continue expanding, buying up the resources of smaller and economically-weaker farmers as they retire or migrate occupationally. The prospect does not give much hope to that large number of farms in the middle-sales-classes. Tinkering with the traditional programs elements like price support levels and target prices will not do much for them either. A substantial revision of the traditional programs is necessary for that goal to be achieved.

POSSIBLE PROGRAM ADJUSTMENTS

This review of farm financial conditions suggests certain policy strategies and elements for future Federal farm policy. One must caution however, that no one set of data or analysis should underlie something as important as the development of farm programs for the nation. By the same reasoning, the development of policy should not proceed without full consideration of all available information and relevant data. To do so involves risk that the policies adopted will focus benefits on groups with questionable need.

This possibility already seems to have occurred in farm policy deliberations. A decade ago, a Federal study of farm income conditions concluded that large farms—farms with $20,000 sales and over—were already earning parity returns on their labor and capital resources.[14] In fact, as the data from the study below shows, the study implied that the largest farms could have withstood a significant reduction in farm prices and still earned parity incomes; by contrast the smallest farms would have required a doubling of farm prices to reach parity incomes. The only obvious impact that this study had on policy was the imposition of the $55,000 limitation on per farm payments in 1970 and this was reduced to $20,000 in 1973 and raised again in the 1977 Farm Act to $40,000.

TABLE 9.—PRICE CHANGE AND PARITY RATIO REQUIRED FOR PARITY RETURNS

| Sales class | Required price change (percent) | Required parity ratio |
|---|---|---|
| $20,000 and over | −9 | 73 |
| $10,000 to $19,999 | +10 | 86 |
| $5,000 to $9,999 | +38 | 103 |
| Under $500 | +170 | 167 |
| All farms | +11 | 86 |

Source: "Parity Returns Position of Farmers," report to the 90th Cong., 1st sess., by the Department of Agriculture, Aug. 10, 1967.

Obviously, the answer to the income differentials in agriculture is not a simple transfer of income from and a reduction of incentives for large farms. That would be publically unacceptable. But the question can also be posed whether Federal income transfer program for agriculture should provide above-parity income farmers with Federal income supplements. This is what the present farm programs accomplish; the majority of payments go to farm operations that have incomes well above national family averages. The question is: Given this factual background, and ignoring political considerations, how should farm programs be changed?

First, the changes should not disrupt the agricultural industry's capacity to provide adequate supplies of food and fiber for the nation and leave adequate amounts for export. Second, any change in programs should not replace the guidance provided to farmers by the market on what, how, and how much to produce of farm and food products. Third, any change in programs should take account of the cyclic instability of agricultural productions and tend to moderate that in stability and where that is impossible, provide farmers protection against adverse impacts. Fourth, change in the programs should treat different agricultural groups—specifically crop and livestock producers—in ways that do not impose burdens on one for the benefit of the other. Fifth and finally, new programs must not impose undue burdens on food consumers or taxpayers to the benefit of food producers, where the end result is higher farm asset values, higher future production costs, and inflationary pressures in the remainder of the economy that ultimately raise the prices paid for inputs by agricultural producers.

To a great extent, this round-robin effect of higher prices—higher costs—higher prices explain the current financial problem of many farmers within agriculture. The great food price spiral of 1973 nad 1974 (a 29 percent increase in retail food prices) led to a large rise in farm purchasing power, particularly for larger farming operations. Many of these operators began purchasing more land and machinery at almost any price partly to take advantage of tax avoidance principles, partly to gain control over more agricultural resources, and partly to get the additional income that higher prices provided. Some of these operators leveraged themselves heavily, using borrowed funds liberally, and when farm prices turned downward in 1976, their small equities quickly disappeared and they faced severe debt repayment problems. In reality, they gambled, and the tax laws encouraged them to do so, that the high farm prices would continue; if prices had continued high, most of these operators would have joined the nouveau riche. But prices went the other way and cash flow problems proliferated. This explains part of the financial problem facing many farm operators in 1978.

Footnotes at end of article.

The question is: are there farm program changes that would improve on these two sets of conditions? The answer, based on this review seems to be: Long run farm policy changes do not appear to be a useful response to the farm discontent of 1977–78; these are special problems which call for special credit assistance much like the Emergency Livestock Credit Program of 1974 was in response to special problems of the livestock industry. Long-run farm policy change could be a useful response to (1) the long-term income problems of the middle-sales-class of American farmers, and (2) the growing problem of concentration of farm production in fewer and fewer farming operations. The following changes are possible responses to both the short-term problems of agriculture and the long-term problems. They are only possibilities not recommendations.

First, farm programs could be revised to reduce or eliminate the assistance provided economically-strong farm operations. By providing these units with massive assistance under current programs, the government is less able to assist the below-average-income farm families due to stringent budget considerations. These budget restrictions might well have led to tighter restrictions on payments to financially-strong farm operations rather than to the relaxation of restrictions as written into the 1977 Farm Act. While payments under disaster programs perhaps could be free to match the potential losses from natural disasters, the payments to any one family under income subsidy programs should not exceed those of other Federal Government assistance programs. Most of these programs would not provide the unemployed or welfare recipient with more than a poverty-level income. A similar limitation on Federal payments to farm operators could benefit the medium size farm operation, improve their competitive position in agriculture and slightly moderate the inequity in bargaining power between commercial-plus and commercial sized farms. The losses of such a change to larger farming units are obvious and need not be spelled out in detail.

Second, target prices could be raised substantially to assure the middle-sales-classes of farms more nearly the new maximum limit of payments. These higher levels of target prices or income supplement payments could raise the incomes of mid-sized farms to nearer the national average family income. One possibility might be to raise target prices to $4.00 per bushel of wheat, for example, which would mean payments of about $1.50 per bushel. A five thousand dollar limit per farm on payments would mean coverage on about 3,300 bushels and a ten thousand dollar limit coverage on 6,600 bushels of wheat. This would be small in terms of commercial-plus size wheat farms but in terms of middle size farms, it would mean raising their incomes to about the national average. In terms of Federal costs, $5,000 per farm for 1.5 million farms would be 7.5 billion dollars. Not all farms would qualify for the maximum payments but a majority of farms might. The remainder would have too little output to reach the limit although this might encourage them to expand production. Since official data show intermediate-size farms have the lowest cost per unit of output and since these almost surely are family farms, this might be a useful result, economically and socially.

Third, a limitation could be placed on the amount of credit any one farmer is eligible to receive from the Commodity Credit Corporation. This limitation could be coupled up with a sharp reduction in interest rates paid by farmers for this minimum amount of credit from CCC. In this way, all farmers would be protected against economic disaster on some minimum amount of production at a lower cost than at present. Above the minimum amount, the CCC could still provide credit for stored commodities if this was deemed desirable, but the interest rates would be competitive with private sources and the non-recourse loan feature need not apply. This would make production in excess of the CCC limit more subject to the market place and effectively free-up market prices from support prices, a step that could have useful effects on expanding farm exports during periods of surplus production.

The current price support program holds market prices at the loan level regardless of market supplies. One of the original reason for proposing a deficiency payment scheme for agriculture was to allow market prices to decline and clear the market of product. When that scheme, originally proposed by Secretary of Agriculture Charles Brannon, was implemented into legislation, the support price feature was continued. At times it has led to large export subsidy programs to ensure competitiveness in world markets. Further, it provides a guaranteed market for farm output for individual farm firms that far exceeds in size, any envisioned when the CCC was established during the Great Depression.

Fourth, the cyclical nature of agriculture makes it a prime candidate for tax programs that smooth out taxable income between years. For example, income averaging is useful in a year of rapid increases in farm receipts. However, farmers also suffer years in which there are sharp decreases in incomes, 1976 and 1977 are examples. These reductions can impose a serious income burden on farm families. One policy possibility would be to substitute the current "loss recovery provisions" that is in the Internal Revenue Code for income subsidy payments for farms with certain characteristics, i.e. large incomes, corporate form of organization, etc. This idea stems from the recent tax refund case of Bethlehem Steel Corporation wherein the Corporation received a $134 million refund from the government because of operating losses it suffered in 1977. (For details, see Appendix II of this report.) While the details for applying this concept to farms would need far more analysis, the possibilities seem relevant to agriculture with its cyclical income situation.

Fifth, another possible policy change relates to the programs of the Farmers Home Administration. The question is whether assistance presently given is helping middle-sales-classes of farms or whether most assistance is going to larger farm operations. Currently, the limitation on credit programs from FmHA is $200,000. It seems quite obvious that most farmers in the middle-sales-categories could not utilize this amount of credit. One possibility would be to reduce sharply the interest rates for the first $50,000 of credit provided by FmHA and raise interest rates to commercial levels on larger amounts. This would have the effect of reducing interest costs for smaller farms and of increasing their net incomes.

Finally, another means of raising farm incomes would be for the government to expand the direct farmer-to-consumer marketing program established in 1976. Many smaller farmers might be able to substantially increase their incomes by marketing directly to consumers through publicly "farmers markets." This program has received minimum resources and has not received the administrative push necessary to make it useful and viable. Its potential would seem to far exceed its present capacity in light of rising retail food prices.

### OTHER POLICY POSSIBILITIES

This short list of program modifications is by no means comprehensive or all inclusive. It implies, however, a substantial shift in the role of Federal Government assistance programs for farmers. That assistance has been, to an increasing degree, concentrated among the commercial-plus size farms, particularly since 1970 although the payments distributed in the past year are unlikely to have changed that trend.

The farm situation today, the three-part structure of agriculture with its inclusion of affluence, near-indigence and indifference, exhibits a range of economic conditions that make it difficult to develop effective farm programs—effective in the sense of providing adequate assistance to medium size, low income farms without over assisting large, higher income farms. This difficulty will continue so long as Federal payments are distributed according to the size of farm production rather than the size of farm income.

The question for future farm policy is whether income supplement and disaster payments programs could be combined into a single program which would base assistance on some measure of farm income adequacy. One reason for raising this question is the experience of 1977 when 2,100 of the 3,100 counties in the United States were declared disaster counties (with farmers eligible for special credit programs) at the same time that the nation had record grain harvests. This experience raised considerable question about the current programs that protect farmers against natural disasters. Questions about the income protection programs are several, most have been raised earlier in this report.

These questions lead to the conclusion that a shift to a combination program to cover both economic and natural disasters might be one means of ensuring some minimum level of income for farm families. If a farm family suffered a large loss from some natural or economic disaster, that could be covered. But if a farm family already had net income above some minimum level, it would be ineligible for further payments. Such a change could remove the criticism that large Government payments are going to farmers who already have incomes from the market place that exceeds the national average family income. Undoubtedly, there would be arguments brought forth in opposition to such a change in Federal farm programs, particularly from farming operations that currently earn large incomes from the market and are eligible for large amount of Government payments under either disaster or other payment programs. But these payments are almost certain to receive wide public attention when the distributions expand. This will create pressure for further change.

### SUMMARY AND CONCLUSIONS

American agriculture has increased in diversity of size and incomes in the period since World War II. A small proportion of farms has grown to enormous size of sales and incomes by historical standards and a large proportion of farms have remained small in size and small in incomes by current standards.

The distribution of Federal assistance to agriculture has followed the trends in farm size with a larger and larger proportion of program payments going to a smaller and smaller proportion of farms. One group of farms, each selling in excess of $40,000 of products, make up 17 percent of our farms (462,000), sell 80 percent of all farm output, earn 60 percent of net farm income, and receive 60 percent of all farm program payments (1976). These farms averaged sales of $232,000, net incomes from farming of $29,300, off-farm income of $9,054, and Government payments of $398, for a total income of $39,150 each in 1976.

Another group of farms, selling less than $40,000 but more than $2,500 of products, made up 44 percent of our farms (1.2 million), sold 19 percent of all farm products, earned 28 percent of net farm income, and received 34 percent of the Federal farm pay-

ments in 1976. These farms had averaged sales of $14,630, net income from farming of $4,753, off-farm incomes of $8,055, and Federal farm payments of $200 for a total average family income of $13,008 in 1976.

The third group of farms, really rural farm residences, made up 39 percent of all farms (1.1 million) sold 1.4 percent of all farm products, earned 9.5 percent of all net farm income (including non-money income) and received 4.9 percent of the Federal farm payments in 1976. These farms averaged sales of $1,232, net incomes from farming of $1,921 (including $33 of government payments), and off-farm income of $15,630 for total incomes of $17,551. Their total incomes were on a reasonable par, measured in rural purchasing power, with non-farm families.

This three-part categorization of American farms points up several features of the current farm situation: One, the income situation varies from very high for the largest farm to relatively low for intermediate size farms to reasonable for the smallest farms. Two, Federal farm assistance programs disburse payments to farmers almost in proportion to their total net incomes and hence, almost inversely to their economic need. Three, higher net farm incomes supplemented by Federal farm program payments are allowing commerical-plus size farms to expand in size of resources and output. This expansion is slowly changing the structure of American agriculture and, in the terminology of some agricultural economists creating the possibility of a "Landed Gentry."

The policy alternatives suggested by this structure of agricultural conditions differs substantially from the current mix of programs. The new policy strategy would focus on providing more financial assistance to intermediate size farms—those with sales annually below $40,000. These farms are, on average, efficiently organized based on their relative costs per dollar of output. Revising programs along lines outlined above could encourage their continuation, and could add to the social structure of rural communities and to the incomes goals of the nation.

FOOTNOTES

[1] For evaluations of farm parity by a number of nationally-known economists and agriculturalists, see Parity Prices for American Agriculture, a report prepared for the House Agriculture Committee by the Congressional Research Service, Library of Congress, February 1977.

[2] One reservation should be pointed out about these middle-sales-size farm income data. A statistical "quirk" may explain their stability over time. If a farm in this group increases its sales and income, it may not be reflected in the class overage because the farm may move up into the next higher sales class. This tends to maintain the class income at the same level over time. However, this doesn't determine the absolute size of income which is the characteristic of most interest.

[3] Average figures on assets and liabilities must be viewed with care, much like the average income figures outlined earlier. The diversity of farm sizes today makes these figures nearly meaningless for assessing the balance sheet of any specific farm. For example, total farm assets were $638 billion at the end of 1976 and total gross farm sales were $94 billion, or an investment of $6.80/dollar of output. Obviously, commercial-plus size farms selling an average of $166,768 of products per farm had much larger assets (perhaps over a million dollars on average) than commercial-size farms selling $14,631 of products per farm (which probably had around a hundred thousand dollars of assets on average). It should also be kept in mind that many farm families do not own the land they farm and hence their total assets are much smaller than these average figures suggest. This would apply to all farm sizes.

[4] Agricultural economists have been raising questions about these trends for a number of years. Agricultural economists in the Midwest worked from 1971 through 1975 on a special public policy education project titled "Who Will Control U.S. Agriculture?" The final project report was included as Appendix I to this report.

[5] For a description of the original "treadmill" concept as it applied to farmers on their way out of agriculture, see Willard W. Cochrane, Farm Prices: Myth and Reality, chapter 5. "The Agricultural Treadmill." University of Minnesota Press. 1958.

[6] Professor Philip M. Raup of the University of Minnesota recently outlined the effects of these "institutional arrangements" on U.S. agriculture and added:

"In the past, much of the discussion of farm problems has assumed that the distortions of policy outlined above have been of principal value to non-farm investors, large conglomerate corporations, or extremely wealthy individuals. A phenomenon of the past five years has been the emergence of a segment of farmers whose income levels, scale of business, and income tax obligations make them effective users of price, credit, and tax policies that formerly were of primary benefit to non-farmers."

[7] Professor Raup in his recent paper noted:

"It is ironic that when efforts have been made to shift to accrual accounting, reduce the preferential taxation of capital gains, limit the deductibility of interest on borrowed funds, remove the inequities of accelerated depreciation, repeal the investment tax credit, or put a ceiling on government farm price support payments, family-type farmers have usually opposed any of these reforms. Policies that contribute to the decline of small or family-type farms, in short, have been supported in most cases by family farmers."

[8] Professor Raup stated it this way:

"Any guarantee of farm commodity prices . . . exerts a differential impact on farms in different size classes. To the extent that a risk of price collapse is reduced, investment in the production of that commodity is made more attractive to large-scale producers. This creates a dilemma in farm price support policy. If the price is set high enough to cover the costs of high-cost, small-scale producers it produces windfall gains for large-scale producers, enabling them to buy out their small-scale competitors. Alternatively, it enables them to bid up the price of land to levels that discourage the sons of smaller, family-type farmers from seeking careers in farming."

University of Minnesota Press. 1965; Earl O. Heady. A Primer on Food, Agriculture and Public Policy. Random House New York, 1967. Luther G. Tweeten. Foundations of Farm Policy. University of Nebraska Press. 1970. This list is not inclusive.

[10] The parity ratio which measures real farm prices, i.e., it is the Index of Prices Received by farmers divided (deflated) by the Index of Prices Paid by farmers, declined from a value of 100 in the 1910–14 period to 67 in 1977. Those farmers with improving efficiency could continue to make adequate returns on investment despite declining real prices; those farmers who could not take advantage of scale economies and other efficiencies were forced to leave agriculture. The number of farms fell from 6 million in 1944 to 2.8 million in 1977 on the current definition or on a realistic definition to 1.5 million. For a description of Parity, See Issue Brief Number 77116, "Agriculture: Parity, Parity, Parity." Congressional Research Service, Library of Congress. Issued November 1977.

[11] The income situation of farmers was evaluated by the Department of Agriculture in 1967 at the request of Congress. The study (Parity Returns Position of Farmers, Report to the 90th Congress, 1st Session, by the Department of Agriculture. Document No. 44, August 10, 1967) found:

(1) Farmers on the average earned, in 1966, 81 percent as much as they might have earned by renting out their land and accepting nonfarm employment. They earned 96 percent as much as they might expect by selling their land, investing in common stocks, and working elsewhere. In 1959 and 1964 the ratio of farm earnings to "parity returns" was lower than in 1966.

(2) Farmers with over $20,000 gross income from farming averaged parity or more than parity returns in 1966 under each of the methods used for comparison.

(3) The smaller farmers (those with less than $20,000 gross income from farming) earned less than parity returns under all methods of comparison and in all years tested.

(4) Farmers in the lowest income group (under $5,000 gross sales) earned only one-third to two-fifths of parity returns even in 1966. Parity returns, as developed in this study, are the equivalent returns that labor and capital employed in farming might get if they were employed elsewhere in the economy. Statistical measurements of parity returns were developed for all farms combined, for several types of farms, and for size classes of farms as indicated by value of sales. Computation by size classes is important, because income of a farm generally varies in relation to the amount of capital and labor used in production.

Parity returns for a farmer's equity capital involves: (1) the value of capital including real estate; (2) the rate of return; and (3) capital gains.

[12] Data for 1976 show that intermediate size farms already have the lowest costs of production:

[13] In the past, the traditional farm programs dispensed significant amount of income to farms that already had high net incomes. This fact led to the inclusion of a payment limitation in the 1973 Farm Act of $20,000 per farm but this was raised to $40,000 in the 1977 Farm Act and will later increase to $50,000. Obviously, the middle-size class of farms with $500 average payments are little affected by the limitation.

[14] A second study by the Department of Agriculture's Young Executives Committee reviewed the "Farm Income Question" at the request of the Secretary of Agriculture in 1971. Its interesting report was included as Appendix III to this report.

## PANAMA CANAL GIVEAWAY: FINAL ISSUES SUMMARIZED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 5 minutes.

● Mr. FLOOD. Mr. Speaker, for more than a decade in and out of the Congress, I have made many addresses on Isthmian Canal policy questions. There is very little of fundamental character that is new which could be added to what other Members of the Congress and myself have previously stated. Some of my major addresses were published in one volume under the title of "Isthmian Canal Policy Questions" (H. Doc. No. 474, 89th Congress). Those addresses, together with others subsequently made, and my testimony before House and Senate committees form a reservoir of authentic information.

One of the most recent contributions to the current national canal debate is an article by Phyllis Schlafly on the "Final Issues in the Panama Canal Giveaway" in the April 1978 Phyllis Schlafly Report.

In this article, Mrs. Schlafly, who is an experienced author, TV commentator, lecturer, and authority on national defense problems in their broadest sense, summarizes the crucial facts in the canal subject essential for wisely reasoned conclusions. Because of the relevance and timeliness of the article, I quote it as part of my remarks and urge that it be read by all Members of the Congress and the highest officers in the executive branch of our Government concerned with Isthmian canal policy, including those in the State Department and the Joint Chiefs of Staff.

### FINAL ISSUES IN THE PANAMA CANAL GIVEAWAY

Commentators described the Senate ratification of the Panama Canal Neutrality Treaty on March 16 as a big victory for President Carter, a "breakthrough" that gave the White House reason to celebrate. The photographs of a jubilant President showed that he agrees with this verdict.

President Carter had staked his personal prestige on the Treaty and it carried by only one vote to spare. The vote was certainly a victory for the Treaty. The question is, was it a victory for President Carter?

He succeeded in forcing the Neutrality Treaty on the American people, but he failed to convince them that it was the wise or right thing to do. He succeeded in inducing enough Senators to vote aye, but it was not the merits of the Treaty that persuaded them.

The final ratification votes were obtained by promises to grant or withhold Federal spending for agricultural and copper prices, and by promises to give some Senators an easy ride to re-election by making sure that no formidable candidate files against them this year. Senator Bob Packwood brought out into the open charges that the treaty was "bought" when he revealed the President's promises of Administration decisions for copper stockpiling and farm price increases.

Commentators say that the ratification of the Treaty was a "symbolic triumph" that "significantly strengthened" President Carter's prestige abroad. But the tradeoff may be to diminish his popularity at home. Was it worth it?

Press comment states that the President would have been "crippled" in dealing with Latin America and Moscow if the Treaty had been rejected. But it is probable that the way ratification was achieved has crippled the President in his future dealings with Congress.

White House aides are hoping that the Treaty ratification will produce the "turnaround" in Carter's public image that he has been seeking in order to pull his Administration out of stalled negotiations on his energy package, the Middle East problem, the coal strike, and SALT II. But inducing Senators to vote against their conscience or their constituents, or both, hardly builds good will that will facilitate passage of other Administration goals.

On the morning of the vote on March 16, Senator Wendell Ford aptly pointed out that all the emphasis seemed to be on making the Treaty terms acceptable to dictator Torrijos instead of making the terms acceptable to the American people.

This strange misplaced concern was confirmed that night when the White House revealed its "concern" about Torrijos' reaction to the DeConcini reservation added by the Senate. No concern was expressed by the White House about the American people's reaction at being forced to give away a great national treasure they didn't want to surrender.

This concern to protect Torrijos is further evidenced by the Carter coverup of the heroin-peddling activities of the Torrijos family. The censoring and the shredding of Drug Enforcement Administration documents makes the Watergate coverup look pale by comparison.

A Pyrrhic victory is one which is too costly. It dates back to 279 B.C. when General Pyrrhus won a costly victory over the Romans. President Carter may, like General Pyrrhus, be defeated by his too costly victory on March 16.

### WHO SUPPORTS THE PANAMA TREATIES?

Why is it that some Senators appear to be willing to take the political risk of defying the overwhelming majority of their constituents on the issue of ratification of the Panama Canal Treaties? Some Senators admit that their mail is running 1,000 to 1 against the treaties but still they plan to vote for them.

One answer to that question is the power and prestige of the hidden backers of the treaties, namely, the giant international banks. On December 1, 1977, 95 large international banks ran an advertisement in the Wall Street Journal announcing that they had loaned Panama another $25 million on November 2. This brings the total bank loans outstanding to Panama to $2,777 billion.

The treaties that President Carter signed with dictator Torrijos are the only way these banks can ever be repaid. The Torrijos regime is paying 39 percent of its national income in debt service. Just ask any banker how much he will lend you if you tell him that you are now paying 39 percent of your income in interest on money you have already borrowed.

The banks know those loans are uncollectible unless Torrijos takes control of the U.S. Canal. Those banks have a large financial stake in the ratification of the Panama Treaties—clearly enough to justify contacting their correspondent banks and other business connections who happen to be constituents of undecided Senators.

Intense pressure has been generated by the "selling" campaign carried on by President Carter, the State Department, and the Pentagon. To try to sway the vote of first-term Democrat Senator Edward Zorinsky, President Carter invited 280 Nebraska opinion makers to visit him in the East Room of the White House. The President hoped the guests would be so impressed with the honor of his hospitality that they would rush over to Capitol Hill and ask Senator Zorinsky to vote yes. It is believed that President Carter also threatened to pull the Strategic Air Command (SAC) base out of Omaha unless Zorinksy voted yes. To his credit, the Senator voted no.

The State Department carried on a massive lobbying campaign for ratification that resembled the political headquarters of a presidential candidate, complete with charts and pinboards for every state, and a weekly progress report called PITS (Panama Information Track Score). In one week's activity, the State Department arranged 476 pro-treaty speeches or debates and 288 media interviews to counteract the "bombardiers" (State's lingo for treaty opponents).

Much of the information put out at taxpayer expense by the Carter Administration is not accurate. The Administration originally claimed, for example, that the treaties would not cost the U.S. taxpayers any money because Torrijos' new money will come out of Canal tolls.

Congressman Philip Crane listed some of the specific costs that will have to be born by the taxpayers if the treaties are ratified: $135 million to pay for the early retirement of Panamanians now employed in the Zone, an estimated $1.3 billion for services now provided by the Panama Canal Company which would have to be provided by the Defense Department, the construction of new facilities for our military personnel to replace those turned over to Panama, the expense of training Panamanians to run the Canal, and the loss of $17 million a year in tolls that the Canal Company has been paying to the U.S. Treasury but which will go to Panama under the treaties.

President Carter said in his fireside chat that "the Canal Zone has always been Panamanian territory." To the contrary, in the 1907 case of *Wilson* v. *Shaw*, the U.S. Supreme Court unanimously ruled: "A treaty with it [the Republic of Panama], ceding the canal zone, was duly ratified. . . . Congress has passed several acts based upon the title of the United States. . . . It is hypocritical to contend that the title of the United States is imperfect, and that the territory described does not belong to this nation."

Our Supreme and lower Federal courts have continued to cite with approval *Wilson v. Shaw's* holding that the Panama Canal Zone belongs to the United States.

### PANAMA CANAL NEUTRALITY

The proponents of the Panama Canal Treaties have tried to claim that Panama dictator Torrijos will permit the United States to "maintain the neutrality of the Canal" after Panama takes full control in the year 2000. Why in the world would we want our Canal to be neutral? "Neutrality" is a treaty trap that would imperil our national security.

During World War II, we used the Canal constantly but closed it to German and Japanese ships and submarines. Weren't we fortunate that the Canal wasn't administered under a treaty of neutrality that would have guaranteed equal treatment to both Allied and Axis ships?

During the Missile Crisis of 1962, after our U-2 plane discovered the missiles Khrushchev had deployed in Cuba, our national survival depended on moving our fleet quickly from the Pacific to to Caribbean. Fortunately our Navy had immediate and unimpeded access to our Canal.

If Castro's friend Torrijos had been in control of the Canal, he might have decided to "alleviate world tension" by closing the Canal to both U.S. an U.S.S.R. ships. Such neutrality would have left us at the mercy of Soviet offensive missiles, but would not have hurt the Soviets because their missiles were already in the Caribbean.

During the Vietnam War, 70 percent of our

war supplies went through the Canal. It is not difficult to imagine Torrijos taking the position that it would violate the Canal's neutrality to allow the war to be supplied through the Panama Canal.

Torrijos adamantly refused to allow a treaty provision promising that Panama would keep the Canal open. Panama negotiator Escobar bragged that, although the United States demanded such a provision, Panama refused to agree to it.

The Canal can be neutral and closed just as well as it can be neutral and open. But the facts of world geography dictate that neutrality, either open or closed, would hurt the United States but not our enemies.

Suppose Castro brings his victorious 14,000 troops home from Angola and decides to conquer several islands in the Caribbean. We decide to bring our Pacific fleet through the Canal to set up a blockade to prevent such aggression. Would Torrijos allow our warships to transit the Canal in order to frustrate the plans of his friend Castro?

Torrijos could simply close the Canal for "repairs" for 30 days. By the time we could sail our ships around the tip of South America, we would be confronted with the choice of accepting the fait accompli of additional Castro/Soviet bases in the Caribbean or mounting an invasion with U.S. Marines.

Suppose we have a future confrontation with the Soviet Union or with Red China. Panama could announce that, in such a time of crisis, world peace requires that the Canal be neutral and closed for the duration. A neutral closed Canal would deprive us of our ability to defend our long unguarded Atlantic and Pacific coastal cities, but it would not interfere in the least with strategic war plans of Russia or China.

Those who argue that it would not be in Panama's economic interest to close the Canal and forfeit the tolls do not understand Communist tactics. Communists never permit economic considerations to take priority over ideological objectives. Those who might argue that Torrijos is not a Communist have absolutely no way of guaranteeing that his successor will not be.

The giveaway of our Canal to a Latin American dictator would mean the conversion of a major U.S. military asset into a strategic weapon in the hands of any and all potential enemies. American national security depends on maintaining our right to send our ships through the Canal in time of crisis, while denying transit to our enemies.

DEFENDING THE U.S. CANAL

When President Carter said he would defend the Panama Canal even if it takes 100,000 American troops, he was indulging in an emotional argument designed to scarce us into ratifying the Canal Treaties by conjuring up the threat of rioting, sabotage, or military attack.

President Carter has the shoe on the wrong foot. The 100,000 troops are what might be required if we sign the Canal treaties—not if we reject them. The terms of the treaties require us to give up the two great nonmilitary assets that now peacefully protect the Canal against violence, and would leave us with only American troops to do the job.

On the other hand, without the treaties, we can defend the Canal indefinitely with our existing level of troops there, just as we have done for more than 60 years.

One of our present non-military assets is the Canal Zone of five miles on each side of the Canal that has always enabled us to keep any troublemakers at a safe distance. Under the treaties, we would surrender this Zone immediately to Panama.

The other non-military asset that keeps Panamanian rioters and troops from doing any damage is their knowledge that, if they get too rambunctious, we can simply cut off the flow of U.S. dollars by pulling out and building another canal in Nicaragua. Under the Canal Treaties, however, we promise not even to talk with any third nation about building another Canal.

Nicaragua is a much better place for a canal. The climate is better, it's closer, and it has a deep lake that would cut costs. The original Isthmian Canal Commission recommended that our Canal be built in Nicaragua.

The reason Panama won out over Nicaragua as the location of the great U.S. Canal was because the Panamanians were lucky enough to have as their agent a smart French promoter-diplomat named Bunau-Varilla. He knew that the sweetener that would tip the scales in favor of Panama was the offer to give the U.S. sovereignty "in perpetuity" over the Canal Zone.

Senator Harry Byrd estimates that the overall cost of the Canal Treaties would eventually reach $10 billion. That is the sum of our present capital investment in the Canal and Canal Zone, plus the more than $2 billion we are scheduled to pay Panama to take it.

This figure doesn't even take into account the economic costs from the increase in Canal tolls. Treaty negotiator Sol Linowitz admits that Panama will raise the tolls 30 percent. Most observers expect a 50 percent increase.

More important is the cost to the good name of America in letting the world know that we are willing to surrender to any petty dictator who has a tantrum, makes threats, and hurls demands.

According to Freedom House, Torrijos has the worst record on human rights in all of Latin America. Until the Canal Treaties began to run into opposition in the United States, Torrijos made a practice of throwing his enemies into prison for 15 years without a trial.

Torrijos' brother Moises is under a Federal indictment in connection with heroin-smuggling charges.

The fatal fallacy in the arguments of those promoting ratification of the Panama Treaties is the very idea that we can give away the Canal and the Canal Zone and then, if necessary, use the Marines to enforce our "right" of passage. Those who use that argument have learned nothing from history. If we ever did such a thing, the world would treat us exactly as it treated the British when they sent troops to protect their rights in the Suez Canal.●

## ENDING AGE DISCRIMINATION: TAKING THE SECOND STEP

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 15 minutes.

● Mr. PEPPER. Mr. Speaker, I had the distinct pleasure of attending last Thursday a White House ceremony at which President Carter signed into law my bill to raise the mandatory retirement age for most workers to 70, and to eliminate the current age 70 mandatory retirement age completely for most Federal employees. From my viewpoint as chairman of the Select Committee on Aging, that was a signal achievement, and I believe both Congress and the President are to be commended.

But the struggle is not over with the enactment of the Age Discrimination in Employment Act Amendments of 1978. We must move forward to a time when there is no discrimination based on age. Even in the area of employment, the new law contained exemptions and delays, and provided no protection for anyone over age 70. Outside of the employment field, discrimination against older people exists in the administration of certain Federal programs, in certain consumer matters and other areas.

Therefore I am introducing today a package of bills designed to end age discrimination in America .

The bills would address three different aspects of this thorny problem:

First, elimination of all age-based mandatory retirement;

Second, strengthening of prohibitions already on the books against age discrimination in federally funded programs; and

Third, addition of "age" as a prohibited basis of discrimination in civil rights statues.

I am pleased to be joined in this endeavor by the gentleman from Massachusetts (Mr. DRINAN), who serves both on the Select Committee on Aging and on the Judiciary Subcommitee on Civil and Constitutional Rights, which will consider part of the package. Also joining in the effort are the gentleman from California (Mr. EDWARDS), who chairs that subcommittee, numerous members of the Aging Committee, and many others.

I am especially honored to have as a principal cosponsor the gentleman from California (Mr. HAWKINS), who did such a magnificent job in speeding the passage of the 1978 amendments in his capacity as chairman of the Employment Opportunities Subcommittee of the Education and Labor Committee.

MANDATORY RETIREMENT

Unfortunately, my bill as enacted contains certain exceptions to the general prohibitions in the bill which Senate conferees insisted on. Even now it will still be legal to forcibly retire at age 65 certain executives and top policymakers with private pensions of $27,000 a year. For the next 4 years, it will still be legal to retire tenured professors at age 65. No private employee aged 70 or over has any protection whatever against mandatory retirement.

One bill being introduced today would effectively end the executives and tenured faculty exemptions, and extend protection against mandatory retirement to all persons, not merely those under 70. This would be done by amending title VII (Equal Employment) of the 1964 Civil Rights Act to prohibit age-based discrimination.

A second bill would eliminate a series of statutory exemptions permitting mandatory retirement of distinct groups of Federal employees—Foreign Service, air traffic controllers, law enforcement and firefighters, CIA and, inexplicably, employees of the Panama Canal and Alaska Railroad companies. Skills needed for many of these jobs are objective, and relatively easy to measure objectively. Arbitrary dismissal solely because of age in these cases is not only onerous, it is also unneeded.

These persons, no less than those protected under the new law, deserve protection against mandatory retirement, which severs productive persons from

their livelihood, squanders their talents, scars their health, and drives many into poverty and despair.

AGE DISCRIMINATION IN FEDERAL PROGRAMS

In 1975 Congress passed, as part of the Older Americans Act Amendments of 1975, the Age Discrimination Act, which outlawed "unreasonable" age-based discrimination in most federally financed programs. Federal regulations to implement the law will take effect not later than January 1, 1979. The U.S. Civil Rights Commission was directed to study age discrimination in Federal programs and recommend to the Congress and the President how best to implement the act. The Civil Rights Commission released its report in January.

The study found that "barriers * * * erected * * * between persons falling within particular age groups—especially children and older persons—and services * * * financed * * * by the Federal Government * * * (have) had and (are) continuing to have a serious adverse impact on the lives of children and older persons who need these services. * * *"

One part of the package being introduced today is a bill to make the changes recommended by the Commission.

The Commission examined 10 major Federal programs, including the Comprehensive Employment and Training Act, the vocational rehabilitation program, the Legal Services Corporation, mental health services, and community health centers program. It found age-based discrimination in every program studied.

The Commission recommended in its report that a number of changes be made in the Age Discrimination Act before it takes effect January. The key change is to forbid age-based discrimination except where Congress aims a program to the needs of specific age groups. The act now forbids "unreasonable" age discrimination. Just as Congress would not sanction "reasonable" sex or racial discrimination, we should not permit program administrators to say some discrimination based on age is "reasonable."

Other needed changes include curbs on discriminatory State use of Federal funds and strengthening remedies available to those discriminated against. The Select Committee on Aging has unanimously approved recommendations which include making these changes as part of the Older Americans Act Amendments of 1978.

CIVIL RIGHTS CHANGES

The issue of discriminatory treatment of persons on the basis of age transcends specific violations. "Ageism" is as odious a practice as racism or sexism, and it is time that older people received the same protection against arbitrary treatment as others whose civil rights have been systematically violated.

Therefore, one bill being introduced today will amend the duties of the Civil Rights Commission to allow its oversight of complaints of discrimination based on age. The bill will also add "age" to race, color, sex and national origin as a prohibited basis for discrimination in pubilc accommodations (title II, Civil Rights Act of 1964), public facilities (title III of that act), education (title IV), equal employment title VII—as described above), Justice Department intervention (title IX), the community relations service (title X), fair housing (title VIII of the Civil Rights Act of 1968) and prevention of intimidation (title IX of that act).

Mr. Speaker, one final point: Because of the various delays in effective dates which I have outlined, the formal protection of the ADEA will not extend to many workers for months, or years in some cases, despite the fact that Congress and the President have agreed that they should be protected.

Therefore I will shortly be contacting all major employers in the country—and for Federal employees, the Civil Service Commission—urging that the spirit of the broader protections be complied with immediately.

As for Federal employees, the Civil Service Commission has the authority under current law to grant a continuance for any worker beyond age 70 if, after receiving a request from that person's employing agency, the Commission finds that the continued employment will serve the public interest. Only a handful of such continuances are approved by the Commission each year. I believe that the enactment of my bill changes the definition of the "public interest" as perceived by Congress and the President, and I will urge the Commission to broaden its interpretation accordingly.

As for workers in the private sector, major corporations should also recognize that implementing as soon as possible the higher age limits contained in the new law would serve not only the public interest, but their own as well. Enlightened self-interest would bring these companies to the realization that pension costs might be somewhat reduced, and valuable expertise retained, by permitting able workers to stay on the job beyond age 65.

I will therefore be contacting each of the "Fortune 500" corporations to urge swift voluntary action along these lines.

Mr. Speaker, I believe we are at a critical point in the way our Nation perceives advanced age. Building on the momentum created by the enactment of the 1978 amendments, we can banish the specter of "ageism" from the consciousness of our people. The package of bills being introduced today points the direction we must travel to achieve that goal, and I urge their timely and careful consideration by the committees to which they will be referred. ●

---

## ADDRESS BY WILBUR J. COHEN, SEVENTH SECRETARY OF HEW (1968–69) ON THE 25TH ANNIVERSARY OF THE DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BRADEMAS) is recognized for 5 minutes.

● Mr. BRADEMAS. Mr. Speaker, few Americans have contributed so much over a period of so long a time to the well-being of their fellow citizens as Wilbur J. Cohen.

As you know, Mr. Speaker, Wilbur Cohen served with great distinction as the seventh Secretary of the Department of Health, Education, and Welfare in which responsibility he won widespread respect for his leadership.

More recently, Mr. Speaker, Wilbur Cohen has been named by the Speaker of the House to serve on the National Commission on Social Security which Congress has charged with the responsibility for reviewing the operation of the social security system and making the recommendations for its improvement.

Wilbur Cohen was, of course, one of the persons who played a key role in the creation of the social security system.

It is, Mr. Speaker, therefore, particularly appropriate that Wilbur Cohen should offer his own observations as we today mark the 25th anniversary of the establishment of the Department of Health, Education, and Welfare, and I ask unanimous consent to insert at this point in the RECORD the text of Mr. Cohen's statement on this occasion:

THE 25TH ANNIVERSARY OF THE DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

(By Wilbur J. Cohen, seventh Secretary of Health, Education, and Welfare (1968–69))

Today we celebrate the 25th Anniversary of the establishment of the Department of Health, Education, and Welfare. They have been a momentous twenty-five years since it was established by President Eisenhower and the Congress. Our population has increased by 70 million persons, science and technology has advanced, and our society has become diffused and complex. At the same time, the nation's health, education, and welfare needs have multiplied at a rapid rate. The Department of HEW has made efforts to respond to these needs, guided by the objective that hope is the anchor of life and that it is possible to create fuller and better opportunities for every American.

I am proud and I am privileged to have been one of the twelve persons selected by a President to serve as Secretary of the Department. The position is one of immense challenge and responsibility. The Secretary of Health, Education, and Welfare is the only national official whose full-time job is to guard and strengthen the health, education, and social security of all the American people. The clocks tick fast in the United States: Every day over 9000 babies are born and some 2500 men and women reach age 65. Each month 34 million persons receive a social security check. Each year over 100 million persons work and contribute to the productivity of the nation and to the social security system. Each day our total population increases by 3500 individuals and there are 6000 marriages, 3000 divorces, and 100 infant deaths. Each day some 100 million persons go to school or to on-the-job training, or similar learning experience. Each one and each event is of concern to the Department.

The opportunity to work as Secretary toward improving the quality of life in America was to me an exhilarating experience. Such a critical Cabinet post should not be held by man or woman with little faith in the goodness of humanity or with personal political ambition. It should be held by someone who combines compassion and idealism with managerial skills and the ability to work effectively with the executive and legislative branches of government and with the private and public sectors of the nation.

THE UNIFIED APPROACH OF HEW

I do not believe that the Department is unmanageable or that it is a "can of worms"

as some contend. Some believe there should be three separate departments: education, health, and welfare. On the basis of my thirty years' experience in various positions within the Department and fifteen years as a DHEW watcher, I believe these critics are wrong. If separate departments were to be created, balancing priorities, measuring alternatives, and making detailed decisions about specific programs would fall on the President, already overburdened with responsibilities. Still worse, more of these matters would fall on the Office of Management and Budget, which is not designed or equipped to be an operational unit.

The Department's mission to create more and better opportunities for all Americans demands a unified approach to the health, education, and welfare concerns of individuals, families, and communities. A child's health cannot be considered apart from his education; a family's welfare cannot be considered apart from its health and education. A fragmented Department would fragment the human problems that must be dealt with as a whole. It is not the size of an institution which makes it manageable or unmanageable. It is the quality of leadership. It is the lack of flexibility and of staff with new ideas. It is the lack of common purpose.

THE PURPOSE OF HEW

The Department has had since its establishment twenty-five years ago one overriding purpose: to improve the quality of life in this nation. Although its purpose has remained constant, its programs and services have expanded considerably to meet new needs. As our gross national product (GNP) has risen, so has the proportion of the GNP invested in health, education, and welfare. In 1953, all health expenditures in the United States—public and private—totalled 13.5 percent of the GNP. Today, these expenditures are equivalent to 28 percent—a doubling in twenty-five years. Some have complained and charged that the increase in expenditures is an indication of how far we have come toward the ambiguous concept of the "welfare state," but to me it is a constructive indication of the compassion and foresight of our business and labor leaders, our federal and state legislators, and the general public in their determination to meet human needs. We do not aspire to a welfare state but to a state of welfare for ourselves and for our neighbors. Our expenditures for welfare are a clear expression of the remarkable ability of our free enterprise economy and our political democracy to compete with the totalitarian and autocratic regimes throughout the world and outdo their claimed beneficence without impairing our basic freedoms of speech, religion, and economic choice.

THE PRIVATE SECTOR AND HEW

It should be emphasized that a substantial portion of our health, education, and welfare needs are met through the private sector of the economy—some 30 percent of the total—and that a large portion of those needs handled by the public sector is met by state and local agencies. Our system is effective because it is mixed and pluralistic. The various levels of government, business, labor, and the universities work together in a wide range of productive activities which improve the life of all Americans. But like any system, it can and should be improved. To make it work even more effectively we will need the best brains, the best ideas, and the best managerial skills available. I believe that through the vigorous leadership of President Carter and Secretary Califano we can and will make additional improvements in the health, education, and welfare of the American people in the years ahead.

We all must be willing to dream new dreams, and we all must have the vision and the persistence to transform these dreams into reality. The twenty-two years left in this century offer us a rich opportunity to make further progress toward full achievement of the oldest and fondest dream of this Republic: creating a just and humane society, the best on earth. The Congress helped start us on that path in 1798, when it created the first health unit, still an important link in the Department. I believe Congress will continue its efforts and with vigorous Presidential and Congressional support improve the health, increase the educational options, and sustain the social security and welfare of all of us.

We must not be satisfied with the status quo in health, education, and welfare but must press forward with progress in education, revisions in the financing of social security, adoption of national health insurance, and welfare reform. I urge that we utilize the present to fashion the future and that we commit ourselves to work harder than we have ever worked before to achieve the objectives advocated by President Carter and Secretary Califano.●

## PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CARR) is recognized for 5 minutes.

● Mr. CARR. Mr. Speaker, on Monday, April 10, I failed to respond to a recorded quorum call (rollcall No. 200) because I was in transit from my district to Washington. I had appointments with constituents in Michigan at 7 and at 9:30 in the morning, and was unable to return to Washington in time for this quorum call.●

## LEGISLATION TO CREATE A SOLAR AND CONSERVATION LOAN PROGRAM WITHIN SBA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

● Mr. BEDELL. Mr. Speaker, I would like to bring to my colleagues' attention the proposal which I have introduced to create a solar and conservation loan program within the Small Business Administration.

The need for such a program was well documented in hearings held by Congressman BALDUS' Small Business Subcommittee on Energy. Small solar and energy conservation firms are experiencing difficulty obtaining sufficient capital to expand their operations to meet the increasing public demand for their products. These small businesses need assistance now to be involved with the new energy technologies and to curb monopolistic trends in the solar marketplace. The Small Business Administration has not been meeting this nationwide need through their present loan programs. My bill would address this problem by insuring that small businesses could receive direct or guaranteed loans through the SBA for the design, manufacture, distribution, marketing, installing, or servicing of solar and conservation energy equipment.

The bill has over 100 cosponsors and was approved overwhelmingly by the House Small Business Committee on April 4. In the near future, the full House of Representatives will be asked to consider the proposal.

The full text of the bill is printed below:

H.R. 11713

A bill to create a solar and conservation loan program within the Small Business Administration

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.*

TITLE I—SMALL BUSINESS ACT AMENDMENTS

SEC. 101. (a) Section 7 of the Small Business Act (15 U.S.C. 636) is amended by adding at the end thereof the following new subsection:

"(1) The Administration also is empowered to make loans (either directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred basis) as the Administrator may determine to be necessary or appropriate to assist any small business concern in financing—

"(1) plant construction, conversion, expansion (including acquisition of land for such a plant) or startup, and

"(2) the acquisition of equipment, facilities, machinery, supplies, or materials to enable such concern to design, manufacture, distribute, market, install or service active or passive solar energy equipment, renewable energy sources equipment, or other item on the Energy Conservation Measures List or contained in an approved State Energy Conservation Plan."

(2) No loan shall be made under this subsection if the total amount outstanding and committed (by participation or otherwise) to the borrower from the revolving fund established by this act would exceed $500,000: *Provided,* That no such loan made or effected directly or in cooperation with banks or other lending institutions through agreements to participate on an immediate basis shall exceed $350,000.

(3) No financial assistance shall be extended pursuant to this subsection unless the financial assistance applied for is not otherwise available on reasonable terms from non-Federal sources.

(4) No immediate participation may be purchased unless its shown that a deferred participation is not available; and no loan may be made unless it is shown that a participation is not available.

(5) In agreements to participate in loans on a deferred basis under this subsection, the Administration's participation shall not be in excess of 90 per centum of the balance of the loan at the time of disbursement.

(6) The Administration's share of any loan made under this subsection shall bear interest at the same rate as loans made under subsection (a) of this section. The maximum term of any such loan, including extensions and renewals, may not exceed fifteen years.

(7) All loans made under this subsection shall be of sound value as reasonably to assure repayment, recognizing that greater risk may be associated with loans made to business concerns in this field: *Provided, however,* That factors in determining "sound value" shall include but not be limited to quality of the product or service; technical qualifications of the applicant or his employees; sales projections; and the financial status of the business concern: *Provided, however,* That such status need not be as sound as that required for loans made under subsection (a) of this section.

(8) For purposes of this subsection, the term "active or passive solar energy equipment" shall include, but not be limited to, solar heating and cooling systems, including storage, solar hotwater systems, solar photovoltaic systems, and such other equipment as prescribed by the Administrator. The term "renewable energy sources equip-

ment" shall have such meaning as prescribed by the Administrator.

(9) Funds under this subsection shall be distributed as equitably as possible between nonurban and urban areas.

SEC. 102. Subsection (c) of section 4 of the Small Business Act (15 U.S.C. 633(c)) is amended—

(1) in paragraph (1), subparagraph (B), by inserting "7(1)," 'after "7(1)" and before "8(a),", and

(2) in paragraph (2), subparagraph (B), by inserting "7(1)," after "7(1)" and before "8(a),".

SEC. 103. Subsection (e) of Section 20 of the Small Business Act (15 U.S.C. 649(e)) is amended by adding at the end a new paragraph as follows:

"(11) For the programs authorized by section 7(1) of this Act, the Administration is authorized to make $30,000,000 in direct and immediate participation loans, and $45,000,000 in guaranteed loans.".

(c) Subsection (f) of section 20 of the Small Business Act (15 U.S.C. 649(f)) is amended by deleting the first sentence of the subsection and replacing it with the following: "There are authorized to be appropriated to the Administration for fiscal year 1979 $1,601,750,000 to carry out the programs referred to in subsection (e), paragraphs (1) through (10).".

SEC. 104. Subsection (d) of section 7 of the Small Business Act (15 U.S.C. 636(d) is amended by inserting "(1)" after "(d)" and by adding at the end of such subsection the following paragraph:

"(2) The Administration is hereby authorized to make grants to qualified organizations for the purpose of enabling such organizations to provide training seminars for small business concerns concerning practical and easily implemented methods for design, manufacture, installation and servicing solar energy equipment, and renewable energy sources equipment, or other Energy Conservation Measures."

SEC. 105. Subsection (b) of section 8 of the Small Business Act (15 U.S.C. 637(b)) is amended by striking out "and" at the end of paragraph (14), by striking out the period at the end of paragraph (15) and inserting in lieu thereof "; and", and by adding after paragraph (15) the following:

"(16) to provide technical manuals on the design, manufacture, installation or servicing of solar energy equipment, or renewable energy sources equipment, to any small business concern at not more than 50 per centum of the cost to the Administration.".●

## CUSTOMS COURTS ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

● Mr. RODINO. Mr. Speaker, today I am introducing a bill which provides for significant and much needed reform of the laws governing the U.S. customs court. Government decisions in the area of international commerce can and do have an important impact upon the American citizenry. Today, more and more individuals are seeking review of these decisions in the Federal courts, especially the customs court and the Court of Customs and Patent Appeals. Over the years many complex questions have been raised concerning the jurisdiction of the customs court, its scope of review, and the type of relief the court may award. For the most part, the primary jurisdictional statutes involved with international commercial litigation have remained relatively unchanged despite the fact that those cases have become increasingly complicated. In short, the law governing the customs court has not kept pace with the problems posed by modern-day commerical litigation.

Inconsistent judicial decisions concerning the primary jurisdictional statutes have created a patchwork system. As such, litigants proceed at their own risk when choosing a forum for judicial relief. If an improper forum is chosen, that may well result in a holding that the plaintiff is before the wrong court. With the costs of litigation today, such a holding can effectively preclude any judicial relief for some people.

Furthermore, the type of relief available depends greatly on the plaintiff's ability to persuade a court that it possesses jurisdiction over a particular case. Thus, some individuals will obtain relief which is denied others, who by chance select an improper form in which the institute suit. Clearly, a judicial system which perpetuates such a result is unfair.

The Customs Courts Act of 1978 is designed to eliminate many of the problems faced by litigants in international commercial cases before the various Federal courts. This bill expands the Customs Court's substantive jurisdiction and type of relief it may award. Furthermore, the court will be granted the same powers of relief given other article III courts. As such, the Customs Court will best be able to utilize its expertise in bringing about a national consistency in the judicial decisionmaking process regarding international commerce.

The bill also addresses itself to the status of the chief judge of the Customs Court. Presently, the law provides that the President shall appoint "from time to time" one of the Customs Court judges to serve as chief judge. Today's legislation would alter the present statute to accord the chief judge a similar position to that of the chief judge of other courts of national jurisdiction.

It is my hope that the Congress will take action on this much-needed legislation in the very near future. I will certainly do all that I can to bring this about.●

## INADEQUATE BENEFITS AND SERVICES FOR VETERANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. ROBERTS) is recognized for 5 minutes.

● Mr. ROBERTS. Mr. Speaker, the Committee on the Budget has adopted its chairman's recommendations for targets to be included in the first resolution for veterans benefits and services for the coming fiscal year. The views of the Budget Committee and those expressed by the members of the Committee on Veterans' Affairs in its report to the Budget Committee dated March 15 are miles apart. For instance, budget outlays for fiscal year 1979 proposed by the Committee on Veterans' Affairs would be approximately $21.535 billion. In comparison, the Committee on the Budget is recommending a total of $20.471 billion in outlays for the coming fiscal year. The Committee on the Budget is recommending only a net total of $799 million for new entitlements during the coming year. This is supposed to include cost-of-living increases for compensation, pension, education and training, et cetera. Obviously, the amount recommended will not take care of the inflation factor alone in these areas. The Budget Committee is recommending an increase of only $45 million in outlays for ongoing hospital and medical care programs. This compares with a figure of more than $400 million recommended by the Committee on Veterans' Affairs.

The veterans throughout the country are very concerned about the action that has been taken, and I share their concern. So that my colleagues will be aware of the differences of opinion between the Committee on the Budget and the Committee on Veterans' Affairs, there follows a copy of my letter dated April 4 to the chairman of the Committee on the Budget in reference to these differences:

COMMITTEE ON VETERANS' AFFAIRS,
*Washington, D.C., April 4, 1978.*

Hon. ROBERT N. GIAIMO,
*Chairman, Committee on the Budget, House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: We have been informed that the Committee on the Budget began marking up, the First Budget Resolution today, and I understand a markup of the veterans' portion of the Resolution may begin tomorrow or Thursday.

Having received your recommendations for Veterans' Benefits and Services, I am compelled to respond on behalf of our veterans and eligible dependents who benefit from programs Congress has provided. Your recommended funding levels are substantially below those recommended by our Committee.

You will recall in our report to the Committee on the Budget, we recommended $2.2 billion in outlays above the amount requested by the President. In addition, since the President substantially underestimated his budget in early January, $511 million in additional outlays must be added based on "reestimates".

If your recommendations are accepted by your members, the Committee on Veterans' Affairs will have a net total of only $799 million in new entitlement authority for all initiatives proposed in our March 15th report. This, of course, would be insufficient to even fund the first-year additional cost of H.R. 10173, the pension reform measure already ordered reported by our Committee. I'm sure you are aware of the strong support for this measure which would resolve the problem of pensions being reduced as a result of social security increases, and the need to provide additional benefits for veterans at age 80, mostly our World War I veterans.

In addition to pension reform, we recommended $350 million for a 6.5% cost-of-living increase in compensation and DIC benefits for service-connected disabled veterans and eligible dependents; $100 million for other initiatives for service-connected veterans; $366 million for cost-of-living adjustments and employment initiatives for those participating in the GI Bill programs; more than $53 million for new medical initiatives; $50 million to strengthen the National Cemetery System and increases in burial benefits; and about $8 million for increased housing benefits. None of this can be accomplished unless the New Entitlement Authority target is increased substantially above the amount you have recommended.

In addition, you are recommending only $45 million in outlays over that proposed by the President for VA's on-going medical programs. We had recommended an additional

$405 million for medical care, research, and construction. of VA and State medical facilities. Your recommendation would not address the Administration's proposed plan to close 3,132 hospital beds during the coming year, and its plan to terminate the medical research program in some 53 VA hospitals.

We are receiving hundreds of inquiries from veterans throughout the country expressing concern for the lack of funds for ongoing VA hospital and health care programs. Surely your members have heard from veterans in their districts and the national service organizations.

In summary, if the Committee on the Budget adopts your recommendations, the Committee on Veterans' Affairs would exceed its target for new initiatives with the passage of a single bill—the pension reform measure, H.R. 10173.

We believe we justified the recommendations in our report to your Committee on March 15th, and we feel the funding levels you have recommended are woefully inadequate. This is regrettable as I do not think it reflects the view of a majority of the Members of the House.

Therefore, unless the funding levels are substantially increased, for both new initiatives and on-going programs, especially in the medical area, we have no alternative but to seek to remedy the situation on the Floor during consideration of the First Resolution.

Sincerely,

RAY ROBERTS,
*Chairman.*

## TATTOOING OF CERTAIN SWINE

Mr. BRINKLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BRINKLEY. Mr. Speaker, the Animal and Plant Health Inspection Service of the U.S. Department of Agriculture has imposed new regulations mandating the tattooing of certain swine intended to be sold for interstate slaughter. It appears that these regulations have been imposed without taking the increased danger to employees handling the swine and possible loss of stock into consideration. Mr. Hugh C. Craig, representing the Georgia Stockyard Operators Association, makes a valid case against these regulations in his recent letter to Mr. Francis J. Mulhern, Director of the Animal and Plant Health Inspection Service. Therefore, I would like to submit for the RECORD and commend his correspondence to the attention of my distinguished colleagues. May I also express particular appreciation to my friend, Fox Stephens, for calling this important matter to my attention:

DUBLIN, GA.,
*March 10, 1978.*

MR. FRANCIS J. MULHERN,
*Director, USDA Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Washington, D.C.*

DEAR MR. MULHERN: This correspondence is in reference to Federal Register Volume 42, number 247 and dated December 23, 1977 concerning the sale of sows and boars.

We are unaware that an emergency swine brucellosis situation exists. This would seem the only justification for the drastic procedures indicated by this regulation. The program has been introduced on two other occasions in 1974 and 1975. In both instances the participating parties were notified, hearings were held and the programs were dropped with just cause. In this instance participating parties were not given the opportunity of a hearing and most stockyards were not even notified of the filing of the regulation until February 21, 1978, and then we were notified only by our own state departments of agriculture.

The types of swine involved are highly excitable and are prone to heart failure and heat death with even minimum handling in unfamiliar surroundings. Under normal conditions we presently have death losses in these classes. With weather temperatures varying from a low of 50 degrees to highs of 108 degrees in the South, we can expect heavy losses in the maximum handling in unfamiliar surroundings that will be necessary in order to mark the swine.

Sows and boars are extremely dangerous to handle and employees are highly reluctant to risk their safety in having to closely handle these animals. A local yard worker was bitten while handling these type hogs and subsequently his leg was amputated three times.

The costs to volume stockyards would be excessive. Throughout the process of unloading, separating, tagging and penning of swine all for tatooing, and in addition to the regular process of grading, weighing and selling swine through the auction ring and again re-penning them, the animals would be handled at great lengths. This will cause undue delay in the normal operation of processing all other swine at a substantial loss of time and added labor costs on the yard. There is also the probable loss of life in highly-bred meat type hogs who have an extremely nervous temperament. It would require two to three additional men to process the sows and boars for handling, marking and doing on the spot bookwork. It would also require additional office procedures and bookwork. All this would be expensive for the stockyards to absorb in addition to probable death losses.

We would suggest that should the U.S.D.A. desire a sustained observation of the swine brucellosis situation, the department would consider the alternative method of "on the farm spot-checking." The animals will be more easily handled in their familiar surroundings and will be less nervous.. Checking at the point of origin would also resolve the situation whereby the swine may be traded several times by "hog traders" before reaching a kill plant. This also brings up the fact that tatoo marks will be eliminated when these animals are skinned as ninety percent are in killing plants. In the use of ear tags on lighter weight hogs, these tags will be destroyed by the de-hairing process used in butchering this size hog.

We hold great respect for the progress made by the U.S.D.A. and our state departments of agriculture in the emergency situations with swine cholera and cattle brucellosis. The Georgia Commissioner has been highly complimentary of our state yards' cooperation and support in these programs. We were aware of the urgency of this situation and we voluntarily absorbed the handling costs of these programs.

However, we feel there is a limit. We do not have a state of emergency in swine brucellosis that warrants this action and we are reluctant to enter this dangerous and costly program at this time. As President Carter has implied, committees never seem to dieout, they just keep growing. We can even visualize this program expanding to include marking of all swine in interstate shipment and the prospect is frightening.

As a last resort, should we be forced into compliance with this regulation, we request the following:

That the federal government assume and appropriate sufficient funds to handle swine mark costs and to cover the cost of death indemnity of same to stockyards or dealers. Further, should federal funds become unavailable, the program should be dismissed immediately.

As representative of the Georgia Stockyard Operators Association, Inc., I respectfully submit this letter for your consideration and immediate action of delay of implementation of the abovementioned regulation for hearings, or complete dismissal of the regulation.

Yours very truly,

HUGH C. CRAIG,
*Georgia Stockyards Operators Association, Inc.*

## TESTIMONY BEFORE CONGRESS ON ORME DAM

(Mr. RUDD asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. RUDD. Mr. Speaker, I was privileged last Wednesday to appear with other members of Arizona's congressional delegation, along with the Governor of our State, the Honorable Bruce Babbitt, before the House Subcommittee on Public Works Appropriations, in behalf of continued funding for the Central Arizona Project.

The testimony was led by our friend and colleague, Congressman JOHN RHODES, the distinguished minority leader, who along with myself and Congressman BOB STUMP represents the people of Maricopa County, the most populous area of our State.

A key aspect of our testimony dealt with the vitally important issue of what has been known as Orme Dam, the water storage and flood control facility planned where the Salt and Verde Rivers join together 14 miles east of Phoenix.

All of us representing Maricopa County in the U.S. House of Representatives are united in our strong support for Orme Dam, which was authorized by Congress for Federal funding in 1968.

Following are statements specifically relating to Orme Dam that were made by all those who testified. The first statement came from Governor Babbitt, who was introduced to Chairman TOM BEVILL and other members of the Public Works Appropriations Subcommittee by Congressman JOHN RHODES:

[From Governor Babbitt's prepared statement, submitted for the record but not read, during hearings of the House Subcommittee on Public Works Appropriations, April 5, 1978.]

Hon. BRUCE BABBITT. In appropriating funds for fiscal year 1978, Congress heeded the Administration's recommendation that Orme Dam at the confluence of the Salt and Verde rivers be eliminated from the Central Arizona Project. In the project plan Orme Dam was to provide for regulation of the flow of water in the aqueduct from the Colorado River, flood protection for the Salt River Valley, and conservation of water in the Salt and Verde rivers.

Subsequently, the Bureau of Reclamation established a task force including state agency and public interest group representatives to study alternatives for Orme Dam. That study was suspended last fall by order of the Department of the Interior. That order was recently rescinded, however, and the studies are now continuing so that an environmental statement can be completed.

As Governor of Arizona, I am not prepared to make a judgment in the Orme Dam controversy until the study of alternatives has been completed. The high dam as originally planned has been opposed by resi-

dents of the Fort McDowell Indian Reservation, and by certain environmental groups.

The storm which hit Arizona late in February and early March caused a tremendous amount of public and private property damage and loss of six lives. Water release from Salt and Verde River reservoirs to accommodate the watershed runoff peaked at about 120,000 cubic feet per second. I am advised that the flood control capacity in the proposed Orme Dam reservoir, had it been in place, wold have limited the runoff releases to 50,000 cubic feet per second.

Hon. TOM BEVILL. What is your position on Orme Dam?

Governor BABBITT. I—and I believe most of the state officials—believe what we should do with the Orme Dam is to back up and ask the Bureau of Reclamation to commission a careful reconsideration of all of the alternatives.

We must have some regulatory storage to have effective water utilization.

Secondly, Phoenix must have a flood control plan.

Again, the storm of early March proved that.

The alternatives are extremely complex. The position of the Indian tribes is not clear. My recommendation would be that the bureau back up and take a year or two to look at all of the alternatives.

---

[Prepared statement of Congressman John Rhodes, First Congressional District, Arizona]

Hon. JOHN RHODES. Mr. Chairman, as I have in the past, I come before you today to urge the Committee to continue funding for the Central Arizona Project. The members of this Committee are well aware of the travail that has surrounded this project, culminating with President Carter's review of it last Spring. At that time, the President saw fit to delete from the Central Arizona Project the Orme Dam and Reservoir. The time is at hand for us to review the President's decision and, I feel, reinstate the Orme Dam and Reservoir as part of the CAP.

In the intervening months since President Carter's decision to delete Orme Dam as part of the Central Arizona Project, many alternatives to the structure have been studied. However, no suitable alternative to Orme has been found for the purpose of storage and diversion of Central Arizona Project water. Any alternative to Orme Dam is, at best, a very weak substitute for these two purposes that the dam would serve. Furthermore, recent events have demonstrated the need for the all-important flood control aspects of Orme Dam.

As this Committee knows, Phoenix has recently been ravaged by the worst floods in the city's modern history. Not only is the current flood disaster the worst in 27 years, it is the second major flood in the past six years. And once again, this disaster has raised the question of the best means of flood control to prevent such occurrences in the future.

No discussion of flood control can be complete without talking about Orme Dam. The record regarding Orme Dam is replete with detailed studies of the flood problems along the Salt River. In a letter I received dated July 11, 1975, from Major Gen. J. W. Morris, then Director of Civil Works for the Corps of Engineers, all of the available information regarding flood control and proposed alternatives to the Orme Dam were summarized. After detailed analysis, the Corps' conclusion was emphatic: ". . . Orme Reservoir stands out as the most cost and operational effective project for flow regulation and flood control." The Corps' conclusion is no different from the conclusions reached by the Bureau of Reclamation, Arizona's own water resource experts, and independent engineering firms. In fact, all of the studies conducted to date have reached the same conclusion: Orme Dam and Reservoir is the most operational and cost-effective structure for CAP water regulation and flood control for the Phoenix metropolitan area. Nothing uncovered by the President's task force contradicted this information.

There is another feature about Orme Dam that also deserves mention when we talk of the structure and reservoir in connection with flood control. If Orme Dam is constructed, part of the flood control measures to be taken would be a project known as Rio Salado. This is a plan to convert the Salt River channel from vacant land and sand and gravel mining operations to water oriented recreation surrounded by a combination of residential, commercial and industrial development. It is similar in its design to the recently completed Indian Bend Wash project, which is also a flood control project, which runs through the center of the City of Scottsdale to the northeast of Phoenix. I think it is interesting to note that when Phoenix was being ravaged by the flood waters of the Salt River bed, the City of Scottsdale was experiencing minimum difficulty with flood waters because of the Indian Bend Wash project. Certainly, Phoenix deserves the same type of recreational-flood control project which has so effectively protected its sister city to the northeast. However, once again, the Corps of Engineers after a detailed analysis of the proposed Rio Salado project reached the conclusion that "without the construction of Orme Dam, the conceptual land use plan (of the Rio Salado) would require a substantial modification because of the flood threat."

At this time, I would like to include in the record both letters from the Army Corps of Engineers concerning Orme Dam and the Rio Salado Project, and I want to urge this Committee to place in the appropriations up to the capability of the Bureau of Reclamation for 1979 funds to reinstate the engineering and design work for the Orme Dam as part of the CAP. This latest flood has demonstrated that we cannot turn our backs on approximately two million people who live in the Central Basin of metropolitan Phoenix and abandon a project that is so necessary to prevent the destruction that has occurred to life and property in the Valley of the Sun.

---

DEPARTMENT OF THE ARMY,
OFFICE OF THE CHIEF OF ENGINEERS,
*Washington, D.C., July 11, 1975.*

Hon. JOHN J. RHODES,
*Minority Leader,*
*House of Representatives,*
*Washington, D.C.*

Dear Mr. RHODES: I am pleased to provide you a summary of Corps involvement in the flood control aspects of Orme Reservoir, consideration of alternative solutions, and our attitude towards storage at Orme Reservoir.

Detailed studies of the flood problems along the Salt River were conducted by the Los Angeles District Engineer in 1957. At that time, we found the best solution to the flood problem was flood control storage in Orme Reservoir, if terminal or regulation storage were first provided, as envisioned under the Central Arizona Project. However, in view of the then existing controversy between the States of Arizona and California regarding rights to Colorado River water, the Corps could not make any firm recommendations regarding flood control storage at Orme Reservoir. Consideration was also given at that time to levees along Salt River from Tempe Butte to 27th Avenue, Phoenix, for local flood protection, but such levees were not economically justified.

Orme Reservoir was authorized in 1968 for construction by the Bureau of Reclamation, as a unit of the Central Arizona Project. The dam, about 195 feet high, would be located on the Salt River just below the Verde River confluence. The total capacity of the reservoir would be 1,650,000 acre-feet, comprising 410,000 acre-feet for conservation and dead storage, 950,000 acre-feet for flood control, and 290,000 acre-feet for surcharge storage. The reservoir would be operated to control a standard project flood peak discharge of 290,000 cubic feet per second at the Orme site (250,000 c.f.s. at Tempe) to a peak discharge of 50,000 cubic feet per second. Since 1968, material has been supplied to the Bureau of Reclamation regarding flood control benefits from construction of Orme Reservoir by applying appropriate factors to the 1957 study results. These factors reflected price level changes and generalized information regarding growth in the area.

Recently, the Bureau has requested an update of the flood control evaluation of Orme Reservoir, and that the Corps consider operating the reservoir on a forecast basis, especially for snowmelt floods. We are hopeful that most of these floods could be controlled to a maximum of 7,000 c.f.s. Recognizing that the floods of 1966 and 1973 along the Salt River have modified the topography in the river channel, the Bureau supplied us with up-to-date topography. The enclosed maps depict a preliminary layout of the flooded areas on occurrence of a standard project, a 100-year flood, and a discharge of 50,000 c.f.s. Of particular interest is the significant development inundated by the two larger floods. We roughly estimate that the value of property subject to overflow by a standard project flood is from 500 to 600 million dollars, and from a 100-year flood, from 200 to 300 million dollars. Also shown on the maps is the layout of the levees considered in the 1957 studies.

Flood control storage at Orme Reservoir is now estimated by the Bureau of Reclamation to cost about $70 million. The benefit-cost ratio, on an incremental basis, using an interest rate of 3¼ percent, is estimated at 1.8 to 1. Thus, such storage is amply justified.

Environmental and social concerns have surfaced at the Orme Reservoir site, as follows:

a. Archeological—Many sites have been identified in the area which need to be evaluated for significance. The Bureau of Reclamation will be working with the National Park Service and the Advisory Council on Historical Preservation in developing an appropriate evaluation and mitigation program to reach an agreement on the matter.

b. Rare and endangered species—Three pairs of Southern Bald Eagles are known to utilize the area in and adjacent to the reservoir. Fish and Wildlife Service, under contract with USBR, is conducting studies to evaluate any impacts, which could lead to recommendations for possible mitigation.

c. Loss of natural vegetation—Adverse impacts will be quantified, and possible mitigation measures will be identified.

d. Elimination of informal recreation such as fishing and tubing—This will be offset by a recreational program on the proposed lake or relocated to portions of the river system not presently utilized for such activities.

e. Inundation of 15,000 out of 25,000 acres of the Fort McDowell Indian Reservation. The Bureau is readying a proposal to the Indian community, which they believe would be accepted.

As mentioned earlier, levees were considered along a 10-mile reach of river between Tempe and 27th Avenue, Phoenix during our 1957 studies. Such levees were estimated to cost about $9,000,000 at that time. In view of the extensive development that has taken place in the Phoenix area, we now estimate that about 22 river miles of levee would be required. Such levees are roughly estimated to cost about $60,000,000 under present prices.

I do not consider that construction of

levees would be as desirable as provision of flood control storage space at Orme Reservoir. Flood protection would be limited to the reaches along the levees; no protection would be provided to the agricultural areas along the Salt River upstream and downstream from the levees, and no protection would be provided to areas along the Gila River between the Salt River and Painted Rock Dam. Orme Reservoir would also permit a flexibility of operation during most floods that would allow a modification of the operation of Painted Rock Reservoir to improve upon the flooding and salinity control problems in the Wellton-Mohawk Irrigation and Drainage District and in Mexico. The levees would have to be spaced about 2,000 feet apart and would be about 13 feet high and rights-of-way costs would be substantial. Such a wide channel requirement would also probably preempt the Rio Salado Project. In addition, recent experience with levees spaced so far apart indicates a need for substantial maintenance; small floods meander over the relatively wide channel bottom causing damages to the levee-system. More positive control of large floods can generally be achieved by storage than through local protection works.

Flood plain management would not be a solution to the flood problem. As mentioned earlier, from 200 to 300 million dollars worth of properties are now located in the 100-year flood plain. It would be impracticable to attempt to relocate such large numbers of properties. In addition, the large amount of additional property flooded by a standard project flood would still be subject to damage.

The Bureau of Reclamation is giving consideration to the addition of flood control space at Roosevelt Lake on the Salt River and the reconstruction of Horseshoe Dam on the Verde River to provide flood control storage. They advise us that the cost of such facilities would probably be about $85,000,000, substantially more than the cost of flood control storage at the Orme Reservoir site. Furthermore, there is some question that ample flood control storage can be provided at Roosevelt Lake without modifying Roosevelt Dam, a historic structure. Additionally, storms occurring downstream from the two dams could cause substantially more damages than those resulting from residual flows downstream from Orme Reservoir.

With respect to alternatives for regulation storage, the Bureau is giving consideration to (1) a dam on the Salt River at Granite Reef and (2) a dam on the Salt River upstream from Verde River or (3) a dam on the Agua Fria River downstream from Lake Pleasant. These sties have many environmental and economic disadvantages.

Use of the sites authorized for construction by the Corps of Engineers for flood control—Cave Buttes on Cave Creek, New River on the New River and Adobe on Skunk Creek—would not fulfill the Bureau's need for flow regulation. These sites do not have adequate storage capacity to permit proper regulation of Central Arizona Project waters.

Based on the above-mentioned considerations, Orme Reservoir stands out as the most cost and operational effective project for flow regulation and flood control. We will continue to provide all assistance the Bureau of Reclamation requires in the implementation of their program.

Sincerely,

J. W. MORRIS,
*Major General, USA,*
*Director of Civil Works.*

---

DEPARTMENT OF THE ARMY,
OFFICE OF THE CHIEF ENGINEERS,
*Washington, D.C., August 20, 1976.*

HON. JOHN J. RHODES,
*House of Representatives,*
*Washington, D.C.*

DEAR MR. RHODES: This is in further response to your recent letter to Lieutenant General J. W. Morris, Chief of Engineers, concerning the relationship between Orme reservoir and the Rio Salado project.

I believe that much of the controversy about the impact of Orme Dam on the Rio Salado project derives from a difference of opinion as to what constitutes the Rio Salado project. At the present time, the Rio Salado project is a concept plan. The firm of Daniel, Mann, Johnson and Mendenhall prepared a Phase II planning study on the project in 1974 for the Maricopa Association of Governments and the Valley Forward Association. That report, which is the most recently published work on the project, assumed the construction of Orme Dam to reduce the standard project flood flow from 290,000 to 50,000 cubic feet per second and proposed a floodplain reclamation program to convert the Salt River channel from vacant land and sand- and gravel-mining operations to water-oriented recreation surrounded by a combination of residential, commercial and industrial development. Without the construction of Orme Dam, the conceptual land use plan would require substantial modification because of the flood threat.

There are others in the community who visualize purely recreational program in the Salt River channel. Without more specific details, it is difficult to comment on such a program. In any case, provision would have to be made for flood control.

As I mentioned above, the Rio Salado project is still in conceptual form. No detailed plans or evaluations of viability are available. The economic feasibility of the program would have to be established and a strong commitment from the comunity in terms of desires and funds would be required to implement any program. Without Orme Dam, I believe that it would be difficult to generate an economically viable program.

The Arizona State Legislature has designated Maricopa County as the agency responsible for coordination of intergovernmental planning for future development of the Rio Salado project. Our Los Angeles District has recently accepted a request from the County to participate a planning task force. It is anticipated that the Corps will provide technical assistance in flood control and recreation concepts, designs and evaluations. We will coordinate this work with our cooperative efforts with the Bureau of Reclamation on their Orme Reservoir project.

If I can be further assistance to you, please let me know.

Sincerely yours,

V. L. RATHBURN,
*Colonel, Corps of Engineers, Assistant Director of Civil Works, Pacific.*

---

[Prepared Statement of Congressman Bob Stump, Third Congressional District, Arizona]

Hon. BOB STUMP. Mr. Chairman, as early as 1903, the U.S. Geological Survey issued a report which recognized the value of a dam at the present Orme location.

In ensuing years Arizonans have never lost sight of the importance of such a structure at the confluence of the Verde and Salt Rivers. It has always been contemplated it would be built; thus, was included as an essential feature of the Central Arizona Project legislation when the legislation was first introduced in the Congress in 1947.

The multiple benefits which would accrue from the emplacement of Orme Dam are widely recognized today by the great majority of the citizens of our State. It is the best solution to our flood and water storage problems, for the regulatory operation of the delivery of water to our cities and farmland, for relief from urban recreation pressures, and with a power feature with or without pump storage, it would meet the area's ever enlarging energy needs by an environmentally acceptable hydro-electric generation plant.

The location of Orme Dam at the confluence of the Salt and Verde Rivers would provide still another essential component to the existing dams as a flood control facility Recently, Arizona faced its worst flood disaster since 1941 and the second major flood in the last six years. A new dam at the confluence of the Verde and Salt Rivers would have easily retained the 500,000 acre-feet of spill which occurred this March. The spill was an equivalent to the domestic needs of a million Valley residents for over two years. Orme Dam would, according to the U.S. Corps of Engineers allow for the inclusion of 950,000 acre-feet of flood control storage and would significantly reduce the flood hazard of a 100 year flood which has a damage potential of $252 million.

The flood control feature would allow for the extensive and improved downstream use and land planning. The most prominent of these is the proposed Rio Salado project, an innovative plan for the development of the Salt River flood plain through the heart of the Valley. Without Orme Dam its maximum benefit to the people cannot be realized.

Basic to the Central Arizona Project is a regulatory storage feature which would assure that the water supply is delivered in the most efficient manner. Orme Dam even in periods of normal flow would increase the water storage capacity of the entire water delivery system by about 14 percent. This is an equivalent to about 131,000 acre feet annually over that which would be deliverable without regulatory storage.

The existence of Orme Dam will improve the operating flexibility of the entire system by adding a downstream level of control which would permit greater planning of flow options between upper reservoirs, to the benefit of agricultural, municipal and industrial users.

Arizona is reputed to have more private recreation boats per capita than any other state in the nation. The Bureau of Outdoor Recreation reports that Orme Dam has the potential of generating up to 2.37 million recreation days of activity per year. The surface acres of Orme Dam Reservoir will nearly equal the surface acres of the Salt River Project system. This would provide relief for the already congested nearly lakes which in recent years have been subject to controlled access.

Another beneficial function of Orme Dam is that it could provide additional hydroelectric power generation which conserves oil. The potential would be present for additional power revenues to pay Central Arizona Project costs.

In view of these comments and those of colleagues, I urge this Committee to allocate funds in the 1979 budget to complete the engineer and design work for Orme Dam as part of the Central Arizona Project.

---

[Statement of Congressman Eldon Rudd, Fourth Congressional District, Arizona]

Hon. ELDON RUDD. Mr. Chairman, Members of the Committee, I am here to join my distinguished colleagues to urge the Committee's continued funding of the Central Arizona Project.

Particularly, I am here to convey to you the overwhelming sentiment of our people and the leaders in Maricopa County—the most populous area of our State which we represent—in favor of funding for the Orme Dam, where the Salt and Verde Rivers join together 14 miles east of Phoenix.

Mr. Chairman, funding for construction of this vital water storage and flood control facility has been officially requested by the Maricopa County Board of Supervisors, Speaker Frank Kelley of the Arizona House of Representatives in behalf of state legislators from Maricopa County, and the city councils of Phoenix and Tempe.

Similar endorsements of funding for Orme Dam have come from the Arizona and

Maricopa County Farm Bureaus, Electrical District Number Two in Pinal County, and numerous other organizations and citizen leaders.

I would like to submit letters and resolutions from those whom I have enumerated for the official record, and the Committee's consideration.

As the Committee is aware, Arizona has just been devastated by its worst flood in 27 years. Economic loss as the result of flood damage in Maricopa County alone is estimated to be above $10 million.

In addition, I have been informed by the Arizona Water Commission that more than 550,000 acre-feet of water went over Granite Reef, just below the proposed Orme damsite, during the first few days in March.

This water, value at almost $14 million, was lost to the Colorado River, instead of being trapped and stored for future use by residents of this large metropolitan area.

Moreover, the rivers are still running in Phoenix, and precious water from the Salt and Verde Rivers is still being lost every day in the aftermath of our recent heavy rains and flooding in Arizona.

Mr. Chairman, with the Committee's indulgence, I would briefly like to put into perspective this flooding situation, in relation to the proposed dam and water storage reservoir at the confluence of the Salt and Verde Rivers.

The 550,000 acre-feet of water that went over Granite Reef from March 2nd through 8th is 179.2 billion gallons of water. This is roughly 25 percent of total reservoir capacity, or enough water to fill Apache Lake more than twice.

I have been informed that it is only because Roosevelt Lake, with a storage capacity of 1.3 million acre-feet, had previously been drawn down that floodwater flowing over Granite Reef and into the heavily populated greater Phoenix area was held down to the level that it was.

The 195-foot tall Orme Dam would provide storage capacity of about 1.6 million acre-feet, which with proper regulation that has been typical of the other reservoirs would prevent the flooding that we have now experienced many times in Maricopa County.

Unless that reservoir is built, experts project that between $500 million and $600 million of road and property damage will be incurred in the greater Phoenix area over the next several years or decades.

That is not out of the question considering our most recent flood. At its peak on March 2nd, according to the U.S. Geological Survey, a peak flow of 138,000 cubic feet per second of floodwater rushed through the center of Phoenix.

That means more than a million gallons of water weighing more than 86 million pounds passed a given point every second, destroying almost everything in its path.

This avalanche of floodwater would have been more than 200,000 cubic feet per second if Roosevelt Lake, 60 miles east of Phoenix, did not have more than a million acre-feet of storage room available at the time the floods came.

Storage space open today is less than 170,000 acre-feet.

With the needed additional storage reservoir and dam at the confluence of the Salt and Verde Rivers, future floodwaters can be collected and saved, and the tragic toll in human suffering and economic devastation can be prevented.

Arizona has been hit by heavy floods and flood damage every three or so years for the past 10 years, and so we know that Orme Dam is vitally needed for water storage and flood control.

This year's flooding was the 14th time since 1891 that the greater Phoenix area has suffered major economic loss and suffering by our people, because effective water storage and flood control has been delayed or set aside.

The toll is worse each time, since our population and growth of the area are increasing sharply. The population is now 1.3 million. Based upon current growth, it will be two to three million by the year 2000.

With all costs associated with public works going up at a substantial rate, it is essential that we build Orme Dam now, and I earnestly seek your help in making that possible.

Mr. Chairman, our people have benefitted enormously from savings in terms of flood damage avoided and flood waters controlled and stored as the result of existing reclamation projects in Central Arizona. These reclamation projects stand as a tribute to past actions of this Committee, for which the people of Arizona are most thankful.

I have asked the U.S. Bureau of Reclamation to provide specific details of these savings, as well as facts about savings that could have been realized if Orme Dam was in place.

That information is expected any day, and as soon as it has been provided I would like to submit it to you for your further consideration.

Thank you, Mr. Chairman, for this opportunity to appear and state our case for continued funding for the Central Arizona Project.

---

DEPARTMENT OF THE INTERIOR,
*Washington, D.C., April 4, 1978.*

Hon. ELDON RUDD,
*House of Representatives,*
*Washington, D.C.*

DEAR MR. RUDD: This supplements our March 17, 1978, acknowledgement of your March 9, 1978, letter about the March 1978 flood in Maricopa County, Arizona.

Final peak flow and damage figures for the March 1978 flood are not yet available, but it is estimated that without the reducing effect of the Salt River Project (SRP) reservoirs the estimated peak flow on the Salt River at Phoenix, Arizona, would have been in excess of 200,000 cubic feet per second ($ft^3/s$). The observed peak was approximately 120,000 $ft^3/s$. During the 8 days from February 28 through March 7, inflow to the SRP reservoirs totaled about 1.3 million acre-feet. Of that total, 792,000 acre-feet were stored in the reservoirs and 508,000 acre-feet were released when reservoirs on the Verde River filled to capacity and spilled. If Orme Dam had been built as initially proposed, including flood-control storage, and was operational for the March 1978 flood, it would have stored about one-half of the excess flows from the Verde River; the peak flow in Phoenix would have been approximately 50,000 $ft^3/s$. If a "mini" or "low" Orme Dam had been built, there would have been no flood-control storage and the dam would not have reduced flood damages.

Accurate figures on damages which occurred and were prevented are not yet available. The Corps of Engineers is preparing a report on the flood which will include damage assessments. Unofficial estimates have placed damages in the range of $20 to $25 million. In a January 20, 1976, letter report to our Arizona Projects Office, the Corps made preliminary estimates of potential damages along the Salt River from Granite Reef Dam (upstream from Phoenix) to its confluence with the Gila River (downstream from Phoenix).

The following data were extracted from that letter and represent conditions and prices as of September 1975:

| | (1) | (2) |
|---|---|---|
| Peak discharge in $ft^3/s$: | | |
| 290,000 | 200 | 252 |
| 210,000 | 100 | 112 |
| 150,000 | 50 | 54 |

[1] Flood frequency (years).
[2] Estimated potential present flood damage (in millions of dollars).

Based on the above data, damages would have exceeded $100 million without the reducing effect of the SRP reservoirs, and benefits attributed to the SRP would be about $75 million.

The peak flow of 50,000 $ft^3/s$ which would have occurred if Orme Dam had been built would have caused some damages under existing conditions. The surface transportation system would have been disrupted but would only have been damaged slightly, the south runway at Phoenix Sky Harbor Airport would have remained undamaged and in operation, and the evacuation of residents in low-lying areas would not have been necessary. Estimated damages would not have exceeded several million dollars.

Storage levels in SRP reservoirs before the March 1978 flood were unusually low following the 1976–77 drought. The additional storage space increased the reservoirs' effectiveness in reducing the flood peak. Increased storage from the flood has ensured normal water supplies for SRP water users in 1978. The water that Orme Dam would have retained in storage (approximately 250,000 acre-feet) was now wasted. That water could have been very valuable during future droughts.

If we can be of any further assistance in this matter, please let us know.

Sincerely yours,

CLIFFORD L. BARRETT,
(For R. Keith Higginson, *Commissioner*).

---

Hon. JOHN RHODES. I would like to make a special plea for some funds to be put into the bill which this Committee will vote out for advanced engineering and design, or whatever study is necessary to proceed more rapidly with the eventual structure which must be built, I think, at the confluence of the Salt and the Verde, at the so-called Orme site.

I know there are various plans which have been advanced and which are being studied for alternative methods of flood control. For some years now—not some years, but for at least a year—we have been studying alternative means of dividing or storing and dividing the waters of the Central Arizona Project before they are actually put into the conduit system.

There has been no good alternative which has been proposed to the use of the Orme site for the latter purpose, that of storing and distributing the waters of the Central Arizona Project.

I doubt very much that we will be able to come up with a reasonable alternative for the other function of Orme, that of flood control, no matter how long we study.

It may be possible for the use of alternative means such as raising the height of the Roosevelt Dam, or perhaps the height of the Horseshoe Dam, to provide for some flood control features which would then allow us to have a lower dam at the Orme site.

As far as I can tell, the only flexibility in the situation is, just how high a dam do you put at Orme? It is not whether you have one, but how high it is. How high do you have to make the dam to provide the flood control storage which I think is absolutely necessary to protect the Phoenix area?

Several times since I have been in this

Congress I have been home and seen the Salt River rolling down through the middle of Phoenix, and, John [Hon. John Myers, Ranking Minority Member of Subcommittee], if the Wabash ever got that muddy, it would look like the Salt, there was that much water. It is fantastic.

Hon. JOHN MYERS. The next time you fly over Wabash, John, you take a look at it.

Hon. JOHN RHODES. I do many times, and I think of you.

Actually, you know, it is not only the waste of the water—and it is really criminal to waste that much water in a desert area—but it is also the fact, of course, if we did have a really devastating, what they call a "project flood," the City of Phoenix itself would be badly damaged.

Mr. Pfister, who is the manager of the Salt River Project, told me the other day that there were three specific storms which were coming into our area. The first one is the one that did the damage. It really dumped a lot of water on the area, and also in the surrounding mountains. That one storm filled the reservoirs of the Salt River Project to overflowing.

He said that if the other two had done the damage that they could have done, that we would have really had a terrible tragedy in the area.

As I say, it isn't a matter of whether or not you are going to build something at the Orme site. We are going to build something there. We have to build something there.

And I say this with all due regard and all due respect for the Fort McDowell Indians. They are a very valiant band of good American citizens, and I feel very sure when the alternatives have been explored and the situation is thoroughly explained to them, and understood by them, that they will come to a decision which will be in the interests of all the people of Arizona, and not just themselves.

I hope if I can make my point at all that it would be a mistake to delay any action at the Orme site until all the studies have been completed, because, as I say, there is going to be something there and it is just a matter of what and how much.●

## PRESIDENTIAL COMMISSION RECOMMENDATIONS ON MILITARY RETIREMENT COULD ENDANGER DEFENSE PROGRAM

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. SIKES. Mr. Speaker, the Presidential Commission reviewing the military retirement system has recommended sweeping changes in the name of reform. These changes, if placed in effect, could be dangerous to the Defense program. There already is widespread concern in the Armed Forces about constant efforts to erode the benefits which historically are a part of military service. Retention of personnel, which is essential to avoid costly recruiting and expensive training, obviously will be more difficult if service in the military forces becomes less attractive. There will be increased problems in obtaining adequate numbers under the all-volunteer system. There is little likelihood that present-day thinking in the Congress and in the Administration would support a return to the draft. Therefore, enlistments and retention are doubly important to a strong defense and to America's security.

A key recommendation of the Commission is the end of the 20-year retirement plan in order to achieve "savings." In the words of the Chairman of the Commission, "The system now costs too much money." Compared to what? In reality, there is nothing to compare the military or its retirement system to. Look at the facts.

First of all, let us not ignore the fact that those presently serving have a contract. Cancellation of this contract would appear to be an extremely poor procedure even if it were legal. Congress should look long and carefully at any erosion of the present benefits of military service. It could be much more costly than the savings which the Commission anticipates.

The Commission recommends that for the new enlistees and officer accessions that their retirement system be based on the civil service systems with benefits beginning at age 55 for those with 30 years' or more service, age 60 for those with 20 to 29 years' service, and age 62 for those with 10 to 19 years' service. In essence, the 20-year retirement on half pay would end. Those wishing to leave the service after 20 years could not collect their benefits until age 60. But this only touches on the problem. The real crunch is expected in that the majority of enlisted personnel and many officers have had a full military career after 20 years. Twenty years of service to a Navy chief petty officer, for example, can easily mean an average of 7 or 8 accumulated years away from his family. For an Army sergeant, 20 years of service will include several unaccompanied tours of duty in Korea or Germany or some other outpost for 1 to 2 years' duration per tour. Yet, this type of career is tacitly compared to a civil service position, few of which include sea duty or lengthy unaccompanied tours.

Additionally, there is little mention of the number of working hours in the day of many of our military personnel. In the words of one enlisted man, "I earn good money for a 40-hour week—the only problem is I have to work 60 hours to receive it." Quite likely, the response from the proponents of this restructuring of the military retirement system will say that these people knew what they were getting into, and if they do not like it they can leave. This is exactly the point. Too many will leave.

Our Armed Forces are having a difficult time at present holding onto qualified first and second termers; the end to the 20-year retirement possibility will only increase that probem. And the concern is not just for qualified enlisted personnel. Too many qualified officers, both commissioned and noncommissioned, the cream of our defense forces, particularly those engaged in tactical aircraft capability, nuclear propulsion, and combat arms, already are leaving the service. One recent newspaper article cited the Navy's problems in retaining top aviators at the peak of their careers. Over 9 percent of these pilots are currently resigning between their 3d and 4th year. When asked why they are leaving, many cite the present review of the military retirement system, and a desire to get out of the service while they are young enough to obtain employment with civilian airlines and other private industrial or business programs. Others said they are tired of risking their lives in war and peace, flying highly sophisticated aircraft, working 12 hours a day and every other weekend, while the public derides them and their families.

The military is hardly the fat cat of the Federal Government system. In the past decade their medical care system, particularly for dependents, has been reduced to a system which sometimes is mainly on paper with too little real quality or benefits. We have been hard pressed to provide adequately for the housing we expect our service personnel and their families to live in. Thanks to an interested Congress, there have been many improvements in this area.

However, the condition of some of the junior enlisted bachelor and family housing programs is still deplorable. It is akin to folly to recommend that we now take away the benefits of retirement.

Simply put, the United States has made a commitment; a contract with our service personnel when they sign on to defend this nation. There is no more honorable profession than to bear arms in defense of one's country, and yet each year some seek to remove just a little more from their emollients and put a little more squeeze onto the appropriations for defense programs. As a result, our defense capabilities decline and citizens wonder why. We may not wake up to the realities of this decline until it is too late. But, we can stop this part right now. The military retirement system does not need change, unless it, is to upgrade it.●

## PRESIDENT CARTER URGES ATTACK ON INFLATION

(Mr. BRADEMAS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. BRADEMAS. Mr. Speaker, in an address today, April 11, 1978, to the American Society of Newspaper Editors here in Washington, D.C., President Carter urged a vigorous attack on inflation and declared:

I am determined to devote the power of my office toward the objective of reduced inflation.

Mr. Speaker, I think that the President is absolutely right in singling out inflation as a problem to which we must give central attention.

I think he is right, too, in focusing on restraint by all sectors, public and private, as the most appropriate response to the problem.

But, Mr. Speaker, a policy of restraint will be effective in holding down inflation only if it is broadly based. All sectors of the economy must do their part.

The President has spelled out the task: it is now up to all Americans to help him reach our common objective.

Mr. Speaker, at this point in the RECORD I insert the text of the President's

address to the American Society of Newspaper Editors:

ADDRESS BY PRESIDENT CARTER

During the last 15 months we in the United States have made good progress in sustaining growth and creating jobs. Four-and-a-half million more people are at work today than fifteen months ago. The unemployment rate has fallen from nearly 8 percent to a little more than 6 percent. Average household income, after adjustment for both taxes and inflation, is 5 percent higher now than a year ago. Business profits in the second half of 1977 were 15 percent higher than one year before, and during that time the inflation rate was held to a reasonable and predictable level.

But too many Americans—particularly young people and members of minority groups—are still without jobs. I am determined to sustain our economy's progress toward high employment and rising real income, with both existing programs and with new, carefully targeted incentives to encourage private business to hire the hard-core unemployed.

We have other economic problems which cause us continuing deep concern.

OIL IMPORTS AND INFLATION

Our nation's economic health can be protected only if we can cope with the two developments that now threaten it most seriously—the high level of oil imports and the increasing rate of inflation.

These two problems both imperil our economic recovery and threaten the strength of the dollar, and they must be controlled.

The steps that we will take are part of a wider international effort by the major industrial nations to promote world recovery in 1978. In this effort, each country has a role to play—with the U.S. maintaining its growth while attacking inflation and limiting oil imports, other countries achieving their growth targets, and all countries avoiding protectionism and providing greater aid to developing countries. In the hope that this concerted approach will make a large contribution to world recovery, I joined the leaders of six other nations yesterday in announcing that we will meet on July 16 and 17 in Bonn to press ahead with our common efforts.

But the first requirement is effective action within each nation.

The primary reason for our problems with the balance of trade and the decreasing value of the dollar is no mystery. Ten years ago we were paying roughly $2 billion for imported oil. This year oil imports will cost us more than $45 billion.

Our energy problems are no longer theoretical or potential. They are an active threat to the economic well-being of our people.

Of all the major countries in the world the United States is the only one without a national energy policy, and because the Congress has not acted, other nations have begun to doubt our will. Holders of dollars throughout the world have interpreted our failure to act as a sign of economic weakness, and these views have been directly translated into a decreasing value of our currency.

The falling dollar in international monetary markets makes inflation worse here at home. It raises the price of goods we import, and this makes it easier for domestic producers to raise their own prices as well.

That is why we must have meaningful energy legislation without further delay. Our security depends on it, and our economy demands it. If Congress does not act, then oil imports will have to be limited by administrative action under present law, which is not the most desirable solution. One way or the other, oil imports must be reduced.

Recently our healthy and sustained economic growth has exceeded that of most other nations who are our major trading partners, so we have been better able to buy their goods than they have to buy ours.

Our standard of living and our ability to grow depend on the raw materials and goods we import from other countries. Therefore, to prevent further serious trade imbalances, we need to export more agricultural products and other goods and services to pay for our purchases abroad.

A Cabinet-level task force, chaired by the Secretary of Commerce, will develop additional measures to promote exports, and will report back to me within 60 days.

PROTECTING OUR NATIONAL ECONOMIC GROWTH

Now I will discuss the steps we must take to protect our national economic growth and the jobs and prosperity of our people from the threat of growing inflation.

Conserving energy, increasing efficiency and productivity, eliminating waste, reducing oil imports and expanding our exports will help to fight inflation; but making that fight a success will require firm government policies and full private cooperation.

The inflation we are suffering today began many years ago and was aggravated in 1973 and 1974 by a quadrupling of OPEC oil prices, widespread crop shortages, Soviet grain purchases, substantial devaluation of the dollar, and a worldwide industrial boom that led to double digit inflation in the United States and around the world. It now has become embedded in the very tissue of our economy. It has resisted the most severe recession in a generation. It persists because all of us—business and labor, farmers and consumers—are caught on a treadmill that none can stop alone. Each group tries to raise its income to keep up with present and anticipated rising costs; eventually we all lose the inflation battle together.

There are no easy answers. We will not solve inflation by increasing unemployment. We will not impose wage and price controls. We will work with measures that avoid both extremes.

Our first and most direct efforts are within government itself. Where government contributes to inflation, that contribution must be lessened; where government expenditures are too high, that spending must be reduced; where government imposes an inflationary burden on business, labor, and consumers, those burdens must be lightened; wherever government can set an example of restraint and efficiency, it must do so.

REDUCING FEDERAL BUDGET DEFICIT

The budget I have proposed for the next fiscal year is both tight and capable of meeting the nation's most pressing needs. The prospective deficit in that budget is as large as we can afford without compromising our hopes for balanced economic growth and a declining inflation rate. As always, pressures are developing on all sides to increase spending and enlarge that deficit.

Potential outlay increases in the 1979 budget which are now being considered by Congressional committees would add between $9 billion and $13 billion to spending levels next year. The price of some of these politically attractive programs would escalate rapidly in future years. I am especially concerned about tuition tax credits, highway and urban transit programs, postal service financing, farm legislation, and defense spending.

By every means at my disposal, I will resist those pressures and protect the integrity of the budget.

Indeed, as opportunities arise, we must work to reduce the budget deficit, and to ensure that beyond 1979 the deficit declines steadily and moves us toward a balanced budget. I will work closely with the Congress and, if necessary, will exercise my veto authority to keep the 1979 budget deficit at or below the limits I have proposed.

The Federal government must also act directly to moderate inflation.

THE FEDERAL WAGE-PRICE SPIRAL

Two months ago I proposed that in each industry and sector of the economy wage and price increases this year be voluntarily held significantly below the average increase for the two preceding years—an important principle of deceleration.

I am determined to take the lead in breaking the wage and price spiral by holding Federal pay increases down. Last year, Federal white collar salaries rose by more than seven percent. I intend to propose a limit of about 5.5 percent this year, thereby setting an example for labor and industry to moderate price and wage increases. This year I will also freeze the pay of all Executive appointees and members of my senior staff. I believe that those who are most privileged in our nation—including other executives in government and in private companies—should set a similar example of restraint.

State and local governments employ every seventh worker in our nation and I have sent letters to every Governor and to the Mayors of our larger cities asking that they follow the Federal example and hold down their pay increases. I have also asked that if those governments plan to reduce taxes they first consider lowering sales taxes, which add directly to the consumer's burden.

OTHER STEPS TO REDUCE INFLATION ON THE FEDERAL LEVEL

The Federal government will take several other steps to reduce inflation:

All Executive Branch agencies will avoid or reduce the purchase of goods or services whose prices are rising rapidly, unless by so doing we would seriously jeopardize our national security or create serious unemployment. I am also asking that all new or renegotiated Federal contracts which contain price escalation clauses should reflect the principle of deceleration.

We must cut the inflationary costs which private industry bears as a result of government regulations.

Last month I directed Executive regulatory agencies under my control to minimize the adverse economic consequences of their actions. I am determined to eliminate unnecessary regulations and to ensure that future regulations do not impose unnecessary costs on the American economy. Our efforts to reorganize the Federal bureaucracy and to streamline the Civil Service will help us put the government's house in order.

I support "sunset" legislation to ensure that we review these regulatory programs every few years, and eliminate or change those that have become outdated.

I also urge Congressional budget committees to report regularly to the Congress on the inflationary effect of pending legislation, much as the Council of Economic Advisors and the Council on Wage and Price Stability now report to me.

The combined actions of my Administration and the Civil Aeronautics Board have already led to substantial cuts in some airline passenger fares. Despite the opposition of private interests, the airline regulatory reform legislation must be enacted this year. We are also re-examining excessive Federal regulation of the trucking industry, an effort which may result in increased efficiency while reducing freight transportation costs and retail prices.

In addition, I am asking the independent regulatory agencies to try to reduce inflation when they review rate changes, and to explore regulatory changes that can make the regulated industries more efficient.

Last fall, major new legislation was passed which will improve economic conditions for farm families, and we have announced additional administrative action to raise farm income this year.

Unfortunately, the Senate has just passed a bill that would raise food prices by 3 percent and the overall cost-of-living by .4 percent, shatter confidence in the crucial ex-

port markets for America's farm products, and cripple American farm families through increased costs. It is bad for farmers, bad for consumers, and bad for our nation.

I will veto any farm legislation, beyond what I have already recommended, that would lead to higher food prices or budget expenditures.

Housing construction rates have been at a high level and costs have risen rapidly, partly because of sharp increases in the price of raw materials such as lumber. Since lumber accounts for one-fourth of the total cost of a new house, we can obtain some relief by increasing production and using our existing lumber output more efficiently. Therefore, I have instructed the Departments of Agriculture and Interior, the Council on Environmental Quality, and my economic advisors, to report to me within 30 days on the best ways to sustain expanded timber harvests from Federal, State and private lands, and other means of increasingly lumber yields in ways that would be environmentally acceptable, economically efficient and consistent with sound budget policy.

Daily hospital costs have jumped from $15 in 1950 to over $200 today, and physicians' fees have risen 75 percent faster than other consumer prices. It is very important that Congress act now on the proposed Hospital Cost Containment Bill as the most effective step we can take toward reasonable hospital prices. Failure of Congress to act on the Hospital Cost Containment legislation will cost the taxpayer more than $18 billion in needless government spending over the next five years.

Together with the airline deregulation bill, this is one of the two most important measures the Congress can pass to prevent inflation.

These measures have so far been delayed by the opposition of powerful lobbying groups. I will continue to give this legislation my full support, and I call on the leaders of Congress to do the same.

DECELERATION IN THE PRIVATE SECTOR OF THE ECONOMY

Such government actions as I have discussed today can be important steps toward controlling inflation. But is a myth that the government itself can stop inflation. Success or failure in this overall effort will largely be determined by the actions of the private sector of the economy.

I expect industry and labor to keep price, wage and salary increases significantly below the average rate for the last two years. Those who set medical, legal and other professional fees, college tuition rates, insurance premiums and other service charges must also join in. This will not be easy. But the example of Federal action must be matched. Inflation cannot be solved by placing the burden of fighting it only on a few.

The Council on Wage and Price Stability recently began a series of meetings with representatives of business and of labor in major industries such as steel, automobiles, aluminum, paper, railroads, food processing, communications, lumber and the postal services. In consultation with the private parties the Council will identify the rate at which prices, wages and other costs have been rising in recent years, the outlook for the year ahead and the steps that can be taken to reduce inflation.

Let me be blunt about this point. I am asking American workers to follow the example of Federal workers and accept a lower rate of wage increase. In return, they have a right to expect a comparable restraint in price increases for the goods and services they buy. Our national interest simply cannot withstand unreasonable increases in prices and wages. It is my responsibility to speak out firmly and clearly when the welfare of our people is at stake.

Members of my Administration have already discussed this deceleration program with a number of leaders of labor, business and industry. They have promised their cooperation. Later I expect to meet with business and labor leaders to discuss contributions that they can make to help slow the rate of inflation. One of the most important contributions they can make is to show that restraint applies to everyone—not just the men and women on the assembly line, but also the managers in the executive suites. Just as I will freeze the pay of the top executives in the Federal government, the American people will expect similar restraint from the leaders of American business and labor.

I am determined to devote the power of my office toward the objective of reduced inflation. Our approach must be flexible enough to account for the variations in our complex economy—but it must be comprehensive enough to cover most of the activities of our economy.

In the long run, we should develop special programs to deal with sectors of the economy where government actions have the greatest potential for reducing inflation. These include housing, medical care, food, transportation, energy and the primary metals industries. The members of my Cabinet will work individually and with the Council on Wage and Price Stability to develop and to announce early action to reduce inflation within their own areas of responsibility.

To accomplish our deceleration goals in the private sector, I am asking my Special Trade Representative, Robert Strauss, to take on additional duties as a Special Counselor on Inflation. He will work with me, with Treasury Secretary Blumenthal, my chief financial spokesman, with Charlie Schultze, the chairman of the Council on Wage and Price Stability and its Executive Director, Barry Bosworth. He will have specific authority to speak for me in the public interest, and will be a member of the Steering Committee of the Economic Policy Group under the chairmanship of Secretary Blumenthal.

CONCLUSION

Reducing the inflation rate will not be easy and it will not come overnight. We must admit to ourselves that we will never cope successfully with challenge until we face some unpleasant facts about our problems, about the solutions and about ourselves.

The problems of this generation are, in a way, more difficult than those of a generation before. We face no sharply focused crisis or threat which might make us forget our differences and rally to the defense of the common good.

We all want something to be done about our problems—except when the solutions affect us. We want to conserve energy, but not to change our wasteful habits. We favor sacrifice, as long as others go first. We want to abolish tax loopholes—unless it's our loophole. We denounce special interests, except for our own.

No Act of Congress, no program of our government, no order of my own can bring out the quality that we need: to change from the preoccupation with self that can cripple our national will, to a willingness to acknowledge and to sacrifice for the common good.

As the nation prepared for the challenge of war, Walter Lippmann addressed these words to our nation forty years ago:

"You took the good things for granted," he said. "Now you must earn them again. It is written: for every right that you cherish, you have a duty which you must fulfill. For every hope that you entertain, you have a task you must perform. For every good that you wish could happen . . . you will have to sacrifice your comfort and ease. There is nothing for nothing any longer."

These words of admonition apply to us now.●

## ADDRESS BY HON. CLEMENT J. ZABLOCKI ON 30TH ANNIVERSARY OF PASSAGE OF MARSHALL PLAN LEGISLATION

(Mr. BRADEMAS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. BRADEMAS. Mr. Speaker, I was privileged to have been present on April 4, 1978, at a dinner in Washington, D.C., at which tribute was paid to the public service of General of the Army George Catlett Marshall and at which there was commemorated the 30th anniversary year of the passage of Marshall plan legislation.

The dinner, sponsored by the George C. Marshall Research Foundation, honored members of the Marshall Associates.

Mr. Speaker, if my memory serves me correctly, the first speech I ever made in the House of Representatives was in tribute to General Marshall for I believed then and believe still that George C. Marshall was one of the greatest public servants in the history of our country.

Certainly, Mr. Speaker, the enactment of the legislation that authorized the Marshall plan, with which General Marshall's name is so indelibly associated, was as President Truman, signed the bill into law, said, "a momentous occasion in the world's quest for enduring peace."

Indeed, Mr. Speaker, I recall, too, having been a student at Harvard University when General Marshall proposed this historic measure.

It was, therefore, Mr. Speaker, with particular interest that I listened on April 4, 1978, to the eloquent remarks of the distinguished chairman of the House Committee on International Relations, the Honorable CLEMENT J. ZABLOCKI, and I insert at this point in the RECORD the text of Mr. ZABLOCKI's address:

REMARKS BY HON. CLEMENT J. ZABLOCKI

Mr. Lovett, General Carter, Mrs. Marshall, Mr. Martin, Honorable Henry Cabot Lodge, Honorable Fran Wilcox, Honorable Averell Harriman, Honorable William Foster and other distinguished guests at the head table:

It is indeed an honor to celebrate with you the 30th Anniversary of the passage of the first Marshall Plan legislation. Celebrating my own 30th year of service in the Congress, I have a special affinity for this much more significant milestone in the history of western civilization.

While 1977 marked the third decade since the Marshall Plan was first conceived and proclaimed, 1978 marks the anniversary of its enactment into law.

We have already paid tribute to the "Bold and Creative Promise" inherent in General Marshall's historic address at Harvard on June 5, 1947. The House has also recognized this extraordinary act of statesmanship and vision by passing H.R. 9165, authorizing the Secretary of State to acquire a statute of the General for placement in the Department of State. We hope and trust that the Senate will soon favorably act upon the resolution.

As a legislator and politician who has been around for a few years, I cannot refrain from noting that between the conception and the implementation—there is often a world of difference. (And I believe that after one year in office, President Carter would support me in that judgment!)

Getting the first legislation passed was not an easy task, and there were a few rough moments. . . . It required patience, determination, and a sense of common purpose among bipartisan supporters in both the executive and legislative branches of our government. I am pleased to note that so many of you who participated in that effort are present this evening. (e.g., Ty Wood, Averell Harriman, William Foster, The Lodges, Henry and John.) Let me say to all of you, we will not reveal your present ages, but we will never forget your contributions—at a time when they were truly needed.

In the intervening years, the Marshall Plan has been studied, analyzed, and examined in great detail as a model for other areas of the world. To some, it represents a unique program of foreign assistance—in that it obviously worked! Results were tangible, discernible and dramatic. The recovery of war-ravaged countries with an industrial base, a skilled and educated population, and modern technical know-how is, we have learned, a far more rapid process than is the development of traditional, agriculturally-based economies.

Today, in fact, those early recipient-nations of Marshall Plan assistance, including two of our former enemies, are among our most intense commercial competitors. Under these circumstances, there is a temptation, at times, to conclude that too much recovery can be a dangerous thing. On occasions like this, however, it is well to consider what the original Herter Report of 1947 referred to as the "Alternative in Terms of Human Lives, Human Misery and Human Slavery. . . ." It behooves us to consider what our economic, political and security prospects might have been by the beginning of this decade had there been no George Marshall and no Marshall Plan.

Finally, my friends, as we look to the future, I would like to leave with you a quote from the late, always-quotable, Hubert Humphrey. In testifying before our Committee on International Relations, he summarized some of the challenges now confronting the institutions of the Atlantic Community—institutions which the Marshall Plan brought into being. He said:

"The past three decades have witnessed the tremendous success of NATO. Not only has NATO withstood the threat from without, it has minimized the likelihood of conflict within. However, even the most satisfying achievements cannot dispel the need for reassessment and renewal. We are no longer the world of 1947, or 1957, or 1967. Today, the scope of problems is broader, the challenges greater, and the risks more severe. Economic uncertainty and a sudden awareness of vulnerability to worldwide market forces have weakened the self-confidence of the advanced industrialized societies.

"Institutions conceived 30 years ago must now meet the requirements of a new era. We cannot leave to chance the resiliency and dynamism that will propel these institutions toward renewed purpose and viable goals. Periodically, therefore, we must undertake with serious resolve a reappraisal of our institutions to assure their survival . . ."

Ladies and gentlemen, there is not much more that I can add to this eloquent statement. In memorializing the passage of the first Marshall Plan legislation, we are reminded, not only of the problems of this decade—questions of nuclear balance and arms control—of economic prosperity or global recession—or of the survival of the concept of individual human rights and liberties . . . We are also reminded of the unfinished work which lies ahead during the remainder of this century—if what the Marshall Plan began is to prevail.

To meet these global problems, we need all of the leadership, perseverance, and dedication we can muster—qualities which are so prominently represented among this audience tonight.

The threat to western democratic traditions and values—which was clearly perceived during the early years of the cold war—remains essentially intact—although it is less visible, less dramatic and, to a generation unfamiliar with armed conflict, less immediate. But the challenges confronting Europe and the United States, not only in the military field, are more formidable and complex than at any time since the end of World War II.

For example, the multilateral trade negotiations currently in progress in Geneva are of crucial importance to the United States and the European Community, but the search for a viable compromise promises to be a most difficult task. Ultimately, it will confront Congress with some very painful decisions.

Similarly, the nuclear energy issue—involving the adequacy of safeguards and nuclear waste disposal procedures—has already demonstrated a potential for divisiveness within the Atlantic community. And this is only the beginning . . .

As our leaders, both in the Administration and the Congress, address these matters in the months ahead, they will need the understanding, support and wisdom of individuals such as those who are assembled here this evening—from across the nation. Let me close by promising you that I will do all in my power to ensure that your voices—the voices of experience—are clearly heard.

Thank you very much.●

## A SERVICE OF THANKSGIVING FOR THE LIFE AND WORK OF HUBERT HORATIO HUMPHREY, THE AMERICAN CHURCH IN LONDON

(Mr. BRADEMAS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. BRADEMAS. Mr. Speaker it was not only in our own country that tributes were paid to our late distinguished colleague, the Honorable Hubert H. Humphrey.

On February 2, 1978, a service of thanksgiving for the life and work of this outstanding human being was held at the American Church in London, England.

Participating in the service were Prime Minister James Callaghan and U.S. Ambassadors to the Court of St. James, the Honorable Kingman Brewster, Jr., and to Hungary the Honorable Philip Kaiser.

A moving address was delivered in tribute to Senator Humphrey by Anthony Hyde, chairman of the Democratic Party Committee Abroad, and I ask unanimous consent to insert at this point in the RECORD the program for the service followed by Mr. Hyde's remarks on this occasion.

The material follows:

A SERVICE OF THANKSGIVING FOR THE LIFE AND WORK OF HUBERT HORATIO HUMPHREY

12 NOON, 2ND FEBRUARY 1978, THE AMERICAN CHURCH IN LONDON

Call to worship and opening prayer: The Rev. George A. Pera, D.D., Senior Pastor, The American Church.

The Old Testament lessons: Psalms 121 and 46, read by the Hon. Kingman Brewster, Jr., United States Ambassador to the Court of St James's.

The New Testament lessons: Luke, Chapter 10, verses 25 to 37; Romans, Chapter 8, verses 31 to 39; read by the Rt. Hon. James Callaghan M.P., the Prime Minister.

Reflections: Mr. Anthony Hyde, Chairman, Democratic Party Committee Abroad.

The Prayer: The Hon. Philip Kaiser, United States Ambassador to Hungary.

REFLECTIONS ON HUBERT H. HUMPHREY

(Address delivered by Mr. Anthony Hyde at the Memorial Service, February 2, 1978, in the American Church, London, England)

There is a dream—an old fashioned American Dream—that every American boy can grow up to be President.

Part of that dream—and it is not yet dead in America—is that courage and loyalty; decency and kindness; and the willingness to work and to work hard will be rewarded by success.

Hubert Horatio Humphrey had that dream; and although the ultimate prize three times escaped him, who is to say that his life was not a success?

Success is, after all, not a destination. It is a journey. And Hubert's journey, as the record shows, ran true and straight. Even in moments of failure and frustration—including the ultimate frustration of death—the spirit of this remarkable and remarkably successful man shone through with a strong and steady light.

I never asked him how he got the name of "Horatio." My own opinion is: it was an echo of the turn-of-the-century optimism of America as the "can-do" country. America has a sense of the possible and Humphrey was the embodiment of this. His bounce, his buoyancy, his "can-do" spirit came to him as a priceless personal legacy from his mother and father and before that from his Yankee and immigrant forebears.

Over the years I have had some experience with that "priceless personal legacy"! It dates from the time our close friend, Bill Benton, asked me to help in Humphrey's first Senate re-election campaign in 1954 and includes the time when some of us gave a dinner in his honour, and afterwards went on to Annabels. At three in the morning, I remember his son Skip saying to him: "Dad, we better go home and let these good people get some sleep." Hubert knew how to play hard as well as work hard.

His career is pure Americana. For some it may seem corny. If it does, so be it.

He was born in 1911 in Wallace, South Dakota, in a room over a drug store, the fourth child of Hubert and Christine Humphrey. Much of his early life he spent on a farm and all of his life he had a feeling for the land and for the people who work on the land.

At 10 years of age we see him working in his father's drug store, washing dishes and serving sodas. This is almost the classic American pattern of its day.

What was not so usual, was his father's deep interest in politics and in the issues of the day, which he discussed with his customers. They used to say about him: with every pill, he sold or tried to sell an idea—an idea about the "good society." The young Hubert grew up in this cracker-barrel atmosphere.

In 1926 he went through an early Mid-West Bank closing and lost his life's savings. At 15 he got off lightly: his life's savings were $140!

The next year the Depression struck the Mid-West in earnest and his father had to sell his house to pay his bills.

But his father had that irrepressible spirit and energy which all of us recognize in his famous son. He made a new start.

At high school Hubert's record was outstanding: athlete, star debater, top student and class valedictorian. This was a taste of early success. But Hubert was no stranger to failure—even if it was not his own.

Oh yes, he knew failure: failure of the American Dream to stand up to the harsh

realities of the 20's: failure of the land to produce: failure of businesses: of financial institutions: the failure of Government to act in response to the needs of the American People.

Hubert was very much a child of the Great Depression and of the New Deal.

He knew what it was like to hitchhike because there was no money for fares;

To have to leave university twice: once because, even with his own earnings, there was no money to pay for tuition: a second time, after he had been able to return on a scholarship, because his father was ill and both he and his brother had to leave to run the family business.

He knew about duty and loyalty, too . . . a characteristic for which he was to be criticised in later political life.

All this left its mark on the boy and the young man who was to become one of the most useful, compassionate, effective and successful men in public life, in our time.

It left its mark but it never touched the core of the man: his optimism, his bounce, his warmth, his belief in himself and in other people.

He had a dream of going to Washington, of doing things . . . big things; and of being "someone" in the world, as he would put it. It bubbled to the surface in a letter he wrote from Washington to Muried Buck, the girl he was to marry. He wrote:

"I can see how someday, if you and I just apply ourselves and make up our minds to work for bigger things, how we can someday live here in Washington and probably be here in Government politics or service. I intend to set my aim for Congress. Together we can do things, I am sure. Never let me get lazy or discouraged. You be my inspirational force, Muriel."

Lazy or discouraged, he never was.

They say that behind every great man, there stands a woman. Hubert was luckier than that. His Muriel walked beside him . . . grew with him . . . shared his triumphs and endured his defeats. She is the kind of a wife that if a man reached out in the dark, her hand would be there.

I have "sketched-in" Hubert Humphrey as a boy and as a young man because it helps to explain the mature man.

He was a man of international stature and outlook, yet he was intensely American. He stood for the old fashioned virtues which have helped to make America great.

For the can-do spirit.

For hard work.

For loyalty.

For courage.

For determination.

For compassion for the weak and needy.

For the equality—yes, and for the brotherhood of man.

He loved his family. He cared, He cared passionately . . . but not just for his family and friends . . . for America . . . for mankind.

He knew how to accept defeat and yet remain undefeated.

He had the ability to live and to fight without rancour. He was forgiving. There was no malice in the man. No envy; no bitterness; no self-pity. What a man!

Of the thousands of letters he received during his stays in hospital, one that he particularly treasured was from Sugar Ray Robinson, which ended with the line: "Keep on punching, old buddy." Hubert kept on punching; not just for himself but for all of us. My friend Archie MacLeish has called this "a special kind of gallantry."

There will always be a warm place in the hearts of those who knew him either in person, as I did, or by his services to the Nation. And when those hearts no longer beat, he will move softly into the pages of history. Though he could not quite make the American Dream come true for himself, he did for millions of others. His eloquence and energy made the dream become the law: for Equal Opportunity: for Equal Rights: for Human Rights. And this was true for much of the major legislation in America for the past quarter century.

He will be known as the man who loved his fellow man . . . who gave all he had to give: to America . . . and to the World. Gave it with joy and without restraint. Oh, yes. The bounce and the joy will be remembered. The Happy Warrior has left the scene. The World is not a poorer place. It is a richer place because he passed here and the American Dream still lives.●

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. LIVINGSTON) to revise and extend their remarks and include extraneous material:)

Mr. MARKS, for 30 minutes, today.

Mr. DICKINSON, for 60 minutes, on April 13.

(The following Members (at the request of Mr. WEISS) to revise and extend their remarks and include extraneous material:)

Mr. WEISS, for 60 minutes, today.
Mr. REUSS, for 30 minutes, today.
Mr. FLOOD, for 5 minutes, today.
Mr. PEPPER, for 15 minutes, today.
Mr. BRADEMAS, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. CARR, for 5 minutes, today.
Mr. BEDELL, for 5 minutes, today.
Ms. HOLTZMAN, for 5 minutes, today.
Mr. RODINO, for 5 minutes, today.
Mr. ROBERTS, for 5 minutes, today.
Mr. BINGHAM, for 30 minutes, today.
Mr. CONYERS, for 10 minutes, today.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. RUDD, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,478.25.

Mr. REUSS, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $2,053.

Mr. PHILLIP BURTON, and to include extraneous matter, immediately following his statement with reference to the gentleman from Massachusetts (Mr. TSONGAS).

Mrs. HECKLER, to revise and extend her remarks immediately prior to passage of H.R. 11662 today.

(The following Members (at the request of Mr. LIVINGSTON) and to include extraneous matter:)

Mr. FINDLEY.
Mr. ARMSTRONG in two instances.
Mr. CORCORAN of Illinois.
Mr. GILMAN.
Mr. MICHEL.
Mr. FORSYTHE.
Mr. HANSEN in three instances.
Mr. ASHBROOK in three instances.
Mr. MOORE.
Mr. SCHULZE.
Mr. STEERS.
Mr. DORNAN in two instances.
Mr. SYMMS.

(The following Members (at the request of Mr. WEISS) and to include extraneous matter:)

Mr. BRADEMAS in six instances.
Mr. GAYDOS in five instances.
Mr. MAZZOLI.
Mr. BONKER in two instances.
Mr. SIMON in five instances.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. EILBERG.
Mr. ROONEY.
Mr. HANLEY.
Mr. WAXMAN.
Mr. FRASER.
Mr. PANETTA.
Mr. HANNAFORD.
Mr. STUDDS.
Mr. MINETA.
Mr. FITHIAN.
Mr. NOLAN.
Mr. STARK.
Mr. HARRIS.
Mr. MOFFETT.
Mr. BLOUIN.
Mr. DODD.
Mr. VENTO in two instances.
Mr. DOWNEY.
Mr. BIAGGI.
Mr. MCDONALD.
Mr. DELLUMS in two instances.
Mr. ZEFERETTI.

## ADJOURNMENT

Mr. WEISS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 52 minutes p.m.), the House adjourned until tomorrow, Wednesday, April 12, 1978, at 3 o'clock p.m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3830. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Air National Guard, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

3831. A letter from the Chairman, President's Commission on Military Compensation transmitting a preliminary copy of the Commission's final report; to the Committee on Armed Services.

3832. A letter from the Secretary of Health, Education, and Welfare, transmitting the annual report on activities under the Rehabilitation Act of 1973, covering fiscal year 1977, pursuant to section 404 of the act; to the Committee on Education and Labor.

3833. A letter from the Chairman, National Commission for Manpower Policy, transmitting three recent reports of the Commission entitled "The Need to Disaggregate the Full Employment Goal," "The Effects of Increases in Imports on Domestic Employment," and "The Transformation of the Urban Economic Base"; to the Committee on Education and Labor.

3834. A letter from the Governor, Farm Credit Administration, transmitting a report on the agency's activities under the Govern-

ment in the Sunshine Act during the 12 months beginning February 1977, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

3835. A letter from the Comptroller General of the United States, transmitting a report on the Federal Bureau of Investigation's efforts to comply with the Freedom of Information and Privacy Acts (GGD-78-51, April 10, 1978); to the Committee on Government Operations.

3836. A letter from the Under Secretary of the Interior, transmitting a draft of proposed legislation to modify the authority of the Government Comptrollers for Guam and the Virgin Islands, and for other purposes; to the Committee on Interior and Insular Affairs.

3837. A letter from the Secretary of State, transmitting notice of the proposed use of Middle East Special Requirements Funds for completion of the Egyptian early warning system in the Sinai, pursuant to section 903(b) of the Foreign Assistance Act of 1961, as amended (88 Stat. 1813); to the Committee on International Relations.

3838. A letter from the Director, U.S. Arms Control and Disarmament Agency, transmitting a copy of a book entitled "Military Expenditure Limitation for Arms Control: Problems and Prospects With a Documentary History of Recent Proposals" by Abraham S. Becker; to the Committee on International Relations.

3839. A letter from the Chief, Division of Bankruptcy, Administrative Office of the U.S. Courts, transmitting the tables of bankruptcy statistics for fiscal year 1976, pursuant to section 53 of the Bankruptcy Act (60 Stat. 329); to the Committee on the Judiciary.

3840. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the Fishery Conservation and Management Act of 1976 to include the Northern Mariana Islands; to the Committee on Merchant Marine and Fisheries.

3841. A letter from the Secretary of the Army transmitting a Corps of Engineers report on the Hudson River, N.Y., in response to resolutions of the Senate and House Committees on Public Works adopted March 27, 1967, and October 19, 1967, respectively; to the Committee on Public Works and Transportation.

3842. A letter from the Comptroller General of the United States, transmitting a report on the Department of Labor's administration of its Apprenticeship Outreach and National On-the-Job Training programs (HRD-78-4, Apr. 10, 1978); jointly, to the Committees on Government Operations, and Education and Labor.

3843. A letter from the Comptroller General of the United States, transmitting a report on the Defense Department's continued failure to charge for using Government-owned plant and equipment for foreign military sales (FGMSD-77-20, Apr. 11, 1978); jointly, to the Committees on Government Operations, and International Relations.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. YOUNG of Texas: Committee on Rules. House Resolution 1121. Resolution waiving points of order against the conference report on H.R. 6782. A bill to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion, and all points of order against said conference report are hereby waived. (Rept. No. 95-1047). Referred to the House Calendar.

Mr. ZABLOCKI: Committee on International Relations. H R. 11832. A bill to authorize appropriations for fiscal year 1979 under the Arms Control and Disarmament Act. (Rep. No. 95-1048). Referred to the Committee of the Whole House on the State of the Union.

Mr. HARRINGTON: Committee on International Relations. H.R. 11877. A bill to authorize supplemental appropriations for fiscal year 1978, and to authorize appropriations for fiscal year 1979, for the Peace Corps, and to make certain changes in the Peace Corps Act. (Rep. No. 95-1049). Referred to the Committee of the Whole House on the State of the Union.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CORMAN:

H.R. 11986. A bill to amend the Internal Revenue Code of 1954 to make certain changes in the taxes on transportation by air and to provide credits or refunds of a certain portion of such taxes for expenditures to retrofit and replace noisy aircraft; to the Committee on Ways and Means.

By Mr. RANGEL:

H.R. 11987. A bill relating to the application of certain provisions of the Internal Revenue Code of 1954 to specified transactions by certain public employee retirement systems created by the State of New York or any of its political subdivisions; to the Committee on Ways and Means.

By Mr. BIAGGI (for himself and Mr. PEPPER):

H.R. 11988. A bill to amend the Age Discrimination in Employment Act of 1967 to provide that employers shall be subject to the provisions of the act without regard to the number of individuals they employ; to the Committee on Education and Labor.

By Mr. DUNCAN of Tennessee:

H.R. 11989. A bill to amend title 5 of the United States Code to provide that disability retirement annuities shall not be terminated for certain permanently disabled annuitants, to provide that certain annuitants whose disability retirement annuities have been terminated shall be given priority in placement in the civil service, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 11990. A bill to grant certain employees of the Tennessee Valley authority, who have been separated from service for reasons not related to performance or conduct, priority in placement in certain positions in such Authority; to the Committee on Public Works and Transportation.

H.R. 11991. A bill to amend the Internal Revenue Code of 1954 to allow the charitable deduction to taxpayers whether or not they itemize their personal deductions; to the Committee on Ways and Means.

H.R. 11992. A bill to amend the Internal Revenue Code of 1954 to provide tax-saving incentives for savings accounts established for the purpose of purchasing a home; to the Committee on Ways and Means.

By Mr. GORE (for himself, Mr. APPLEGATE, Mr. AUCOIN, Mr. BAFALIS, Mr. BALDUS, Mr. BEARD of Tennessee, Mr. BEVILL, Mr. BLOUIN, Mr. JOHN L. BURTON, Mr. CHAPPELL, Mr. CORNELL, Mr. CORRADA, Mr. FLOOD, Mr. FUQUA, Mr. GIBBONS, Mr. HANLEY, Mr. JEFFORDS, Mrs. LLOYD of Tennessee, Mr. MCHUGH, Mr. NOLAN, Mr. QUILLEN, and Mr. ROE):

H.R. 11993. A bill to direct the Secretary of Agriculture to establish a program for the purpose of indemnifying owners of dairy cattle which, under any Federal law, are destroyed in order to control or eradicate brucellosis, and for other purposes; to the Committee on Agriculture.

By Mr. GUYER:

H.R. 11994. A bill to amend the Internal Revenue Code of 1954 to provide that a taxpayer conscientiously opposed to participation in war may elect to have his income, estate, or gift tax payments spent for nonmilitary purposes; to create a trust fund (the World Peace Tax Fund) to receive these tax payments; to establish a World Peace Tax Fund Board of Trustees; and for other purposes; to the Committee on Ways and Means.

By Mr. JEFFORDS (for himself, Mr. PEPPER, Mr. PURSELL, Mr. AKAKA, Mr. AMMERMAN, Mr. DRINAN, Mr. EILBERG, Mr. FAUNTROY, and Mr. MURPHY of Pennsylvania):

## PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

440. The SPEAKER presented a petition of the city council, San Diego, Calif., relative to deferred compensation; which was referred to the Committee on Ways and Means.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1

By Mr. LEACH:

Page 24, after line 17, insert the following new section:

"§ 7367. Special Reports to Congress

"(a) Concurrently with the transmittal of any nomination of any Presidential nominee subject to this subchapter under section 7362(a)(7) of this title, the Director shall transmit a report containing the information required under subsection (b) of this section to the Committee on Post Office and Civil Service of the House of Representatives, the Committee on Governmental Affairs of the Senate, and such other committees of the Congress as may have appropriate jurisdiction.

"(b) The following shall be included in any report required to be submitted by subsection (a) of this section:

"(1) A copy of the report required by such nominee under section 7363 of this title, together with a certification by the Director as to whether or not, in the opinion of the Director, the nominee is in compliance with applicable laws and regulations.

"(2) Certification by the Director, by the reporting individual, and by the head of any agency with respect to which, during the 5-year period preceding the transmittal of the nomination involved, the reporting individual (or any member of the reporting individual's immediate family or any entity with which the reporting individual is affiliated)—

"(A) had, or sought to obtain, contractual or other business or financial relations with such agency, or

"(B) conducted operations or activities which are regulated by such agency,

as to whether or not, to their knowledge, the reporting individual, any member of the reporting individual's immediate family, or any other financial entity with which the reporting individual is affiliated was a party to any criminal, civil, or administrative proceeding which would relate to the matters for which the nominee would be responsible in the position to which nominated (as determined by the Director by regulation).

"(3) If the existence of any criminal, civil, or administrative proceeding is certified under paragraph (1), a description of the nature of such proceeding and its outcome and the factors on which such outcome was based.

"(c) Notwithstanding any other provision of this chapter to the contrary, the report required to be filed under section 7364(a)(3) of this title within 5 days of the transmittal of a Presidential nomination shall cover the 5-year period preceding the transmittal of such nomination.

"(d) For purposes of this section:

"(1) 'civil, criminal, or administrative proceeding' means—

"(A) any civil or criminal proceeding to which the United States or any State is a party;

"(B) any administrative proceeding by the United States or any State denying any benefit on the basis of any act or omission by the person who is the subject of such proceeding or which restricts, by consent, the activities of the person who is the subject of such action; and

"(C) any investigation of a type which normally precedes any action described in subparagraph (A) or (B) of this paragraph;

"(2) an individual shall be considered to be affiliated with any entity if such individual, or any member of such individual's immediate family, has a substantial interest in such entity or held any position in such entity which is required to be reported under section 7363(b)(6) of this title; and

"(3) 'substantial interest' and 'member of immediate family' have the meanings given such terms under section 7363 of this title.".

Page 24, line 18, strike out "7367" and insert "7368" in lieu thereof.

Page 25, line 24, strike out "7368" and insert "7369" in lieu thereof.

Page 26, in the matter below line 19, strike out the items relating to sections 7367 and 7368 and insert in lieu thereof the following:

"7367. Special reports to Congress.
"7368. Liability under other authority.
"7369. Failure to file or falsifying reports."

Page 43, after line 15, insert the following new section:

§ 1596. Special Reports to Congress

"(a) Concurrently with the transmissal of any nomination of any Presidential nominee subject to this subchapter under section 1592(2) of this title, the Secretary concerned shall transmit a report containing the information required under subsection (b) of this section to the Committees on Armed Services of the House of Representatives and of the Senate, and such other committees of the Congress as may have appropriate jurisdiction.

"(b) The following shall be included in any report required to be submitted by subsection (a) of this section:

"(1) A copy of the report required by such nominee under section 1592 of this title, together with a certification by the Secretary concerned as to whether or not, in the opinion of the Secretary concerned, the nominee is in compliance with applicable laws and regulations.

"(2) Certification by the Secretary concerned, by the reporting individual, and by the head of any agency with respect to which, during the 5-year period preceding the transmittal of the nominations involved, the reporting individual (or any member of

the reporting individual's immediate family or any entity with which the reporting individual is affiliated)—

(A) had, or sought to obtain, contractual or other business or financial relations with such agency, or

"(B) conducted operations or activities which are regulated by such agency,

as to whether or not, to their knowledge, the reporting individual, any member of the reporting individual's immediate family, or any other financial entity with which the reporting individual is affiliated was a party to any criminal, civil, or administrative proceedings which would relate to the matters for which the nominee would be responsible in the position to which nominated (as determined by the Secretary concerned by regulation).

"(3) If the existence of any criminal, civil, or administrative proceeding is certified under paragraph (1), a description of the nature of such proceeding and its outcome and the factors on which such outcome was based.

"(c) Notwithstanding any other provision of this chapter to the contrary, the report required to be filed under section 1594(a)(2) of this title within 5 days of the transmittal of a Presidential nomination shall cover the 5-year period preceding the transmittal of such nomination.

"(d) In this section:

"(1) 'Civil, criminal, or administrative proceeding' means—

"(A) any civil or criminal proceeding to which the United States or any State is a party;

"(B) any administrative proceeding by the United States or any State denying any benefit on the basis of any act or omission by the person who is the subject of such proceeding or which restricts, by consent, the activities of the person who is the subject of such action; and

"(C) any investigation of a type which normally precedes any action described in subparagraph (A) or (B) of this paragraph.

"(2) an individual shall be considered to be affiliated with any entity if such individual, or any member of such individual's immediate family, has a substantial interest in such entity or held any position in such entity which is required to be reported under section 1593(b)(6) of this title.

"(3) 'Substantial interest' and 'member of immediate family' have the meanings given such terms under section 1593 of this title."

Page 43, line 16, strike out "1596" and insert "1597" in lieu thereof.

Page 44, line 21, strike out "1597" and insert "1598" in lieu thereof.

Page 45, line 11, strike out "1598" and insert "1599" in lieu thereof.

Page 47, line 15, strike out "1599" and insert "1600" in lieu thereof.

Page 27 in the matter below line 5, strike out the items relating to sections 1596 through 1599 and insert in lieu thereof the following:

"1596. Special reports to Congress.
"1597. Liability under other authority.
"1598. Failure to file or falsifying reports.
"1599. Regulations relating to reporting of financial interests and to conflicts of interest.

Page 58, after line 13, insert the following new section:

SPECIAL REPORTS TO CONGRESS

304. (a) Concurrently with the transmittal of any nomination of any Presidential nominee subject to this title under section 301(c), the Committee shall transmit a report containing the information required under subsection (b) of this section to the Committees on the Judiciary of the House of Representatives and of the Senate, and such other committees of the Congress as may have appropriate jurisdiction.

(b) The following shall be included in any report required to be submitted by subsection (a) of this section:

(1) A copy of the report required by such nominee under section 302, together with a certification by the Committee as to whether or not, in the opinion of the Committee, the nominee is in compliance with applicable laws and regulations.

(2) Certification by the Committee, by the reporting individual, and by the head of any agency with respect to which, during the 5-year period preceding the transmittal of the nomination involved, the reporting individual (or any relative of the reporting individual or any entity with which the reporting individual is affiliated)—

(A) had, or sought to obtain, contractual or other business or financial relations with such agency, or

(B) conducted operations or activities which are regulated by such agency,

as to whether or not, to their knowledge, the reporting individual, any relative of the reporting individual, or any other financial entity with which the reporting individual is affiliated was a party to any criminal, civil, or administrative proceeding which would relate to the matters for which the nominee would be responsible in the position to which nominated (as determined by the Committee by regulation).

(3) If the existence of any criminal, civil, or administrative proceeding is certified under paragraph (1), a description of the nature of such proceeding and its outcome and the factors on which such outcome was based.

(c) Notwithstanding any other provision of this chapter to the contrary, the report required to be filed under section 301(a)(2) upon the transmittal of a Presidential nomination shall cover the 5-year period preceding the transmittal of such nomination.

(d) For purposes of this section:

(1) "civil, criminal, or administrative proceeding" means—

(A) any civil or criminal proceeding to which the United States or any State is a party;

(B) any administrative proceeding by the United States or any State denying any benefit on the basis of any act or omission by the person who is the subject of such proceeding or which restricts, by consent, the activities of the person who is the subject of such action; and

(C) any investigation of a type which normally precedes any action described in subparagraph (A) or (B) of this paragraph; and

(2) an individual shall be considered to be affiliated with any entity if such individual, or any relative of such individual, has a substantial interest in such entity or held any position in such entity which is required to be reported under this title,

Page 58, line 15, strike out "304" and insert "305" in lieu thereof.

Page 58 line 17, strike out "302" and insert "302 or 304" in lieu thereof.

Page 58, line 22, strike out "301" and insert "301 or 304" in lieu thereof.

Page 58, line 23, strike out "302" and insert "302 or 304" in lieu thereof.

Page 44, line 14, strike out "O–6" and insert in lieu thereof "O–7".

Page 46, line 23, after "shall not apply", insert the following: "with respect to the making of communications solely for the purpose of furnishing scientific or technological information under procedures acceptable to the department or agency concerned or".

# EXTENSIONS OF REMARKS

## ILLEGAL ALIENS AT THE WHITE HOUSE

### HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. ASHBROOK. Mr. Speaker, today's Washington Post carries a very interesting article entitled "Illegal Aliens Received on Visit at White House." Not unusual for Margaret Constanza to host them. She has been in charge of the delegations of homosexuals, radicals, misfits, and any other group that feels the liberals have not liberalized the laws enough so far to suit them.

I include the article with these remarks. If read closely it reveals some interesting facts. Of course, this administration has created a new phony term to designate the illegals. They have become "undocumented aliens." Not illegal, just undocumented. The article refers to one of the aliens as having been deported four times.

As I read the United States Code that makes him guilty of criminal violation of the law. Not just an illegal alien but a person who has criminally flaunted our laws.

Five of the illegals were picked up by the border patrol on their way to the White House Conference. Imagine that, arresting them. Maybe the White House can reprimand those poor people who try to enforce the law at the local level while it is being flaunted at the White House by those who encourage the illegals to come into the country.

Here is the article. Read it and weep:

ILLEGAL ALIENS RECEIVED ON VISIT AT WHITE HOUSE

(By Christopher Dickey)

Fourteen Latin Americans were invited to the White House yesterday to talk with presidential assistant Margaret Costanza.

Several of them had trouble identifying themselves to get past White House security because they are illegal aliens, without any documentation that allows them to live and work in the United States. One said he has been deported four times.

The issue of documentation is what brought them there in the first place. Grapefruit pickers from Arizona, sugar cane workers from Louisiana, domestics and dishwashers from the District of Columbia and their representatives have been gathering since Friday in Mt. Pleasant for a conference of the National Workers Project.

Those who spoke yesterday with Costanza vehemently attacked President Carter's proposed immigration legislation. They also protested what they called the brutality and harassment of the Border Patrol and police forces in the Southwest that have been rounding up illegal aliens.

Five people on their way to the conference from Phoenix last week were picked up by the Border Patrol in Arizona, according to a spokesman for Immigration and Naturalization Service and members of the Project.

Five more, who made it into the White House yesterday, told Costanza that they oppose the Carter immigration plan. They called for a general amnesty, Carter is asking amnesty for those who have lived here since before 1970, a restricted 5-year amnesty for those here since Jan. 1, 1977, and sanctions against employers of undocumented workers.

"We are punished by that (proposed) law very much," said Manuel Maria Bernal, who, like several of the others at the White House, came to work in the citrus groves of the Southwest because he could not support his family in Mexico. Bernal told Costanza he hoped the government would grant visas to workers so they may come and go as their work demands.

Other members of the conference criticized the Carter plan's sanctions against employers of illegal aliens because they believe such measures—already in effect in Virginia and about 20 other states, and under consideration in the District of Columbia—lead to discrimination against all workers with foreign-seeming features or accents.

Costanza was told that foreign nationals would prefer unionization of workers rather than the Carter proposal.

Though some labor groups have blamed illegal aliens for failure of some efforts to unionize workers, because with the threat of deportation they are reluctant to oppose their employers, there recently have been successful strikes of undocumented workers in Arizona citrus groves.

Lupe Sanchez, who helped organize those strikers, told a reporter that his workers won the right to blankets and bathroom facilities, a minimum wage, and warnings before the trees under which they sleep are sprayed with pesticide, "It is obscene," said Sanchez, "to have to negotiate such things."

Costanza said she would visit the groves soon. After hearing repeated charges of harassment and brutality against Immigration Service agents and local police, she said she would send a report of the meeting to the Attorney General.

A spokesman for the Immigration and Naturalization Service said it takes "maximum steps to minimize brutality. But we can't control what the local police forces do. We don't encourage them, we discourage them."●

## FIGHTING INFLATION

### HON. WILLIAM L. ARMSTRONG

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. ARMSTRONG. Mr. Speaker, the Colorado General Assembly has adopted and forwarded to us a joint memorial calling for an amendment to the U.S. Constitution to prohibit deficit spending.

As huge Federal budget deficits continue and inflation lowers everyone's standard of living, this action by the Colorado Legislature is very timely.

I urge my colleagues to take time to read Colorado Senate Joint Memorial No. 1 and consider the wisdom of this proposal.

The memorial follows:

SENATE JOINT MEMORIAL NO. 1

By Senators Strickland, Hughes, H. Fowler, Kinnie, MacManus, Meiklejohn, Schieffelin, Woodard, Allshouse, Anderson Decker, L. Fowler, Harding, McCormick, Phelps, Plock, Smedley, and Wham; also Representatives Kramer, Durham, Becker, Bledsoe, Dittemore, Eckelberry, Gorsuch, Hayes, Hefley, Hilsmeier, Lillpop, McElderry, Neale, Reeves, Schaefer, Showalter, Swalm, Tancredo, Waldow, Winkler, Yost, Barnhill, DeNier, Dodge, Herzberger, Jones, Spano, Younglund and Zakhem.

Whereas, with each passing year this nation becomes more deeply in debt as its expenditures grossly and repeatedly exceed available revenues so that the public debt now exceeds hundreds of billions of dollars; and

Whereas, The annual federal budget continually demonstrates an unwillingness or inability of both the legislative and executive branches of the federal government to curtail spending to conform to available revenues; and

Whereas, Convinced that fiscal irresponsibility at the federal level, with the inflation which results from this policy, is the greatest threat which faces our nation, we firmly believe that constitutional restraint is vital to bring the fiscal discipline needed to restore financial responsibility; and

Whereas, under article V of the constitution of the United States, amendments to the federal constitution may be proposed by the congress whenever two-thirds of both houses deem it necessary or on the application of the legislatures of two-thirds of the several states that the congress shall call a constitutional convention for the purpose of proposing amendments which shall be valid to all intents and purposes when ratified by the legislatures of three-fourths of the several states; now, therefore,

*Be It Resolved* by the Senate of the Fifty-first General Assembly of the State of Colorado, the House of Representatives concurring herein:

That the Congress of the United States is hereby memorialized to call a constitutional convention pursuant to article V of the constitution of the United States for the specific and exclusive purpose of proposing an amendment to the federal constitution prohibiting deficit spending except under conditions specified in such amendment.

*Be It Further Resolved,* that this application and request be deemed null and void, rescinded, and of no effect in the event that such convention not be limited to such specific and exclusive purpose.

*Be It Further Resolved,* that copies of this memorial be sent to the secretary of state and presiding officers of both houses of the legislatures of each of the several states in the union, the clerk of the United States house of representatives, the secretary of the United States senate, and to each member of the Colorado congressional delegation.

FRED E. ANDERSON,
*President of the Senate.*
RONALD H. STRAHLE,
*Speaker of the House of Representatives.*
MARJORIE L. RUTENBECK,
*Secretary of the Senate.*
LORRAINE F. LOMBARDI,
*Chief Clerk of the House of Representatives.*

TO THE MEMBERS OF THE COLORADO GENERAL ASSEMBLY

Thank you for sending me a copy of Senate Joint Memorial No. 1 recently adopted by the Colorado General Assembly.

Your Joint Memorial could not have been more timely. In recent months, the spectre of

double digit inflation has reared its ugly head once again. Decisive action must be taken now if we are to prevent a repetition of the stagnation and recession which devastated our economy in the early 1970's.

Professional economists and private citizens alike recognize that inflation is the greatest danger to our economy. Wherever I travel in Colorado, this is the problem people are talking about most. Inflation imposes an especially severe hardship on the elderly, people who are least able to protect themselves against rising prices. But young people are hurt, too, especially those who are just starting out and find themselves priced out of the housing market. And the same is true of virtually every family in our state and the nation. Inflation must be brought under control.

Our country was recovering from the recession of 1973–74 before the present Administration came to power. The annual rate of inflation had been brought down to 4.8 per cent by the time President Ford left office. The economy was expanding and new jobs were being created. But in January of this year the rate of inflation had doubled to a whopping 9.6 per cent, and both the stock market and the international money markets were signalling economic distress ahead.

Concern about the economy is not limited to the financial community. Recent opinion polls make it clear the American people consider inflation to be the most serious problem facing our country today.

It is not hard to pinpoint the source of their concern. When so-called "off-budget" borrowing is included, the Administration's proposed budget for the next fiscal year contains a deficit of $87 billion. Federal money creation to paper over a deficit of that magnitude is certain to spur inflation, and federal "crowding out" of private borrowers in the money markets is sure to slow economic growth. No wonder the stock market is swooning, the dollar is plunging, and ordinary Americans are scrambling to find ways to protect their savings.

To date, the Administration's anti-inflation program has consisted of jawboning and finger-pointing and precious little else. No Administration had ever talked more about the need to stabilize prices, or so casually ignored these goals in formulating its policies.

The Administration has put its stamp of approval on dozens of dubious new programs certain to spawn new inflation. Among them are:

New Social Security taxes that will add $6.8 billion to employers' payroll costs this year alone, as well as drain vitally needed purchasing power from the pockets of consumers;

An increase in the minimum wage which will add approximately $10 billion to the cost of doing business in this country;

Additional unemployment insurance costs of $3 billion in 1978;

Proposed new energy taxes that would, if enacted, extract $72.5 billion from the economy by 1985;

New oil tanker regulations which will cost consumers $1 billion;

A 39 per cent wage increase over three years for coal miners, which could boost the price of steel and electric utility bills by at least 10 per cent;

Restrictive import agreements on steel, shoes, and television sets, and

A cargo preference bill which Treasury Secretary Blumenthal estimated would have added $1 billion a year to the fuel bill of Americans.

Our economy has yet to feel the brunt of most of these new and proposed spending programs. But in the last year alone the consumer price index doubled, purchasing power declined, industrial production fell and retail sales decreased. The dollar fell to an all-time low and the trade deficit grew to an all-time high. The rate of capital investment dropped to the lowest among all industrial nations.

It is clear that unless something is done to halt the federal government's wild spending spree, our economy will once again be suffering from stagflation—double digit inflation and a stagnating economy.

If we simply maintained the rate of inflation at the current 6.7 per cent annual rate:

A home costing $55,000 today will be priced at $83,000 within five years, an increase of 63 per cent;

A new car that sells today for $5,000 will be up by 38 per cent to $6,875 within five years, and

A $100 electric utility bill today will be up by 58 per cent within five years.

But the costs of inflation go beyond the extra bite out of American paychecks. For some it may mean no paycheck at all. Inflation has a devastating effect on business decisions which require new capital formation to create new jobs. A poll of 2,000 chief executives indicated that only 22 per cent of business leaders felt that now is a good time to undertake new or expanded investments.

The only sure, permanent way to put a lid on inflation is to write into the Constitution an amendment that will forbid deficit spending, a wise provision which is already written into the constitutions of 47 states, including Colorado. While I do not personally feel it is desirable to convene a constitutional convention, I completely support the kind of amendment proposed by Senate Joint Memorial No. 1. I am delighted that the Colorado General Assembly has gone on record in support of such an amendment.

I will insert a copy of Senate Joint Memorial No. 1 in the CONGRESSIONAL RECORD, along with a copy of this letter as a means of alerting my colleagues in the House of Representatives to the need for urgent action.

Sincerely,

WILLIAM L. ARMSTRONG.●

## BUSINESS LEARNS ABOUT GOVERNMENT

### HON. SAMUEL L. DEVINE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. DEVINE. Mr. Speaker, it is always a pleasure to welcome to Washington a group of businessmen who are here to learn about their Government and how business and Government can work together.

Robert Parsons, of Reynolds Metal Co. in Richmond, is this year's president of the National Coil Coaters Association, which is conducting its Government Affairs Seminar on April 9, 10, and 11.

NCCA consists of a remarkable group of businessmen who have created a new industry with a new technology—the precoating of metals for a wide variety of uses, such as beverage cans, automobile metal, home siding, and recreation products. Their imagination and business initiative has built a multibillion-dollar industry in less than 20 years. Because these men have made good use of modern technology, their industry has been proven cost-effective and energy efficient.

They are here to study "The realities of Regulatory Government in Business Decisions." With so much of today's businessman's time taken up with Government regulations, this is an important subject. I hope that these dynamic businessmen will have as great an impact on Government as they have had on the metals industry. It is only through the informed action of business that the swelling Government regulatory system can be reduced to reasonable limits. We look forward to their visit.●

## HEW'S FISCAL NONSENSE

### HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. HANNAFORD. Mr. Speaker, a recently proposed rulemaking by the Department of Health, Education, and Welfare would broaden the scope of disability insurance coverage under social security. In view of the dire straits in which the social security trust funds can be found today, any such proposal should be looked at carefully. But the proposal I am addressing would be considered ludicrous even if a surplus existed in the social security accounts.

The Department desires to classify as "handicapped" any individual who cannot perform simple arithmetic functions or speak English. While I will agree that these unfortunate individuals will experience great difficulty in the commerce of their daily lives because of their shortcomings, I feel that describing them as "handicapped" for purposes of receiving social security payments is an insult to the millions of truly handicapped persons who depend on the disability insurance program.

Mr. Speaker, the Long Beach Independent, Press-Telegram published a succinct editorial analysis of the HEW proposed rulemaking in its March 27 edition, and I would like to share it with you now.

HEW'S FISCAL NONSENSE

Since January, American workers and employers have been paying higher Social Security payroll taxes to keep the fund from going bankrupt—and the taxes will continue to increase.

Congress approved the very substantial increases at the urging of President Carter.

No one was particularly happy that Social Security taxes had to be raised, but there wasn't much choice since benefits being paid out were more than the taxes coming in.

In view of this, it is incredible that the Department of Health, Education and Welfare is proposing new regulations which, if permitted to become effective, would provide that a person who can't add or subtract, or is unable to speak English, or is over 55 years of age may qualify for disability insurance under Social Security.

Hasn't HEW heard how hard the American worker and his employer have been hit by the increased payroll taxes to keep the Social Security fund solvent? How can they propose new expenditures from the fund under such circumstances?

The proposed new disability regulations, published March 7 in the Federal Register, say being unable to add or subtract is a disability, because "the inability to perform simple calculations in addition and subtraction would represent vocational restrictions."

The regulations say further: "An individ-

ual's inability to communicate in English may be a decisive factor resulting in a finding of disabled. . ."

Another section states that if "an individual's physical and mental capacities are not consistent with making an adjustment to work differing from that which the individual has performed in the past, it will be determined that such an individual is under a disability."

Social Security is not supposed to be a welfare program. It is supposed to be a retirement program, financed by contributions from workers and their employers. The HEW proposals to expand benefit coverage do not conform to the purpose of the system.

Congress should take another look at the Social Security system and, instead of increasing payroll taxes, should rescind some of the projected tax boosts. One way to do this would be to strip away benefits such as Medicare and public welfare programs which are not properly a part of Social Security.

At the very least, it should dump HEW's proposed new rules, which are fiscal nonsense.●

## TAKING A CHANCE ON TURKEY

### HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. EILBERG. Mr. Speaker, in placing an embargo on the shipment of arms from the United States to Turkey, this House has registered its protest against the denial of human rights on Turkish-occupied Cyprus, and on the continued presence of Turkish troops on that island.

Now, we are being asked by the administration to lift our embargo, in the expectation that by restoring our support for arms to Turkey, she will withdraw her troops on Cyprus and allow countless Greek refugees to return to their homes.

The New York Times of Sunday, April 9, commented on President Carter's plans, and in a precise fashion pointed out that this bet "may be a bad one."

I quite agree, Mr. Speaker, that Congress would be taking a large gamble, especially in light of the political climate in Turkey which makes it difficult for President Ecevit to make concessions. I offer for the RECORD the following commentary from the New York Times:

TAKING A CHANCE ON TURKEY

Secretary of State Vance told Congress last Thursday that if only it would lift its restrictions on shipments of American arms to Turkey, the Turks and Turkish Cypriots would put forward new proposals for a Cyprus settlement. He may be right. But the issue is not whether there will be new proposals. Rather, it is whether the proposals will move Turkish troops back from the 40 percent of Cyprus they now occupy to a zone more nearly proportional to the 18 percent of the island's population that is Turkish. Secretary Vance is thus asking Congress to join him in betting that once the American restrictions are removed, the Turkish Government of Prime Minister Ecevit will be able to make large concessions that could not be made while the limits remain.

The bet may be a bad one. In Turkey's politics, no time is a good time for conceding territory to Greek Cypriots. And Mr. Ecevit's position seems less strong now than it did when he returned to office last Jan. 1. In Parliament he has been able to govern without the votes of ultranationalists. But in the streets extremists continue their campaigns of violent intimidation that have taken more than 100 lives this year. There is no reason to think that Mr. Ecevit himself does not want to be generous so as to remove the Cyprus problem from his crowded agenda. But in the prevailing political climate, concessions that are even remotely acceptable to the Greek Cypriots may be impossible. And once American pressure is removed, Mr. Ecevit will have even less reason to take political risks.

Secretary Vance emphasized the strains that the limits on arms shipments impose on Turkish politics and Turkey's links to NATO. But he glossed over the comparable strains on Greek politics, and Greece's links to NATO, if removal of the restrictions is not accompanied by a satisfactory outcome on Cyprus. Greece is no less important to NATO's southern flank than Turkey. Any bargain that "saves" Turkey for the alliance at the cost of losing Greece would be hollow indeed. And if, as is likely, Congress should refuse to ease the limits on Turkey, the Administration's present approach risks alienating both countries.

Turkish's spokesmen decry what they see as an American tilt toward Greece, and they say that they only want Americans to be "even-handed." Yet in the present Cyprus situation, removing the arms limits would amount to a tilt toward Turkey. So long as Ankara's troops remain where they are on the island, Congress should retain the only leverage it has.●

## PUBLIC OPINION ON FOREIGN INVESTMENT HERE

### HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. GAYDOS. Mr. Speaker, the steady increase in foreign investment in the United States also is attracting growing public attention. In many cases the foreign investor is being wooed to locate here. Recently, the governor of Pennsylvania made a special trip to Japan for that specific reason.

Upon his return, the Standard-Observer of Irwin, Pa., conducted a survey among some of its readers to gain their reaction to the idea. I will insert into the RECORD extracts of their responses.

One young lady commented:

I'm a little skeptical . . . The U.S. made so many concessions for Volkswagen (a plant located near New Stanton, Pa.). I think we should give some assistance to small business in this country. That would be more beneficial and fair to citizens here.

A young man observed:

We should take care of our own first.

He pointed out the United States has many problems and encouraging foreign business to settle here primarily benefits them.

It will not be a general benefit to people here; just to the ones who work there, just a few.

Another young lady said a German friend of hers objected to the Volkswagen plant in New Stanton because it took jobs from German workers. She conceded foreign companies locating here will make work for people but, she added:

We will have to pay more taxes for the conveniences for the company, such as new roads. I'm not sure anyone makes out so well.

A housewife opposed the idea, preferring the encouragement of people in this country to open businesses—

I don't like so many coming in.

One man noted there are two sides to the issue—

If people in the U.S. are going to buy foreign products they may as well buy ones manufactured here.

But, he also cautioned:

Foreign buying is getting out of hand.

Mr. Speaker, I, too, am concerned lest encouragement of foreign investors lead to encroachment on our ability to control our own economy. It is for this reason I have advocated reasonable limitations on foreign investments in the United States, permitting the investor a fair return on his money but preventing his control of U.S. industries or business.●

## SOVIETS IMPOSE SEVERE PENALTIES ON HELSINKI WATCHERS

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. SIMON. Mr. Speaker, while Western public opinion focuses its attention on the upcoming Shcharansky trial, Soviet authorities have quietly been meting out so-called "justice" to the other members of Helsinki watch groups throughout the Soviet Union. On March 29, 1978, the two founding members of the Ukrainian Helsinki group, Mykola Matusevych and Myroslav Marynovych, were each condemned to 7 years in labor camps and 5 years of internal exile for "anti-Soviet agitation" following a trial which, by all standards, was a mockery of justice.

The week-long trial, conducted behind closed doors so neither friends nor family could attend, culminated 11 long months the two Ukrainians spent in forced isolation after their arrest on April 23, 1977.

Matusevych, 31 years old, and Marynovych, 28, founded the Ukrainian group in November 1976, a few months after the formation of the Moscow group to Promote Observance of the Helsinki Accords. Since November, the group in Ukraine has issued over 20 reports on Helsinki implementation and has witnessed six of its members arrested over the past year.

I find it increasingly difficult to understand why courageous young men, whose only "crime" is to treat seriously their government's signature on an international agreement, must spend years suffering for their humanity. Or why a nation which calls itself civilized continues

to perpetrate with impunity these true crimes against its citizens.

If we do not speak out now against the illegality of these men's trial, if we do not speak out against this flagrant violation of Helsinki pledges to which Brezhnev himself signed his name, if we do not protest Soviet neglect of their own laws, then we ourselves become accomplices through our silence.

Soviet authorities have just begun to punish the 55 imprisoned Helsinki watch group members, but already the cruel arm of Soviet justice has clearly been raised. For the sake of all the dozen others awaiting their fate, we must register the strongest protest against the illegality and immorality of this recent Soviet action.●

## HENRY FORD, II ON REGULATION

### HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. COLLINS of Texas. Mr. Speaker, Henry Ford II has made some excellent analytical statements in recent years. His concise views on "the High Cost of Regulation" sums up this situation. In the recent March 20 issue of Newsweek, they have a 1-page visitors' editorial. In this issue it was the statement of Henry Ford II, chairman of the board of the Ford Motor Co.

Inflation is the number one problem in America but the average citizen does not know that one of the primary causes of inflation is the expensive and costly requirements of regulation and overregulation by Congress.

Henry Ford II puts the issue squarely on the back of Government. He is absolutely right and here in Congress I ask that my colleagues review the sound commonsense remarks that he has made.

The entire statement is profound, but I am quoting only a few of the more fundamental paragraphs of the Newsweek statement on regulation by Henry Ford II:

Perhaps it's only a coincidence that the recent period of rapidly rising government spending and roughshod regulation also has been a time of high unemployment, slow productivity improvement, soaring government deficits and unprecedented peacetime inflation. But I don't believe it's a coincidence at all. Despite a mounting record of failure and frustration, our leaders have failed to grasp the fact that too much government inevitably leads to economic decay.

It is obvious to everyone—or should be—that the more government spends, the less wealth is left for productive investment as well as for private consumption.

But I am arguing with the tendency to sanctify each goal—to seek instant perfection with little regard for costs and consequences.

There is a real danger that regulation will continue to feed upon regulation and become not so much a means to an end as an end in itself. With the labyrinth of regulations, many in Washington and elsewhere find themselves possessed of a power greater in some respects than that of the Congress or state legislatures.

The staggering cost of meeting regulations falls first upon the affected industry and its customers, and only later does the impact begin to be felt by the society at large in terms of general price rises, slower economic growth and fewer jobs. ●

## HUMAN RIGHTS AND THE NEED FOR A PEOPLE-ORIENTED APPROACH TO U.S. FOREIGN RELATIONS

### HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. BONKER. Mr. Speaker, in my judgment, in several instances U.S. foreign policy reverses have been caused by our preoccupation with winning the favor of governments, rather than identifying with the plight of people who suffer under the arbitrary rule of these governments. This government-centered approach has always appeared somewhat ironic to me, since our country's guiding philosophy is that a nation's legitimacy is derived from the consent of those governed. This philosophy is particularly important in Third World countries, whose governments are marked by chronic instability. People, not governments, provide the continuity needed to keep nations and states intact.

President Carter's human rights policy represents in spirit an effort to move toward a closer identification with the interests and welfare of people ruled by repressive governments. This is a very welcome development in my opinion. However, as currently applied, the President's human rights policy continues to vacillate between a people-oriented approach, and an approach fixed on a rather short-term identification with particular governments on behalf of narrowly conceived "national security" criteria. During a recent visit to the Horn of Africa, I noted that this latter approach, which was used in Ethiopia under previous administrations, was detrimental to long-term U.S. interests. The United States faced a similar situation in the former Portuguese territories. Will this senario now be repeated elsewhere, in time, in countries such as Iran?

Mr. Speaker, the American Ambassador to Kenya, Wilber J. Le Melle, gave an eloquent presentation last fall on the relationship between promoting better human understanding and advancing human rights. I now ask that Ambassador Le Melle's remarks be placed in the RECORD, as they emphasize elements which I believe should increasingly be given priority in U.S. foreign policy today.

The remarks follow:

WORLD UNDERSTANDING AND HUMAN RIGHTS

Mr. Chairman, Rotarians, ladies and gentlemen. Your invitation to meet with you today to discuss a subject of such immense importance as world understanding was a particularly welcome one. The search for understanding between and among societies and nations is as old as those institutions. Diplomats—along with artists and teachers, scholars and scientists—have a particular responsibility in carrying on that search. Our sense of urgency in this quest has grown dramatically over the past few decades—both because the potential rewards for success have increased enormously and because the penalties for failure have taken on terrifying proportions. At the same time, the task has become more complex, because of global population growth, enlargement of the world family of nations, and technological development.

Just about everyone subscribes to the proposition that world understanding is a good thing and that we need more of it. But how often do we stop to think about what—in fact—we mean by understanding and how it might best be achieved. Certainly we must go beyond a simple analysis of each other's motives or the learning of a few pertinent facts about the history and culture of other societies. Learning is too often mistaken for understanding, knowledge for wisdom. Learning and knowledge are a process and an achievement of the mind, and we need them. But understanding and wisdom involve a spiritual commitment as well. If we are to achieve true world understanding we must make that spiritual commitment. We must go beyond tolerance and accommodation to genuine respect and a hospitality of the mind and spirit.

In his recently published study on man's origins Richard Leakey* has offered the hypothesis that humans can probably best be defined as cooperating animals. That hypothesis—as opposed to the older and more popular theory which Konrad Lorenz argued—that we are essentially aggressors—seems to me a much better term for defining us, even if it yet awaits final scientific validation. For while our record in the area of cooperation may be a spotty one, it strikes me that man has applied himself more consistently in that direction than otherwise. It remains for us to find ways to improve on the balance, and that is where world understanding must take its place in the forefront of world priorities. It has advanced from being a desirable goal to the status of an imperative.

Over the past three decades the proliferation of nations in the world family has been accompanied by an intensifying of international relations. Politically, economically and socially, our affairs have become progressively more interwoven.

That process of intensification continues today and can be expected to continue well into the future. The interests of nations and, perhaps more to the point, the interests of the individuals who live in those nations, are all of a piece in the modern world. That reality poses certain problems, but it also offers a vast array of opportunities for us to work together in designing a better life for all the world's people.

The division of international affairs into fields we designate as political, economic or social is one we construct arbitrarily for the sake of analysis. That division is frequently difficult to maintain. Nevertheless, each nation does have its own peculiar array of political, economic and social institutions, each shaped by a unique set of historical circumstances. It is vital to the achievement of world understanding that we understand not just how we acquired these institutions and how they function but, more importantly, that we realize, as well, that the people who created them and who compose them were and are essentially the same.

In a world of cultural diversity it is encouraging to see people exhibiting growing appreciation for cultures not their own. So long kept apart by ignorance and misunderstanding, people are now being drawn together by the desire to share the cultural wealth that springs so copiously from every society. In America, every major university and many of the smaller ones have faculties

*Richard Leakey and Roger Lewin, Origins, MacDonald and Jane's, London, 1977.

devoted to the teaching of the historical and cultures of other lands—and the students are flocking to them. The same is true in many countries other than mine, and it is a heartening thing to see. In this era of rapid and easy travel, people are going to other countries to study, to engage in commerce, and most often just to share in another culture. Peoples once divided by a kind of fear engendered by ignorance and misunderstanding are beginning to lose that fear through knowing each other. In this world of many cultures, growing social intercourse is having its effect—and the effect is a major contribution toward world understanding. An unhappy note in this regard is that some nations continue to throw up barriers designed to frustrate that seemingly natural human urge to know one another. We can only hope that efforts now being made to breach those barriers will some day succeed. That would constitute another major step toward the knowledge that we are all one people.

A prerequisite to the achievement of world understanding—and to the enrichment of the human condition that it would herald—is the commitment of national governments to that end. Perhaps owing to the diversity of the American people themselves, the United States Government made that commitment long ago. Our people are free to come and go as they please and our doors remain open to the world. Scholars, teachers, students, artists, and journalists from all lands come to our country in an unending stream and are welcome there, just as our people go abroad in ever greater numbers. Having never been closed, our doors have not required opening. But it is more than a passive commitment. We have done much to promote cultural exchange—the flow of knowledge, ideas and understanding.

In actively committing itself to the promotion of cooperation and understanding among nations, the U.S. Government created a whole new family of agencies designed to work toward that end. The Fulbright-Hayes Act gave rise to the Bureau of Cultural Affairs within the Department of State. It is this Bureau that funds the Fulbright scholarships, the International Visitors program and a number of other activities that work toward helping Americans and people of other nations to see each other as they are, and to work together in seeking understanding of each other's ways. The United States Information Agency, the Agency for International Development, the Peace Corps—all are living, functioning institutions dedicated to the proposition that people from all cultural and historical backgrounds can—and must—work together. The commitment that led to the creation and sustained support of these institutions springs from the American conviction that, in order to survive and to progress, people must cooperate in identifying common goals and achieving them. Because of that conviction, there are many exchanges that take place outside of official circles and usually with little or no governmental participation.

Apart from official government support for international exchanges, a large number of private American institutions—educational, cultural and philanthropical—are also active in the international field and contribute tremendously to the flow of knowledge and understanding between the United States and other countries. The importance of the latter, small group of institutions is that they enjoy greater flexibility and in some instances more latitude in programming which happily compliments the more formally focused governmental efforts.

The same fundamental conviction that has led to American efforts—both official and private—to seek cooperation and understanding among peoples has led us to the position we have taken on fundamental human rights in international affairs. Americans did not invent human rights, nor have we been altogether consistent in observing them. In proclaiming the human rights doctrine as a central part of U.S. foreign policy, President Carter made clear that we are subject to—and prepared to accept—criticism. So we recognize the problem as being a universal one. Because the problem is universal, and because it touches so intimately on the quality of every individual human being's existence, it is the core issue in seeking world understanding. The American conviction that global acceptance of certain fundamental human rights is essential to a peaceful and cooperative relationship among the world's nations is accompanied by another conviction. That is that such an understanding is achievable.

Clearly, if the doctrine of human rights is to become universally accepted and universally applied, it must be defined. What then are these fundamental rights of which we speak? President Carter has said that they are "to speak without fear, to have a chance to express one's political belief, to seek different employment without interference by government, not to be dominated by officials who have power, not to be imprisoned without adequate charge and not to be tortured." Secretary of State Cyrus Vance, elaborating on the doctrine, said that "man has a right to be free from government's violations of the integrity of the person, the right to the fulfillment of such vital needs as food, shelter, health care and education, and the right to enjoy civil and political liberties." Now those rights would appear to be sufficiently fundamental for any reasonable purpose. They are clearly defined and they are universal in the sense that just about any individual, anywhere in the world, would want them for himself. They are those rights which are most basic and fundamental, and about which there is general agreement, or what the scholastic philosophers used to call, a sensus communis. Where the concept gets into trouble is in the fact that there are those who, while clearly arrogating these rights to themselves, would deny them to others.

When the Carter Administration elected to include basic human rights as an integral part of U.S. foreign policy it became inevitable that an old ghost would be raised. The question is being asked—from within the United States as well as from without—whether the human rights doctrine isn't another effort to universalize what might be termed "American morality" as a basis for arranging the relations between nations. Those who raise this question may be looking back warily to the nineteen-fifties—to the height of the cold war when a "new moralism" was injected into U.S. foreign policy with ultimate disastrous results. Obviously that moralist world view, which divided the causes of nations as either good or bad and left no morally justifiable room for neutralism and non-alignment, is something quite apart from the Carter Administration's stand on human rights.

I believe that even a cursory examination of the human rights doctrine should allay any fears that the United States is reverting to the narrow parochialism of cold war mentality. We have left that behind us. The human rights doctrine, far from being a manifestation of American self-righteousness, is quite simply the acceptance by the United States of, in the words of Zbigniew Brzezinski, "an idea whose time has come." As Mr. Brzezinski has further pointed out, "throughout the world, because of higher literacy, better communications and a closer sense of interdependence, people are demanding and asserting their human rights." In championing the cause of human rights America, rather than attempting to draw lines of conflict, is seeking to dispel them.

We are convinced that a consensus is taking shape among the people of the world, a sense that the time has come for human beings—all of us—to move toward the attainment of a common dignity, a common sense of man's heritage, and a common sense that the degradation of one human being degrades all humankind.

Over one hundred years ago President Abraham Lincoln said, "A nation cannot exist, part slave and part free." Under his leadership America abolished the institution of slavery. A similar statement might well be made today with regard to the community of nations. The community of nations cannot exist, part respecting fundamental human rights and part denying them.

The doctrine of human rights is present in U.S. foreign policy because our government and our people see no other way in which the community of nations can take form and be sustained. We seek to establish a common bond of understanding and respect upon which nations can find a new kind of relationship—a relationship in which the common goal is the cooperative pursuit of the betterment of the human condition, a better life for all men.●

## ADMINISTRATION PHONYNESS ON PANAMA CANAL ISSUE IS SHOWN

**HON. JOHN M. ASHBROOK**

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. ASHBROOK. Mr. Speaker, the raging controversy over the DeConcini reservation shows many things but above all it shows the sheer phonyness of the Carter administration's position and the charade it has gone through to sell the canal treaty to the public.

Simply stated, the DeConcini amendment which passed the Senate says that the United States has a right to intervene militarily in Panama at any time to keep the canal open. The President has consistently maintained that we could protect our interests and keep the canal open. One difficulty—like most liberals he wanted to say that was so to get the votes but he did not want it in writing to make it fact what he argued in generalities.

How dumb can we be? I have pointed out on numerous occasions the charade that has been going on. Panamanians look at language one way and we look at it another. The President assures the skeptical American public one thing, the Panamanian dictator and the Panamanian people something else. In effect, each side gets to hear what it wants to hear, certainly nothing unusual for Washington liberals.

The Washington Post dutifully plays along with this ploy. In today's edition this liberal newspaper has a front page story with this paragraph in a lead story:

> Yesterday, administration officials began courting DeConcini's staff in preparation for an attempt to somehow clarify the meaning of the reservation in order to placate Panamanian opinion, which reportedly has been inflamed over this issue in recent days.

In Washington doubletalk, Carter doubletalk, what does that mean? Simple. The DeConcini amendment

means what it says it means. State Department appeasers and compromisers will somehow try to come up with a charade that will convince Americans that it means one thing, the Panamanians something else.

No wonder this administration has so little confidence among the American people. No wonder the U.S. Senate has so little confidence either.●

## THE NEUTRON BOMB DECISION

### HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. MICHEL. Mr. Speaker, William F. Buckley, Jr., recently wrote an informative and incisive column about the controversy over the neutron bomb. Demolishing the myths of those who do not want it deployed in Europe, Buckley points out that no less an expert than NATO Comdr. Gen. Alexander Haig has recently held a press conference in Washington to clear up misconceptions about this weapon.

Buckley quite correctly points out that the Soviet Union has launched a massive propaganda barrage against the neutron bomb, distorting its effects and trying to portray it as a weapon that will increase the horror of war. To the contrary, the neutron bomb acts first of all as the primary deterrent to war in Europe. In case it ever was needed it would give the NATO allies a weapon that would enable them to stop the attack of the Warsaw Pact tank forces. At the same time it would not bring about the widespread destruction that results from "dirty" nuclear weapons now in place in NATO countries.

I think that when the story of the neutron bomb controversy is finally written, the role of Soviet propaganda will amaze even the most knowledgeable of Kremlin watchers. To put it briefly, the Soviet Union's propaganda campaign against the neutron bomb has been worth 10 divisions to the Soviets.

The Wall Street Journal, April 11, 1978, published an editorial pointing out the folly of the administration's decision and reminds us that in this administration "defense advocacy is weak, disarmament impulses are inbred and the President is apparently susceptible to moralizing sermons."

At this time I would like to place in the RECORD "Soviets Hate Neutron Bomb", by William F. Buckley, Jr., from the Peoria Journal-Star, Wednesday, April 5, 1978, and "Feckless Decision-Making", Wall Street Journal, April 11, 1978:

SOVIETS HATE NEUTRON BOMB

(By William F. Buckley, Jr.)

Just over a week ago General Alexander Haig, who heads the North Atlantic Treaty Organization, told a Pentagon news conference that the Pesident should poceed to deploy "ER's," which is the term the technical folk use to signify "neutron bombs." There are reasons not merely mincing, but scientific, for making the distinction. To speak of a neutron bomb is to invoke Hiroshima clouds. Whereas enhancing radiation, which is all that a neutron bomb does, simply intensifies the heat, as the words suggest.

For reasons that should be irrelevant to this analysis but are not, the neutron bomb is, taxonomically, a member of the nuclear family. That is, atom-splitting of some sort or other goes on in order to make an ER give. What is of course relevant isn't what makes it go, but what then happens. But this the Soviet Union does not permit us to discuss, preferring to talk about the ER's as though they were an advanced form of hydrogen bomb, to be despised by all decent, industrious and well-intentioned men.

Now General Haig's press ccnference is twice important. First because it brought attention to the military need for the new ER's. Over at the other end, the Warsaw Pact has developed the frightful SS–20 missile, capable of blowing up an entire megalopolis, and has trained these on NATO targets. Specifically, one SS-20 missile is, to quote Haig, "2,000 times more devastating in explosive consequences."

The intensive propaganda war waged by the Soviet Union against the deployment of the neutron bomb is extremely easy for any student of Soviet rhetoric to transcribe. It says "You may not deploy one because we haven't got one."

What the Soviets have is a huge, highly mobile concentration of the world's top military machines. The Warsaw Pact has 31 armored divisions; we have 11. They have 36 infantry divisions, we have 18. What do we do when the juggernaut begins to rumble? We can fire some ER's, that's what: and the effect would be devastating against a motorized division moving toward you.

That being the case, as General Haig stresses, the ER's would enhance the deterrent credibility of the NATO defense forces. And that having been done, the risk of their having to be used is minimized. It would be otherwise if the Warsaw Pack countries began suddenly to move and, in self defense, we flew in and began to fire the ER's.

Now the Haig conference is otherwise interesting. Early in his administration President Carter made it very clear, by his summary treatment of General Singlaub in South Korea, that Carter does not wish generals to disagree with their commander-in-chief publicly. Of all military men, Haig is probably the most experienced in presidential vanities, crotchets, and guile. It is likelier than not that Carter either put Haig up to the press conference in question, to drum up support for the ER's; or that Haig persuaded Carter that the time had come to deliver such an analysis.

After all, several of our allies in Europe, including one or two who are inclined to get themselves overrun from the east every generation or so and only then call on United States assistance, have been squeamish about deploying the neutron bomb on their territory.

Haig's press conference served a twin purpose. To Congress he was saying: the neutron bomb restores parity in Europe and so diminishes the possibility of war; and to Europe he was saying, Act your age, free yourselves of the pull of Soviet cant, and recognize where your own interests lie.

The explosive reaction early in the year by Brezhnev to the neutron bomb needs to be dealt with more thoroughly by the White House. Brezhnev's blast, for one thing, affected the thinking of the Central African Republic, Chad, Mexico, and the National Council of Churches. That may not seem like much, but it is a leg up.

Brezhnev deserves such an answer as Khrushchev on one occasion got from Senator Dodd when Khrushchev was critical of the U.S. resumption of nuclear testing: detailed comparison of the behavior of the two nations a reading of which left no doubt that the United States was alone in showing a consistent desire to limit nuclear experimentation.

It would be easy to put the Soviet Union on the spot about its SS–20 missile. Why don't we do it?

The time is opportune. And it is not irrelevant to the Panama Canal debate, which hangs on the question whether we have a determined commander-in-chief.

[From the Wall Street Journal, Apr. 1, 1978]

FECKLESS DECISION-MAKING

President Carter's deferral of the enhanced-radiation warhead raises basic questions about the decision-making process in his administrtaion. If the Secretary of State, Secretary of Defense and National Security Adviser all favored production, from whom is Mr. Carter taking his advice?

The decision itself, first of all, has to be recognized for what it is, a significant step backward in European defense. The military balance on the central front is already dire, and the enhanced radiation/reduced blast warhead was intended to help deter Soviet adventurism by giving the allies a more effective and more credible counter to huge tank armies. While Mr. Carter covered his decision with just enough waffling to appear indecisive, he has put off this promising opportunity indefinitely.

Politically the decision seems certain to nip the new coalescence of NATO that has started to bud in the last year. Especially so since Mr. Carter made his decision just when the West German government had at American urging agreed to take the initiative in asking deployment. Mr. Carter shoved Chancellor Schmidt out on limb, and then sawed it off behind him. American diplomatic standing in Europe probably cannot be repaired in Mr. Carter's presidency, with effects that will reach far beyond the field of atomic weapons.

And for what? The notion that unilaterally stopping U.S. armaments will lead to Soviet restraint is childish, and in any event the weapon was needed to counter what the Soviets have already done, not what they will do in the future. Once you understand that the "neutron bomb" will not produce more atomic radiation than the warheads it will replace, only less blast and heat, any moral dimension is hard to discern. In short, Mr. Carter's decision is so spectacularly bad one has to wonder how it came about.

In speculating about this, we would certainly not exonerate those officials who did back the ER/RB warhead. Cabinet officials have a responsibility not only to take sensible positions, but to advocate those positions forcefully enough to educate the President broadly and deeply. It's nearly impossible for us to believe that Mr. Carter's decision could have been made by a President who truly understood the likely diplomatic costs; for that matter, we marvel that it could be made by a President who understood even the technical warhead effects. To the extent presidential incomprehension played a part in the decision, Mr. Vance, Mr. Brown and Mr. Brzezinski bear their share of the blame.

The second point that needs to be made concerns the administration's knee-jerk attitude toward arms control, and the atmosphere this lends to decision-making. The three advisers above put aside, the administration is full of people who have devoted their lives to opposing U.S. weapons programs. The President himself talks of otherworldly goals such as the complete elimination of nuclear arms. In such surroundings arms control becomes not merely one means of enhancing national security; disarmament becomes a cause transcending national security.

Finally, we hear that Mr. Carter's initial decision to stop development of the warhead followed a stem-winder from UN Ambassa-

dor Andrew Young, saying that if the weapon were deployed he could not defend the U.S. position in the forthcoming UN special session on disarmament. As precipitating inputs go, we suppose this is better than divine revelation, but barely so. The UN session obviously has the administration in a tizzy, see below. And when disarmament at the UN outweighs defense of Europe, an administration's priorities are at best capricious.

Happily, the Founding Fathers gave us more than one branch of government. If the administration cannot come up with processes that produce cogent decisions, Congress will have to bear more responsibility than usual. A good place to start would be reversing the decision on the ER/EB warhead.

Even more important, if a strategic arms agreement is reached, the Senate will have to remember that it comes from an administration where defense advocacy is weak, disarmament impulses are inbred and the President is apparently susceptible to moralizing sermons. The Senate will have to decide whether this process will produce better judgments in SALT than it has on the enhanced radiation warhead.●

## CONGRESS TOO RESPONSIVE?

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. SIMON. Mr. Speaker, the Christian Science Monitor recently had an article headed "Congress: Now Too Responsive to Voters?"

It poses some basic questions, and I think those of us who serve in these halls should reflect on its basic message:

CONGRESS: NOW TOO RESPONSIVE TO VOTERS?

(By Peter C. Stuart)

Congress criticized throughout the years of the civil rights movement and Vietnam war for being "unresponsive" to the national mood, now stands accused of an odd, new charge: being "to responsive."

Once an isolated, slow-moving institution that often seemed impervious to public opinion, Congress, the critics charge, now has become a mercurial, fickle body that overreacts to the slightest pressure from voters.

The apparent transformation, a long time in the making, is capped by recent volatile behavior that has stunned some of the lawmakers who were once most impatient with Capitol Hill's old obstructionist ways.

In the past few hectic weeks, this Congress has:

Rebelled, in apparently unstoppable numbers in the House of Representatives, against the increases in social security payroll taxes which the same Congress approved barely three months ago. The tax hikes are now likely to be rolled back.

Enacted, in a Senate besieged by striking farmers, a farm bill that combines two seemingly contradictory approaches for raising farm income.

Threatened to revoke long-term security aid to South Korea, a major American ally in a militarily unstable region, over a short-term investigation of Korean influence-buying which causes political embarrassment in a congressional election year. A House vote on the aid looms next month.

To the congressmen involved, of course, such unpredictability is not flightiness but the solemn duty of any politician to (in the words of one) "listen to your constituents."

Others are more skeptical. One of them is Sen. Edmund S. Muskie (D) of Maine, who as part of a band of junior liberals in the 1960s often battled what he regarded as Congress's slowness in recognizing national consensus.

He scorns the backbench rebellion against social security taxes as "simply . . . a reaction to a public reaction," and brands the farm bill as an "unanalyzed, undigested, inconsistent" response to "what the farmers have done" by lobbying.

A middle-ranking Republican in the House, four-term Rep. Bill Frenzel of Minnesota, chides his younger colleagues for oversensitivity.

"To them a dozen letters is a consensus, and 15 phone calls is a mandate," he says. "The Congress has changed . . . from a stable, almost inbred body to one of inexperience and whimsy."

Whether it is "whimsy" or being more closely attuned to the changing moods of constituents, the new congressional behavior appears rooted in several recent changes on Capitol Hill.

MORE MARGINAL MEMBERS

Most of the 75 Democratic freshmen elected to the House in 1974, and many of the 47 elected in 1976, captured previously Republican seats—often by whisker-thin margins.

To hold these marginal seats, they tend to be more responsive to day-to-day soundings of folks back home than to congressional leaders, the president, or a consistent political ideology.

INEXPERIENCE

Nearly one-third of the Senate (29 of 100 members) and more than one-third of the House (156 of 435 members) are newcomers serving only their first or second terms. Many are in elective office for the first time.

They have had little experience in evaluating, coping with, or reshaping the views of constituents—or even resisting them, statesmanlike, for a locally unpopular stance in the national interest.

POTENT GRASS-ROOTS LOBBYINGS

The most effective interest-group pressure increasingly comes not from professional Washington lobbyists, but from orchestrated appeals generated among a lawmaker's own constituents, who are more difficult to ignore.

The recent House defeat of the proposed federal consumer protection agency—passed in the three preceding Congresses—came, for example, after congressmen were peppered with letters, phone calls, and visits from local businessmen organized by the U.S. Chamber of Commerce.●

## COMPUTER SCIENCES CORPORATION: OPEN TO WOMEN

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. DORNAN. Mr. Speaker, we hear so much criticism about what is and is not being done in the area of sex discrimination, that I would like to take this opportunity of calling to my colleague's attention the achievements of Computer Sciences Corp., headquartered in El Segundo, Calif.

The Wall Street Journal of March 28 carried the following news article on Computer Sciences Corp.:

Industrial sales, like many other fields, is opening up to women.

Computer Sciences Corp., El Segundo, Calif., had only four female marketing and customer-service reps five years ago. Today one of its sales divisions has 50 women on a 200-person staff. Of about 1,200 people hired by Xerox Corp. for sales positions last year, 31%—or 419—were women. IBM says its female sales force has doubled since 1974.

"They're not soft," reports Jack Coke, a personnel officer at Computer Sciences, who debunks the idea that women are "illogical and intuitive." A Los Angeles recruiter adds they are "better organized and more emphatic" than men. While their sales aggressiveness is sometimes misinterpreted by men, officials say, women can overcome the problem of sexual advances by being well-informed and conducting themselves professionally.

The trend hasn't touched all industries. Makers of heavy industrial products say few women seem interested in sales jobs with them.

Computer Sciences Corp. was founded in 1959 and was one of the first companies organized to provide computer services. Today it is a leader in the development and implementation of computer-communications systems technology.

Under the leadership of William R. Hoover, chairman and president of CSC, not only has the company achieved record net income and revenue levels, but it has made great strides forward in opening industrial sales to women.●

## GOVERNMENTAL INTERVENTION

### HON. WILLIAM L. ARMSTRONG

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. ARMSTRONG. Mr. Speaker, a few days ago I read with utmost interest an article by Carl A. Gerstacker, chairman of the board of Dow Chemical Co. from 1960 to 1976. I only wish that every businessman would read and reflect upon Mr. Gerstacker's thought-provoking message. I certainly hope that each of my colleagues in the House will do so:

WHEN IT COMES TO GOVERNMENT INTERVENTION

(By Carl A. Gerstacker)

Many papers are a waste of time of the audience or writer, or both. I don't want this to happen here. I warn you, when you put this down to turn to whatever's next, I expect you to be thinking and discussing what's been said. I hope I shall upset your concentration, so if you mess things up today, blame Gerstacker. I'm going to state my theme early and then develop it in a way that, I hope, will give you the feeling that you have a lot of soul searching to do. Here it is: When it comes to governmental intervention should we fight to the bitter end on issues—win or lose totally—or should we compromise and try to salvage something?

Twenty-two years from now, in the year 2000, will there be private corporations as we know them? I don't know! But the way we now make judgments on whether to compromise or fight will go a long way toward answering that question.

Now for some anecdotes.

I have a friend from the country of India, Jeh Tata. He was the first Indian to become a commercial pilot. He started Air India and the government later nationalized the airline. Jeh is now Chairman of the Board of the government-owned Air India. Recently I heard Jeh lamenting the nationalizing of more Indian industry and I said, "Jeh, I don't understand why you work so hard to make Air India successful. You are supporting the

nationalization of private industry. If you make nationalization work with Air India, your government will ask, why not nationalize other things?"

Jeh thought a while, visibly distressed. He loved the airline he had built, he felt a responsibility to *his* employees not to let them down. Making nationalization work seemed the lesser of the evils. He asked me what I would have done. I don't know. What would you do? What is the lesson here? Don't be too quick to say Jeh should have said "No" and abandoned Air India. He may be right; he may also be wrong.

I am a U.S. government-appointed Director of Conrail, the residue of seven bankrupt Northeastern railroads, including the once mighty N.Y. Central and Pennsylvania. When these companies failed they weren't allowed to go out of business and, with whatever dignity they had left, sell their assets and pay off their creditors. No. Our government said that closing rail service was against the public interest. It seized the assets, kept the railroads running, created Conrail as a "private" corporation, and agreed to invest and loan more than $2 billion to it. On the books the government set up an equity item of $630 million to represent the value of all the seven railroads. Doesn't sound like much, does it? The former owners claim it is worth at least ten times that much.

Now, if Conrail goes bankrupt—and since it lost more than $400 million in its first 12 months, that is more than a possibility—the owners and creditors will be worse off than if the railroads had been allowed to die several years ago. If Conrail is a howling financial success, the government will get its $2 billion back and the private owners and creditors might get their money back. If Conrail is a moderate success, and at the moment this is the expectation, then the owners and creditors will probably be worse off than they would have been under simple bankruptcy.

I am a director because I think we need *some* railroad freight service in the Northeast by private, not government owned, railroads. But maybe I am working against the interests of the private owners and the basic concepts of private corporations. Maybe these railroads should have been allowed to die as other companies can.

Am I working to prove that government takeover of businesses is a noble and effective thing, and will I thereby pave the way for government control of still other inefficient businesses? In other words, am I working toward a goal that is the last thing I've worked for, for 40 years?

Jeh Tata, move over; here comes Carl Gerstacker!

Are we hurrying and abetting the demise of private corporations? I don't know, but I am worried.

Sometimes nationalization can even be the lesser of several evils and we may find ourselves asking the government to please do it.

In Indonesia, an earlier government nationalized an oil company and paid for the company out of its own oil. Not so good, you say, but wait. In another case, the government did not nationalize a consumer products company. But it did set the selling prices and the raw material costs, and didn't allow any management people in the plant. You know what happened? After a few years, that company had a disaster on its hands. It wished it had been nationalized.

And that true story brings to mind the plight of Chrysler in Merry Old England. Chrysler is losing gobs of money. As I understood the situation, the government wouldn't let them shut down and, despite Chrysler's asking for it, wouldn't nationalize the operation. The government is paying Chrysler most, but not all, of its losses. This must seem like the lesser of the evils to Chrysler but where does that precedent take us in the future?

By now you're probably saying. "OK, I can see how the least bad alternative may be pretty bad but it hasn't happened to my outfit."

Ah, but things are happening to you. Last year our industry was faced with a piece of legislation specifically tailored to enable a great deal of government control of our industry—the Toxic Substances Control Act. A majority of our industry felt we would lose if we fought for no bill at all—that it was better to compromise and help tailor a bill that was less onerous than it might be. Again, the lesser of the evils, we thought. Well, we have the bill now I wonder whether we did the right thing in accepting TSCA. Alan Smith, the scientific attache at the British Embassy had a lot to say about TOSCA. To quote his remarks—"In the opera, Tosca is a creature of doubtful virtue; who, out of devotion to a hopeless ideal, destroys herself and those around her by refusing to accept a straightforward proposition she declines to accept the advice of the authorities, while protecting repeatedly in language nobody can understand."

In the words of the unlamented cigarette ads, would we rather fight, or switch? Should we switch to a stance of accommodation and cooperation with government, or should we fight like wildcats against the continued encroachment of government? I pose this problem to you.

Frankly, it isn't easy to know exactly what you believe about it or which side you favor. But you should know; we all must agonize over this now, because it is so important to the future of our industry.

There is almost nothing we do now that is not monitored in some fashion by government agencies. This ranges all the way from which people we can recruit, to how much pension we'll pay them when they retire; from the raw materials we use as a starting point, to how we dispose of the eventual waste from the end product. Everything we do is ordained or approved or reviewed in some way by some level of government.

If we project the recent past 25 years into the future, what do we see? Can we even imagine what the relationship between the U.S. government and the U.S. chemical industry will be like if anything approaching present trends continue? Will there be left anything that even resembles a 1970's private chemical company?

We can only speculate. But any kind of speculation leads to the conclusion that our industry will become a mere handmaiden of government if we follow our present path. The question I am posing then is: What will be the winning strategy for the chemical industry in the face of this speculation?

Let's talk about saccharin. It is an interesting case. As we all know, it has been around for 80 years and has been seen as a benefit all that time. It helps diabetes patients and others who need to avoid sugar. It is fairly representative of the benefits of chemistry. But suddenly it is a villain. Do we stand up and fight for saccharin? Or do we switch and say to Uncle Sam, "we'll do our best to come up with a safe new sugar substitute"? Some of us might think that we can make more profit on a new saccharin substitute—so let saccharin go. Or we might say, "I, personally, have no sugar problem, so why should I care?"

And let's talk about acrylonitrile bottles for soft drinks (cf, CHEMTECH, Dec. 1977, p. 717). Should we take up arms and fight for Monsanto's product? Or should we passively support government by turning our backs on the problem. Our self-interest may play a part. Some of us have other plastic compositions for soft drinks. Some of us don't produce acrylonitrile, we buy it, and think that more supply and less demand for acrylonitrile might help our costs, short term anyway. Monsanto says, and I believe them, that the tests show no acrylonitrile-related pathological changes for a child drinking 3000 quarts of cola every day for a year. How wild can government get? And what are you and I going to do? Are we going to fight this unwarranted bureaucratic overkill, or will we compromise?

I haven't time to cover many other "endangered species" such as tetraethyl lead, fluorocarbons, vinyl chloride, pentachlorophenol, 2,4-D, and 2,4,5-T, to name a few. Or other problems such as Dow's $500 million investment in California that never happended. After $4 million in expense and $6 million for land, Dow scrapped this petrochemical plant because we couldn't get the permits, even though the pollution control authorities considered it the cleanest facility they had ever seen, the local population wanted it badly, and it would probably pollute less than the present farming. It was another victory for bureaucratic overregulation, and defeat for the public interest.

Stop and think. If all these are bellwethers, what kind of chemical industry will we have in the year 2000?

Maybe we do switch to accommodation too easily. Most industry was sure that the Common Situs Picketing bill would become law. Only President Ford's surprise veto saved it. Then President Carter promised labor he would sign it. But a lot of industry decided to fight the hopeless odds and the House turned it down. How about that!

Many of you didn't fight very hard against the SEC-induced NYSE rule that forces companies to elect "outside" directors under the guise of an independent Audit Committee of the Board. Dow didn't have a single outside director, but most of you did, and so this "camel's nose in the tent" dictating the composition of a board of directors was easier to accept than fight. It didn't hurt you right away, so you bought it. I wonder whether you will like the next government mandate on the make-up of boards of directors? Remember the camel in the tent!

A while back we in chemicals had unfair (we said) competition from oil companies in such things as plastics because oil companies had "tickets" to import cheap oil. We didn't fight to eliminate controls. We, and that includes Carl Gerstacker, fought to get our share of "tickets" from government, and we got some. Oil and gas are still under controls of many kinds and I think these controls are a bad mistake. Maybe we should have fought, back then, for decontrol instead of just taking our share of government largesse from controls. Did we take the short term, easier way out?

Every company's primary corporate goal is long-term profits, but we must always weigh carefully the factors that influence our profitability, especially when government is involved. Sometimes we are tempted to ask the government to get involved in our businesses in ways that will increase our earnings or minimize our losses. When things get so bad that we welcome government controls we perform an act somewhat akin to Cleopatra's clasping the viper to her bosom. That, at least, is my experience.

We are living in an era of crisis mentality. The press and the public believe in these crises, most of which originate in government. We move from the vinyl crisis to the Kepone crisis to the Red No. 2 crisis to the acrylonitrile crisis, and then to the saccharin crisis. In between times we have the aerosol crisis, the Toxic Substances crisis, the multinational company crisis, New York City's crisis, the energy crisis, and some of these have sub-crises such as the natural gas crisis, and the cold weather crisis, not to mention

such old stand-bys as the population crisis, the unemployment crisis, the environmental crisis, and the consumerism crisis. On any given day we have a wide choice of crises to work on.

This is not a new development. James Madison spoke in the early days of the republic of "the old trick of turning every contingency into a resource for accumulating force in the government." This is still happening today, but we now have the power and immediacy of television. Crises sell newspapers. The financial problems of business do not. The only exception is when they go "belly up", as in the case of Penn Central, and the press and public then ask "What happened? Why didn't someone tell us?"

I believe it is time for each of us to take a broad, searching look at our attitudes and come to grips with the question of the long-term welfare of our industry. If it is in our best interests to smile and compromise and charm the government, then let us select our best charmers and send them to do the job. If it is in our best interests to battle with everything we've got, let's pick our best fighters and send them.

You will surely ask whether there are not alternatives to "fight" or "switch." Well, in some cases we should fight, in others switch. I recognize that. Let us make sure that we entertain both possibilities, make our decisions wisely, and then follow through with all the muscle we have. And if we choose to fight, we must somehow generate enough enthusiasm in that silent majority of our employees and stockholders to get them actively to contact Congressmen, the President, and others. President Carter is urging us to fight overregulation and waste. Let's take him at his word.

I have a general feeling that the chemical industry in recent years has been floating with the tide. Now I fear that we're dangerously close to, and may be pulled over the falls of disaster—that disaster being complete government control of our industry. It won't happen today or tomorrow, but how would you bet on where we'll be after 25 more years of the downhill progress we are making?

I suggest to you that we need to shake loose from the old ways, to start paddling in the direction we want the industry to go. We need to start paddling now and together.

(Carl A. Gerstacker was chairman of the board of The Dow Chemical Company from 1960 to 1976. In addition to his continuing directorial duties at Dow, he is a director of Carrier Corp., Eaton Corp., ConRail, Dundee Cement, Dow Corning, and K-Mart Corp. He is a former president of the Synthetic Organic Chemical Manufacturers Association, and former chairman of the Manufacturing Chemists' Association; a trustee of the Starr Commonwealth for Boys, Northwood Institute, The Macromolecular Institute and the Reproductive Biology Research Foundation; a member of the Rockefeller University Council; and chairman of Albion College Trustees. Gerstacker joined Dow in 1938 after graduating from the University of Michigan with a B.S.E. in chemical engineering. Until 1940 he was on the accounting staff of the company's Dowell Division. He then served six years with the U.S. Army, attaining the rank of major with the Ordnance Department before returning to Dow in 1946, first as a production engineer and then as a purchasing agent. He was elected a Director in 1948; named a vice president in 1955; a member of the executive committee in 1957; and has been chairman of the finance committee since 1959. He and his wife, the former Esther Little Schuette, live in Midland, Michigan. They have four daughters and one son. ●

## THE THIEVES THRIVE

### HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. PICKLE. Mr. Speaker, for years now I have attempted to see legislation passed to put teeth in our Government's effort to fight cargo crime.

The opposition to my approach still runs strong in some quarters. Mainly, some in the transportation industry say legislation is not needed, that industry/government voluntary efforts are working.

A recent story from New York shows that thieves still thrive at John F. Kennedy Airport. This is ironic since crime at JFK brought the cargo security problem to light about 10 years ago. After much ado, the airlines and local authorities maintained that the situation was under control.

The Queens, N.Y., district attorney, Mr. John J. Santucci, has stated otherwise. The evidence appears to substantiate his charges that all is not well at JFK. Neither is it well at many other airports, docks, ports, or terminals.

I commend Mr. Santucci and ask that an article from the March 31, 1978, New York Times be placed in the CONGRESSIONAL RECORD:

[From the New York Times, March 31, 1978]

NINE INDICTED IN "MASSIVE" KENNEDY THEFTS; SANTUCCI CHARGES "COVER-UP" AT AIRPORT

(By Pranay Gupte)

Nine men, including a New York City police detective, were indicted yesterday by a grand jury in Queens on charges of hijacking millions of dollars worth of cargo and stock certificates at Kennedy International Airport and selling them.

The Queens District Attorney described the hijacking and sale as a "massive operation."

At a news conference at his office in the Queens Criminal Court Building, the District Attorney, John J. Santucci, accused various law enforcement agencies, including the Federal Bureau of Investigation, as well as airlines, of noncooperation in his investigation.

Mr. Santucci said these organizations had been, in effect, deceptive in "repeatedly" telling his office that there was "no crime at the airport."

"We believe there are efforts being made at the airport to cover up—whether for public-relations reasons or what, I don't know," the prosecutor said.

"We've had difficulty with the F.B.I.," he continued, "What concerns me greatly is that at every meeting we're told that Kennedy Airport is a 'Garden of Eden.' Nobody cooperates in these investigations. If I want to fandango, I go to a dance, not to meetings with these law enforcement officials."

A spokesman for Federal Bureau of Investigation, when informed about Mr. Santucci's remarks, said that there would be no immediate response from his agency. But other bureau officials pointed out that the agency maintained a permanent staff of a dozen agents to monitor criminal activities at Kennedy Airport and that several arrests had been made over the last few years as a result of these agents' efforts.

Asked what he thought was behind the bureau's alleged noncooperation, Mr. Santucci shrugged.

He said that perhaps the bureau was "jealous" of other law enforcement authorities, such as his office. "The F.B.I. is part of a group telling me that there's no crime at Kennedy Airport," he said. "I don't know why."

Mr. Santucci then accused airline shippers and labor unions of "conspiracy and collusion" and said that in many instances shipping concerns, manufacturers and various airlines handling cargo failed to report thefts.

THEFTS NOT REPORTED

"They only report it to their insurance companies, which pay them, and everybody knows that the consumer pays with higher rates," he said. "Somewhere along the line, people find it profitable not to report thefts."

"There is something strange about these proceedings," Mr. Santucci said.

The prosecutor said that yesterday's indictments of the nine men stemmed from a seven-month undercover investigation by his office. He said that members of his staff had been able to buy, for 10 percent of the market value, such goods as radios, stereos and tape recorders, cameras, bullet-proof vests, telephone "debugging" gadgets and musical instruments.

He said that undercover agents had also been able to buy negotiable stock certificates that had been stolen early this year from the Union Pacific Corporation. Mr. Santucci said that these certificates were blank, that any number of shares up to one million could be entered and that since the company's stock was recently trading at about $42 a share, each of the certificates could have been represented as having a value of up to $42 million.

The police detective who was indicted by the grand jury was identified as Patrick Santoli, 36 years old, of Holbrook, L.I. He had been assigned to the Police Department's automobile crime unit, and the indictment accused him of possessing and using an unnamed device that had been stolen from the airport.●

## REPRESSION IN SOUTH AFRICA: CONGRESSIONAL ACTION STILL NEEDED

### HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. BONKER. Mr. Speaker, last fall, the House passed by an overwhelming margin House Concurrent Resolution 388, strongly denouncing gross violations of human rights in South Africa. Despite all the attention to "reforms" in South Africa's sports policy and adjustments in domestic regulations, there is no indication that the imprisonment and mistreatment of political dissidents has abated. The terrorism act and other repressive legislation which sanction violations of human rights still stand.

Aside from taking further action in Congress, there are constructive initiatives which Members can undertake during visits to South Africa. In a recent letter to the ad hoc monitoring group on South Africa, Amnesty International suggested types of initiatives which might be most appropriate during visits

there. I would like to insert relevant portions of this letter in the RECORD for the benefit of colleagues concerned about the deterioration of human rights in South Africa.

In addition, I would like to call attention to an emerging problem facing white South Africans confronted with military conscription. Increasing numbers of conscripts are presented with a difficult moral dilemma in having to join an army illegally occupying Namibia, and serving as a force to suppress domestic discontent, as was the case in Soweto recently.

Tragically, South Africa has no provision for conscientious objectors, nor does it provide means of alternative service. Consequently, increasing numbers of South Africans are feeling morally obligated to leave their country as refugees, for reasons which, ironically, few countries, including our own, are willing to recognize as sufficient basis for allowing entry and diplomatic protection. An article by David Martin in the London Observer describes this growing problem, and I include it in the RECORD at this time:

EXCERPTS FROM A LETTER TO THE AD HOC MONITORING GROUP ON SOUTH AFRICA FROM AMNESTY INTERNATIONAL, MARCH 24, 1978

There are efforts which are perhaps best undertaken by individual Members of Congress in their public (though non-legislative) capacities. We are particularly sensitive in this country to the relative newness which African issues hold: they are not ones with which the American public has had long experience. Amnesty International has been trying to locate and at times create an audience for precise information about the practice of apartheid in an effort to focus international attention on the extreme hardship which that philosophy imposes on life in the Republic. We would hope that each member of your Ad Hoc Monitoring Group would make our Report available to his constituency.

While initiatives from outside the Republic are essential, we also urge you to consider sending delegations of your members to South Africa in order to:

(a) pursue cases of political imprisonment in which official responses to your inquiries have been unsatisfactory;

(b) meet South African parliamentarians and express to them the abhorrence with which their security legislation is regarded in other countries. This second point is, we believe, of great importance since the South African Parliament contains almost no members willing to question, let alone oppose, the Government's policies in this field. You, as United States Congress people, could have access and even influence which would be possible to no other national or international body.

(c) meet with African and minority political leaders, many of whom are imprisoned, banned or banished with consequent denial of their access to public fora.

In addition, it is frequently helpful for external observers to attend trials, both to indicate foreign interest and to ensure, to an extent, that proper judicial process is not abrogated. This applies not only to overtly political trials, but also to those taken under racially discriminatory legislation. In this context we would also recommend that Members of Congress request to visit prison facilities, including Robben Island.

It is necessary that international pressures remain vocal; both private and public voices must continue to protest the existence of repressive legislation in South Africa. Not only is the legislation itself harsh and socially obstructive, but the punishment which accompany indictment and conviction are severe, ranging from long sentences to capital punishment. The conditions of banning and house-arrest, as well as internal exile, prohibit any convicted person from participating in a normal life, and these deprivations are often seemingly arbitrary.

We hope, therefore, that you will continue to work under a dual mandate, whereby broad pressure for the unconditional repeal of security legislation, such as the Terrorism Act, which is incompatible with all due process principles, is under-pinned by action on behalf of individual prisoners; legislation and its implementation are two aspects of a single issue. We hope that the Ad Hoc Monitoring Group will continue its work on behalf of prisoners of conscience in jail or who are under banning orders or house arrest. Your members should also be willing to make appeals in cases where an individual is arrested and past experience suggests a high risk of torture.

The issue of torture requires separate mention here. As media reports have recently recounted in some detail, and as our report describes, there have been many documented cases of torture and deaths in detention. We hope that any appeal to the government of the Republic, and all public statements, will draw attention to these facts and underscore our feeling that such treatment is in all cases reprehensible. In addition, pressure for public autopsies, with international representation, in the growing number of cases where detainees die in police custody, is needed. Here you might utilize American legal and medical forensic expertise.

Although our report outlines only the situation surrounding political imprisonment, it is clear that the entire legislative and judicial apparatus in South Africa is based on a philosophy of separatism which precludes just treatment or equal status for South African citizens. The corpus of discriminatory legislation is extensive. Pressure for the repeal of those laws is urgent. It should be noted also that the current policies for relocating Africans in bantustans both circumscribes individual mobility and abrogates traditionally conceived rights to and of citizenship.

As legal norms have been progressively eroded, the number of those citizens of all races who undergo imprisonment or other forms of persecution as a direct consequence of discriminatory law and policy has increased. One result has been a sizeable refugee exodus to neighboring African states and to some European countries. The number of South Africans who have obtained asylum in the United States has so far been relatively small, but we hope that increased recognition by Congress of the exigencies of the South African situation will result in a relaxation of admission procedures for refugees, detainees and those under threat of persecution.

As an international organization, Amnesty International works within the context of the United Nations programs. 1978 has been designated International Anti-Apartheid Year. It is also the 30th anniversary of the Universal Declaration of Human Rights. While the UN has done major work in documenting human rights violations in South Africa and in directing international action, much effective pressure can only be exercised bilaterally. Here, for reasons which are apparent, the United States Congress has a unique role to play. As the one Congressional body which focusses solely on South Africa, we feel that the Ad Hoc Monitoring Group has an unusual opportunity to exert influence on the South African Government and Parliament.

(Article written by David Martin which appeared in the London Observer on Dec. 18, 1977.)

LUSAKA.—Large numbers of young South African men who are liable for two years military conscription including the possibility of combat service in Namibia are leaving their homeland to become draft dodgers, according to a group of them in the Botswana capital, Gaborone.

They estimate the numbers of draft dodgers in "hundreds". Most of them, they say, have gone to Europe on the pretext of further education. But few are likely to return while the call-up is still in force. At the same time a small flow of deserters is beginning.

One of the draft dodgers in Gaborone is John Coast, a 26-year-old Cape Town University graduate who arrived in Botswana by train at the end of November.

He was ordered to report to the Lions Head Commando on 7 October for three months service in Namibia where South African troops are fighting guerrillas of the South West Africa Peoples Organization (SWAPO). Because of examinations his call-up was deferred until 1 December and four days before that he left South Africa for Botswana.

"I would not have left South Africa if I had not been called up," he said. "But I am not prepared to do active service especially in Namibia. One knows that the security forces are basically a suppressive force and that Namibia is an illegally occupied country."

In South African schools all white male citizens and noncitizens who have lived in the country for five years are registered for military service at the age of 16. Unless they are going on for further education they are liable for call-up at 17. Those who receive academic deferments are monitored and if a three-year course is not completed in five years the deferment ends.

Hitherto there has been virtually no publicity about South African draft dodgers and deserters. However in August the United Nations World Conference For Action Against Apartheid in Lagos passed a resolution urging member states to "grant immediate political asylum to bona fide war resisters and deserters from the apartheid armed forces."

That clause attracted little attention and few member states appear to have considered its implications. The South African draft dodgers and deserters are encountering difficulties in finding countries willing to accept them as political refugees because they are white, and even Sweden which took in many American Vietnam War draft dodgers has proved unhelpful.

A South African deserter who arrived in Gaborone on 3 December says the United Nations told him they would give him a ticket to Europe if he could produce a letter saying Sweden or any other country accepted him. But the Swedish Mission in Gaborone declined.

Mr. Coast said he was treated with "antagonism" when he saw a diplomat in the British High Commission Consular Section in Gaborone. He says that the diplomat suggested he should return to South Africa, saying that nothing would happen to him—although he would certainly be imprisoned for refusing to do military service.

In Botswana there are at least a dozen draft dodgers and deserters waiting for countries to accept them. Two deserters have arrived this month. The bulk of the draft dodgers who have passports and can afford tickets are flying direct to Europe.

Mr. Graham de Smidt, a 26-year-old Cape Town teacher, became a draft dodger in July, also after receiving a three-month call-up for service in Namibia. He tried to fly out from Johannesburg airport to Europe but his pass-

port was seized. A few days later, with his wife, he walked across the border into Botswana.

He was also not prepared to fight in an illegal occupation army in Namibia. He sees the South African Army as a force to maintain the white regime, discrimination and privilege. "What is really taking place in South Africa is a civil war where it's South Africans fighting South Africans and I was not going to be part of that."

Even conscientious objectors are forced to serve in the army, Mr. de Smidt said, but at the discretion of the commanding officer need not carry arms. Members of religious orders like Seventh Day Adventists, Buddhists and Jehovah Witnesses are put into detention barracks. And homosexuals are kept in Ward 22—the psychiatric unit—at Voortrekkerhoogte hospital in Pretoria.

One of the deserters in Gaborone, who was unwilling to be named because he feared it would compromise his being admitted to another country, spent five months in the South African Army. He said he had initially intended to become a draft dodger but did not have the money for a ticket to Europe and he finally gave way to pressure from his family.

After basic training he was posted to the Directorate of Information Systems and Analysis (DISA) in Johannesburg. The unit's prime task was to compile a computerized system on all South African white males with the ultimate objective that identity and military numbers would be identical. Personal details such as religion, date of birth and next of kin were fed into the system.

The unit's secondary function was as the SOWETO TASK FORCE to be called in if the police were losing control. The deserter was absent without leave and crossed into Botswana after his unit was put on standby as a result of expected trouble in Soweto during December.

For this task the unit was given specialised training including the use of the "D Formation". This consisted of a formation of three platoons of sharpshooters on the outer perimeter of the D-shaped formation with a headquarters platoon in the centre.

The formation drew up 200 yards from a crowd and the commanding officer first warned them that it was an illegal assembly and gave them three minutes to disperse. If they failed to do so tear gas was fired. If this still failed, about five "ringleaders" were selected and identified by the commanding officer and a marksman was ordered to shoot them dead one at a time. Thereafter, if the crowd still did not disperse, the soldiers were ordered to put their weapons on automatic and fire at will into the crowd.

The deserter said that during his five months service he continually encountered "naked racism" and anti-semitism. "The attitude of officers and recruits alike was that blacks were just kaffirs and one lieutenant told a Jewish recruit that he wished Hitler had killed all the Jews."

Political indoctrination lectures stressed that South Africa was fighting Communism and a lecturer told them that 75 percent of South Africa's newspapers were owned by Communists. The lecturer said he knew this was true because he had been told so by the Chief of the Rhodesian Army.

The deserter never served in Soweto. But he says that during training a Sergeant Major Keet told recruits that there had been reports in the press of a mass grave in Soweto after the June 1976 riots and official reports had put the death toll at around 160. The Sergeant Major said this was incorrect, that there had been eight mass graves and that the death toll was about 800.●

## REPRESENTATIVE PAUL SIMON DISCLOSES INCOME DETAILS

## HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. SIMON. Mr. Speaker, for 23 years I have been making detailed disclosure of my income assets and liabilities. I have followed this practice during my service in the Illinois House and Senate, as Lieutenant Governor of Illinois and as a Member of the House for the past 4 years.

I do not fault others for not making such statements, but I think our rules do not go far enough in requiring the same disclosure detail that I have included in my yearly reports. For example. I think our rules should be clear in requiring detailed accounting of income for spouses and minor children of Members of Congress, and professional fees earned by those of us in positions of public trust.

I have made these yearly statements voluntarily and I don't think they have done me any harm. I think complete financial disclosures offer the public the best means possible to determine for themselves whether their Representatives are serving the public interest or some special interest. I am confident that few of us have anything to be ashamed of, but I think we build public confidence in government by making the details of our personal finances a matter of public record.

As I have done each year since I began serving in the House, I am publishing my financial statement in the RECORD, along with statements from members of my staff earning over $15,000 per year, another practice I have followed since my years as Lieutenant Governor. I hope other Members will join me in this practice.

WASHINGTON, D.C.—Congressman Paul Simon, on Monday, April 3, 1978, released his 23rd annual complete personal financial statement, including all income, assets and liabilities for himself, his wife and their two children.

In addition, the Southern Illinois congressman released financial statements for members of his personal staff with annual salaries of $15,000 or more.

Simon has been making the voluntary financial statements since 1955, when he entered the Illinois House of Representatives. He followed the practice during eight years in the state House, six years in the Illinois Senate, and four years as Lt. Governor, and continued it after election to Congress in 1974.

As Lt. Governor, he was the first state official in the nation to require similar statements of his staff members, a practice he continued when elected to Congress. Simon is believed to have followed the practice of complete personal financial disclosures longer than any other public official currently holding office in the United States.

Simon's statement lists 1977 income for himself and his wife, Jeanne, totaling $73,666.19. The figure includes his House salary, reimbursement for travel and other expenses, rental income, stock sale, interest and dividend income, honoraria for appearances, book royalties, payment for three articles and some miscellaneous items. Simon's 1976 income was $64,581.47.

The statement also shows assets (as of Jan. 1, 1978) of $243,031.17 and liabilities of $121,585.30, for a net worth of $121,445.87—contrasting with a Jan. 1, 1977 net worth of $111,335.78.

In addition to statements of income and assets for his children, Sheila and Martin, Simon also listed four gifts he received in 1977, with values greater than $25.00, a practice he began last year.

He noted that he received a coffee maker from the Building and Construction Trades, valued at about $35.00, hotel lodging of undetermined value from the government of Cyprus during his official trip there last summer for the funeral of Archbishop Makarios; quilts from Mrs. Stanley Maciewski of Chester and friends in Troy, Illinois, the value of the quilts undetermined; and a painting (of undetermned value) of a Southern Illinois scene from the artist, Ms. Jackie Rainer.

"I think these financial statements are the best way to deal with the potential conflict of interest problems that may arise during public service," Simon said in releasing his 23rd annual statement.

"They allow constituents to decide for themselves whether an office holder is serving the public interest or some other interest."

The complete Simon financial statement follows, along with statements for the following members of his staff:

Ray Buss, district assistant; Ray Johnson, office manager; Terry Michael, press secretary; Judy Wagner, legislative coordinator; Nick Penning, legislative assistant; and Virginia Otterson, office manager, West Frankfort office.

---

TWENTY-THIRD ANNUAL FINANCIAL STATEMENT, CONGRESSMAN PAUL SIMON, 24TH DISTRICT OF ILLINOIS

INCOME FOR 1977

STAFF DISCLOSURES SUBMITTED TO CONGRESSMAN SIMON IN MARCH 1978

*Ray Buss, District Assistant*

1977 income other than government: Rental income, $8,650.

Sources and amounts of indebtedness over $500: Mortgage, Carbondale Savings & Loan, $56,560; mortgage, Mary Licos, $9,600; personal loan, Salem National Bank, $16,200.

Stocks and bonds owned: None.

Property owned: Apartment house, $100,000; household furnishings, $7,000; Buffy Bear (sheepdog), $107.

*Ray Johnsen, Office Manager*

1977 income other than government: Troy Publishing Co. stock sale, $15,000 (80.74 capital gains, $12,111); rental income, Troy property, $3,353; General Motors, Inc., dividends, $70.60; Roadhouse Record, Inc., dividends, $180; Alpha Portland Industries, dividends, $11.04; Wright Patman Congressional Federal Credit Union, interest, $9.29; Missouri Portland Cement, interest, $239.42; Metropolitan Life, interest, $18.43; Suburban Savings & Loan, interest, $78.87; General American Life, interest, $114.51; American Savings & Loan, interest, $31.99; Bankers Life, interest, $95.48; Metropolitan Savings & Loan, interest, $8.47; Perpetual Savings & Loan, interest, $114.48; and Troy Publishing Co., interest, $863.25 (totaling $17,299.83).

Sources and amounts of indebtedness over $500: Washington & Lee Savings and Loan, $29,635.72.

Stocks and bonds owned: Wright Patman Congressional Federal Credit Union, $157.84; 150 shares Cottonwood Junction, Inc., $10,000; Series E Bonds, $543.75; H. J. Porter, bonds, $5,070; 400 shares, Laclede Steel, $3,800; 24 shares, Alpha Portland Cement, $432; 24 shares, Watson Lumber Co., $7,200; 21 shares, General Motors, $1,340; Perpetual Savings & Loan, $4,114.48 (totaling $32,658.07).

Property owned: State of Illinois Employees Retirement System, $1,772.01; real estate, Arlington, Va., $95,000; real estate, Troy, Ill., $30,000; household furnishings, $15,000; 1978 Chevrolet, $6,000; 1975 Volkswagen, $2,000 (totaling $149,772.01).

*Terry Michael, Press Secretary*

1977 income other than government: $35 interest income.

Sources and amounts of indebtedness over $500: Wright Patman Congressional Federal Credit Union, auto loan, $4,800.

Stocks and bonds owned: shares, Wright Patman Congressional Federal Credit Union, $1,964.

Property owned: 1976 Lancia Beta Coupe, $6,000; household goods, $1,200.

*Nick Penning, Legislative Assistant*

1977 income other than government: $1,743.09, Plains Television Corp., Springfield; $11.31, Springfield Sacred Heart Credit Union; $18.64, Wright Patman Congressional Federal Credit Union, interest; $50, Congressman Paul Simon, payment for assistance with magazine article.

Sources and amounts of indebtedness over $500: $44,622.77, Robert Heltzel Co., Manassas, Va., for home mortgage.

Stocks and bonds owned: $25 U.S. Savings Bond for daughter Lisa Kathleen Penning.

Property owned: 1976 Dodge Aspen Station Wagon purchased new in 1976 for $4,354; residence at 1122 S. Harrison, Arlington, Va., purchased 2/14/77 for $49,700.

*Virginia Otterson, West Frankfort Office Manager*

1977 income other than government: wages of husband, Robert H. Otterson, Old Ben Coal Corp., $24,081.65; interest income—GSA Series H. Bonds, Lincoln National Life Insurance, First Community Bank of West Frankfort, Bank of West Frankfort, totaling $2,459.35; dividend income—Affiliated Funds, C.I.P.S., First Community Bank of West Frankfort, Keystone Fund B-1, Roosevelt National Investment Co., Boca Raton National Bank, totaling $1,525.44.

Sources and amounts of indebtedness over $500: None.

Stocks and bonds owned: 34 shares, Boca Raton Bank; 2 shares, Fidelity Bank; 2 shares, Citizens Bank; 300 shares, C.I.P.S.; 102 shares, Keystone B-1; 100 shares, Roosevelt Investment; 4 Illinois Central bonds; 100 U.S. Leasing Warrants; 1,600 shares, Affiliated Fund; 42 shares, First Community Bank; all totaling about $28,500; GSA Series H Bonds, $10,000; Series E Bonds totaling $10,875.

Property owned: real estate, West Frankfort, $29,500; 4 lots, West Frankfort, $3,000; 1977 Buick, 1972 Pontiac, 1971 Camaro totaling $8,000; 1972 travel trailer, $1,500 household goods about $5,000.

*Judy Wagner, Legislative Coordinator*

1977 income other than government: $587, interest on accounts at Perpetual Savings & Loan and Senate Credit Union.

Sources and amounts of indebtedness over $500: American National Bank (home mortgage, $81,736; Mrs. Dorice Bumpus, personal note, $8,070; U.S. Senate Credit Union, $4,082; Master Charge, $751; Maryland National Bank, $879; Sears, $520.

Stocks and bonds owned: None.

Property owned: residence, Bethesda, Md., $110,000 (1976 appraisal); farm house, purchased in 1976, Gilmanton, N.H., $25,000; 20-acre lot in Gilmanton, N.H., purchased in 1974 for $16,000.●

## MALVINA REYNOLDS, SINGER-ACTIVIST, DIES

### HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. DELLUMS. Mr. Speaker, Malvina Reynolds, a personal friend of mine who was known throughout our country as a singer/songwriter who cared deeply about all people, died recently in Oakland, Calif.

I would like to share with my colleagues an article that was published shortly after her death that shows the important contribution Ms. Reynolds made to our culture. She will be greatly missed.

MALVINA REYNOLDS, SINGER-ACTIVIST, DIES

(By Bob Fordham)

Celebrate my death for the good times I've had,
For the work that I've done and the friends that I've made,
Celebrate my death of whom it could be said,
She was a working class woman and a red,
My man was the best, a comrade and a friend,
Fighting on the good side to the very end,
My child was a darling, merry, strong and fine,
And all the world's children were mine.

Her snow-white hair and her guitar were familiar sights at rallies and marches of the last two decades. Her voice was high and croaky, but when she sang people listened.

Malvina Reynolds, songwriter and social critic, died Friday morning in Oakland of kidney failure. She was 77 years old. She was hospitalized Wednesday after being stricken at her Berkeley home.

Reynolds was perhaps best known for her song "Little Boxes," which lightheartedly criticized life in modern suburbia. She was inspired to write the song in 1964 while driving past a Daly City housing tract.

It has been said that Reynolds wrote "Little Boxes" in the car. "Whether this is true or not I can't say," said Ruth Bernstein, Reynolds' business manager since 1964. "But Malvina always carried a pencil and a piece of paper. When something moved or provoked her, she wrote a song."

Bernstein estimated that Reynolds wrote between 500 and 600 songs. "Most were not recorded and many had non-social themes," Bernstein said. "Malvina wrote songs for friends, songs about dieting and going to the dentist."

"It's my way of talking, that's all," Reynolds said of her music. "Everybody has a way of saying something and mine happens to be a very satisfying way."

Malvina Reynolds was born in 1900 in San Francisco. An honor student at Lowell High School, she was not permitted to graduate because her parents opposed America's involvement in World War I.

Despite her lack of a high school diploma, Reynolds attended UC Berkeley, where she eventually earned a doctorate in romance philology.

Reynolds worked as a steel worker, a social worker and a newspaper editor during the Depression and World War II. She married William Reynolds, a carpenter and a draft resister during World War I.

Reynolds was over 50-years-old when she began her musical career. When she returned to the Berkeley campus to study music in 1951 she met folksinger Lou Gottlieb of the Limelighters, who encouraged her to write music.

With her first "hit" song, "Turn Around," recorded by Harry Belafonte, and later with "Little Boxes," Reynolds' fame grew. Her songs were recorded by Pete Seeger and Joan Baez.

Although she performed throughout the world, Reynolds' home remained Berkeley. Friends and music were always welcome in her modest house on Parker Street.

Reynolds had, in fact, become something of a local institution in recent years. She could usually be seen at anti-war demonstrations in the late 1960s and she hosted a folk music program on radio station KPFA.

Official recognition of her contributions to Berkeley came on Reynolds' 77th birthday last Aug. 26, when the Berkeley City Council declared that day "Malvina Reynolds Day." A huge party was held that night for her at the La Pena Cultural Center and the adjacent Starry Plough Pub.

Another Berkeley social music institution, Country Joe McDonald, was aided and influenced in his musical career by Malvina Reynolds. "She was one of the first people I met in Berkeley," McDonald said. "She really encouraged me and helped me get started. Malvina influenced the music of Baez, Dylan and Phil Ochs as well as my own."

Despite the success of "Turn Around" and "Little Boxes," Reynolds never attained widespread acceptance or financial success. She had trouble finding work in the '50s and late '60s because of her political views and activities. "Right wing groups were often putting pressure on concert promoters not to hire her," Bernstein said.

"Malvina wouldn't have turned down success," said McDonald, "but she had a role as a woman and a mugwump which were more important. There wasn't really a place for her in mainstream music."

Reynolds kept singing and protesting to the end. Her latest concern was over the dangers of nuclear power. She had planned to sing at a pro-solar rally in Bellingham, Washington, in two weeks. She was concerned with rape and last year wrote a song called "The Judge Said" in response to the lenient acquittal of a rapist in Madison, Wisconsin.

In lieu of a funeral, there will be a memorial concert sometime within the month. Instead of flowers, her family has requested that contributions be sent to Bay Area Women Against Rape, People Against Nuclear Power, or the National Council Against Repressive Legislation.●

## AMERICA'S CIVIL DEFENSE: DOES IT EXIST?

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. DORNAN. Mr. Speaker, it is all too easy to be misled by the defense budget that the Carter administration has submitted to Congress, calling for a 3-percent increase in defense spending for fiscal year 1979. This increase, amounting to a total expenditure of some $115 billion, tends to reassure those of us who have actively urged the administration to repair its growing defense gap. However, such reassurance is illusory, and the cause for it premature.

That is, in the so-called hard areas of our national defense budget such as strategic forces or civil defense, we are actually spending less. We are spending less, because the White House still favors the myth that the Soviet Union has become more pacifist, that its strategic designers are really just plain good ole boys rather than aggressive and well funded war planners who mean business. If the Soviets appear sometimes, rarely, as benign or ideologically wearisome as our State Department press release writers seem to believe, in the final analysis, we can never trust an ideology which accepts lying as state policy and no U.S. administration has the right to play such a large gamble over the ultimate survival of our Nation in the face of the greatest threat to peace and liberty in the history of mankind.

Our Nation's civil defense system is equivalent to a national life insurance policy in this world of ever-present dangers. The Soviets know this, explaining why they have spent incomparable sums of money to build a system incorporating both "collision" and "comprehensive" features in the nuclear age. In effect, the Soviets are steadily improving their civil defense system in order to approach what they regard as a possibility, the perverse prospect that for the Soviets an eventual nuclear confrontation might become profitable.

We must protect our population with the same regard for life as any state on the planet. We have a responsibility to see that our fleeting civil defense system is repaired. Mr. John G. Hubbell, the distinguished roving military editor for the Reader's Digest, recently wrote a capsuled analysis of where we stand in relation to the Soviets in the area of civil defense. It is based on the latest intelligence estimates, and it is must reading for all of us. I request that his analysis be incorporated into the RECORD.

SOVIET CIVIL DEFENSE: THE GRIM REALITIES

RUSSIA'S ELABORATE BLUEPRINT FOR SURVIVAL IN THE EVENT OF FULL-SCALE NUCLEAR WAR AFFECTS THE BALANCE OF POWER AND THE FREE WORLD'S SECURITY

(By John G. Hubbell)

The evidence is unmistakable and omninous. The Soviets have added a major civil-defense component to their military posture—an addition which, in a superpower showdown, could prove decisive.

Item: U.S. intelligence has located, at 75 points adjacent to the beltway encircling Moscow, huge steel spheres—each containing communications centers, emergency power sources, sleeping areas, food and water storage. Reserved for the Politburo, military general staff and high-level Soviet bureaucracy, they have been sunk 600 feet into the ground, then covered with earth and reinforced concrete. Similar shelters have been built in and around major cities throughout the U.S.S.R.

Item: Since the early 1960s, the Soviets have been dispersing their new industrial complexes in widely scattered locations over the length and breadth of Russia. Even single factories, which in the United States would be housed under one roof for efficiency's sake, are divided into many buildings so separated from one another and with machinery so protected that destruction would require numerous nuclear warheads. And every factory in Russia now has blast-resistant underground shelters sufficient to accommodate its largest work shift.

Item: All Soviet factory workers devote at least two to four hours per month to civil-defense training. Moreover, civil-defense education begins in the second grade and continues on a compulsory basis up to age 60.

Item: Reconnaissance satellites have located huge underground food-storage facilities throughout the U.S.S.R. Intelligence sources explain that the Soviets plan to store away enough food (with the help of U.S. grain purchases) to feed themselves following a nuclear exchange—at least until a new harvest.

Item: Throughout the U.S.S.R., special training sites have been built with fire-gutted buildings, downed power lines, and all the debris that would result from nuclear assault. Factory and municipal workers attired in gas masks and protective clothing learn to fight fires, decontaminate buildings, rescue people and restore services.

The Soviets have made no secret of this interest in civil defense. According to Harriet Fast Scott, a Washington-based consultant on Soviet military affairs who lived for years in Moscow, "Officials constantly stress that nuclear war is survivable and that 'civil defense is everybody's business.'"

By the mid-1960s, U.S. intelligence agencies had made several attempts to call attention to the Soviet civil-defense programs as a major effort which, if continued, could affect our own deterrent capability. The information was dismissed by some as irrelevant to arms control, and intelligence collection ceased in the late '60s. In 1972, we entered into the Anti-Ballistic Missile (ABM) treaty without taking Soviet civil defense into account. With the ABM treaty, Washington and Moscow agreed not to deploy weapons systems that could effectively defend against each other's nuclear missiles. In other words, we each made our population hostage to the threat of nuclear attack by the other. But the Soviets, with their continuing and increasingly elaborate civil-defense program, have been depriving us of our hostage—in effect, circumventing the intent of the treaty.

In 1972, the Soviets dramatically upgraded civil defense. Organized since 1961 under a central military command, it was now publicly ranked as a separate service of the armed forces on an equal footing with its army, navy and air force. Each of the U.S.S.R.'s 15 republics has a military commander and staff concerned solely with civil defense. In 1976, elite status was conferred upon civil-defense boss Col.-Gen. Aleksandr T. Altunin: he was elevated to full membership in the Central Committee of the Communist Party. Last year, he was promoted to full general.

There simply is no question that Russia is serious about civil defense. Says Prof. Leon Gouré, director of Soviet studies at the University of Miami's Center for Advanced International Studies: "Soviet leaders persistently call for a military posture that includes a war-survival capability. They see no point in being able to destroy an enemy if he is able to destroy them in turn. And as the disparity between the Soviet and American abilities to survive nuclear war becomes more pronounced, it becomes more difficult for the Kremlin to believe that the United States would engage in a nuclear exchange over a secondary issue; for example, on behalf of Israel or Japan or even Western Europe."

Nevertheless, many Americans still subscribe to the belief that a nuclear exchange would mean suicide for the country making the first move. Yet T. K. Jones, for three years senior technical adviser to former U.S. SALT negotiator Paul H. Nitze, offers some tough, mathematical reality to chew on:

Suppose the worst happens. A crisis gets out of hand, and the U.S.S.R. launches a nuclear first strike against the United States. Calculations show that half our strategic arsenal would survive such a strike. If all our surviving strategic weapons—all of them—were then delivered on the Soviet Union, they would kill all of the people in an area that amounts to only 2.7 percent of the U.S.S.R.'s geography. Retargeting these weapons to produce radioactive fallout would force the Russians to take shelter, but within a week of American retaliation the people in 97 percent of the Soviet Union would be able to leave their shelters for an eight-hour workday.

Had the Soviets not gone ahead with civil defense but had kept their population in the cities hostage to our nuclear arsenal, our deterrent force would still be effective. However, the Kremlin now is able to disperse its people over its agricultural lands, approximately 27 percent of U.S.S.R. territory—an area nine times greater than we can cover with our nuclear weapons.

The bottom line? Last year, in response to a query from Sen. William Proxmire (D., Wis.), Gen. George S. Brown, Chairman of the Joint Chiefs of Staff, estimated that ten Americans might die for every one Russian in a Soviet-American "worst case" nuclear shoot-out if the Soviets successfully evacuated their urban populations and the U.S. failed to take civil-defense measures. That means Russia's losses could be roughly half the 20 million lives it lost in World War II, and about four percent of the population—food for thought for Americans who have been educated in the myth that we can wipe out the U.S.S.R. many times over!

Clearly, the Soviets regard their civil-defense capabilities as a factor of immense strategic significance, one which is not matched in the American arsenal and which strongly supports Moscow's pursuit of its aggressive international designs. Without the advantage it provides, Soviet leaders surely would be much less likely to threaten our allies or challenge us in areas of vital interest.

What to do about it? For openers, our government can stop soft-pedaling the issue in the hope of achieving politically popular but dangerous arms-control agreements with the Kremlin. Indeed, there has been some minimal progress in this respect. Before he took office, Defense Secretary Harold Brown was publicly doubting the notion of an effective Soviet civil defense; but by last spring, he was taking a much more sober view, estimating Soviet civil defense expenditures at a billion dollars annually, ten times the U.S. investment. At the same time, an interagency intelligence survey was being drafted by the CIA which would put the Soviet investment much higher. Intelligence services in Western Europe have estimated $65 billion for the past decade.

Not incidentally, even before the interagency report had been written, people who had not participated in the survey were leaking to the press alleged conclusions demonstrating the Soviet civil-defense activities had declined since 1973 an were not cause for alarm. Accordng to participants, the highly classified study shows no such thing.

We must face the facts. According to Jones, Professor Gouré and others who have studied Soviet civil defense closely, we have no choice but to get into a civil-defense program, although we need not do so on the massive, activist, hugely expensive scale the Russians have. Jones and Gouré believe that with reasonable expenditures for shelters and crisis evacuation, at least 90 percent of our population could be saved in a nuclear attack. Bomb-damage calculations show that there is no need to uproot and scatter our essential industry and work forces across the landscape, but zoning laws must be changed so that dangerous industrial clusters can be disassembled and factories spread out. An vigorous testing shows that industrial machinery can be rigged to withstand all but a direct nuclear hit. Factories can be fireproofed, and shelters built to afford some protection for workers.

Also needed is a trained professional civil-defense force, the basis of which already exists in the National Guard and the Red Cross. Augmented by veterans organizations and other civil groups, such a trained force could provide rudimentary instruction to the general public as well as direction in case of actual attack. Studies show that in times of crisis, people pay close attention to authoritative instructions, and act quickly on them.

Experts agree that an upgraded, well-planned civil-defense program need not cost much, that it would add perhaps $1 billion to a defense budget which now approaches $117 billion annually. And it would restore credibility to the American deterrent—credibility which has been diminished to a dangerous degree as a result of the massive Soviet civil-defense program.●

## POSTAL REFORM AND FAIR COMPETITION

### HON. JOSEPH D. EARLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 5, 1978*

● Mr. EARLY. Mr. Speaker, this past Thursday legislation was passed that should aid the U.S. Postal Service in maintaining public service at adequate levels and within acceptable cost ranges. Only one glaring error seriously marred this bill, H.R. 7700, and would have, but for the alertness of Congressman WILSON, eliminated USPS as a viable parcel post carrier.

Historically, Congress has been concerned that the Government not compete unfairly with private carriers for parcel post business. For most of this century, Congress has, in fact, required that parcel post pay a little more than any other class of mail. Congress has never maintained a monopoly on parcel post, though it has consistently protected private carriers from unfair Government competition. Since the turn of the century, however, there has been an evolutionary change in the parcel post delivery system. At one time the Government was the dominant carrier competing with a fledgling private industry. That situation no longer exists.

A narrowly designed amendment meant to primarily benefit a single business interest was adopted last Wednesday by a wide margin. I voted against the so-called Simon amendment notwithstanding the enormous write-in campaign waged by UPS. Private business interests latched onto an effective ruse that, simply stated, would have one believe that jobs in the private sector would be lost as the result of unfair competition from the Postal Service. That logic is unfounded and misleading. In terms of profitability, UPS has performed considerably above the average for large transportation companies. In 1974 and 1975, its return on equity (return on investment) amounted to 13 percent and 21.7 percent, respectively. The average return on equity for the 50 largest transportation firms (excluding UPS) was considerably less—6.5 percent in 1974 and 3.3 percent in 1975. During this same period UPS handled nearly 900 million parcels compared to the Postal Service's 338 million parcels. It can hardly be maintained that the Postal Service poses an undue competitive threat to private carriers.

Mr. Speaker, to argue that H.R. 7700 will harm private industry indicates a misunderstanding of the situation. Time, and time again, the U.S. Postal Rate Commission has handed down decisions indicating that rate changes requested by the Postal Service—ratemaking hearings at which private carriers were represented—could not "* * * cause undue adverse impact on the general public or business users." The Commission in a 1975 decision went further and noted that USP made no "claim that the lower parcel post rates proposed by the Service will have an injurious effect upon it."

Other arguments that the Postal Service is the beneficiary of hidden subsidies or cross-subsidies are simplistic in nature. Private parcel post carriers are well protected by H.R. 7700 in their legitimate interests. As originally reported from committee, H.R. 7700 would not have applied the 60 percent limitation on attributable costs to parcel post. Parcel post would be required to bear its full attributable cost, plus a fair share of all other costs. This would insure against unfair rate cutting should the Postal Service attempt to do so. Moreover, the Postal Rate Commission would be required by H.R. 7700 to consider in every rate case "* * * the effect of rate increases upon enterprises in the private sector of the economy engaged in the delivery of mail matter other than letters." The Commission itself has stated in previous decisions that parcel post rates must give appropriate consideration to the matter of competition and provide a "Reasonable contribution to the institutional costs."

Even the legislative history of the Postal Reorganization Act of 1970 makes it clear that Congress respected the old costing system for parcel post rates linked to full allocated costs. Congress, then, noted the specific competitive impact factors and stated that "* * * to go beyond that point would simply be to recommend provisions of law protecting a particular economic interest or limiting the availability of a Federal parcel delivery system."

Charges levied against the Postal Service that it is the beneficiary of subsidies giving it an unfair competitive edge in the parcel post industry are misleading. Some would have us believe that like any other business, the Postal Service should have to account for all costs and pass those costs on to the private citizen, presumably in the form of higher parcel post rates. This would be fair in a free enterprise system allowing for the usual marketplace forces in determining which entity should survive as the most efficient carrier. But, Mr. Speaker, these arguments are specious and misstate the actual forces impinging upon parcel post carriers, including USPS, when rates are set. In determining parcel post rates, including the recovery of all costs, particular attention must be given to the fact that alternative means of sending and receiving parcels must be made available to the public at competitive rates. It is undisputed that although households have alternatives to the Postal Service, they are still more dependent upon USPS than is the business community. Adoption of special interest amendments might lead to an inevitable disruption of adequate and competitive parcel post service in some rural and suburban areas. The Postal Service is a public service and not a business. The public demands not only 6-day mail delivery, but an alternative for parcel post delivery. Narrowly drawn amendments would effectively eliminate that choice.

Mr. Speaker, I believe it can be adduced from Postal Rate Commission hearings and the testimony of postal rate experts before the Post Office and Civil Service Committee, that H.R. 7700 emphasizes parcel post rates competitive with private enterprise. And, as it has been pointed out by several of my colleagues, the parcel post language in H.R. 7700 after an examination by an independent panel of rate experts, was judged as evenhanded in its treatment of all parcel post carriers.

In concluding, Mr. Speaker, I would add one more thought. Theoretically, the market forces should weed out those businesses that are inefficient and noncompetitive. That stands to reason within a business context. But the Postal Service is not a business. It is a public service and should continue to be one. My decision not to support the Simon amendment rested on the belief that the amendment was contrary to the national interest (insofar as Postal Service was concerned), would have fostered a possible monopolistic situation and would have possibly lessened the incentive for innovative, efficient and safe delivery of parcel post.●

## RISING COLLEGE COSTS

### HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. CORCORAN of Illinois. Mr. Speaker, an article in last week's Washington Post details a study recently released by the College Scholarship Service of the College Board, a nonprofit organization of schools, educational, associations, and scholarship agencies which proves, without a doubt, that the already aggravated problem of rising college costs is getting worse. The report says that it will cost an average of 6 percent more to go to college next year than it does this year. It also explains the fact that a resident student at a private 4-year college will spend more than $5,000 in the academic year starting in September.

Mr. Speaker, the advocates of college tax credits, including me, have been concerned about these educational expenses for quite some time. The people who would benefit from these tax credits are not looking for a free ride. We want to give them, through the tax credit approach, an "inflation offset" so that they can afford to educate their children. It is our belief that tax credits will get money back into the pockets of the individual so that he can decide for himself how it should be spent, not how the bureaucrats in Washington decide it should be spent.

Mr. Speaker, at this time, I would like to include the text of this article in the RECORD:

COLLEGE COSTS RISE; 4 YEARS COULD RUN $20,000

NEW YORK—It will cost an average of 6 percent more to go to college next year than it does this year, says a new study that shows that a resident student at a private, four-year college will spend more than $5,000 in the academic year starting in September.

That $5,000 is equivalent to about one-

third the median family income in the United States. And it means that even if there is no further inflation—and that is not likely—a freshman who enters a private school this fall and lives on campus will pay more than $20,000 for a college education.

The study, released yesterday, was conducted by the College Scholarship Service of the College Board, a nonprofit organization of schools, educational associations and scholarship agencies. The findings were based on reports from 2,693 colleges and universities.

Costs vary according to the type of institution involved and such factors as whether a student commutes or lives on campus.

The board study showed, for example, that 1978–79 school expenses for a commuting student at a public, four-year college will total $2,604, up 4.8 percent from this year. A student at the same school who lives on campus will spend $3,054, up 5.3 percent from this year.

The study estimates expenses at private, four-year colleges will average $5,110 for on-campus students, up 6.1 percent from this year, and $4,577 for commuters, up 5.7 percent. ●

## SOUTHEAST ASIA—WHICH WAY TO A CLEAR CONSCIENCE?

### HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. DOWNEY. Mr. Speaker, there is a basic apprehension among many American people that any involvement or, indeed, concern, with the problems of Indochina and the Indochinese people will lead us into another military conflict in that part of the world.

This solicitude is proof of exactly how little we are willing to learn from our involvement in Southeast Asia. We should not ignore the war as if it never happened. Rather we should closely examine the actions we took and learn from our experiences. Indochina should not be the repressed trauma it has been since April 17, 1975, when the last of the government troops defending Phnom Penh against the Khmer Rouge had put down their weapons.

No one can deny that our involvement in Southeast Asia is a blot on our history. This is a direct result of a series of bad judgments. Bad judgment from those who got us involved. Bad judgment from those who misconceived exactly what our mission was and how to complete it once we were involved. Finally, bad judgment from those who engineered the evacuations.

This episode of our recent history has affected our behavior in sometimes unacknowledged and generally detrimental ways—from mistreating our veterans at home to ignoring our obligations to the people of Indochina. It is ironic that those who were involved with the war on this level seem somehow held responsible for it.

We are all familiar to some degree, perhaps not enough, with the atrocities taking place in Cambodia. Reports from refugees are continually pouring out of that country from those who are lucky enough to escape. These reports are not given the attention they deserve. The media is reluctant to cover these reports and, despite its stance on human rights, the administration virtually ignores the horrors of Cambodia. There seems to be a concerted effort to keep the collective American conscience guilt free.

If there is any question as to the authenticity or reliability of the refugee's reports, then an impartial international organization should conduct an extensive survey of them. Testimonies should be cross-checked to insure their credibility. Reports from our intelligence sources should be utilized to determine just how bad the situation is.

As the strongest advocate of fairplay and justice in the world, the United States must take steps to end the carnage in Cambodia and demand a basic adherence to human rights. The President and the Congress must realize that the United States is at least indirectly responsible for the situation of the Indochinese people.

Realistically, there is nothing we can do directly. Short of armed conflict, we can exert no leverage in Cambodia. However, we can focus the world's attention on the atrocities being committed there. We can compel the United Nations to take an interest. We can urge the People's Republic of China—possibly the only country Cambodia respects—to apply pressure. And we can exert our own influence in an effort to force the Khmer Rouge to observe the basic human rights protected by the United Nations Declaration of Human Rights.

As a matter of good conscience, we cannot go on ignoring the plight of the Indochinese people.●

## FISHERMEN'S PROTECTIVE ACT COMMENDED

### HON. CHRISTOPHER J. DODD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Monday, April 10, 1978*

● Mr. DODD. Mr. Speaker, the House passed H.R. 10878, a bill amending the Fishermen's Protective Act. As the Congressman from the fishing district of Connecticut, I am very pleased that this bill, which I strongly supported, has been passed by the House. I would like to take this opportunity to discuss the reasons why I believe this bill is important for the protection of our Nation's fishermen and for the protection of endangered wildlife.

H.R. 10878 would extend until October 1981 the cooperative insurance program which compensates American fishermen for damages incurred when foreign governments seize their vessels in territorial waters that are not recognized by the United States.

The cooperative insurance program is an important protection extended to our Nation's fishermen as they pursue their livelihoods in accordance with the law of the sea as recognized by the United States. As the record of participation demonstrates, the cooperative insurance program has been received with enthusiasm and interest by our Nation's fishermen. More than 100 vessels have participated each year since the program began in 1969; there are currently 119 tuna and shrimp vessels in the program.

During the program's first 9 years, there have been 119 seizures eligible for compensation, resulting in claims totaling over $3 million. H.R. 10878 will continue the program for 3 more years, protecting our fishermen and encouraging them to fish in waters which are open under international law.

Our fishermen have suffered losses not only through seizure by foreign governments, but also through the damage of their fishing gear by foreign vessels. This is particularly distressing to me, Mr. Speaker, because while the fishermen of my district seldom venture far from home, they face the possibility of severe economic loss if their fishing gear is damaged by the foreign vessels which enter New England waters.

Under the provisions of the Fishermen's Protective Act, there are now three methods for obtaining compensation for damage caused by foreign vessels. However, none of the methods provides an efficient administrative mechanism for adjudicating damage claims filed by U.S. fishermen.

The primary obstacle to securing compensation has been the requirement that fishermen prove which vessel caused the damage for which compensation is sought. This has been particularly difficult for fishermen who set out traps or lay out long lines and are unable to constantly monitor their gear.

In order to correct this problem, H.R. 10878 would create an insurance program which would protect fishermen under what would be essentially a no-fault compensation program. This would provide coverage for damage attributed to both vessels and acts of God. The compensation procedure would be simplified and claims would be processed within 30 days. Any foreign vessel which sought permission to fish in U.S. waters would be required to participate in the insurance program.

The Subcommittee on Fisheries and Wildlife expects the insurance program to be especially popular with independent, small boat fishermen of whom there are a considerable number in the southeastern Connecticut region. I believe that the insurance program will provide fair and well-deserved compensation to our Nation's fishermen.

The Fishermen's Protective Act includes an amendment which authorizes the President to embargo fish products from countries whose nationals act to diminish the effectiveness of an international fisheries conservation program. The amendment, the Pell amendment, has proven to be an effective tool in our efforts to conserve the world's whales and to encourage other nations to observe both the word and spirit of agreements reached by international fishery conservation bodies.

H.R. 10878 would extend the provisions of the Pell amendment to include not only fisheries, but all endangered species. The President would be authorized to embargo wildlife products from nations which the Secretary of Commerce or the Secretary of the Inte-

rior have determined are diminishing the effectiveness of an international endangered species conservation program. If the success of the Pelly amendment is any indication, this should prove an effective means for protecting endangered species.

H.R. 10878 significantly and beneficially strengthens the Fishermen's Protective Act. I look forward to H.R. 10878 protecting our fishermen and endangered wildlife.●

## SMALL BUSINESS ADMINISTRATION PROGRAM AMENDMENTS AND AUTHORIZATIONS

### HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. GILMAN. Mr. Speaker, while having generally supported H.R. 11445, the Small Business Administration programs and authorizations—which passed the House yesterday—I am concerned that the bill contained a provision raising the interest rates for nonresidential natural disaster loans from 3 to 5 percent on the first $250,000 borrowed. Moreover, I object to the fact that this measure was brought to the floor under a procedure not affording Members the opportunity to reject specific provisions contained in the bill.

Contained in H.R. 11445, is a section authorizing $270 million for the expansion of the SBA development center program for management and technical assistance for the period fiscal year 1979 to fiscal year 1982. I support this provision, and last session cosponsored legislation supporting the concept of small business development centers.

I am also firmly supportive of the concept, as articulated in the committee report accompanying H.R. 11445, that SBA disaster loans should be readily available to farmers. I am pleased that the proposed move to exclude from eligibility for SBA disaster loans those small businesses which happen to be agricultural producers, was defeated. The most likely alternative for farmers to these SBA loans are disaster loans offered by the Farmers Home Administration (FmHA).

I have long been an ardent advocate of reforming the inequitable and inefficient FmHA disaster loan program, and have introduced legislation to accomplish that goal. Accordingly, I commend the Small Business Committee for both spelling out that "FmHA programs are inferior [to SBA programs] and in many ways inadequate" as concerns the farmers, and for underscoring the continued need for making SBA disaster loans available to farmers.

However, I believe that H.R. 11445 errs egregiously in increasing the SBA disaster loan interest rate from 3 percent on the first $250,000 and 6⅝ percent on all thereafter to a 5-percent overall interest rate. Data indicates that the bulk of SBA loans are for less than $250,000. Moreover, while commitments appeared last year to complete a comprehensive review of the disaster interest rate question, no such study has been undertaken. Yet, the House was yesterday presented with a bill containing a provision to increase that portion of SBA disaster interest rates which will be borne most heavily by businesses seeking loans under $250,000.

I was also disappointed by the bill's lack of attention to the need for some margin of flexibility in determining eligibility for these SBA loans. I specifically point to a case in my congressional district in which an SBA ruling made flood victims ineligible for new, more favorable interest rates effective July 1, 1976, because of an SBA determination that the storm responsible for the flooding began a day earlier. Even though the rainfall in the area affected was significantly greater on July 1, than the preceding days, SBA's determination concluded that the "actual" storm had commenced earlier; thus, even though the storm was in progress on July 1, 1976, SBA arbitrarily ruled these flood victims ineligible for disaster assistance at the newer higher interest rates.

Thus, while realizing the obvious need for extending SBA disaster assistance and for backing the above provisions of H.R. 11445 for which I have indicated my support, I urge the Committee on Small Business to examine the urgent need for flexibility in administering the SBA disaster loan program, and to undertake, as expeditiously as possible, a comprehensive review of the interest rates now scheduled for SBA disaster loans.●

## RISING COSTS AND VANISHING MARKETS ENDANGER AMERICAN FARMERS

### HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. HANSEN. Mr. Speaker, the United States must develop adequate foreign and domestic farm markets and control the spiraling costs of production if American agriculture is to remain strong and free.

We must make ourselves more competitive by finding new uses for agricultural products and new markets for our products around the world. And certainly we must not continue to follow the Carter human rights calamity in foreign policy which sees us forfeiting substantial markets in pursuit of unreasonable and erratic demands of other nations.

While markets are important they will never save the farmer without an early and effective curtailment of the rampant inflation which has propelled farm debt and costs of land, machinery, labor, and other production requirements to astronomical heights.

The real heart of the problem centers around the Government's appetite for big spending. Government overspending causes increased inflation and it is the family farmer saddled with a huge investment with low proportionate return who feels the effects first and worst.

I commend farmers and ranchers for their fighting spirit and faith in the free American economic system which has kept them going and sustained the Nation through extremely rough circumstances. Farmers are having to fight for their lives but it is really the welfare of the consumers of the Nation and the world which is at stake.

However, farmers need more than sympathy and lipservice; they need action. This segment of our Nation's economy has become a whipping boy. When food prices go up the farmers are blamed, but when farm prices fall off while food prices continue to go up, the farmers still seem to get most of the credit.

Recent meetings in Washington with concerned farmers have resulted in a better understanding. They explained what problems they were faced with in trying to make a living and we have explored in depth the alternatives that Congress and the administration might pursue to help solve farm problems.

In seeking a solution to this problem, I am always open to suggestions and will continue to support any constructive measure and work with all means at my disposal to find answers to provide opportunity for a fair return for the farmers of this Nation. Hopfully, the farm legislation before us will finally result in needed relief, at least on a temporary basis until a more permanent and responsible program can be developed.

The grazing fee moratorium bill which I have sponsored, to hold down arbitrary increases in costs to ranchers has passed the House and is now awaiting action in the Senate. This bill will keep the current rates for at least one more year and give Congress adequate time to thoroughly consider other pending alternatives.

Regarding the 160-acre problem, this situation has been neutralized somewhat for the time being since a California Federal court declared that the Department of Interior could not put regulations into effect regarding this issue until an environmental impact statement had been prepared. The Interior Department has reversed its original position and agreed to prepare the statement and not appeal the court decision. The best estimate is that it will take about a year for them to complete the statement.

The adverse impact on Idaho and the Nation's agriculture by the proposed transfer of the Panama Canal is significant. U.S. Department of Agriculture statistics readily show the specific impact on sugar, grain, cattle, and other commodity markets. All citizens, farmers, and consumers, should immediately and forcefully express their concern to their U.S. Senators who are currently voting on the issue.●

## TRB ON TAXES

### HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. FRASER. Mr. Speaker, in the concise and timely manner to which we have become accustomed, TRB, in his column "Tax Time" in the April 8, 1978, New Republic, calls some important points to

our attention. TRB is quite right when he writes that we Americans have shown a rather remarkable degree of faith and confidence in our institutions which today remain strong after having been subjected to many years of abuse. But these institutions are not indestructible.

At this time we are again coming to the realization that inflation is a cruel tax that plagues us by eroding purchasing power while driving us into ever higher tax brackets. Some argue that the biggest culprit is the Federal Government's inability to live within its means; another $60 billion deficit, it is said, is the prime factor behind the latest increase in the rate of inflation.

But part of the deficit is attributable to what IRS Commissioner Jerome Kurtz calls the $200 billion subterranean economy—income sheltered legally and otherwise from Federal taxes.

So tax reform ought to be a tool in any anti-inflation program. And tax reform or better enforcement of existing laws is needed if Americans are to continue to believe in the fairness of the present system.

IRS Commissioner Kurtz has indicated that he is aware of the enforcement problem, but adequate resources to conduct more thorough investigations into possible shelter abuses are lacking.

Advocates of tax reform may sometimes feel that they are pursuing a will-o'-the-wisp. But better enforcement of present laws ought to be obtainable in short order. As TRB concludes, this all should give us "something to think about on April 15."

The article follows:

TAX TIME

Of all the rituals of American democracy I think the annual self-flagellation of citizens in filling out their income tax forms (deadline April 15) is the most impressive. I suppose nobody hates to pay taxes more than I do. But I go through my Form 1040 once a year, by custom, with reasonable honesty, and send my contribution on to the federal bureaucrats, grumbling at every step of the way. We carry the self-inflicted mortification beyond any other nation. Why do we do it? Let's face it, because we accept Oliver Wendell Holmes' saying that taxes are the price of civilization; because, at heart, we trust our government to administer the money with a reasonable degree of competence and evenhandedness, and because, finally, we trust our neighbors—yes, we believe that they are doing their share too and, on average, will be as conscientious as we are, or maybe more so.

It is well to have the grizzly ordeal come in the Spring, the time of hope. Everything looks brighter then. We couldn't stand it in November. Taxes come up with the tulips.

Having made this unpopular genuflection to the income tax, let me add that I think that anything that weakens this unique relationship between Americans and their government is subversive in the ultimate sense. By the middle of this month 85 million individual income tax forms will have been received by the Treasury, with a vernal tide of about $186.8 billion dollars. Some 2.3 million corporations will have contributed another $60 billions. Of these returns about 2.5 percent will be audited. No doubt the fear of such audits propels the process along. But it would not survive for a minute without that additional ingredient: confidence in the ultimate fairness of the government and of fellow-citizens.

It is the ingredient of confidence that is challenged now from many directions. During the campaign candidate Carter called the tax system a "disgrace to the human race" which was a rhetorical way, I suppose, of promising that he would make reforms if elected; so far these reforms haven't appeared.

Confidence in the tax structure is attacked from many sides. For six years Representative Charles Vanik, Democrat of Ohio, has compiled an annual study of corporate tax loopholes. Last January he examined 168 of the biggest US companies and found that 17 of them had paid nothing in effective Federal income taxes in tax year 1976. These 17 companies (listed in the *Congressional Record* of January 26) had combined worldwide net incomes of $2.9 billion. No US income tax. Forty-one other giant companies (listed by name) paid less than 10 percent in effective federal income taxes in 1976, Vanik reported. IRS Commissioner Jerome Kurtz, in a TV appearance last week, agreed that corporations are paying a smaller proportion of all taxes than they used to; individuals are paying a higher proportion. Tax loopholes for corporations and affluent individuals, he acknowledged, have grown: Kurtz called it "an increasing number of abusive shelters." How much escapes? "We have some estimates of a $200 billion subterranean economy," Kurtz said. He put a comfortable face on it, however: "Two hundred billion dollars is a very high number, but in a two-trillion-dollar economy it's certainly not overwhelming," he said.

It may not be overwhelming in a world of cash and balance sheets, but in a tax system that rests on intangibles like faith and fairness, it could be said to be destructive.

Another attack on the unique American tax system is inflation. If we cherish the progressive income tax, we must do something about this. Consumer prices rose in February at an annual rate of 7.2 percent and the average worker's buying power, according to the Labor Department, declined at an annual rate of 2.4 percent. The consumer was caught between higher prices, a social security tax boost, and graduated income taxes. Consider the example of the luckless Jones family. The Jones family has four members, and back in 1955 Mr. Jones earned $15,000. His sympathetic employer matched inflation with wage increases, dollar for dollar, over 21 years. This produced a fine income of $32,900 in 1976—an increase of 120 percent. But the higher salary pushed the Jones family from a 22 percent tax bracket into a 36 percent bracket. Its tax soared from $1540 to $6600. That's an increase of 330 percent. The unfortunate family doubled its nominal income but it is now 11 percent worse off in purchasing power than in 1955.

Most American families, despite inflation, are better off than they were. But old people, pensioners, those on fixed incomes aren't; and now comes last week's warning signal that for one month, anyway, the average worker's buying power declined. If a Washington politician isn't aware of the dynamite in that signal he is very stupid indeed.

The most dangerous attack on the tax system in our time was made by Richard Nixon, who undertook to warp the Internal Revenue Service into a political appendage. On September 11, 1972, John Dean handed to IRS Commissioner Johnnie Walters an "enemies list" of 490 McGovern aides and supporters for investigation. Four days later, at the White House, H. R. Haldeman told Nixon that Dean was "moving ruthlessly" on the investigation "through IRS."

The attack on the integrity of the IRS, I think, was the worst breach of faith of Richard Nixon. As contrasted to this, John Kennedy, and, after him, Lyndon Johnson, called in the IRS regional commissioners and district directors and addressed them emphasizing their bipartisanship. On the third floor of the IRS building, down the hall, is a small plaque proudly commemorating the visit Kennedy made to the office—the only visit of any president. An income tax form tells about a citizen's family, debts, social status, payments, donations, contributions—it is hard to imagine any document more entitled to privacy. Information is recorded and stored on tapes in a bank of IRS computers in Martinsburg, West Virginia. David Wise, in his chilling book, *The American Police State*, shows how Nixon and his crew deliberately set out to make the IRS the equivalent of the FBI and CIA, an instrument of social control. The Special Service Staff (SSS) had files on Jimmy Breslin, Mayor John Lindsay, Coretta King, columnist Joseph Alsop, the Ford Foundation, the American Civil Liberties Union. There were dozens of lists—"audit them, investigate them" were the orders. The sullen bureaucrats resisted. Nixon had three IRS commissioners in five years. And at the end of it all it was disclosed that Nixon himself paid only $792 in taxes in 1970, and $873 in 1971, having deducted half a million for donating his vice-presidential papers in an improperly backdated gift. Something to think about on April 15.●

## NATIONAL PORT WEEK

### HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. MURPHY of New York. Mr. Speaker, today I have the distinct pleasure of adding to our growing list of cosponsors the following Members listed below. The response by my colleagues has shown a real concern for the recognition of our ocean and inland centers of trade.

In addition, we have received letters from nine State Governors expressing the desire to have their respective States participate in the "National Port Week". At the present time, Florida, Indiana, Illinois, Vermont, South Carolina, Mississippi, Oklahoma, South Dakota, and Virginia have issued or will issue executive proclamations coinciding with this joint resolution. We invite all the Governors to join with the above States in proclaiming "National Port Week".

I thank both the Governors and these Members on behalf of our ports for their support and look forward to my other colleagues joining with us in cosponsoring the joint resolution authorizing the President to proclaim the week of September 17, 1978, as "National Port Week".

The list of cosponsors for these resolutions is as follows:

Mr. Ashley, Mr. Biaggi, Mrs. Boggs, Mr. Bowen, Mr. Breaux, Mr. Burke of Florida, Mr. John L. Burton, Mr. Don H. Clausen, Mr. Cornwell, Mr. Cotter, Mr. Dicks, Mr. Evans of Delaware, Mr. Florio, Mr. Garcia, Mr. Gephardt, Mr. Goldwater, Mr. Green, Mrs. Holt, Mr. Ireland, Mr. Kemp, Mr. LaFalce, Mr. Lederer, Mr. Leggett, Mr. Livingston, Mr. McFall, Mr. Mann, Mr. Metcalfe, Mr. Moakley, Mr. Moss, Mr. Mottl, Mr. Murphy of Illinois, Mr. Murphy of Pennsylvania, Mr. Nix, Mr. Patterson of California, Mr. Pepper, Mr. Price, Mr. Richmond, Mr. Rinaldo, Mr. Risenhoover, Mr. Rodino, Mr. Roe, Mr. Sikes, Mr. Solarz, Mr. Stanton, Mr. Stokes, Mr. Treen, Mr. Van Deerlin, and Mr. Weiss.●

## WELCOME PRESIDENT CEAUSESCU

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. BIAGGI. Mr. Speaker, the President of Romania, Nicolae Ceausescu, will be arriving today for a State visit to the United States. I am pleased to join with our President and other members of the Government in welcoming President Ceausescu to our country.

Mr. Ceausescu has been in the news lately regarding his ongoing efforts to help bring about a peaceful settlement in the Middle East. We recall his courageous efforts in helping to bring about Egyptian President Anwar Sadat's historic visit to Israel.

I am sure Mr. Ceausescu has earned the respect and admiration not only of the parties to the Middle East dispute, but of world leaders and diplomats the world over who have tried often enough to help bring peace to the Middle East. I hope Mr. Ceausescu's further efforts in this area will bring additional fruitful results.

President Ceausescu, however, is not coming to the United States solely to discuss the prospects for peace in the Middle East, although I am certain that that will be a major topic of discussion. He is also concerned about the continued trade relationship with the United States that has been ongoing for nearly 2 years. Romania enjoys most-favored-nation status in our trading relationship and that status has sparked a major growth in commerce between our two nations.

It is interesting to note that the United States has benefited in this arrangement with the balance of payments on the surplus side for our country. Romania is obtaining the much needed heavy industrial equipment to expand its economy and has found a market for its various consumer products such as gloves, men's wear, and glassware.

There are problems with the human rights questions that are raised frequently with respect to Romania. These questions must be raised and discussed in an atmosphere of friendship and mutual cooperation for world peace.

My hope is that the Romanian Government under the able and enlightened leadership of President Ceausescu will continue to provide for the equal rights of all its citizens and assure those who wish to leave that country for other lands that they will have the right to emigrate. In this area, my own experience in the past has been good and I am hopeful that the Romanian Government will continue to be responsive to all requests for exit visas.

Mr. Speaker, my colleagues, I hope that the spirit of cooperation and friendship that has been engendered by President Nicolae Ceausescu will be a guiding light for our relations with other nations in the Communist bloc. I further hope that President Ceausescu's personal efforts to help move the stalemated Egyptian-Israeli talks forward will be successful as well.●

## RUSSIAN ROULETTE AT THE PANAMA CANAL

### HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. HANSEN. Mr. Speaker, Members of the U.S. Senate who on one hand seek closer ties with Castro's Cuba and on the other hand vote to give away the Panama Canal are playing Russian roulette with the peace and security of the United States and the Western Hemisphere.

Cuba is the leading exporter of armed revolution in the world, and the main neutralizer to their efforts in Central and South America is the U.S. presence in the Caribbean and particularly the Canal Zone.

Cuban revolutionary efforts which have been so successful in Africa failed miserably in the Americas under the notorious Communist Che Gueverra mainly because of the stabilizing influence of the United States emanating from our military and commercial control of the Panama Canal.

Removal of U.S. influence in Latin America could well create a power vacuum which would most naturally be filled by the aggressive revolution-peddling Government of Cuba.

Some Senators have tried to defend their votes by claiming they have significantly changed the treaty with amendments. That is an argument I just cannot buy.

None of the amendments or reservations adopted change the fundamental weakness of the first treaty. That weakness is that "in time of peace and in time of war" the canal will remain "secure and open" for the vessels of all nations.

This means that if Cuba wanted to ship troops through the canal to support a revolt against an anti-Communist government in South America, the United States would have to permit the ships to pass. And this analogy can be further expanded in areas of national security.

Many Senators have ignored the wishes of their constituents and the best interests of the country, and caved in before the pressures of appeasement and massive White House lobbying to pass the Neutrality Treaty.

It is widely known that the reason many Senators are taking this position is that the Carter administration has pulled out all the stops and is making offers that apparently they cannot refuse. Cabinet members were asked to come up with pork barrel projects to help sway undecided Senators while the administration offered to change its position on other issues favored by certain Senators and in some cases opposing party members were assured of no opposition in this year's election.

One treaty supporter put it very well when he suggested the President was more like the master of ceremonies at "Let's Make a Deal."

Mr. Speaker, playing Russian roulette at the Panama Canal or with any other part of America is dangerous to the security of the Nation and disastrous to the morale of the people.

Let us hope that Capitol Hill will stop making deals and start making more sound decisions to protect the well-being of the citizens of this Nation.●

## ITALIAN CULTURE WEEK

### HON. LEO C. ZEFERETTI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. ZEFERETTI. Mr. Speaker, the city of New York will soon be observing Italian Culture Week during the week of April 16–23. This occasion is a source of great pride for the millions of Italian Americans not only in New York City, but for those across the Nation.

We stand proud of our rich heritage, for the sons and daughters of Italy have made invaluable contributions in all fields of human endeavor, including science, education, the arts, sports, and other areas too numerous to mention at this time. Their achievements have all too often been ignored by our history books, but these individuals are giants in the hearts of all Italian Americans.

It cannot be denied that the news from our native land has been less than encouraging during the past few months, the most recent incident being the kidnaping of former Prime Minister Aldo Moro. We must keep in mind, however, that this increase in terrorist activity is not unique to Italy alone. These heinous attacks have sadly become a fact of life in nations throughout the world.

The kidnaping of Moro is a further indication that no government or amount of protection can adequately thwart terrorism. There is no doubt in my mind that Italy will survive this tragedy, but its recovery can be hastened if the United States and other democracies throughout the world offer their support. That is why I have joined many of my colleagues in cosponsoring House Resolution 1082, which expresses Congress condemnation of the Moro kidnaping and terrorism around the globe.

The political and social unrest inherent in today's Italy cannot dim the lure of that country's art, music, landmarks, and other contributions that have enriched the history of the world for untold centuries. That nation has withstood the turbulence of numerous wars, earthquakes, and other disasters—both natural and manmade—that have destroyed weaker nations, and I remain firm in believing that today's turmoil will also be overcome.

We, of Italian heritage, must rally behind our homeland during these trying times, and I again remind all Americans of the valuable contributions made by Americans of Italian descent. Having helped found and expand our United States, they continue to play a vital role in the strengthening of our country.

I, for one, am proud of my Italian heritage, and I applaud New York City officials for declaring this week of salute to Italy and its descendants.●

## VANCE SPEAKS ON FREE TRADE

### HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. SIMON. Mr. Speaker, I would like to call to my colleagues' attention a recent speech by Secretary of State Cyrus Vance, "America's Stake in an Open Trading System."

Some sectors of our economy are threatened by imports. In my own district, shoe companies and other industries have been hurt. I support the efforts being made by Ambassador Robert Strauss and others in the administration to insure that our trading partners are playing the game fairly. We appear to be moving well in the right direction.

I also favor programs, such as economic adjustment assistance, that help workers in this country who have lost their jobs due to imports. Because of my concerns about the impact of foreign trade, I have joined the Congressional Steel Caucus and the House Informal Working Group on Textiles.

I am also concerned, however, about the trend toward protectionism that appears to be evident in this country and among many Members of Congress. As Secretary Vance points out in his speech, protectionist actions by the United States would do direct harm to our own interests.

Before we consider any protectionist moves, we should remember that if we restrict trade, other countries will do the same. This occurred in the 1930's with disastrous consequences. The costs to the public of such actions at this time would also be disastrous. One of every eight manufacturing jobs in this country depends on exports, and each of these jobs create another one in a supporting industry. Every third acre of American farmland produces goods for export. In my State of Illinois it is one out of two acres. Exports contribute a total of $200 billion to our gross national product. Many of our industries depend on imported materials to produce their final goods.

If we invoke protectionist policies, our consumers would suffer from rising prices and rampant inflation. As many as 10 million jobs would be jeopardized. American consumers and workers would be the losers.

Secretary Vance's speech is an effective antidote to protectionist pressures, and I would like to insert it, as well as a column I wrote some weeks ago on international trade, into the RECORD at this point:

AMERICA'S STAKE IN AN OPEN TRADING SYSTEM

(By Secretary of State Cyrus Vance)

I am delighted to have this opportunity to meet with you today. I want to talk about the stake of every American citizen in maintaining an open international trading system.

In the 30-plus years since World War II, we have enjoyed a mounting level of prosperity. Our people have enjoyed the fruits of an outward looking economy, vigorously engaged in a steadily more open and active world commerce. We have grown from a $200 billion economy to a $1.9 trillion economy, in no small measure because we have seized the opportunities afforded by our superior technological and industrial capabilities to expand the reach of our economy to every corner of the globe. We have been able to do this because we have succeeded in fostering a progressively more open world trading system, one that has enabled us to generate new markets, new jobs, and new choices for the American consumer.

In 1962 President John Kennedy told us that a rising tide of international trade would lift all boats. He was right. Our commitment to vigorous world trade has served us well.

At this moment, however, we face unusually difficult strains on our economy. There is a strong impulse to abandon our commitment to an open world trading system—to draw our wagons into a circle.

Let there be no mistake about the sensitivity of this Administration to the reality of those strains and the necessity to deal, constructively and effectively, with the causes and the consequences of current economic difficulties. Unemployment is more than a statistic to a family without a job. Inflation is a corrosive that eats away at the hope of every American for a better future. The damage to a community when a factory shuts its gates can be devastating.

As the President indicated in his State of the Union Message, bolstering our domestic economy is at the top of this Administration's agenda. The comprehensive economic program which the President submitted to Congress in January presents the clear outlines of a coordinated strategy to expand our industrial productivity, to create new job opportunities, and to develop a more consistent and dependable economic climate for private investment and trade.

We all share the same economic goals: to keep our recovery on course; to enhance the economic security and well-being of our people; and to assure that the benefits and burdens of a dynamic economy are equitably shared. But we must be careful how we pursue these goals. We must avoid short-term responses to current pressures that mortgage our future interests. We must resist the temptation to insulate ourselves from international economic competition, for we are a nation that thrives on world trade. We cannot lose sight of one simple proposition: To buy from us, other nations must be able to sell to us.

It is essential to recognize that the economic strains that we feel are by no means confined to the United States; indeed, our economy is strong when compared with most of our trading partners. The sharp increase in oil prices in 1973–74 sent world inflation rates upward and helped push the world economy into recession. Recovery has been slow. Unemployment is unacceptably high. Large surpluses have been accumulated by some of the oil exporting countries while the consuming countries grapple with the corresponding deficits. These deficits lead countries to try to import less and export more, something which all countries obviously cannot do simultaneously.

These strains create pressures here and abroad to turn to policies that restrict trade. Until now, the industrial countries, despite these unprecedented economic stresses, have, for the most part, resisted the rush toward trade restriction. But if we should turn down the road toward protectionism, our major trading partners would face irresistible demands to impose their own barriers. And the developing countries, caught in the squeeze between high energy prices and narrowing export prospects, would be forced to restrict their imports as well.

The American people have a vital interest in a progressively more open trading system. We have far too much at stake to benefit, in any lasting sense, from a new wave of international protectionism.

One out of every eight manufacturing jobs in the United States depends on exports. For every one of those jobs, another one—in a supporting industry—is created.

Every third acre of U.S. farmland produces for export. Each dollar of those agricultural exports stimulates more than a dollar's worth of output in a food-related industry.

Today, one out of every three dollars of U.S. corporate profits is derived from international activities.

Exports of our goods and services now contribute nearly $200 billion to our gross national product.

Two-thirds of our imports are essential raw materials, or goods we cannot readily produce. From automobiles to newspapers, from jet aircraft to household appliances, many of our industries depend upon imported materials.

What I have just described is the profile of a nation whose prosperity depends upon an open trading system.

The impact of America's trade with the world is felt in each of your states. Let me cite just a few examples.

For the State of Washington, international trade accounts for a substantial part of the $5.6 billion in aircraft equipment which the United States exported in 1977.

Nebraska contributed about 11 percent of the $5.6 billion of feedgrains we exported in 1976.

Ohio has a vital interest in international trade as well. The tire, steel, and electrical equipment industries in Ohio depend upon imports of critical materials such as natural rubber, manganese, and cobalt.

For Oregon, the importance of trade is clear. In 1976 more than 8 percent of total U.S. exports to Japan, more than 12 percent of our exports to Korea, and more than 25 percent of our exports to India passed through Oregon's ports.

I could go on: with Arkansas, which contributes more to our exports of poultry and rice than any other state; with Massachusetts, which contributes substantially to our rapidly growing exports of electrical and health care equipment, as well as computers and accounting machines; with Texas, which is a major exporter of cotton and industrial chemicals; with New Jersey, where foreign trade provides a livelihood for about one in five workers.

In all, 22 states have established offices in Europe and Asia to promote trade and to encourage foreign investment in the United States, evidence of the direct concern you have demonstrated in fostering vigorous international competition.

There are, of course, sectors of our economy that are threatened by imports. It is tempting to think that we can solve many of our economic problems by insulating these industries from import competition. But the costs to the American public would be enormous:

Consumers—particularly poor and middle income Americans—would suffer. They would pay more for what they buy and they would have less choice.

Inflation would be fueled. Import restrictions not only push consumer costs up, they add substantially to producer costs as well, driving prices upward and undermining the competitiveness of many of the goods we produce.

Jobs would be jeopardized. If U.S. consumers have to spend more on some items because of import restrictions, they will have less to spend on other goods and services, the great bulk of which are produced here at home by American workers. And just as important, protectionism against our trading partners breeds protectionism by our trading partners against us. Nearly 10 million American jobs depend on our exports. No Administration committed to protecting the jobs of every American worker should embark upon a course that could unleash a new and danerous era of trade warfare.

In short, we cannot protect jobs in some industries without endangering the livelihood of more workers in other industries. We cannot solve the problem of an unemployed steel worker in a way which costs a machinist his job. Our policy must look to the future of both. We must continue the momentum of the last three decades toward more open trade among nations, while at the same time we deal fairly and humanely with short-term dislocations.

Let me discuss the steps this Administration is taking to pursue both our immediate and future goals.

First, we are engaged in a major and comprehensive effort to devise a more open and equitable trading system. We are seeking in the multilateral trade negotiations in Geneva, along with our trading partners, to achieve a comprehensive reduction—and sometimes elimination—of industrial tariffs and an easing of barriers to our vital agricultural exports.

This effort, if successful, will stimulate expanded opportunities for world trade. But more than tariffs are involved in the Geneva negotiations:

We are working toward international rules that limit the use of government procurement policies and subsidy practices that distort trade;

We are seeking to reduce or eliminate a variety of other nontariff barriers which impede trade; and

We are making a serious effort to improve international procedures under which governments take actions to protect their citizens against sudden surges of imports.

The negotiations in Geneva will establish the framework of world trade for years to come. This will involve tough negotiating in the months ahead. Some argue that we should pull back and wait out this period of economic uncertainty. We believe just the opposite: that successful completion of this major effort to expand trade and strengthen its international rules will increase business confidence and spur our recovery. Ambassador Bob Strauss is determined to bring back a package of agreements that will bolster our economy and those of our trading partners. We look to you for guidance and support as this process unfolds.

Second, as we work to secure enduring improvement in the world trading system, this Administration will fully and vigorously enforce the laws which have been enacted to stop unfair trade practices aimed at American industries. American workers must be confident that their Government will insist that all nations play by the rules.

We must also insure that our enforcement mechanisms are effective. In the case of steel, where widespread "dumping" threatened to overtake our enforcement capabilities, we developed a "trigger price" device to enable us to respond promptly and effectively to this unfair trade practice. Although steel has been the most prominent case recently, it is not the only action we have taken against unfair practices. We have moved to prevent dumping of other products, and have taken countervailing duty action against such items as leather goods from Latin America and fish from Canada.

We also intend to carry out the mandate of the Trade Act of 1974, which provides for temporary relief to industries injured by imports. The disruption caused to families and communities by particular trade problems cannot be ignored. Under this authority, the Administrtaion during the past year negotiated orderly marketing agreements with Taiwan and Korea for shoes and with Japan for color TV sets.

In implementing these laws we will adhere to the principle that our actions must be temporary and limited only to the minimum relief necessary. Such measures should not become permanent. Trade relief should provide breathing space for adjustment, not a subsidy for inefficiency.

Third, we must stimulate lagging U.S. exports. On December 21, the President announced steps that will enable us to respond more creatively and energetically to export opportunities. He has asked Congress for an unprecedented $15 billion expansion of direct lending authority for the Export-Import Bank over the next five years. And he has directed the Department of Commerce to vigorously assist U.S. exports, in ways that are consistent with an open trading system.

Finally, we must insure that no segment of the population is forced to bear the burden of a more open trading system without being helped to find new opportunities. The Administration is committed to making trade adjustments assistance more effective. The delivery of benefits to displaced workers and communities must be accelerated. We have been experimenting with new types of programs, such as one in the footwear industry, where teams from government and industry are working together to improve the competitiveness of our firms.

We cannot prevent change. Our economy is dynamic and it must remain so. But we can and must help affected industries and workers to adjust to change—through modernization, retraining, and facilitating shifts of resources to more productive sectors.

Trade policy alone cannot carry the entire burden of solving this Nation's economic problems. We must also have an effective energy policy and we must have it soon. Unless we curb our unchecked appetite for foreign oil—on which we spent $44.6 billion last year, or 30 percent of our total import bill—we will not begin to reverse the $30 billion U.S. trade deficit. We must take the difficult steps that are required to reduce our requirements for imported oil and to promote the development of other energy sources. Both for our energy and trade needs, passage of domestic energy legislation is imperative.

Nor can we solve our economic problems by ourselves. No single country or group of countries can shoulder the adjustment to a changing world economy. Some successful exporting countries have been seen as taking advantage of the relatively open U.S. market, while at the same time restricting their markets to imports. This contributes to protectionist pressure among their trading partners.

We recently concluded a series of intensive discussions with Japan leading to its commitment to open its markets further. Japan has also announced its plans to accelerate its growth. The fact that we encouraged Japan to open its market to imports rather than to restrict its exports illustrates a basic principle of our trade policy: that whenever possible we will resolve our problems with an "outward" or trade expanding orientation.

An outward looking trade policy is not a luxury for the United States. It is pure economic necessity. Even more than our trade is at stake. For, if we let ourselves slide into the unpredictable business of protectionism, international investment, monetary affairs, and international development will also suffer. We would be fostering a kind of nationalism which could shake our alliances and undermine our efforts to build international cooperation across the entire range of pressing global issues.

Protectionism is a dangerous gamble in which everybody loses. That is the indelible lesson of history. A wave of trade restrictions in the early 1930's deepened a worldwide depression. The desperate economic situation that existed then in Europe certainly contributed to the popularity of authoritarian movements. Today we cannot close our eyes to the relationship between economic growth and political stability around the world.

Today, as much as in any period of our history, American leadership is called for. Others are looking to us. Unless we demonstrate our resolve to move toward a fairer and more open trading system, such a system simply will not evolve. Unless we adjust to a changing international economy—an international economy in which we have a major stake—America's interests will seriously suffer.

We will need your help. Together we can meet the immediate challenges that face us without endangering our future. And together we can work to build an international economic system that expands opportunity and fosters peace.

---

## The International Trade Dilemma

(By Congressman Paul Simon)

How much Japanese steel should the United States permit to enter for sale here? How many pairs of shoes from Taiwan and Korea should be permitted to enter the U.S.? What should we do about imports of textiles into the United States? Should we require Mid-East oil to come to our country in U.S. ships?

These are among the questions Congress and the President are struggling with these days.

What is at stake are American jobs, jobs in others countries, inflations and our relationships with other countries.

And there are no easy answers.

If we restrict the ability of other nations to sell to us, they restrict our ability to sell to them. One out of every eight U.S. industrial jobs is dependent on exports. In Illinois roughly one out of every two acres of farmland is used for exports.

So there is a danger that if we protect ourselves in one area, we will hurt ourselves in another.

Steel provides a good example. Steel production is down about 20 percent from 1973. That means a great many steelworkers are out of jobs. And it is getting worse. A simple way to solve part of the problem would be to put greater restrictions on steel imports (primarily from Japan) to the United States.

But another Illinois corporation, Caterpillar, is one of the nation's largest exporters and thousands of Illinois jobs are dependent on those Caterpillar exports. About five percent of the steel Caterpillar now uses comes from foreign producers, the other 95 percent from U.S. steelmakers.

If the United States makes too big a fuss over that five percent from foreign markets, we stand a chance of losing substantial sales of Caterpillar products overseas, hurting the people in Peoria and Joliet and Decatur who manufacture Caterpillar, and hurting the steelworkers who make the 95 percent of the American steel Caterpillar now uses.

Steel companies all over the world have been having a tough time during this recession. The best answer to all of these problems is to get the world economy moving again.

But U.S. steel problems have been aggravated by cost increases substantially greater than the general inflation trend. In the past

five years industrial prices generally have risen 55 percent, while steel has gone up 79 percent.

Factors which have caused this include:

A 66 percent increase in hourly wages.

Coal, iron ore and steel scrap have all risen more than 100 percent.

Stricter environmental standards.

It costs Japan 15 to 20 percent less than U.S. manufacturers to produce a ton of steel. When you add transportation costs for shipment from Japan, they can sell for about five percent less than the U.S. producers.

And there are some who charge that U.S. steel manufacturers simply have not kept up with steel producers in other countries in modernizing and using the latest production techniques.

One of the things that can be done to protect U.S. workers is to provide better job guarantees in the United States. This would help promote peace of mind among the workers and their families.

Second, import laws which already exist should be enforced with much greater firmness. The old business of winking at violations of foreign import regulations has to be made a thing of the past.

Agreements we have with other countries have to be enforced more rigidly.

The long-run interest of the United States is to encourage trade with other countries, but in the meantime workers and businesses adversely affected need greater protections than they now receive.●

## HOMEBREWERS SEEK AMENDMENT TO HOMEBREW BILL

### HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. DELLUMS. Mr. Speaker, several constituents of the Eighth California District are among the many thousands of persons who brew small amounts of beer for personal consumption. They have followed with interest the course of legislation regarding the licensing and production of homebrew. While they believe that the time for legislation is right and that a bill concerning homebrew is a useful step in controlling any possible abuse of the activity, they believe that several amendments are required to achieve equity between home winemakers and those who brew beer.

While the bill has been passed by this House and is now pending in the other body, I would like to share with my colleagues in the House the text of a petition which is presently circulating among home winemakers and brewers. These individuals will be attempting to secure amendment in the other body and if they are successful, I would urge my colleagues in the House to reflect on their concerns and accept these amendments:

PETITION TO OUR U.S. SENATORS

On March 14, 1978, the House of Representatives passed a bill, H.R. 2028, that would abolish two present restrictions on home wine-making. But it would also establish three restrictions on home brewing of beer. That is, the bill does not treat beer and wine alike.

We ask the U.S. Senate to adopt three amendments to provide equality for home-made beer and wine:

1. The bill would abolish registration for wine-makers, which the sponsor of H.R. 2028 says "has proven to be of little use to the Federal Government and is burdensome to the public." We ask that registration for beer-makers be eliminated from the bill.

2. We ask elimination from the bill of the limit of 30 gallons of beer in a household at any one time. It provides no such limit for wine. Both beer and wine must be aged for months, so several batches can be around the house even though little is being consumed.

3. We ask annual limits based on the amount of alcohol in beer and wine, not on the amount of water. The present bill would limit both beer-making and wine-making to 100 gallons a year for single individual-households, 200 gallons for larger households. Because beer contains less than half as much alcohol as wine does, we ask limits for beer of 200 gallons and 400 gallons.

With these amendments, the bill would be a good one, establishing controls without unfair restrictions "burdensome to the public." ●

## MAD DOCTRINE

### HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. STARK. Mr. Speaker, I am slowly becoming convinced that the doctrine of mutual assured deterrence is indeed MAD. We have now developed the neutron warhead, a weapon that destroys people with minimum property damage, and it is hailed as progress. Through the existence of such a "selective" weapon commands a certain perverse fascination, we must recognize that the neutron bomb can only increase the chances of nuclear war. Through adherence to the MAD doctrine, we have now created a weapon whose sole merit is that it will frighten the other side because it is so usable. This is supposed to contribute toward stability.

The bomb is designed to deter a conventional attack on our NATO allies. Should Soviet troops and tanks swarm across our lines, however, these eminently practical warheads could be shot toward them from as close a range as three-quarters of a mile. Having scared the other side sufficiently, we could then regain control of our allies soil and nary a farmhouse would have been damaged.

Right?

Wrong.

Once any nuclear weapons are used in battle, the barrier barring their use is destroyed. The use of neutron warheads would blur the distinction that exists between conventional and nuclear weapons and there would be nothing to stop further escalation. Moreover, even if we did try to deter an attack by conventional means, it is doubtful that a field commander whose lines of communication have been cut and whose troops are being threatened would hesitate to use the most "effective" weapon at his disposal.

It is my fervent hope that President Carter will be true to his first inclination and bar further funds for this dangerous weapon. We cannot allow advances in weapons technology at the cost of world peace and security. The continued development of the neutron bomb threatens both.●

## GIVE DISC A CHANCE

### HON. MICHAEL T. BLOUIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. BLOUIN. Mr. Speaker, recently I offered testimony to the House Ways and Means Committee on why I believe the Domestic International Sales Corp. (DISC) should be continued and not be phased out as is currently proposed in pending tax reform legislation. Moreover, I attempted to specifically draw attention to the fact that DISC has made a significant contribution to the overall economic well being of my home State of Iowa.

Mr. Speaker, it does not appear to be coincidental that many are reevaluating their position on DISC. For instance, it might be well to point out that in a recent survey conducted by the National Federation of Independent Businesses (NFIB) of those responding 52 percent of their membership favored the continuation of the Domestic International Sales Corp.

I am committed to the continuation of DISC as a means to expand this country's export markets, as well as aiding in the fight to reverse the serious trade imbalance we are presently experiencing. It is for this reason, therefore, that I would like to insert into the RECORD at this time my recent comments on this subject for the House's consideration.

The comments follow:

From time to time an individual has to step back and re-evaluate one's position as it relates to programs that are periodically considered by Congress. As times change, new situations arise, and subsequently one has to attempt to use a little common sense when considering whether to continue to eliminate programs. After many months of reviewing the "pros" and "cons" concerning this particular matter, it is my conviction that to eliminate DISC would be unwise. Moreover, it is my belief, that the Domestic International Sales Corporations, as it is presently structured, clearly offers itself as a vehicle to aid the overall domestic economic picture that we must all admit has not been very positive as of late.

My question is, will we have the wisdom to give this program a legitimate chance?

Most small U.S. companies fail to become involved in export matters for a variety of reasons. Not only is there substantial initial and ongoing costs in becoming involved in export activities, but there is the chronic shortage of capital that often prevents small companies from expanding their facilities to handle export activities. Moreover, when you couple this with the fact that export receivables, unlike their domestic counterparts which are normally payable in thirty days, usually require 180 or longer, and are often not financeable through U.S. banks (not to mention associated currency fluxuations and inflation risks), it often dissuades this country's small firms from electing to vigorously adopt an exporting posture. Additionally, smaller U.S. companies often find themselves losing foreign sales to foreign competition given that they are locked into the position of demanding firm letters of credit prior to the consumation of an export deal.

It was for reasons such as these that the Domestic International Sales Corporation

was originally created. It should be noted, however, that these were not the only reasons why this preference was enacted.

As a result of the declining competitiveness of U.S. firms in the 1960's, many firms then involved in exporting products began to re-evaluate their overall "marketing strategy." Some U.S. firms began servicing their foreign markets through the use of marketing agreements, while others established foreign manufacturing facilities. Worst of all, many U.S. companies began withdrawing from export markets completely. To exacerbate this situation, the U.S. was then experiencing a negative trade balance.

While admittedly this trade imbalance was not as profound as it is now, our government, as well as the Congress, had the foresight to seek the means by which to provide the psychological, as well as capital incentive necessary to enter, as well as to maintain, existing domestic export operations.

In my opinion, DISC has served to stimulate exports in several very important ways. It has encouraged companies to begin or expand its export operations; it has provided the necessary capital to expand its export facilities, as well as provide the necessary cash flow to deal with slow export receivables; and, has served to stimulate our domestic economy by encouraging domestic firms to service international markets from at home rather than enter into marketing agreements or to establish manufacturing plants abroad. Moreover, with the adoption of the DISC "incremental rule" as a part of the Tax Reform Act of 1976, i.e., one-half of the DISC income in excess of 67% of the four-year base period is deferred from taxation, I feel that those who have been critics of DISC in the past should be satisfied given that this "rule" guarantees all concerned that no firm will be able to continue claiming this preference unless they continue to expand their export activities. Additionally, it should be noted the existing statute requires that at least 95% of both DISC income and assets must be reinvested in export-related activities.

According to Frank A. Weil, Assistant Secretary of Commerce for Industry and Trade, there are about 300,000 manufacturing firms in this country and of the 50,000 plus firms that have export potential only about 25,000 are actually exporting now. The logical question that might be asked is why are one-half of these firms not electing to export? In my opinion, the answer is painfully clear—why take the risk!

There are quite a few small businessmen in my district who have told me that even with the risks involved, they would very much like to establish a DISC, but wisely rationalize "why should I go through the motions when there is going to be a continuing 'battle' " waged year in and year out to discontinue DISC incentives. To tell you the truth, I don't really blame them, given that the present legal and accounting costs associated with complying with the complex DISC legislation in already quite burdensome—an area I might add that could stand reform and simplification.

I would like to point out that in my part of Iowa, DISC is creating jobs; DISC is allowing businesses to expand; but most importantly, DISC is contributing to improving the overall economy, which needs all the help it can get at this particular time. Moreover, if there are those who have their doubts about the effectiveness of DISC, I would certainly welcome them to visit Northeastern Iowa so they can personally see companies that have grown through DISC and the jobs that have resulted through this program.

Last month it was my privilege to have had one of my constituents, Mr. Tom Parks, President of KWIK-Way Manufacturing of Cedar Rapids, Iowa, testify before this Committee. Mr. Parks, in my opinion, not only gave one of the best "common sense" defenses of why DISC should be continued, but he also showed how DISC had legitimately contributed to employing individuals and stimulating Iowa's economy.

Let's consider just on part of Mr. Parks' testimony:

"Since 1971 our export business has grown from $1.1 million annually or about 6.2% of sales, to $5.6 million in 1976 or 36.2% of sales, 1976 being the last year on which audited figures are available. Translated into jobs, 144 people of approximately 400 people employed in our modest operations are now totally dependent upon export for their employment. 144 people approximates our total employment in pre-DISC days, evidence that an encouraged and properly operated business grows, improving our tax base."

To me, this statement is one reflective of why the Congress should continue DISC. Why? Because DISC is helping firms to grow and to employ more people. Mr. Parks' firm is not an isolated example. In fact, there are many firms in Iowa who are taking advantage of DISC and can show positive accomplishments as a result.

It seems only equitable that this government should provide some type of incentive to American firms if for no other reason than their foreign counterparts are currently receiving export incentives from their respective governments in the form of tax advantages and direct subsidies. Our trading partners have gone to great lengths to stimulate their exports, the result being that exporters in foreign countries have a decided advantage over their U.S. counterparts.

As this country faces a continually growing trade deficit, it might be well to reflect on the comments of Assistant Secretary of Commerce Weil, who stated quite some time ago that this country needs "a plan of action, a plan that translates into an overall export strategy." I could not agree with him more! In my opinion, however, this country will fail in this regard if it decides to eliminate DISC.

I will be the first to admit that the continuation of DISC will not by itself solve our present trade imbalance. I would submit, however, that DISC serves as an important element expanding this country's export markets abroad, and in stimulating our lagging domestic economy.

In considering the Tax Reform proposal now before the Congress, it is time for us to show that we are committed to a vigorous export policy by not eliminating the Domestic International Sales Corporation.●

## THE 100TH ANNIVERSARY OF THE SOUDERTON INDEPENDENT

### HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. SCHULZE. Mr. Speaker, on April 19, 1978, the Borough of Souderton will honor its community newspaper, the Souderton Independent, as it celebrates its 100th anniversary. I would like to join my constituents in congratulating this paper for its century of public service as it begins its second hundred years under the aegis of the descendants of the paper's founder.

In April 1878, W. F. Goettler founded the Independent which has since become a backbone of the Souderton community. Now, a century later, the four great-grandsons of Mr. Goettler are still publishing the paper in the same tradition of integrity and quality established by their great-grandfather. This weekly paper which serves over 6,500 homes in the Indian Valley community, has provided an invaluable public service. A community paper provides a vital link in the chain that binds the community and its people together. The Souderton Independent has provided informative yet entertaining and responsible journalism for the people of its community for many years.

I join my constituents in lauding the Independent for its long service to the community and for the many distinguished achievements of its first 100 years. I send my heartiest congratulations to the Moyer and Fenstermacher families as they begin the second century of publication of this family paper.●

## SMALL BUSINESS LOAN INTEREST RATE CHANGES

### HON. W. HENSON MOORE

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. MOORE. Mr. Speaker, I voted against H.R. 11445 yesterday due to the provision in the bill to increase disaster loan interest rates to 5 percent instead of continuing the present 3-percent level for loans to small business. I concur with the extension of present low interest rates for disaster loans to homeowners as well as other features within H.R. 11445 of benefit to small business, but I find the increase in disaster loan interest rates for small business to be unwarranted and prejudicial.

My objections center upon title I of H.R. 11445 and concur with my opposition to S. 1306 defeated on the House floor on November 1, 1977, when a nearly identical move was attempted to increase small business disaster loan interest rates to 5 percent for loans issued during the first 9 months of this year. It was ill-advised to attempt to increase these interest rates then and remains wrong today. Small businesses which would be aided by a $250,000 maximum loan at 3-percent interest are primarily independently owned stores and businesses that are family operated. These "mom and pop" small businesses simply do not have the operating capital or economic nest egg to rebound from a severe flood or natural disaster. Many have to take out a second mortgage on their businesses or refinance their homes in order to recover. Those who need an SBA loan larger than $250,000, pay the 6⅝-percent interest rate to make the program self-supporting. Thus, it is geared to benefit small business most.

With last year's rejection of higher interest rates for small business disaster loans, a commitment was given to thoroughly study the interest rate structure prior to any change from existing policies. I am not a member of the Small Business Committee, but information available to me shows no study has been forthcoming. In other words, the House has acted to continue low homeowner in-

terest rates, but not those for small business without substantive justification for taking either action.

I support the preservation of the existing 3-percent interest rates for small business loans and action taken within H.R. 11445 of benefit to individual homeowners.●

## CARTER PROPOSAL HEARTENING TO HUNGARIAN PEOPLE

### HON. JAMES M. HANLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. HANLEY. Mr. Speaker, I recently received a letter from Tibor Helcz, the national chairman of the Federation of Hungarian Former Political Prisoners, concerning President Carter's proposal that Hungary be granted most-favored nation status. The organization, consisting of former prisoners of Nazi and Communist prison camps, is dedicated to the cause of seeing full human rights extended to the people of Hungary. They should be congratulated for their work to assure Hungarian compliance with the Helsinki accords. Indeed, this is why it is particularly heartening to hear that they endorse the granting of most-favored nation status to Hungary. Hopefully, the creation of a warmer climate between our two countries will result in great improvements in the basic human rights of the Hungarian people.

Mr. Helcz has communicated this message to Secretary of State Cyrus Vance, and because of its importance I would like to insert a copy of this letter in the CONGRESSIONAL RECORD, assuring that this body will have this organization's views before it when we consider the issue.

The letter follows:

FEDERATION OF HUNGARIAN
FORMER POLITICAL PRISONERS,
*Syracuse, N.Y., March 24, 1978.*

Hon. CYRUS VANCE,
*Secretary of State, The Department of State, Washington, D.C.*

DEAR MR. SECRETARY: We, The Federation of Hungarian Former Political Prisoners, have frequently expressed our support for a proposal by the United States to grant Hungary "most favored nation" status. Recently, we were pleased when the State Department announced the Hungarian and United States governments signed a new trade agreement, as Hungary is now placed in the same special category as Poland and Romania by lifting restrictions on imports in return for freer emigration.

We must stress first and above all that the Federation of Hungarian Former Political Prisoners is a human rights movement. Each of us has survived long years of imprisonment and untold anguish in Nazi and Communist (or both!) prison camps. For this reason, we are solidly dedicated in our struggle to obtain human rights for our fellow Hungarians in Soviet-dominated Eastern Europe and to obtain release of Hungarian political prisoners.

Reportedly, the U.S. Government claims that Hungary is the most "liberal" of all Communist-bloc countries. We must insist, however, that the Red-dominated Hungarian government indeed does *not* guarantee citizens the basic human rights adopted by the Helsinki Accords four years ago. We offer examples:

First, while Hungary agreed to accept a linkage between trade and emigration of Jewish persons and other minorities, we are much more concerned about emigration in a far broader term. According to latest statistics, Hungary has only 2 percent minorities, including 1 percent Jewish. We find it only fair to ask you, Mr. Secretary, to intervene for the same rights for 98 percent Magyars, who are 55 percent Roman Catholic, 20 percent Calvinist, 5 percent Lutherans, and the remainder of other faiths.

Secondly, travel and emigration by young Hungarians to the West falls into an area of the strictest control by Communist authorities. It is futile, if not impossible, for a Hungarian family to obtain a visa to the West, as some members must remain behind as hostages. Family reunifications are at a standstill, with authorities employing intimidation, harassment, and imprisonment against those who persist in exercising their human rights. When Hungarians are denied legal means of emigration, they are then left with the risky, often lethal avenue of escape from their country.

Section 203/1 of the Hungarian Penal Code prescribes sentences of from six months to five years imprisonment for attempts to cross the border without permission. Incidents of border shootings are not uncommon.

Amnesty International, the 1977 Nobel Peace Prize-winning human rights organization has adopted Sandor Rudovics, a twenty-seven year old factory worker, from the city of Szombathely, who with his wife, departed Hungary in 1973 for Austria, leaving their baby daughter behind.

"The authorities refused to grant permission for their daughter to leave Hungary to join her parents. On October 10, 1974, Sandor Rudovics returned to Hungary and tried to leave the country with his daughter without official permission. He was arrested and sentenced to two years imprisonment on charges of crossing the frontier illegally. After spending two years in prison, Sandor Rudovics made another attempt to cross the frontier in August, 1976. He was again arrested." (Amnesty International Report, 1977, Page 255) This persecution is a direct violation of the Helsinki Accords.

The other well-publicized case in connection with the supposedly guaranteed "freedom of travel" is Jeno Farkas' arrest in an aborted escape from Hungary on April 27, 1977, his eighth attempt. He previously languished for 8½ years in Hungarian prisons for his desire to leave the country. We can cite hundreds of cases such as Rudovics' and Farkas'.

Thirdly, another area we are most deeply concerned with on the human rights issue is lack of freedom of speech in Hungary. "Agitation," the catch-all category of the Section 127 of the Hungarian Penal Code, prescribes prison sentences of up to eight years for acts liable to "incite others" to "hatred" directed against the State and international relations of Hungary. His code is a suppression of any criticism of the government.

According to official Hungarian statistics, at least 100 citizens were convicted of such "incitement" in 1975. Later figures were denied us.

The case of Dr. Maria Dombovari-Lorincz, a medical doctor from Budapest, is a sad example of freedom of speech in Hungary. She was charged in 1977 under Article 127/6 to "incite hatred against alliance and friendship between Hungary and other countries." Dr. Dombovari had publicly denounced the presence of Soviet troops stationed in Hungary since 1956. For this, she was sentenced to an undisclosed term in prison.

Fourthly, while Hungarian authorities have long been sentencing citizens to serve prison terms for expressing desire of national independence, we American-Hungarians have openly and freely espoused total withdrawal of Soviet troops from Hungary as one of the conditions for returning the Holy Crown of Saint Stephen to Hungary. This condition, however, has not been met, and this holy relic, (a revered symbol of our national heritage) is being returned despite the existence of tyranny in our native land.

In addition, after the American and Hungarian authorities signed the recent trade agreement, Hungary "persuaded" four leading dissidents to leave the country. These dissidents were among those Hungarian intellectuals who in late 1976, sent an open letter of solidarity to signatories of Chapter 77 in Czechoslovakia. By exiling them to the West, the Communist-controlled Hungarian government again demonstrated rejection of freedom of speech.

We stand behind President Carter in his attempt to grant "most favored nation status" to Hungary. We firmly believe his dedication to human rights will create a warmer political atmosphere in which our Federation's desire for amnesty to political dissenters in Hungary and a full implementation of the Helsinki Accords will become a reality.

We would be most grateful, Mr. Secretary, for your supporting our Federation's efforts. Be assured, we shall persist with firmest determination and faith in our endeavors to restore fundamental human rights in our native Hungary.

Respectfully yours,

TIBOR HELCZ,
*Chairman.*●

## NO REMOVAL OF MILITARY BASES WITHOUT AN ACT OF CONGRESS

### HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. HANSEN. Mr. Speaker, the House on February 28 took an unheralded but significant stride toward forcing recognition of the constitutional role of the U.S. House of Representatives in consideration of the proposed Panama Canal treaties.

Working with the leadership and staff of the House Armed Services Committee I introduced a bill H.R. 11201 now cosponsored by over 80 percent of the committee's members designed to block any transfer of military bases in the Panama Canal Zone without action by both Houses of Congress.

This bill has been referred to the jurisdiction of the Armed Services Committee, and the overwhelming support evidenced among its members should indicate the possibilities of early consideration and passage which I am now urging with the cooperation and help of key committee members.

This action adds strength to my resolution pending before the House Merchant Marine and Fisheries Committee which now has 237 cosponsors, well over half the Members of the House, demanding that the House as well as the

Senate act in any transfer of U.S. property in Panama—a resolution which is being urged to early floor action by discharge petition which is rapidly moving toward the necessary number of signatures.

Since this legislation has the support of the chairman and a large majority of committee members as cosponsors, there is considerable likelihood that the legislation can be moved along at an early date, if necessary, to adequately impress upon the Senate and this administration that the House will not be bypassed and trifled with in its responsibilities to the American people.

The administration since last November has promised and not delivered implementing legislation for the proposed treaties and more and more Members are concerned that the treaty process consideration will go too far too fast before the real facts are made available to the Congress.

This has made the huge unprecedented effort of assertion of rights by the House of Representatives necessary.

What it boils down to is not just a fight over giving away the Panama Canal but a possibly even more important fight over giving away basic constitutional safeguards protecting the peoples' interests.

I have formally requested expeditious committee action and the following resolution signed by a majority of the members of the Armed Services Committee urging early consideration of the bill was presented to the chairman to signify firm support for whatever expediting steps he deems necessary.

The resolution, a letter, and a bill follow:

RESOLUTION UPHOLDING BASIC CONSTITUTIONAL AUTHORITY OF CONGRESS

In support of legislation to prohibit the transfer or other disposal of any military installation located in the Panama Canal Zone without the specific authorization of Congress

Whereas, the United States Government has enjoyed right of access, possession, ownership, and title to the Panama Canal Zone as defined by previous treaties and enactments of law through payments to French interests, to the Republic of Panama, to private land owners of the Canal Zone and indemnification of Columbia; and

Whereas, the Supreme Court in the 1907 case of Wilson vs. Shaw ruled that the Panama Canal Zone is titled Property of the United States; and

Whereas, authorization and appropriation of funds by Act of Congress as provided by the Constitution of the United States is necessary and unavoidable for alteration, modification, or removal of military installations in the Panama Canal Zone; and

Whereas, under Article IV of the United States Constitution the Congress shall have Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States; and

Whereas, under Article I of the Constitution money shall not be drawn from the Treasury, but in Consequence of Appropriations made by Law; and

Whereas, implementing legislation necessary to authorize the conveyance, relinquishment or disposition to the Republic of Panama or any foreign government of any right to, title to, or interest in the property of the United States Government agencies in the Panama Canal Zone or any real property and improvements thereon located in the Zone has not been received timely even though consideration of proposed related treaties is currently in process in the United States Senate,

Now therefore, be it enacted by the House of Representatives and the Senate of the United States of America in Congress assembled. That notwithstanding any other provision of law, no right, title, or interest of the United States in or to any real property located in the Canal Zone which on the date of the enactment of this Act is under the jurisdiction of the Secretary of a military department may be transferred or otherwise disposed of unless such transfer or disposal has been specifically authorized by Act of Congress enacted after the date of the enactment of this Act.

And further, be it understood that we the undersigned petitioners as sponsors of said legislation who among us constitute a majority of well over two-thirds of the House Committee on Armed Services do hereby request of the Chairman of such committee urgent and priority action in consideration of this bill, this consideration being in keeping with a majority of Members of the House of Representatives, as demonstrated by the 223 cosponsors on record in support of H. Con. Res. 347 upholding the provisions of Article 4, Section 3, Clause 2 of the U.S. Constitution.

---

HON. MELVIN PRICE,
*Chairman, Armed Services,*
*Washington, D.C.*

DEAR MR. CHAIRMAN: Since the Panama Canal Treaties seem to be in their final stages of consideration before the U.S. Senate, and since it appears that a conscious effort is being made to bypass the House of Representatives through unprecedented applications of the concept of self-implementing treaties, and since it appears that the House will need to assert its authority under Article IV, Section 3, Clause 2 of the U.S. Constitution to act timely in matters of transfer or disposal of U.S. property to a foreign government, it appears necessary that the Committee on Armed Services which has significant jurisdiction in the Canal Zone because of key military installations therein situated, call up H.R. 11201 for immediate consideration.

This legislation has a large number of sponsors including over 80 percent of the Members of the Armed Services Committee and is similar to H. Con. Res. 347 which has 237 cosponsors.

The situation is urgent in terms of the Constitutional authority and responsibilities of the House and this legislation stipulates that "no right, title or interest of the United States . . . in the Canal Zone . . . under the jurisdiction of the Secretary of a military Department may be transferred . . . unless such transfer . . . has been specifically authorized by Act of Congress . . ."

Mr. Chairman, again your early action is respectfully requested to deal with what appears to be a serious constitutional challenge to the traditional authority of the House and our legitimate role as Representatives of the people of the United States.

Sincerely,

GEORGE HANSEN,
*Member of Congress.*

---

H.R. 11201

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That notwithstanding any other provision of law, no right, title, or interest of the United States in or to any real property located in the Canal Zone which on the date of the enactment of this Act is under the jurisdiction of the Secretary of a military department may be transferred or otherwise disposed of unless such transfer or disposal has been specifically authorized by Act of Congress enacted after the date of the enactment of this Act.●

---

## QUIET STRENGTH

## HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. PICKLE. Mr. Speaker, while we were away from Washington, the Washington Post ran a feature story on Secretary of Labor Ray Marshall on the front page of the Saturday "style" section of March 25, 1978.

Since we did not get to see the story, I want to share it in the CONGRESSIONAL RECORD.

The story is a story of life, and how life can be led when it is difficult, and hurting to go forward. This is an excellent story of the able Ray Marshall and his family:

LABOR'S RAY MARSHALL: WRESTLING WITH PUBLIC AND PRIVATE CRISES

HIS FIRST PRINCIPLE IS NOT TO WORRY ABOUT THE THINGS HE CANNOT CHANGE

(By Jacqueline Trescott)

It was 4 a.m. one Saturday morning last month and Ray Marshall didnt want to go into the Labor Department's auditorium and tell the press the coal talks had broken down. Again.

Marshall was fatigued and finally discouraged. On only a few hours sleep, he had spent the previous 2½ days in an intensified round of bargaining and caucusing, and had been optimistic that an end to the 73-day-old strike was in sight. He had been shuttling between the White House, where the coal operators were waiting in the Roosevelt Room, and his office, where the bargaining council of the United Mine Workers was camped out.

Now all the work and all the hours seemed for naught. And the beleaguered Marshall was tired of black coffee, tired of the spare-rib dinners the staff was ordering for this son of a Louisiana tenant farmer.

This endless night the secretary didn't even try to relieve the tension with a Bob Newhart routine. (His imitation is unrivaled, says his staff.) Everything was unraveling and he hated to say that out loud.

"Folks" said Marshall, hesitating a little as he faced the bleary-eyed press corps, "sorry. we can't reach an agreement. The bargaining council voted down the last offer, 39–0. It looks like it's not going to be possible for us to have a negotiated settlement."

But the painful night was not over for Marshall. As he wrestled with the coal strike, the first major crisis during his 14 months as Labor secretary, he also had been coping with a personal ordeal. Within a five-week period, his son, Christopher, 15, had two operations for cancer. On January 30, Chris had an arm and shoulder removed because of the disease, and underwent a second operation on March 2, after it was discovered the disease had spread to his lungs.

The morning of the pre-dawn press conference, Marshall went home, spent some time with Chris, one of his five children, and was back in the office before 9 a.m.

Yesterday the 160,000 striking UMW members vote on the latest contract offer, the third since Dec. 6. Cautious about the outcome, Marshall prepared two statements, one grateful, one not.

By late evening, it appeared he would be using the grateful one. United Mine Workers President Arnold Miller announced last night the striking coal miners had voted to ratify a new three-year contract and end their 109-day walkout.

"It's been a pretty hard time," said Marshall, 49, earlier this week. To his friends Marshall is known as a man who has two loves, his work and his family. Despite simultaneous crises in both areas, publicly Marshall has not lost his control, congeniality or optimism.

"We were shocked about Chris, partly because it was so sudden, but also because at every turn in the process, things were pretty bad. You think a pain in the arm is a muscle problem or a sprained ligament but it turned out to be cancer. It was a shock," said Marshall, his voice soft and level but the words impeded by his emotion.

The people who saw the most of Marshall, however saw only his stoic side. "I would go home some nights after these negotiations and Helen would ask me what was disturbing me," said Robert Strauss, the chief U.S. trade negotiator who was part of the White House coal strike team. "I told her I was thinking about Ray Marshall, and how that guy was under the tremendous weight of the president putting his confidence in him on the strike matter, plus the burden of his load. I couldn't do it. And I've always thought of myself as a strong man. He was unflappable, he never showed the tension."

Stuart Eizenstat the administration's domestic affairs adviser, noted, "I saw him at countless meetings. He looked fresh, he never showed any strain. And his mind never wonders and you think it would at a time like this."

Patricia Marshall, shy and soft-spoken, has seen this strength before in her husband in their 31 years together. "Ray has never given into any kind of pressure," she said.

His particular resilience and discipline evolved from his own emotional battles as a child. He was very poor, spent five years in an orphanage, and lied to get into the Navy at age 15. By the time he was 48, and selected for the Cabinet, Marshall was a well-established economist at the University of Texas, with an armful of books to his credit and a 75-acre ranch. He believes anybody can beat the odds.

By many different people, Marshall is considered a rare bird. George Meany once introduced Marshall to Alexander I. Solzhenitsyn as one of the few professors in the United States who understood working people. Some people find it surprising, given his background, that he developed what friends call a "guiltless" sensitivity to race relations and focused much of his professional interests on the plight of minorities.

Not everybody likes Ray Marshall, his views, his performance at Labor or his strategy during the coal strike. But he deals with criticism and tough situations with examples of courage he has borrowed from novelist William Faulkner, the late Earl K. Long, the governor of Louisiana, and the apostle Paul.

It's Faulkner he quotes, especially from the writer's Nobel Peace Prize speech: "I believe that man will not merely endure: He will prevail."

MAKING THINGS SIMPLE

"I don't remember not working," said Marshall, putting aside a piece of wire copy he had been doodling on and settling into a corner of his office couch.

Coming from this Labor secretary that statement is not flip but factual. Marshall has the ruddy complexion of an outdoorsman, which he has been at least by hobby most of his life. This afternoon he is not wearing the cowboy boots he wears at least twice a week but a pair of brown oxfords, with a brown and white suit.

Marshall was born in Oak Grove, La., where his father, Thomas, was a tenant farmer. Marshall was Freddie Ray then and he picked cotton and sugar cane. He spoke of his father as a strong man who rejected the fundamentalist religion of North Louisiana as irrational and emotional, and his mother, Virginia, as a sensitive, largely self-taught woman, who gave him his first lessons in race relations.

"We had black neighbors and my mother said to address them 'Yes, ma'am.' The white neighbors didn't like that and criticized (her) but I didn't develop any fears because of that criticism," said Marshall.

When Marshall was 11, his mother died suddenly of blood poisoning and the five children went to live in the Mississippi Baptist Orphanage in Jackson, where the family had by now moved. Thomas Marshall, the secretary's younger brother, who now works for the Department of Agriculture here, recalled, "He kept the brood together. We griped about the work we had to do but Ray was energetic. He got up at 4 a.m. to milk the cows, and he operated the engines and boilers of the laundry. And he was smart. I overheard the teachers say that he knew more than they did."

The education and work procedures at the orphanage were bound into a strict religious code, and Marshall viewed it skeptically. "I tried to learn all I could about Christianity and the brotherhood of man. But what disturbed me was the contract between what they did and what they were saying, particularly on race matters and materialism. The preacher would say, 'This is the way God intended things. Do you find cows mixing with horses or birds mixing with rabbits.' And I asked, 'have you ever heard of black cows mixing with white cows?' "

Eventually Marshall decided he wanted more independence and when he was 15 he ran away from the orphanage, worked briefly making false teeth, and then joined the Navy, serving as a radio operator in the Pacific.

After World War II, Marshall returned to Jackson, got his high-school equivalency diploma, enrolled in Hinds Junior College, where he met his wife, and then earned a degree from Millsaps College. At one point, Marshall considered a political career "to address the issues of the disadvantaged." A professor told him, "Look, life isn't that much fun down here and politics is about the only entertainment we have. We don't want to hear serious talk. So think about that."

Marshall took his interest to the classroom where his views as a faculty member of the University of Mississippi and Louisiana State University in the 1950s attracted the White Citizens' Council. They called him a "scalawag and troublemaker." But he survived in the environment, recalled Bernard Sliger, a colleague who is now president of Florida State University, because, "Ray never irritated people. It wasn't felt that he was an outsider and he was always calm and logical. He always smiled."

From his experiences in the South, Marshall picked two people from whom he learned valuable lessons—William Faulkner, whom he met in the early 50's, and Earl Long. "I really didn't read Faulkner until I was in Finland on a Fulbright in 1955 and 1956. It was a writing style I was not used to because I was accustomed to scanning books and papers. I told Faulkner this and he said, 'I work hard at my craft, I don't want you to scan it.' And we talked about fear and courage, and he said, 'The only thing you can do well when you fear is run, and if you are running, you are not true to yourself.' "

Again, it was courage and style that Marshall learned from Long, two-term governor of Louisana. "I certainly didn't agree with everything he stood for. But he showed you could dramatize the simple things, you could get your point across and still be outrageous," said Marshall.

The secretary, it is quickly noted, has been just the opposite: shy, low-keyed, methodical, and, before the coal strike, often overlooked. "Yes," said Marshall. "But I am trying to make things simple."

NO HOLDING BACK

As secretary of Labor, Marshall has accomplished many of his goals. Under his administration, the overall unemployment rate has dropped from 7.3 in January, 1977, to 6.1 percent last month. The overall black unemployment rate has dropped in the same period from 13.1 to 11.8. Yet the black teen-age unemployment rate, which has hovered around 40 percent, has barely changed.

He has doubled public service jobs to 725,000, gotten a sizable jobs component in the welfare reform measure and was the administration's strongest point man in House passage of the Humphrey-Hawkins jobs bill. He also has lost on a couple of pieces of legislation.

His internal staffing also has drawn praise; there are a number of highly placed blacks and his assistant secretary for manpower, Ernest G. Green, is black.

He's pleased.

Others are not. Charles Bailey of the National Right to Work Committee, called Marshall's record "abominable." Sen. Orrin Hatch (R-Utah), a member of the Committee, on Human Resources, formerly Labor and Public Welfare, said Marshall's a "decent, scholarly man but as a secretary he is biased to big labor on almost all issues and he performed poorly in the coal miners' strike. He wasn't forceful enough."

But then again some are pleased. "I'm not criticizing Marshall when I criticize President Carter," said Jerry Wurf, president of the nation's largest public employe union, who has denounced some of Carter's urban approaches. "Marshall is one of the best appointments, forthright and honorable. We know he has to compromise and when we don't get everything, it's not his fault." Another critic of the administration, M. Carl Holman, president of the National Urban Coalition, said, "He understands. We've lost some fights but when he is attacked as a liberal in the Cabinet, I consider, that a good sign."

Rarely does Marshall get ruffled by criticism, defensive, yes, but, rarely angry. Only once in the last two months, with the monumental professional and personal pressures, does the staff remember him angry. Evans and Novak wrote a column giving Robert Strauss the credit as the chief strategist in the negotiations. Marshall exploded. Strauss has since said Marshall called the shots.

And, it was to Strauss that Marshall turned the night President Carter announced an earlier (and unratified) contract agreement and said, "No one is more relieved than I that this is settled. Now I can get back and devote more time to my personal decisions."

In his office, Marshall is talking about fear, that fears are self-imposed. And about sleep, that needing a lot of sleep is a state of each person's mind. He hasn't had that much sleep lately.

"One of the ways I have been able to deal with the coal thing and the shock with Chris has been Chris' own attitude. We discussed the different treatments, whether chemotherapy is better immediately after surgery or should we wait. We talked about the unpleasantness that can come with the treatment. We haven't held anything back from him," said Marshall.

When Chris was hospitalized during the coal strike, Marshall would visit him in the morning, again in the evening, and sometimes, at lunch. He came back encouraged as Chris learned to write with his other arm, learned to tie his shoes and put in his contact lenses.

"But the thing that has made it easy is his own strength. We decided that it doesn't help to get depressed," said Marshall. And he taught his son and the rest of the family his first principle. "Never to worry about things I cannot change."●

## HUMAN IMPACT OF THE BUDGET

### HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. MINETA. Mr. Speaker, the Budget Committee has now completed action on the concurrent resolution on the budget for fiscal 1979. During the preparation of that resolution, the committee conducted extensive hearings on the shape of spending and revenues for the upcoming fiscal year. I would like to share the remarks of Ms. Marjorie Boehm, national president of the Women's International League for Peace and Freedom, who testified before the committee on February 27, 1978.

It is too easy to think of a budget as simply a mass of figures without realizing the full human impact on the citizens of this country. Ms. Boehm's testimony is directed at that human impact.

This year defense spending will again be one of the largest single components of the Federal budget. While we all realize the vital importance of national defense to this country, there is considerable evidence that we pay too high a price for that security. Defense spending, with the billions of dollars in contracts that it hands out to American industry, has traditionally been considered an important stimulus to the economy. That assumption, however, is being brought into question. As these questions are raised, it becomes increasingly important to redefine what is actually the "national security" of this country.

Ms. Boehm is a resident of Santa Clara County and is familiar with the impact of defense industries on the local community and its residents. The conclusion her testimony reaches is clear: Rather than a boon to the economy, excessive Government spending on weapons systems and military manpower can be a brutal sacrifice and a tragic underuse of our national resources. This lesson is valid throughout the country.

The testimony follows:

Honorable Chairman and members of the Budget Committee of the House of Representatives.

The Women's International League for Peace and Freedom recognizes that the decisions you make before April 15 will influence the setting of priorities and the well-being of our country this year and in the future. We recognize also that this committee and the office of management and budget expect 75 to 80% of the nation's budget to remain relatively uncontrollable, which makes your decisions about the remaining 20 to 25% even more important.

The proposed "national defense" function outlays of $117.8 billion are 23.5% of the expected budget total of $500.2 billion. Defense Secretary Brown has said that needs for 1983 will require $56 billion more. If this committee accepted such thinking our defense budget would rise to $173.8 billion and would comprise 26.7% of our projected total outlay for that year of $650 billion.

Members of the Women's International League for Peace and Freedom feel that it is time to redefine the word "security" in terms of the kind of world and country in which we want to live. What is being hawked in the marketplace as defense or "security" we believe cannot bring us a truly healthy, prosperous, democratic country in the world of peace and freedom sought by our international sisterhood.

JOBS

We are convinced that the greatest threat to security in the United States is unemployment.

California is one of the most military-dependent states in terms of percent of federal income and the most military-dependent of any state in terms of total dollars. In 1977 our share in prime contracts was slightly over $10 billion.

I live in Santa Clara County which received $1.94 billion. Nearly one half of that amount went to Lockheed Missile and Space Company.

With a population of about 10% of the nation's total, we in California got about 11.5% of all federal expenditures in 1976. And, in three important categories of spending, we were way over our per capita share. These categories were, in percentages of the total U.S. expenditure: Department of Defense 18%, National Aeronautics and Space Administration (NASA) 47% and Energy Resource and Development Administration (ERDA) 12%. We fell below our per capita share in three areas: the Department of Agriculture 7.9%, Department of Commerce 7.3% and Department of Transportation 5.3%.

How did our unemployment figures stand during this same year of 1976? The percent in California was 9.2% as against 7.7% for the United States, and Santa Clara County matched the national average with 7.7% that year. In 1977 California's rate was 7.6% and that of the U.S. 7%. That is hardly what might have been expected considering the generous flow of U.S. dollars into California.

I am sure you are all familiar with the Bureau of Labor Statistics Report revealing that military spending creates fewer jobs than a corresponding amount of money spent by the government in other areas. The average number of jobs per billion dollars of Pentagon spending is 75,710. Government spending in other sectors generates many more jobs. For each billion spent in state and local government, 87,021 jobs are created. And in construction 100,072 jobs are generated by each billion dollars.

A study done in Santa Clara County projects what could be accomplished in jobs creation by a 10% shift from military to other areas of spending. It shows that at least 8,534 jobs would be created by that modest shift of funds.

It is a myth that military spending creates jobs. Such spending is capital and research intensive, not labor intensive. In 1968 Lockheed Missile and Space Company received $551 million in contracts and employed 31,500 workers. In 1976 that complex got $882 million in government orders and employed only 15,500 workers.

The Joint Economic Committee of Congress reports that each unemployed worker costs U.S. taxpayers $18,279 in lost taxes, unemployment insurance, food stamps, welfare and other important services.

A study by the Social Security Administration reports that Social Security income has been reduced drastically by unemployment. If the jobless rate were cut from 7% to 5%, Social Security would show a $10 billion surplus over the next 4 years instead of an $11 billion deficit.[7]

Economist Gar Alperovits says, "unemployment is stealing from the standard of living for all Americans."[8]

We are concerned that the increases in outlays for employment and training programs are insufficient. Large numbers of unemployed workers are still not being helped at current levels. We recommend a substantial increase in the Training, Employment and Social Services function to allow for growth in jobs programs.

We are also concerned that special youth programs for jobs and training proposed in the budget do not meet the request made by the Conference of Mayors. Since unemployment figures for teenagers are hovering close to 20% and those of minority youth near 40% we must expand our jobs programs for youths, not assume that fewer youths will be looking for jobs.

INFLATION

Another enemy of real security is inflation. The Women's International League for Peace and Freedom believes that the greatest single cause of inflation is military spending. Such spending consumes billions of dollars but does not put anything back into the economy that can be used. Its products don't generate the need for other goods. Meanwhile, research and development in all areas of human needs, such as health services, have lagged behind, unable to compete for funds against the military-industrial partners.

In 1976, ¾ of Federal research funds went to Defense, Space and Atomic Energy.[9] This has paid off in armaments but has cost us dearly in all facets of our lives and our finite environment. The FY 1979 budget maintains this priority in research spending, with over 60% programmed for Defense and Space areas.

In Santa Clara County, as elsewhere, ever larger numbers of elderly on fixed incomes are in desperate straits as property taxes rise. Young couples often must choose between having a baby or buying a house because of incredibly inflated rates.

HEALTH

The Women's International League for Peace and Freedom believes that we shall never have real security in the U.S. until we have a comprehensive health program. We are concerned that the only budget proposals relating to Medicare or Medicaid programs are to fund administrative studies for the purpose of economy or preventing frauds and abuse. We see nothing to help the elderly who are now paying more for medical care out of their own pockets than they did before Medicare.

Dan McCorquodale of the Santa Clara County Board of Supervisors, in a letter to President Carter said our county operates a health facility which includes a large hospital complex known as Valley Medical Center (VMC). This hospital serves a cross section of county residents but in particular it is the place of last resort for patients of limited financial means. Currently we are facing capital expenditures of as much as $50 mil-

lion to bring the physical plant at VMC to acceptable standards. This is about 10 percent of the county's annual budget and it comes on top of our ongoing budget items. How are such costs to be met? At the local level, our principal tax fund is the property tax, a tax which is not linked to ability to pay. It seems to me that the only real vehicle for addressing unmet social needs will be to convert some of the defense dollars to these new priorities. I would urge this effort as a preparation to move ahead to FY 79."

INTERNATIONAL

The Women's International League for Peace and Freedom which was founded at the Hague in 1915 has sections in 24 countries around the world and groups in an additional 3 countries. At our twentieth Triennial Congress in Tokyo last summer our resolution on economic and social change called upon the women of the world "to stand in solidarity to convert monies wasted on military build-up to be used for the abolition of hunger, poverty, unemployment and illiteracy."

I submit that although the Military Assistance items in our budget under international affairs may be a relatively small proportion of the total, the decisions you make regarding them are of an importance out of all proportion to their monetary significance. Your committee is indeed being asked to set international priorities. Consider these amounts sought in FY 79: U.S. development aid for poor countries $1.6 billion; UN and OAS programs $282 million and Military and Security Assistance $2.7 billion. A decrease in the third category would have at least a symbolic effect on worldwide arms sales.

There is another reason why you should consider a reduction in that amount. Sales credits and training program grants are still going to countries where violations of human rights have been documented: the Philippines, South Korea, Thailand and Indonesia. Many countries in Latin America continue to receive arms under U.S. budgeted programs of previous years even though they have been criticized as human rights violators. There is a symbiotic relationship between production of weapons for U.S. military purposes and production for Foreign Military Sales. Pentagon officials say that export sales now sustain 350,000 jobs in the defense industries. There are reasons why production for the U.S. military spills over into international arms sales. The arms industry wants to maintain constant production and to maximize profits. Overseas sales also diminish per unit cost of weapons research and development.

Weapons sales are a concrete way to maintain the U.S. balance of payments and absorb the huge accumulation of funds from Middle East Oil Sales. It is incumbent upon your committee to assure that a break in U.S. arms production will slow military sales also. This country must export other goods and services to maintain its balance of payments position. A reduction in our nearly 500,000 troops abroad would slow the dollar flow. A decrease in military activity would certainly reduce our need for energy, our dependence on Middle Eastern oil and would also improve our balance of payments position. Appropriations Committee Chairman Mahon has been quoted as saying," every year you ask for more money and every year you say we need more security." Dr. Brzezinski has told us that security depends on the political situation but also on our well-being and on the well-being of citizens of other countries.

The Women's International League for Peace and Freedom rejects the notion that we must continue to expand our ability to destroy the world. We worry about the build-up of counter-force weapons. We know that even present levels of NATO troops, tanks and trucks clog the highways of Europe. We hope for progress in the signing of a SALT agreement. We hope that the U.S. will make a substantial contribution to the UN Special Session on Disarmament this spring. A U.S. budget with decreased military expenditures could be a real prelude to these steps towards peace. Please try it.●

---

## A SEARCH FOR WAYS TO TEACH COURAGE

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. DORNAN. Mr. Speaker, last Sunday's Washington Post carried an article which told the story of Adm. James Stockdale's approach to his new job as president of the Naval War College. More specifically, how he intends to instill into the students there the qualities of courage and integrity which he and his comrades displayed so heroically in the POW torture cells of Hanoi. Admiral Stockdale is trying to find ways to teach the next generation of Navy officers how to withstand if necessary the tortures, beatings, and fear he resisted for 7½ years.

His theory and method are, to my mind, accurate. He knows better than any man that courage does not exist until it has been used; until there is something to fear and overcome. Courage cannot be exhibited in the classroom but only in the crucible of combat and war. Courage itself cannot be taught with lectures and class notes but perhaps the reason to be courageous can be.

Stockdale's class will study philosophy and history—not military manuals—to learn the reasons courage is needed. It was the values of civilization, the wisdom of the great teachers which formed the bedrock of Admiral Stockdale's courage and which he believes will form the bedrock of courage for his officer students. With a thorough knowledge of the beliefs and values which have made our civilization great, the officers will know what they are defending and why it must be defended, and without the knowledge of what and why, courage can all too easily collapse or dissipate.

Mr. Speaker, I include the Washington Post article as part of my remarks today:

[From the Washington Post, Apr. 9, 1978]

A FORMER POW'S SEARCH FOR WAYS TO TEACH COURAGE

(By George C. Wilson)

NEWPORT, R.I.—Standing before the picture hung in the place of dishonor over the toilet, the admiral stabbed the tiled bathroom wall with his forefinger to tap out the type of coded message that had sustained him during 7½ years of isolation and torture in Hanoi's Hoa Lo prison.

In those days when Hao Lo was a fearsome place rather than just a picture in the bathroom, James Bond Stockdale's determination to live and lead was fortified every time he heard a tapped message from a fellow prisoner of war. Now, as president of the Naval War College here, Stockdale is searching for some way to teach Navy officers how to withstand the tortures, the threats, the beatings and the fears that he had to teach himself to resist.

Can such qualities be transmitted in the calm setting of a peace-time campus? Stockdale believes they can be, although it is only in the crucible of combat or the desperation of the detention that they finally rise to the surface. For him, it was the classical philosophy learned in a graduate course at Stanford, rather than anything taught him at Annapolis, that came back to fortify him against the cruelties of his North Vietnamese captors.

There was the time, for example, when the North Vietnamese handcuffed Stockdale's hands behind his back, locked his leg in heavy irons and dragged him from his dark prison cell to sit in the unshaded courtyard where other prisoners could see what happened to anybody who refused to cooperate. The Navy's official report of Stockdale's imprisonment, based on exhaustive questioning after his release, describes that and other incidents during Stockdale's 2,714 days of captivity from Sept. 9, 1965, to Feb. 12, 1973:

"He remained sitting in that position for three days. The sun beat down upon him. Since he had not been in the sun for a long time, he soon felt weak. He yelled for Bao Cao [guard], and the guard struck him from side to side on the face.

"The indomitable prisoner communication system provided a great boost to Captain Stockdale's morale at this point as two prisoner dishwashers established voice contact for short words of encouragement in spite of close guard supervision.

"The guard on duty decided not to let him sleep, and at one point accused him of dozing, punching Captain Stockade right and left on the jaw.

"As the guard left the stall, Captain Stockdale remembers hearing with pride a towel [snapping out in prison code the letters] GBUJS for God Bless You Jim Stockdale."

There are lessons in that and other prison experiences that Stockdale has decided to distill into an elective course for officers at the Naval War College, starting next fall. Called "Foundations of Moral Obligation," the course that Stockdale himself will teach represents the latest attempt to help American fighting men cope with pressure, including but not limited to that inflicted by captivity. He will try to convey to young officers what teachings got him through his 7½ years of captivity, which began on Sept. 9, 1965, when he parachuted from his damaged A–4 fighter-bomber into a tree. He will try to explain how and why a man can summon up astonishing courage if he has committed himself to integrity—"one of those words which many people keep in that desk labeled 'too hard,'" in Stockdale's words.

There was the day his captors decided to force him to be photographed for a propaganda film:

Escorted by Pig Eye [the POW's name for one of their guards], Captain Stockdale marched down to the Heartbreak improvised wash area where he was given a new razor and soap. He knew he had to act quickly, and he had already decided exactly what to do.

Getting down into a hundred position, as if prepared to shave, he frantically started digging with the razor. He began to cut the top out of his hair in sort of an inverse Cherokee in an attempt to make himself

unpresentable so that he couldn't be photographed.

In his panic, he actually dug the razor into his scalp several times without feeling it. Pig Eye, who had been busy getting gear together, suddenly realized that Captain Stockdale was not working on his whiskers. He stormed through the door and saw the blood streaming from the cuts in the scalp. . . .

Realizing his blunder, Pig Eye jerked Captain Stockdale out of the wash area and rushed back to Room 18 [where two other guards, "Rabbit" and "Chihuahua," were waiting] . . . Captain Stockdale could see their surprise turn into rage as they saw his bloody head and leaped to their feet and to the conclusion that it was a suicide attempt.

Captain Stockdale immediately took a seat on the floor [in the position the guards had so often pushed him into before subjecting him to the wrenching rope torture.]

"No. No. Get up," one of the guards ordered. "Why are you taking your own life? You've got things to do. The senior officer wants to see you tonight."

(The guards left him locked up in his cell and rushed out to find a hat to cover the cuts so the film ordered by the prison director could be made on schedule.) Alone for the moment, Captain Stockdale knew he had a problem and would have to act quickly. In panic, he realize that the hat would beat him in spite of his determination. He was not going to be used as a tool, for in his hierarchy of values the very top of the list was "not to betray my fellow prisoners or mislead them."

By this time he was about nine days into a fast and was neither too strong nor too alert. He thought of the honey bucket as a device to cut his wrists. He went over to the corner, glanced at the badly rusted, filthy thing and rejected that idea because of the certainty of infection from the rust and filth.

He glanced at the window-glass panes and thought of breaking a pane and cutting his wrists. But he knew there were Vietnamese close by outside, so he picked up his heavy mahogany stool, and, in Captain Stockdale's own words:

"I just started pounding my face. I bruise easily, and I stood there thinking I could be heard. Pretty soon a crowd of curious civilian [prison] workers were looking in awestruck horror through the panes of glass at this madman standing in the middle of the room pounding his face with the stool.

"I kept working because I knew I would get some swelling. I could feel my eyes coming up. There was a commotion at the door, and here were Chihuahua and Rabbit frantically trying to get back in.

"They finally burst in to find both my eyes almost closed up, my eyebrows and eyelids cut and bleeding and my appearance pretty well unfit for photography."

[The guards rushed out of Stockdale's cell a second time, evidently to tell the prison camp director about the further damage the subject of the film had inflicted on himself.]

His eyes still weren't quite as swollen as he wanted them, so he went to the wall and began pounding his face against the concrete. [When the guards returned and saw Stockdale, Chihuahua asked him:] "What are we going to tell the senior officer?"

"You tell the major," Stockdale replied, "the Commander decided not to go."

The film the North Vietnamese had in mind, Stockdale learned later, was to show him talking with a lower-ranking fellow prisoner about the unjustness of the war. The other prisoner would be standing behind a screen so Stockdale would not know he was there. The camera would have photographed the two prisoners from the side so viewers would not notice the screen.

Although Stockdale's heroics frustrated the filming scheme, the North Vietnamese through expert rope torture and other coercion did force Stockdale to write and record statements against his will. Like so many prisoners before him, Stockdale learned that every man—no matter how tough—has a limit of how much pain he can take. But he resisted each time before submitting to keep himself and fellow prisoners from unraveling.

During the Korean War, some American prisoners unraveled completely under brainwashing inflicted by their North Korean captors in hopes of giving future U.S. prisoners of war a moral guide to cling to, the Eisenhower Administration created a Code of Conduct.

One provision of that code stated: "When questioned, should I become a prisoner of war, I am bound to give only name, rank, service number and date of birth. I will evade answering further questions to the utmost of my ability. I will make no oral or written statements disloyal to my country and its allies or harmful to their cause." The late military columnist and author, S.L.A. Marshall, has said that he was "the penman" when the code was written.

U.S. soldiers, sailors, marines and airmen have all found they could not, under torture, limit themselves to giving "only name, rank service number and date of birth." Cmdr. Lloyd M. Bucher, skipper of the spy ship USS Pueblo captured by North Korea in 1968, said after his release that the code should be reviewed in the light of the harsh realities of communist torture. He and other Pueblo crewmen testified that their North Korean interrogators were expert at finding a man's weak point and exploiting it. For Bucher, that proved to be his love for his crew. The North Koreans told him they would shoot each one of his crew, starting with the youngest, unless he signed a false confession that he invaded North Korea's territorial waters. Bucher signed.

The fear that they could not stand up under torture and would sign propaganda statements in violation of the Code of Conduct drove some Pueblo and Vietnam War servicemen to attempt suicide. They often went into deep and lasting depression after signing confessions under torture.

U.S. officials decided to review the code against the experience of the Pueblo crew and Vietnam prisoners of war. One suggestion was that the code be liberalized and that the U.S. government declare to the world that it would disavow any future confessions by U.S. servicemen on the assumption they were obtained under duress. Stockdale was among the former prisoners of war who urged the code continue unchanged. He argued that even though experience had shown the code could not be fulfilled completely, it served as a standard for men to try to adhere to in captivity. His hardline stand on how prisoners should behave under pressure impelled Stockdale to file misconduct charges in 1973 against two officers who were imprisoned with him. Navy Secretary John Warner decided against prosecuting.

After assessing the various views on the Code of Conduct, the White House announced last November that President Carter had made one liberalizing change. He deleted the word "only" from the provision which formerly stated: "I am required to give only name, rank, service number and date of birth." The White House said the change was "to reduce guilt feelings in prisoners who are coerced into giving more than name, rank, service number and date of birth."

Stockdale, who looks amazingly fit at fifty-four considering what he went through—except for the stiff left leg which was torn at the knee so savagely by his first captors that it cannot be restored through surgery—said his new War College course will focus on a man's personal code.

Uncomfortable questions to be addressed in the classroom, he said, will include: "What do you think of a [dive-bomber pilot] who pulls off the target high" so anti-aircraft fire does not hit him? "What do you think of a guy who doesn't aim his bombs? Is that the way to lead?"

Stockdale's class will study philosophy and history, not military manuals, to get into the teachings that stayed under him like bedrock after the pressure of prison camp had blown everything else away. The philosophy course he took at Stanford in his thirties, said Stockdale, did him a lot more good in Hanoi than any of the Naval Academy's technical subjects.

The 1st century Greek Stoic Philosopher Epictetus "was tailor-made for my predicament," said Stockdale as he walked stiff-legged to the bookshelves lining his second-floor office at the Naval War College. "One proposition in his manual that I remembered was that you're but an actor on the stage and your job is to play well the given part."

Other teachings of Epictetus that came back to the crippled pilot and helped sustain him in captivity included: "Lameness is an impediment to the body but not to the will." "Men are disturbed not by things, but by the view they take of them." "It's better to die in hunger, exempt from guilt and fear, than to live in affluence with perturbation."

But instead of digging out such teachings so they can form bedrock in the minds and personalities of today's military officers, complained Stockdale, the wisdom that has stood the test of time is being eclipsed by the theoretical jargon of systems analysis, managerial techniques and modern weaponry.

"We spend most of our time worrying about things that have nothing to do with our profession of arms," he said. Stockdale's students will be directed to read Epictetus' "Enchiridion," the Book of Job, Aristotle, Plato, Kant, Mill, Sartre, Emerson, Dostoyevsky, Conrad, Kafka, Koestler, and Solzhenitsyn.

"I think this is the only way to teach a sophisticated audience 'duty, honor, country.' I'm not trying to make fundamentalists out of them. I'm not trying to make warmongers out of them.

"I'm trying to make more self-confident leaders who will realize half of what comes into their baskets is crap and that they should worry about things that are important." ●

## BUDGET SHORTAGE FOR VETERANS MEDICAL PROGRAM

### HON. W. G. (BILL) HEFNER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. HEFNER. Mr. Speaker, I have been receiving a great many letters from my constituents concerning the President's fiscal year 1979 budget request for the veterans health care system. They are concerned, as I am, that this budget is inadequate to meet the real and growing need for top quality medical services to our Nation's veterans and their families.

The chairman of the Committee on Veterans' Affairs, RAY ROBERTS, and the ranking minority member, JOHN PAUL HAMMERSCHMIDT, wrote each Member of the House on February 28 indicating the significant shortages in the President's budget request. Our Veterans' Affairs Committee supports the necessary funds for the important Veterans' Administration medical programs and our request to the Budget Committee for funds over and above the President's budget was arrived at only after a detailed analysis and study of the matter.

But the information we are receiving about the Budget Committee's action on the upcoming budget resolution would indicate that it, too, is unwilling to recommend adequate funding for this program. It would now appear that the only way this matter can be resolved, one way or another, is on the floor of the House.

The national commander of the American Legion, Robert Charles Smith, has just furnished me with a copy of an article which will appear in the American Legion magazine in May entitled "VA Medical Program Must Be Preserved." This article is included with my statement, and I commend it to the reading of every Member of this House. Each Member can be assured that the national veterans' organizations and the individual veterans and their families represented by these organizations are all vitally concerned with this matter. I am calling this to the attention of all Members in order that they may be fully informed of the real concerns over the inadequacy of the budget for these essential health services which benefit not only our Nation's veterans but all our citizens through the outstanding research programs of the Veterans' Administration physicians.

VA MEDICAL PROGRAM MUST BE PRESERVED

It becomes increasingly clear that the struggle to preserve the veterans benefits program for which The American Legion has devoted its energies for 59 years will be won or lost in the contest for the veterans medical care program administered by the Veterans Administration. We have come to grips with the situation over the VA Budget for Fiscal Year 1979. The Congress is now considering this Budget.

1. VA requested Budget authority of $5.8 billion for the veterans medical program.

2. Construction funds are requested for two replacement hospitals (Seattle, Wash., and Portland, Oreg.).

3. New VA hospital at Camden, N.J., is cancelled.

4. Total VA acute care bed capacity will be reduced by 3,132 beds.

5. We have identified shortfalls of $426 million needed for improvements, and medical and prosthetic research.

This means that the size of the system is going to be reduced at a time when the nation has the highest veteran population (29.5 million) in its history.

The Camden hospital is the only new hospital that had been planned and was intended to provide medical care for 300,000 veterans of South Jersey, who now have to depend on the Philadelphia VA hospital. The Camden hospital has been planned for several years after exhaustive studies by the VA, and construction of the hospital has had the approval of Congress. All of a sudden, VA says the hospital is not needed. We ask: Why the sudden change?

Eliminating 3,132 beds from the system will reduce VA bed capacity to 88,300—subject to additional reductions in future years. Again, we ask: Why?

Our questions are made urgent by the fact that the largest segment of the veteran population is made up of 13.5 million veterans of WW II, whose average age is now 58. These veterans are becoming increasingly subject to the catastrophic illnesses that are associated with advancing years—such as cancer, heart disease and stroke—illnesses that will force them to turn in increasing numbers to the VA for medical care they will no longer be able to afford in the private sector.

This year, two VA research physicians have received the Nobel Prize for Medicine—testimony to the quality of VA medical research for the benefit not only of veterans, but of all humanity. Yet in the face of this significant achievement the VA is reducing the level of its research programs. Why?

We believe we see an alarming lack of commitment to medical care for veterans.

And our troubles do not end there. Increasingly, voices are being raised in the medical community challenging the justification of maintaining a separate medical care system for veterans. We must face it; there are those in the medical community who resent $5.8 billion being spent on medical care *just* for veterans.

And that is still not all. The American Legion is convinced that should National Health Insurance become a fact, an effort would be made to phase the VA hospital system into national health insurance, and to make VA facilities available to all citizens who have need of them. The attack will be launched by the social planners at HEW, who are envious of the magnificent VA hospital system.

What should The American Legion do?

The friend of the veteran throughout history has been the Congress—the voice of the people. We have many friends in Congress who will speak for us. But first they have to know that we will speak for ourselves. It is up to veterans, speaking through their organizations, to let Congress know what is right and fair for veterans, their dependents and survivors.

But many old friends are leaving Congress, by reason of death or retirement. We do not know who is going to replace them. That is where the average Legionnaire comes into the picture. It behooves all Departments, Districts, Posts and each Legionnaire to approach candidates for Congress—both House and Senate—to find out from them what their attitude is toward veterans problems and, when possible, to secure from them commitments to heed the needs and rights of veterans.

The American Legion today finds itself embattled on many fronts in defense of veterans programs. Our success or failure will determine two things; first, whether the efforts of countless Legionnaires during 59 years will be recorded by history as having been successful, and second, whether veterans, during the balance of the 20th century and beyond, will have available to them veterans programs as we have known them.

Make no mistake, we could lose our hospitals—as our British and Canadian comrades have lost theirs. And if veterans hospitals are lost, there will be little hope for the future of all other veterans' programs.

Legionnaires, and all veterans, earned their status as veterans through honorable service in time of war. We are not strangers to struggle. With courage and determination, with diligence and persistence, *we shall win*. To be true to our heritage, and to provide for those who follow us—we must succeed.●

## THE MERIT EMPLOYMENT ACT

### HON. HERBERT E. HARRIS II

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. HARRIS. Mr. Speaker, the Post Office and Civil Service Committee is now holding hearings on H.R. 11280, the administration's civil service reorganization bill. I am concerned that the bill may open the door to improper political influences and have introduced H.R. 11165, the Merit Employment Act which requires that all personnel actions be made on the basis of merit and bars political recommendations for Federal jobs.

As we consider this legislation, we must make sure sufficient safeguards are included to protect employee rights. Joseph Young, in two recent Washington Star columns, has outlined some of the concerns that employees have about the administration's legislation and I urge my colleagues to take note of his observations:

DOUBLE STANDARD SPOTTED AMONG CARTER PERSONNEL REFORM PROPOSALS

The pro-management slant of President Carter's personnel reform plan is illustrated by the double standard it would set up in adverse actions.

While most federal employees would be denied the guarantee of full-scale evidentiary hearings in firings, managers and supervisors accused of personnel violations and facing possible removal would be entitled to such hearings.

Also, in these cases the burden of proof would rest on most federal employees to show that their agencies were wrong in firing them. The reverse would be true for federal managers and supervisors facing adverse action because of charges that they violated federal personnel rules or employee rights. In these situations, the burden of proof would be on the special counsel of the proposed Merit System Protection Board who would handle such cases.

This is just another example of why federal employees are suspicious and apprehensive over Carter's personnel plan.

Meanwhile, Bernard Rosen, the retired executive director of the Civil Service Commission who now is a professor of government of American University, has criticized four aspects of the Carter plan that he contends "would seriously undermine the effectiveness and impartiality of the civil service, while the benefits sought from the relevant changes are vague and uncertain."

In a speech before the International Personnel Management Association, Rosen rapped the proposal to eliminate the CSC and create the Office of Personnel Management and the Merit System Protection Board in its place.

Rosen said the board "will be incapable of fulfilling the role of an effective watchdog to protect against merit abuses because, as proposed, it lacks an adequate mandate and resources."

Rosen said the board would serve a useful purpose in handling employee appeals and investigating allegations of merit violations, but "it would be incapable of meeting the larger responsibilities of protecting the merit system because it would be too far removed from day-to-day operations."

As contemplated in the Carter plan, the board would not be "sufficiently independent" of the Office of Management and

Budget and the White House to have the clout necessary to enforce the merit system in government, Rosen said.

Rosen also criticized the proposed OPM, declaring that by having it run by a single administrator appointed by the President, instead of the bipartisan three-member setup in the CSC, could result in "manipulating the civil service for personal or political favoritism."

Rosen said "There is an abundance of experience to tell us that a single administrator making personnel policy as well as directing operations of the central personnel agency will hold an unwarranted concentration of power and is a major threat to merit in the federal system of civil service employment."

Rosen also was critical of the proposal to delegate significant personnel authority to the agencies, declaring that this would seriously weaken the merit system. Also, "it is the wrong way to go if we want a citizen to file an employment application in one place instead of many," he said.

Another criticism Rosen made concerned the proposed Senior Executive Service.

Rosen said the proposed system of reassigning and arbitrarily removing careerists in the proposed SES would result in their being subjected to intense pressure "to . . . serve special interests rather than the public interest" if they want to hold on to their careers.

He expressed serious misgivings over the proposal that those in the SES would qualify for bonuses if their superiors liked their work and conversely would be kicked out of the service if their performance was not deemed satisfactory.

"This will seriously damage one of the most important characteristics of career executives: expressing views and judgments which, based on their experience and technical knowledge, may be critical of policies and programs advanced by Presidential appointees," he said.

"The danger of being replaced, not for poor performance, but simply to put someone else in the job would understandably cause many career executives to moderate their criticism or even hesitate to adequately question the ideas and proposals of superiors."

Rosen also challenged the administration's assertion that only 10 percent of these jobs would be filled by political appointees.

It would be "especially easy" to place political appointees in many of the career jobs if career executives can be "reassigned and demoted without cause," he said.

At the conclusion of his speech, Rosen received two standing ovations from his audience composed mainly of federal career executives.

Ironically, these careerists have been afraid to open their mouths about their fears and doubts on the Carter plan.

No one expects any one careerist to stand up and publicly criticize President Carter, but the various federal managerial and professional organizations have been notable for their silence.

As far as we know they haven't even asked to testify on the plan during the hearings being held by the House Civil Service Committee.

They owe it to their members to take a stand on the plan—either for or against. The thunderous applause that greeted Rosen's critical remarks undoubtedly made him feel good, but he would feel better if he got some meaningful support from among his former career colleagues in government. After all, their careers are on the line.

In this situation, silence isn't golden. It's stupid.

---

CARTER PERSONNEL REFORM PLAN FACES HARD QUESTION FROM CONGRESS

When Carter administration officials go to Capitol Hill next week to testify on the President's personnel reform plan, they'll face hard questions about possible inconsistencies and flaws in the proposals.

For example, some members of Congress are disturbed over what they see as a double standard in a Carter recommendation designed to make it easier to get rid of unsatisfactoy employees.

On the one hand, in a deal made with the AFL–CIO and the American Federation of Government Employees in order to get their support for his personnel reform package, Carter agreed to back as part of the reform legislation a system of outside binding arbitration for union members in grievances and adverse actions.

But for non-union employees, and even those union members who are supervisory and managers outside the bargaining units, the appeals system would not be nearly as liberal.

While the rights of union members would be at least as strong as they are now in appealing firings and other adverse actions, non-union members would be subjected to a limited appeals system. They could appeal to the proposed new Merit System Protection Board but not be assured of a full-scale evidentiary hearing as they are now.

The board could order an evidentiary hearing if it decided the situation warranted it, but this right would by no means be guaranteed.

Thus the proposal could be interpreted as placing a premium on union membership and penalizing those federal employees who choose not to join unions or cannot because there are no unions established where they work.

Another aspect of Carter's plan that disturbs some members of Congress is his recommendation that bonuses be paid in lieu of regular pay raises for federal supervisors and managers in grades 13 and above as an incentive for better performance.

This has raised some concern that it could result in consideration of personal friendships and political influences in determining who would get these bonuses.

Concern also has been expressed that such a system would result in many professional employees such as scientists and engineers in these grades drawing higher salaries than their managerial and supervisory bosses.

And some employees in grades below GS–13 also could draw higher pay than those in the immediate grades above them. This is because in grades GS–13 through 15 managers and supervisors would receive only a partial increase of an annual pay raise given to other federal workers, and those in the proposed new Federal Executive Service would get nothing.

Also, there would be no more virtual automatic in-grade raises for those in grades 13 and above.

All this raises some serious questions. What kind of morale would exist if subordinates made more than their superiors? And what about the infighting and the office politics that would arise in the awarding of bonuses to managers and supervisors in grades 13 and above? Would they be based on true merit or on friendship or political clout?

Still another possibility worries some of the unions. If a lot of managers and supervisors in the higher grades are denied bonuses (only 50 percent of them would be eligible for such raises each year), would this produce a downward chain reaction in which disgruntled managers and supervisors would deny in-grade step increases to their underlings in the lower grades?

Members of Congress also want to know about the proposed new Office of Personnel Management which along with the new merit board would replace the functions of the Civil Service Commission. Would this signal the emergence of widespread political patronage in government?

While the OPM would not be a part of the President's office, it might well be considered an adjunct of the White House.

The OPM would have its five top officials appointed by the President and in all likelihood the five would be from the political sector. The director and deputy director would be political appointees. The five assistant directors probably also would be political appointees, although one or two of them could be career men or women.

Thus, there could be a political orientation to the OPM not found in the present CSC. The OPM would have overall policy control regarding federal personnel policies, with the authority to decentralize hiring authority and other personnel actions to the individual departments and agencies as well as clear all future applicants for jobs in the proposed Senior Executive Service.

The proposed merit board would not set merit policies, but would investigate complaints by employees of any abuses. Thus, the OPM for all intents and purposes will run the government's personnel system.

Will the OPM with its close ties to the White House be as responsive to the Congress and its civil service committees as the Civil Service Commission has been? Or will it adopt the attitude of semi-independence from congressional oversight that other White House units have seen fit to do?

The President's proposals include procedures designed to set strong federal merit standards and punish those who violate them. Are they adequate? Can they be strengthened?

The Carter administration may well answer all the questions that have been raised to the satisfaction of members of Congress. But these are questions that should be answered before Congress takes final action on the President's plan. That's why the congressional hearings are so important.●

---

## EMERGENCY AGRICULTURE ACT OF 1978 (H.R. 6782)

### HON. RICHARD NOLAN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

Mr. NOLAN. Mr. Speaker, I urge my colleagues to support H.R. 6782, the Emergency Agriculture Act of 1978. This bill, which applies only to the 1978 crops of wheat, corn, and cotton, was reported out of the conference committee on April 5, 1978, and will soon come before the House for final approval.

The Emergency Agriculture Act increases the 1978 support prices for wheat, corn, and cotton to about 70 percent of parity for producers complying with set-asides already announced by the Department of Agriculture. The 70 percent of parity price floor, while an improvement, does not give farmers an opportunity to recover their production costs. Recognizing this deficiency, the conference committee also provided farmers with the option of qualifying for higher target prices under the flexible parity provisgion, if additional cropland is set aside.

BIASED BUDGET ESTIMATES

The Carter administration has resorted to biased "advocacy economics" in an attempt to discredit the Emergency Agriculture Act of 1978 (H.R. 6782). The administration's economic analysis of

H.R. 6782 is based upon worst-case assumptions which have only a remote chance of occurring. The administration conveniently fails to note that if the same worst-case assumptions are applied to the recent USDA initiatives, their own program has disastrous economic implications. No one who understands our farm economy would be deceived by economic analysis based on improbable worst-case economic assumptions. Those who are not familiar with the farm economy should carefully examine the administration's questionable economic analysis.

FOOD PRICE INFLATION

According to the administration, H.R. 6782 will "increase food price inflation to double-digit levels."

The above statement is obviously misleading. Economists currently are forecasting a 6 to 8 percent increase in food prices for this year in the absence of any additional farm legislation. USDA predicts that H.R. 6782 will cause retail food prices to increase by 2 to 4 percent. CBO projects a more moderate increase of 1.1 to 1.5 percent, or, a $46 to $63 increase in the food bill for an urban family of four—a modest increase in consumer food prices.

H.R. 6782 provides farmers an opportunity to obtain an income which will give them a better chance to meet their production costs and continue farming. If the House defeats H.R. 6782, the Nation's farmers would receive a clear message that they—along with urban consumers—will be stuck with a 6 to 8 percent rise in consumer food prices, but will still be expected to produce at a loss.

In 1972 and 1973, farm commodity prices hit their high marks. Since that time farm income has dropped precipitously, but consumer food prices have failed to drop accordingly. According to CBO and USDA estimates, H.R. 6782 will raise farm income, but not to the peak levels of the early 1970's. From USDA's point of view, however, no matter how low farm commodity prices have dropped, any recovery in prices, regardless of how slight or from whatever depression level, is denounced as inflationary.

It is not fair to continue making farmers the shock absorber for everybody else's inflation.

COST TO THE GOVERNMENT

According to the administration, H.R. 6782 "would add as much as $6 billion to the Federal budget."

CBO, in its budget estimate dated March 29, 1978, expected the fiscal year 1979 cost to be $4.2 billion and later revised the figure upward to $5.7 billion. CBO also expected H.R. 6782 to result in a $1.4 billion saving to the Government in fiscal year 1980 as higher market prices reduced Government costs.

Economic analysis is worthless unless costs are weighed along with benefits. USDA, however, has not undertaken any analysis of how increased farm income will expand purchasing power and stimulate the economy.

The administration's economic analysis is also full of contradictions. On the one hand, USDA assumes high participation in the flexible parity program and sharply reduced stocks. This would cause market prices to rise substantially and thus reduce Treasury costs. On the other hand, USDA denounces the alleged high cost of H.R. 6782, ignoring the fact that the worst-case assumptions reduce Treasury costs.

EXPORT MARKETS

According to the administration, H.R. 6782, by sharply reducing production and increasing prices, could seriously undermine our competitive position in world markets.

This is another of USDA's worst-case assumptions, one that applies equally well to the Department's recent initiatives.

The main question which USDA has ignored for decades is: "Why sell at a loss?" By continuing to do so, U.S. farmers are exporting their equity abroad, thus undermining the economic stability of U.S. agriculture. Exports of cheap grain aggravate the Nation's trade deficit. H.R. 6782 will increase the market value of U.S. farm commodities so that even if the volume exported is reduced, the value will increase. In USDA's own issue briefing paper on the American agriculture movement's proposal for 100 percent of parity, the Department estimates that at 100 percent of parity the U.S. will lose 30 percent of its grain exports, but the value of all commodities exported increases by $7.5 billion the first year and continues upward in subsequent years. H.R. 6782 will not raise farm prices to 100 percent of parity, but any loss of export markets will be balanced by the increased value of the commodities exported.

USDA has been more interested in maintaining the volume of exports rather than increasing the value of the commodities exported—a policy which injures U.S. farmers and increases the Nation's trade deficit.

ADVERSE EFFECTS ON LIVESTOCK INDUSTRY

According to the administration, if H.R. 6782 were enacted, "the higher feed prices that result would adversely affect our own livestock industry."

Contrary to USDA's assertion that producers will set aside the maximum under the flexible parity provisions, CBO estimates that only 60 percent of the feed grain producers will enter the program and the remainder will stay out because they feed their grain. Again, USDA is using improbable assumptions to make its case. The charges that the bill would hurt the livestock industry are not coming from family-size farmers who produce both feed grains and livestock, dairy, and poultry. The opposition is coming from larger than family-size agribusiness operations.

The livestock industry has been in its loss situation for several years because cheap feed has induced overexpansion. Raising feed grain prices now will restrain another expansion cycle in the livestock industry, thus leveling out the roller coaster price of meat.

BUREAUCRACY

According to the administration, H.R. 6782 will "require vast new layers of bureaucracy to administer" the new program.

County ASCS officials know how to measure land and they have performed the task competently in the past. Sign-up and measurement pose no problems.

MAJORITY OF BENEFITS GO TO SMALL NUMBER OF FARMERS

According to the administration, H.R. 6872—

Would direct the vast majority of its benefits to a small number of the very largest of our farmers, rather than those in the greatest need of help.

USDA estimates that 5 percent of the farmers would receive one-third of the payments under this bill. The bill includes a $40,000 payment limitation.

The administration ignores the fact that 95 percent of the producers cannot survive at 70 percent of parity—which is the latest administration position. Small and medium size family farmers need better commodity prices in order to survive. According to USDA's own issue briefing paper on the American agriculture movement's proposal for 100 percent of parity, the Department states that 100 percent of parity prices "slow the decline in farm numbers" and increase the number of small farms.

The past several decades of farmland expansion have been fueled by low farm commodity prices. Producers had to increase the size of their farms in order to reduce the per unit cost of production. The higher farm commodity prices which will result from H.R. 6782 will slow farmland expansion and, by increasing market prices, will provide medium and smaller farmers with the income they need to maintain their operation.

It is unusual to find the administration crying crocodile tears for small farmers, given their past track record. Last year the administration did not support an amendment to prevent nonfarm corporations from receiving farm program benefits. This year, the administration failed to provide any funds for the small farm research and extension program authorized by the 1977 farm bill.

The administration supported raising the interest rates on FmHA loans, to the detriment of medium- and smaller-size farmers. The administration opposed the provision in the Emergency Agricultural Credit Act which authorizes low-interest, graduated payment FmHA loans to new farmers so that they may compete for the purchase of farms, thus reducing farmland expansion by big farmers. Finally, the administration should realize that low farm commodity prices will continue to drive the small and medium-sized farmers out of the business.

UNITED STATES WILL BE RESIDUAL GRAIN SUPPLIER

According to the administration, the planted acres of crops not included in H.R. 6783 will be severely reduced.

USDA is particularly concerned about a reduction in the planting of soybeans, but again, the Department employed worst-case assumptions. If USDA fears a substantial movement out of soybean production, such a tide could easily be stemmed by simply raising the soybean loan level.

PRODUCERS WILL SHIFT ACREAGE TO CROPS DESIGNATED IN THE BILL

According to the administration, H.R. 6782 would make the United States the prime adjuster of world food supply in order to balance supply and demand.

Currently, with its cheap food policy, the United States is already the residual supplier. Other exporting nations will continue to undersell the United States whether our prices are high or low. The level of prices is not the major factor in the maintenance of export markets. Rather, U.S. farmers do not have an effective marketing agent for their production. Private U.S. grain traders cannot compete with the grain boards which conduct the sales for other nations.

The United States will not be the residual supplier of grain if Congress enacts the Weaver bill, H.R. 11294. This bill gives the Commodity Credit Corporation the authority to designate the Commodity Credit Corporation as the seller or marketing agent for export sales of U.S. grain. Given the great volume of U.S. grain involved in the export trade the CCC will be able to bargain for higher export prices. Such a program gives the United States flexibility as a price leader so that we will maintain our current export markets and develop new ones through CCC negotiations of reliable long term sales which private grain trades are unable to transact.

PARTICIPATION IN RESERVE PROGRAM

According to the administration, H.R. 6782 will undermine the reserve program.

Again, this fear is based on a worst-case assumption that stocks will be severely reduced.

The existing reserve program, however, has been no more than a last resort measure for farmers. Until the recent administration initiatives, farmers had no economic incentive to lock up their grain for 3 years. Only after heavy pressure from Congress and farmers did the administration agree to raise the storage payments to realistic levels and consider waiving the interest charges. Last year the administration resisted establishing a grain reserve large enough to stabilize supply, but last month the administration finally agreed to increase the size of the reserve stocks.

The current reserve program will never provide farmers with an opportunity to obtain a fair income because the stocks will be allowed to flow onto the market at price depressing levels. Last year, the administration resisted establishing higher loan release and call-in levels. The grain reserve program, the so-called cornerstone of administration farm policy, is therefore a defective mechanism as it now exists.

Under current policy and under the program established by H.R. 6782, the administration has the authority to raise the loan release and call-in levels to realistic levels which will make the reserve program work to protect farmers and consumers from boom and bust prices.

BUYING TIME FOR FARMERS AND CONSUMERS

H.R. 6782 is only a 1-year emergency measure. With or without H.R. 6782, followup legislation is necessary for 1971–1981.

The recent USDA farm program initiatives provide only a 70 percent of parity floor under farm income. Farmers cannot survive at these poverty levels which are below their cost of production. H.R. 6782 offers farmers immediate economic assistance at realistic levels.

Without H.R. 6782 and without followup legislation farmers can expect a continuation of the boom and bust cycle and its erratic swings in commodity prices. For consumers, however, the price of food never comes down when farm commodity prices slide into the bust phase.

I again urge my colleagues to reject the administration's erroneous and panicky appraisal of the Emergency Agriculture Act and to vote in support of H.R. 6782. I also urge my colleagues to request that the House Agriculture Committee immediately begin consideration of a long-range farm program which will stabilize the agricultural economy at price levels fair to farmers and consumers.●

## THE FIGHT AGAINST SCLERODERMA

### HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. PANETTA. Mr. Speaker, I would like to draw the attention of my colleagues to the fight against schleroderma, a painful and debilitating disease that attacks the skin and multiple organs of the body.

In its most serious, systemic form, scleroderma can strike the esophagus, intestines, lungs, heart, or kidney, causing fibrosis, inflammation, and atrophy of normal functioning tissues. Localized scleroderma causes hardening and thickening of the skin, particularly of the hands and fingers, along with painful ulcerations.

The cause of scleroderma is unknown, and there is no cure for the disease. Therefore, much work remains if we are to overcome its effects.

Spearheading the battle against scleroderma is the United Scleroderma Foundation, a nonprofit organization established in December 1975, in Watsonville, Calif. The foundation is led by Diane Williams, herself a victim of scleroderma. Having met Ms. Williams, I can tell you she is a dedicated and enthusiastic woman. She has overcome the crippling effects of this disease to help bring national attention to the more than 300,000 people suffering the effects of scleroderma.

I would like to place in the RECORD the text of a handbook which explains the nature of scleroderma and describes the activities of the United Scleroderma Foundation. I urge my colleagues and the public to read this information to obtain an understanding of this disease and its victims.

The information follows:

You may be a patient whose physician has just made a diagnosis—scleroderma. Perhaps you are a husband, wife, mother, father, daughter or son of a person who has received this same message. You might be a friend to someone who is afflicted, or you are just interested in this unusual disease.

If one of the above is the case, there probably is a great deal of confusion in your mind. Perhaps the following information will help explain some of what is known about scleroderma, the direction it takes and what is being done about it.

Scleroderma is a relatively uncommon disease of undetermined cause.

A definition of scleroderma in Schiffere's Family Medical Encyclopedia is "hardening of the skin," appropriately based on the roots of the word.

Stedman's Medical Dictionary goes a little further: "Thickening of the skin caused by swelling and thickening of fibrous tissue, with eventual atrophy of the epidermis; hidebound disease."

This disease has been described and diagnosed for centuries. Although some authors have been credited with earlier documentation, Curzio of Naples wrote the first definitive description in 1753; however, present thinking is that his patient probably had scleredema. This is a different disease which usually remits spontaneously.

Gintrac introdced the current term "scleroderma" in 1847, after which it was recognized as a skin disorder. Only in the present century has scleroderma been thought of as a more generalized ailment.

Scleroderma is an all inclusive term used to apply to several clinical conditions. For general purposes, it is divided into two major forms, systemic and localized.

SYSTEMIC SCLEROSIS (SS)

1. Diffuse.
2. CREST syndrome (defined later).
3. MCTD (Mixed-Connective Tissue Disease).

LOCALIZED SCLERODERMA

1. Morphea (limited to a well defined patch of skin).
2. Generalized morphea.
3. Linear (a band-like thickening confined to one part of the body, such as an arm or leg).

This is the definition of systemic sclerosis and localized scleroderma used by Dr. Gerald P. Rodnan, Professor of Medicine and Chief of the Division of Rheumatology and Clinical Immunology in the Department of Medicine, University of Pittsburgh.

Diffuse scleroderma indicates possible involvement of internal organs of the body, namely the esophagus, intestines, lungs, heart or kidneys. The liver is affected only in the CREST syndrome, and then not commonly.

Localized scleroderma involves the skin or the skin plus other body parts (muscle, bone) in a circumscribed or patchy (morphea) distribution or in a linear pattern which usually affects one part of the body.

Either variety involves only a limited portion of the skin and frequently poses more of a cosmetic problem than anything else. There may also be some mobility problems. Linear scleroderma does not involve the face; the form of localized scleroderma in which the face is affected is known as scleroderma en coup de sabre.

Scleroderma is classified as one of the collagen diseases, although it does not appear to be a disorder of the collagen molecule primarily.

Collagen is the most abundant protein in connective tissue as well as the body. It consists of three chains that are coiled about each other like strands in a rope. The collagen chains and molecules become cross connected to each other as they age. This is the dominant structural material of man and other members of the animal kingdom.

Scleroderma is thought to result from loss of blood vessels which in turn leads to fibrosis of skin and multiple organs.

CREST is a clinically recognized varient of scleroderma. The prognosis of individuals with CREST syndrome is often very good, as this is a relatively benign disorder compared to the classical diffuse scleroderma form of systematic sclerosis.

There rarely is any threat to overall health in this type of scleroderma, although recently patients have been found who developing severe lung disease twenty years or more after the onset of CREST syndrome.

The term CREST is an acronym made up of the first letters of the five most prominent manifestations noted below. CREST syndrome includes patients who were formerly said to have sclerodactyly and to have a favorable prognosis.

Calcinosis is the accumulation of calcium below the outer layer of skin. These accumulations may become painful with time. They may protrude through the skin, causing infections.

Raynaud's phenomenon is a vascular reaction, an exaggeration of a normal blood vessel reaction to cold. Normally vessels constrict in order to conserve the warmth of the body for the internal organs; but in scleroderma the vessels are decreased in number and narrowed. Even a slight constriction may produce a marked decrease in or cessation of the flow of blood to the fingers.

In response to cold, the tips of the fingers or toes may go from white to blue to red. The result may be painful, with burning pins and needles numbness.

Raynaud's phenomenon may occur in association with scleroderma or other forms of connective tissue disease such as lupus erythematosus. In either case the term secondary Raynaud's phenomenon is employed.

This phenomenon also may occur as an isolated circulatory disturbance. In this case the term primary Raynaud's phenomenon is used. Not all Raynaud's phenomenon means scleroderma, but it is present in about ninety percent of scleroderma patients.

Esophagael dysfunction involves fibrosis and loss of normal motility of the lower esophagus, actually thinning of muscle. This causes difficulty in swallowing and acid reflux and leads to heartburn.

In Sclerodactyly the skin becomes thin, shiny and bright; the fingers and toes may not bend, or they become fixed into flexed or less functional positions.

Telangiectasia occurs when the small vessels near the surface of the skin become dilated and visible. They form fine little red or purple spiderish spots that usually have at least one straight border.

Mixed-Connective Tissue Disease is an overlap between scleroderma and one or more other collagen diseases; for instance, systemic lupus, dermatomyositis or rheumatoid arthritis. This type of scleroderma has a different course and is treated in a different way.

Scleroderma may be defined as a rare disease complex of (1) vascular changes, (2) fibrosis, an abnormal increase in the amount of collagenous connective tissue in an organ, (3) inflammation that to varying degrees involves skin and visceral organs, and (4) atrophy or loss of normal functioning tissues.

The basis of scleroderma is thought to result from blood vessels narrowing, which leads to fibrosis of skin and multiple organs and atrophy of normal tissues.

It is not known what the primary event may be. Changes may occur first in vessels or cells (fibroblasts) which cause connective tissue proliferation; or an inflammatory response may take place. It is possible that a combination of the changes may occur early.

At first, scleroderma can be difficult to diagnose. There may be slowly evolving changes in the skin or malfunction of the internal organs. The relationship to any systemic disease may be unknown at this point. Arthritis-like symptoms may appear. Rheumatoid arthritis, lupus erythematosus, osteoarthritis and bursitis are frequent misdiagnoses.

Common presentations may include such nonspecific complaints as weakness; weight loss; fatigue; neurasthenia; vague muscle, joint or bone aching; arthritis; Raynaud's phenomenon; stiffness of the hands; altered pigmentation; unexplained edema; thickening of the skin or telangiectases.

Loss of body hair; swallowing difficulties; heartburn; shortness of breath; blood pressure problems (rare as a presenting problem); heart, kidney, intestinal or lung problems. If any one of these is an isolated complaint, scleroderma isn't the first disorder that comes to mind.

When two or more of these symptoms come together, the true nature of the disease may be suspected. There is no single test which proves the diagnosis. Several tests, including blood sedimentation rate, gamma globulin, latex fixation, antinuclear antibody tests, skin biopsies and X-rays may be made. Some of the tests may be abnormal, but scleroderma is not necessarily the only possible diagnosis.

All of the above tests are non-specific, and none proves the diagnosis. This generally is established on the basis of combined clinical findings. The decision may be confirmed by biopsy, although this seldom is required for diagnostic purposes.

Estimates of frequency in the United States vary from 50,000 to 300,000. With the probable occurrence of numerous undiagnosed cases, an exact figure is difficult to ascertain.

Any age group may be affected, although most patients develop the disease between the ages of thirty and fifty. It is emphasized that occurrence may be observed at any age, even in childhood.

Approximately three times as many women as men develop scleroderma during early and middle age. The frequency tends to increase with age in both sexes. In older ages, the relative ratio of women to men is less.

In most cases, this is a chronic and disable disease, although there are exceptional records of remissions after five to ten years. The patient must face the fact that he is dealing with a long-term disorder.

Unfortunately there is not as yet any known therapy that will stop or reverse the progressive sclerosis involved in sclerodema. Many different medications and therapies have been tried. Some of these have been met with initial hope and enthusiasm both by doctors and patients, but so far none has led to a permanent cure of the disease.

Several agents still are being researched to determine if they are useful in special types of scleroderma. Cortisone, penicillamine, colchicine, immunosuppressive drugs, DMSO (dimenthylsulfoxide) and Vitamin E are some that currently are being studied. Aspirin frequently is prescribed as relief for the arthritis symptoms. There is no evidence whatsoever that DMSO or vitamin E is helpful.

Scleroderma usually doesn't respond to cortisone, as does arthritis of the rheumatoid type. It is emphasized that no specific drug is available at present to cure scleroderma, although various anti-inflammatory agents may provide benefit in treating certain manifestations.

General supportive, nutritional, drug and physical therapeutic measures can contribute significantly to improving function and comfort of the patient.

Much research is being conducted on the possible causes and treatment of scleroderma, but at present it is controversial. Toxic therapies should be avoided. The patient's physician can best prescribe for the individual case.

The patient should avoid prolonged exposure to cold, over-fatigue and chronic emotional stresses. Occupational exposure to cold should be eliminated. Smoking must be stopped. Excessive alcoholic intake may aggravate the condition by shifting blood flow away from affected areas.

Good care of circulation and infections is recommended. A warm climate may offer relief of some symptoms, but modern air conditioning should not be used to excess.

Upper respiratory tract infections should be treated early and vigorously. The treatment is directed toward preventing long term complications.

Rest is most important. Physiotherapy can include warm whirlpool baths and hot water baths. Passive and graduated muscle exercises are beneficial, as is general physical conditioning.

After diagnosis, the patient will probably go through an emotional process in several stages—denial, anger, bargaining (an attempt to postpone), depression, and finally, acceptance. The patient should know the truth first, then be given the most important thing—HOPE.

At the first California Licensed Vocational Nurses Association Scleroderma Workshop in Monterey, California, in February, 1977, Dr. Denny L. Tuffanelli said the old advice "Don't read about the disease," is founded upon concern about patients reading without guidance with the resultant misunderstanding.

He said the patient with serious problems has a right to know facts. Group meetings or clubs are a way for people to learn more about their minds and bodies. Personal exchange between the afflicted is encouraged.

Once more the unknown cause of the disease is stressed. There has been recent progress in understanding the collagen and ground substance in scleroderma. According to Dr. Richard K. Winkelmann of the Mayo Clinic, one of the problems has been the abundance of theories and the absence of facts. Now, however, data exists to make classification and staging of scleroderma according to severity possible.

After the diagnosis, the physician often has little to offer except alleviation of the patient's symptoms. Many fundamental questions are unanswered, as the disease varies from the sclerosis of a small bit of skin to overwhelming systemic reactions terminating in death.

Scleroderma is a baffling disease with no cure available at this time. The symptoms can be treated only with the hope of making the patient more comfortable. It is wise to seek a specialist who practices in the area in which the patient lives.

Currently studies and research are being conducted at medical centers throughout the United States. These may result in new findings to uncover a cure.

Attention to scleroderma research by medical people should be encouraged. The United Scleroderma Foundation is hoping to further this work by grant awards for the most productive and scholarly published research papers on scleroderma, its causes and potential cures. Outstanding work in collagen or related diseases will be eligible for the grants. The awards will be decided upon by the USF's Medical Advisory Board, a nationwide panel of physicians who specialize in scleroderma.

The United Sclerodemra Foundation is a non-profit organization established in December, 1975, in Watsonville, California, under the state laws of California. Its goals are to educate and inform the public about scleroderma; to promote medical research toward finding a cure; to help patients make and maintain contact with each other, and to accept donations, bequests, memorials

and grants, and to oversee their proper and most useful distribution.

Scleroderma patients and supporters formed the foundation to channel hopelessness into action, ignorance in knowledge and fear into acceptance.

The United Scleroderma Foundation will be glad to answer any inquiries. The address is Post Office Box 724, Watsonville, California 95076. Telephone contact may be made at 408-728-1277.●

## EQUALITY UNDER THE LAW FOR SOVIET REFUGEES

### HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. STEERS. Mr. Speaker, last month I introduced a bill with my distinguished colleagues, MILLICENT FENWICK and GLADYS NOON SPELLMAN, H.R. 11508, that would allow paroled refugees the same treatment under the law as conditional refugees regarding the computation of their permanent resident status. Indochinese and Cuban refugees already receive this treatment, but refugees from the Soviet Union do not.

At the present time, conditional refugees must be in the United States several years before they can apply for permanent resident status. They then must have permanent resident status for 5 years before being eligible for citizenship. This 5-year period is computed from the time they arrived in the United States. Paroled refugees must also wait an initial period before receiving permanent resident status, but their 5-year permanent resident status requirement is computed from the day they received permanent resident status, not the day they entered this country.

In some cases, these paroled refugees entered the United States the same day as conditional refugees, but they must wait years longer to acquire citizenship. It is the aim of H.R. 11508 to provide Soviet refugees the same consideration under the law as is presently accorded the other major groups of refugees.

This bill is extremely simple and I am inserting into the RECORD the text of this bill for my colleagues' perusal:

H.R. 11508

A bill to provide that certain refugees who were paroled and later admitted for permanent residence into the United States will be treated, for determining their period of residence for purposes of naturalization, as establishing permanent resident status as of the date of their arrival to the United States

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That any alien who, before the date of enactment of this Act—

(1) was paroled into the United States as a refugee under section 212(d)(5) of the Immigration and Naturalization Act, and

(2) had his status adjusted to that of an alien lawfully admitted to the United States for permanent residence,

shall, for purposes of section 316 of such Act, be regarded as lawfully admitted to the United States for permanent residence as of the date of his arrival.●

## AN OUTRAGEOUS ATTEMPT TO CHANGE THE RULES

### HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. McDONALD. Mr. Speaker, the debate over the so-called equal rights amendment has already consumed more of America's time than many persons think it really merits. Clearly, public opinion is turning against ERA. However, the pro-ERA lobby is now attempting to win with blackmail—no conventions in anti-ERA States—what they have failed to win in the legislatures of the States. And, if this blackmail effort is not bad enough, they are now attempting to secure an extension of the time alloted for ratification of a constitutional amendment. Thus, while the ball game is, officially, almost over, the ERA proponents want an extended overtime with which to plead their case. This is wrong and Phyllis Schlafly recently stated the case as to why they are wrong in a very succinct item that appeared in the Washington Post of Tuesday, April 11, 1978.

The item follows:

THE ERA ARGUMENT—AN "OUTRAGEOUS ATTEMPT TO CHANGE THE RULES"

(By Phyllis Schlafly)

The football game is in the last quarter and your team is winning. Suddenly the coach of the losing team demands that the game be extended an extra quarter to give them time to catch up.

Would the fans on either side put up with such an outrageous attempt to change the rules in the middle of the game? Certainly not. Neither will fair-minded Americans accept a similar attempt by the backers of the Equal Rights Amendment to change the rules in the middle of the consideration process and extend the time limit another seven years.

Such action would be unfair, unprecedented, and unrealistic. It should be buried under a torrent of righteous indignation.

The Supreme Court ruled in *Dillon v. Gloss* (1921) and *Coleman v. Miller* (1939) that Congress has the power to set a "reasonable" time limit for ratification. Nothing could be more unreasonable than to saddle state legislatures with the duty of debating the same constitutional amendment for 14 consecutive years.

The seven-year limit was set by Congress in the ERA resolution itself because that figure had been used in most other amendments of this century. As passed by Congress on March 22, 1972, ERA specifically states that it shall become part of the Constitution "when ratified by the legislatures of three-fourths of the several states within seven years from the date of its submission by the Congress."

In addition to the poor sportsmanship of the ERA supporters in trying to change the rules, their proposal is a great confession that they cannot get three more states by March 22, 1979. (Actually, they need six more states, because Nebraska, Tennessee and Idaho have rescinded their ratifications of ERA.)

The reason ERA has lost all its early momentum is that women have discovered that it will do nothing to benefit them in employment, education, credit or in any other endeavor. Federal legislation already has eliminated sex discrimination in those areas by passage of the Equal Employment Opportunity Act of 1972, the Education Amendments of 1972 and the Equal Credit Opportunity Act of 1974.

ERA will, however, take away from women many rights they now enjoy. It will take away a young girl's exemption from the draft in all future wars and force her to register just like her male counterpart. The Selective Service Act would have to read "all persons" in our next war, and women would be involuntarily assigned to combat duty just like men.

If laws pertaining to family support are neutralized by ERA, it would void the husband's obligation to support his wife, to provide her with a home and support their minor children. ERA simply would not permit any "sexist" law such as "Husband is liable for the support of his wife."

Section 2 of ERA would shift from the states to the federal government the last remaining aspects of our lives that it does not already control, including marriage, divorce, child custody, prison regulations, protective labor legislation and insurance rates.

ERA would prevent us forever from making reasonable differences between men and women on the basis of factual differences in child-bearing and physical strength. ERA would force upon us the rigid, unisex, gender-free mandate demanded by the women's liberation movement, and it would transfer the power to apply that mandate to the federal government and the federal courts.

ERA can't win in seven years, and it is even less likely to win in 14 years. American women are too smart to fall for the fraud of ERA.●

## COMMERCIAL ARMS SALE

### HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTAT

*Tuesday, April 11, 1978*

● Mr. STUDDS. Mr. Speaker, on March 8, the Subcommittee on International Scientific and Security Affairs of the House International Relations Committee held a hearing on the sale by U.S. companies of police and law enforcement equipment to nations around the world. During the hearing, a number of very important questions were raised concerning the uses to which U.S.-supplied equipment are put. In addition, a great deal of interest was expressed in the Carter administration's policy toward the sale of commercial weapons to governments known to have poor records in the area of human rights.

I believe that the issue of commercial arms sales is very important, and that it is deserving of continued close scrutiny by the Congress. I believe also that the following correspondence between myself and Under Secretary of State Lucy Benson on this subject will be of interest to my colleagues:

WASHINGTON, D.C., *March 10, 1978.*

Hon. LUCY WILSON BENSON,
*Under Secretary for Security Assistance, Department of State, Washington, D.C.*

DEAR MS. BENSON: In testimony on March 8 before the House Subcommittee on International Security and Scientific Affairs, Representative Thomas Downey raised a number of questions about our current commercial weapons sales practices. At that hearing, I expressed my intention to request an Administration reaction to the arguments presented by Representative Downey in his statement (copy attached), and asked that

this correspondence be included in the official record of the hearing.

Accordingly, I would greatly appreciate a letter from the State Department which would spell out the Administration's views with respect to both the general thrust of, and the specific suggestions made by, Congressman Downey. In particular, I would like to know:

(1) What are the reasons for keeping confidential the names of those U.S. companies which sell weapons on a commercial basis to other countries? Why, for example, should information about whether or not Cadillac-Gage is selling armored cars to Haiti be kept confidential?

(2) Would it not be reasonable to modify the term "internal security," as it is used in Section 4 of the Arms Export Control Act, in order to make clear that this term does not include actions which would contribute to the repression of legitimate forms of dissent in other countries?

(3) Would the Administration support a prohibition on the use of military sales credits for financing foreign police, prisons, law enforcement, or domestic intelligence-gathering activities?

I realize that many proposed actions which seem appealing on the surface do not translate well into concrete legislative proposals. I also believe, however, that the issues raised by Representative Downey are well worth the attention both of the Administration and of the Congress.

Finally, I would like to express my appreciation for the continuing effort being made by President Carter, and spearheaded by your office, to develop a workable arms sales restraint policy for the United States.

Sincerely,

GERRY E. STUDDS.

---

UNDER SECRETARY OF STATE
FOR SECURITY ASSISTANCE,
SCIENCE AND TECHNOLOGY,
*Washington, D.C., April 8, 1978.*

Hon. GERRY E. STUDDS,
*House of Representatives.*

DEAR GERRY: I am writing in response to your letter concerning the recent testimony offered by Congressman Downey before the House Subcommittee on International Security and Scientific Affairs with regard to certain aspects of our arms transfer policy, especially with relation to exports of commercially-sold defense articles and defense services on the U.S. Munitions List.

As you know, the Administration has placed a renewed emphasis on the observance of, and respect for, internationally-recognized human rights as a fundamental tenet of United States foreign policy. Consistent with this policy and the provisions of section 502B of the Foreign Assistance Act of 1961, as amended, we carefully review all proposed exports of commercially-sold items on the Munitions List intended for countries where substantial human rights problems exist. This is especially the case with respect to proposed exports of equipment that could be used by the police and other civil law enforcement authorities of those countries. The review process has recently been expanded to include police-related items not on the Munitions List, whose export is controlled by the Commerce Department. In many cases, applications for licenses for such exports have been denied on human rights grounds. In addition, we have made clear to a number of governments that the question of the nature and scope of any security assistance relationship with the United States is directly related to the state of human rights observance.

With regard to the specific proposals made by Mr. Downey, we are, of course, entirely sympathetic to the ends they are intended to achieve. Our preliminary analysis suggests that while some of these proposals may be desirable and feasible, others would present substantive and procedural difficulties that would seriously undercut their ultimate usefulness. Still others represent practices that are already being followed by the Department in exercising its functions with respect to the control of commercial exports of defense articles and services. We expect to be providing the Committee with more detailed comments on Mr. Downey's proposals in the very near future.

In your letter you asked for our views on three specific matters. The following comments are keyed to the questions which you have asked:

1. Section 38(e) of the Arms Export Control Act incorporates by reference the provisions of section 7(c) of the Export Administration Act of 1969, as amended, so that the requirements of the latter provision of law are made applicable to the activities of the Office of Munitions Control. Consequently, confidential business information, or information with respect to which a request for confidential treatment has been made by the person or firm supplying that information, received by the Office of Munitions Control, may not be released to third parties unless the Director of that office finds that withholding the information would be contrary to the national interest. (Section 38(e) carries with it the qualification that nothing therein shall be construed as authorizing the withholding of information from the Congress.) Moreover, the Freedom of Information Act exempts from disclosure under that statute ". . . commercial or financial information obtained from a person and privileged or confidential", 5 U.S.C § 552(b)(4).

Much of the information received by the Office of Munitions Control falls within the categories of information protected from disclosure by the above-mentioned statutes. For example, information relating to the identity of customers and the nature of the sale with respect to which a license application is filed could, if improvidently released, cause genuine competitive harm to the applicant. This is especially true of export license applications and applications for prior approval of sales activities, both of which may come well before the final conclusion of a sales transaction. The present system enables us to obtain information regarding export transactions and related matters (such as agent's fees) in excess of the bare minimum required by law and regulation. Thus, the restrictions on disclosure of information furnished in confidence to the Office of Munitions Control serve an important dual function recognized by statute—to further the regulatory scheme by encouraging full and complete disclosure, and to protect those who furnish such information from possible competitive harm—and do not, nor are they intended to, insulate either the exporter or the Executive Branch from any public criticism of specific export transactions. Any substantial relaxation of these disclosure limitations could put at risk the sources of information needed to effectively administer an important regulatory scheme, without genuine compensatory advantage to the public.

On the other hand, the Department does make available to the public, upon request, statements submitted under section 38(b)(1) of the Act, which identify and describe the activities of persons engaged in the manufacture, export or import of defense articles and defense services, without reference to particular transactions. Further, the annual report submitted to Congress each year under section 657(a)(3) of the Foreign Assistance Act is almost entirely public information. This report documents arms exports to all countries during the preceding fiscal year.

2. As you know, we do not construe the term "internal security" as used in section 4 of the Arms Export Control Act to refer to police and other civil law enforcement activities, but rather to the maintenance of internal order in a military sense, a legitimate purpose for which all countries, including our own, have historically maintained and supported armed forces. While we could support in principle an appropriate clarification of the present language of section 4 to make this distinction explicit, any such modification would have to avoid a formulation that would condition the legal propriety of a particular transaction upon the subsequent actions of the purchaser not foreseen at the time the sale was made. We are prepared to work closely with the Committee in the event it chooses to consider modification of section 4 in this respect.

3. With respect to the financing under the Arms Export Control Act of purchases related to foreign police, prisons, law enforcement, or domestic intelligence-gathering activities, such activities do not fall within the authorized purposes for which FMS sales may be made under section 4 of the Act, and consequently are not activities for which the use of FMS financing would be approved. Consequently, we do not believe that an amendment of the type you suggest would be either necessary to, or effective in, achieving the desired end.

We are, of course, looking forward to working together with the Congress in framing legislative proposals that will help give practical effect to the foreign policy goals of the United States. If I may be of further assistance in this or any other matters, please do not hesitate to let me know.

Sincerely,

LUCY WILSON BENSON ●

---

## PANAMA AND PAX AMERICANA

## HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. SYMMS. Mr. Speaker, last Friday (April 7) the Wall Street Journal carried an excellent editorial entitled Panama and Pax Americana that discussed some of the subtleties of the Panama Canal Treaty debate.

For one, the article points out that the people of Panama seem to believe (or have been led to believe by Torrijos) that the increased revenues to their Government from payments by the United States will permit the Panamanians a tax cut. The article goes on to point out that the reason Panamanian taxes are so high is because Torrijos runs Panama the same way Nelson Rockefeller ran New York State.

Mr. Speaker, I simply cannot help being amused by this ironic comparison; I must share this editorial with my colleagues in Congress:

PANAMA AND PAX AMERICANA

(By Jude Wanniski)

One of the most puzzling political phenomena of the year is the wide gap between the people and the politicians on what to do with the Panama Canal.

Who doubts that if there were provision in the Constitution for a national referendum, and one were held on the Canal treaties, that the voters would bury them? The opinion polls suggest the public opposes the treaties by roughly a two-to-one margin. Yet the representatives of the people, in the White House and in the U.S. Senate, by an astonishingly lopsided margin of roughly 70% to 30%, back the treaties, interpreted by the people as "giving away" the Canal.

Of course it's true that in a representative form of government we expect as natural the frequent discrepancies between the apparent wishes of the citizens and the votes of their delegates. This is because we expect our political delegates to weigh the intellectual arguments and passions of their constituents in addition to the numerical majority. In other words, Americans accept the idea that majority rule is not inconsistent with the notion that the squeaky wheel gets the grease.

But how can we explain this Canal voting? Not only has antitreaty sentiment among the citizenry amassed a wide numerical majority. It also commands the passion of that majority. There is scarcely any intensity among the minority of citizens who support the treaties. Senators Howard Cannon of Nevada and Paul Hatfield of Montana, for example, can hardly find any of the citizens who they represent agreeing with their protreaty votes.

What's going on?

AN EXPLANATION

There must be a rational explanation. And there is, I think, an honest difference of opinion here between the people and their representatives. When you come right down to it, President Carter and two-thirds of the Senate base their decision on the idea that "imperialism" is a bad thing and that the Panama Canal (which we "stole fair and square") is a symbol of American imperialism (Teddy Roosevelt, gunboat diplomacy and all that). Furthermore, they believe imperialism is antihistorical, as witness the crumbling of the Roman and British empires.

The American people, on the other hand, still think Yankee-style imperialism is not a bad thing, all things considered. By this we'd mean an extension of hegemony not by conquest, but through superior example, leadership and salesmanship. Americans more or less think our system of government is the best in the world. For 60 years the U.S. economy has been preeminent. For a good part of that time U.S. military power has protected the interests of democracy and freedom. The U.S. dollar has been the world currency. American culture has become an international language. A benign imperialism, mostly.

Nor do Americans, generally speaking, believe "imperialism" is antihistorical. On the contrary, if the world is going to be unified someone has to be in the lead. If it is not the United States it looks to the man in the street that it will be the Soviet Union. The problem with empires, like any club, is that they are good only as long as people really want to belong to them. Previous empires broke down because the costs of belonging finally overtook the benefits.

For the last dozen years or so, unhappily, the costs of membership in the Pax Americana have been rising and the benefits have been falling. American imperialism has been falling. American imperialism has been getting a bad name. People are trading in dollars for yen. France and Italy are on the brink of switching to the other guys. German citizens are taking up collections to help support our tattered legions stationed there. And when Omar Torrijos rattles his Panamanian saber, our Kissingers tremble.

President Carter and two-thirds of the U.S. Senate are correct in their calculations. A shrinking Pax Americana cannot keep clients against their will. One must cut the empire down to size, smiling as we wave bye-bye to former customers. So long, Cuba, Goodbye, Vietnam and Indochina. Adios, Angola. Goodbye, Canal. Shrink the U.S. Navy to bathtub size. Ban the neutron bomb. Take what you can get at SALT, and start thinking about kissing Taiwan goodbye.

The American people are making different calculations, and seem to be saying it is too soon to throw in the towel on Yankee world leadership. Heck, we hardly had a decent run at it, and when the President and Senate reach so far down into the barrel to give away the Canal, it seems premature. Sure, if the economy continues to bleed itself with inflated currencies and debt finance we'll have no choice but to retreat, to lighten the load. But so soon?

What, though, is the alternative? It goes without saying that internal economic disintegration must be halted and real expansion renewed. But even if Mr. Carter and two-thirds of the Senate had a clue as to how this could be done, it would not be enough to boom the host country of this empire. The American failure of the last 30 years, as an imperialist host, is that it unwittingly poisoned the poor countries of the world with unfortunate advice. In the next run at a Pax Americana, this has to change.

Consider Panama. The chief reason by far that the people of Panama want the Canal is economic. In addition to getting a big bag of money to take the Canal off our hands, Panama gets the right to boost Canal tolls and milk it for everything the traffic will bear. The people of Panama seem to have a vague hope the revenues will go to reducing their domestic taxes.

Why are Panamanian taxes so high? The main reason is that for the last decade Gen. Torrijos ran the government the way Nelson Rockefeller ran New York State. Spend and tax, spend and borrow. Mr. Torrijos was advised that this was the best way to build a modern economy by his friend, Nelson Rockefeller, who a decade ago sent a team of experts to Panama to help him out. Panama's external debt is at least $2 billion and debt service takes 37 cents of every dollar of national revenue. For the most part, New York banks hold the paper. Mr. Rockefeller is the only American we know who exhibits genuine passion on behalf of the treaties and Mr. Torrijos.

A BETTER WAY

There must be a better way of redeeming Mr. Rockefeller for his dreadful advice to his friend than giving up the Canal and a lot of money. Sen Harry Byrd of Virginia thinks the U.S. taxpayer costs will hit $10 billion before the deed is done in the year 2000. And chances are slim that Mr. Torrijos will use the money to relieve his people of oppressive taxes. He'll buy a lot of military trinkets and build a replica of the Albany Mall.

Why not pay off Panama's $2 billion debt if the government agrees to cut tax rates by 37% (the amount of revenues now going to debt service). The Panamanians would love it.

We shouldn't pin this to Mr. Rockefeller, either. He was, after all, only one of a crowd of Americans who circled the globe since World War II selling a British brand of economics. It never occurred to the American Keynesians that the British Empire crumbled under the idea that public debt and high tax rates were the correct, modern formula for growth. Mr. Rockefeller was honest. He practiced what he preached. New York has not recovered, just as the former British colonies have not recovered, just as Panama has not recovered. And observe the prosperity of Egypt 22 years after Mr. Nasser grabbed Suez from the dying Pax Britannica.

Imperialism becomes malign when the Empire disseminates poisonous advice. Lucky for us that countries like Germany, Japan, Taiwan and several others ignored our advice, and kept the Western economy buoyant.

Perhaps this partly explains why there is such a gap between the people and the politicians on the Canal. The citizenry may sense that Keynesianism is on its last laps, and we'll soon abandon the idea that an American hegemony can succeed with economic theories that destroyed the British Empire. American global leadership must surely become more attractive once we stop advising the Panamas of the world to search for happiness in debt, devaluation and taxation.

This is an optmistic view. The President and the Senate clearly do not believe any of this foolishness, which is why they vote the way they do. The people haven't given up on another run at a Pax Americana, which is why they are putting up such a fuss.

(Mr. Wanniski is an associate editor of the Journal.)●

## CHILD ABUSE PREVENTION AND TREATMENT AMENDMENTS OF 1977

### HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

Mr. BRADEMAS. Mr. Speaker, yesterday the House of Representatives gave final approval to H.R. 6693, legislation providing for a 4-year extension of the Child Abuse Prevention and Treatment Act with authorizations at $25 million for fiscal 1978, $27.5 million for fiscal 1979, and $30 million each for fiscal 1980 and 1981.

The measure would increase the level of funds available to the States for assisting State child abuse prevention and treatment efforts. Continued support would be provided for ongoing service programs helping abused children and their families. The legislation would also require a close review of the research activities of the National Center on Child Abuse and Neglect.

Mr. Speaker, the legislation passed yesterday would give special assistance to programs dealing with the sexual abuse of children, and would also provide for the reform of adoption procedures to ease the interstate placement of children in adoptive homes.

At this point, Mr. Speaker, I would place in the RECORD a summary of the compromise agreement on H.R. 6693 reached with the Senate Committee on Human Resources and approved yesterday by the House of Representatives:

H.R. 6693—JOINT EXPLANATORY STATEMENT OF HOUSE BILL, SENATE AMENDMENT, AND COMPROMISE AGREEMENT

TITLE I—CHILD ABUSE PREVENTION AND TREATMENT AMENDMENTS

SEC. 101—National Center on Child Abuse and Neglect.

*Dissemination of research and training materials*

The House bill would add a requirement to the Child Abuse Prevention and Treatment Act that the National Center on Child Abuse and Neglect "disseminate" as well as "compile, analyze and publish" (requirements of existing law) research and training materials.

The Senate amendment contained no comparable provision.

The compromise agreement contains the House provision.

*Comprehensive plan for maximum coordination of activities of all agencies and organizations involved in child abuse and neglect*

The Senate amendment would require that the National Center on Child Abuse and Neglect prepare a comprehensive plan for seeking to bring about maximum coordination of the goals, objectives, and activities

of all agencies and organizations involved in child abuse and neglect.

The House bill contained no comparable provision.

The compromise agreement contains the Senate provision.

*Research priorities*

Both the House bill and the Senate amendment would require that the Secretary of H.E.W. establish research priorities for making grants or contracts under the Act and, not less than sixty days before establishing such priorities, publish a statement of such proposed priorities in the Federal Register for public comment.

The compromise agreement contains this provision.

The Committees anticipate that the research and demonstration priorities for fiscal year 1978 will reflect the amendments to the Act contained in the compromise agreement.

*Research grants*

Both the House bill and the Senate amendment, with slightly different phraseology, would provide that research grants may be made for periods up to three years with a review, at least annually, by the Secretary of H.E.W. utilizing peer review mechanisms to assure the quality and progress of research conducted under such grants.

The compromise agreement contains this provision utilizing the House phraseology.

*Staff and resources*

Both the House bill and the Senate amendment would provide that the Secretary of H.E.W. shall make available to the National Center on Child Abuse and Neglect the necessary staff and resources for the Center to carry out effectively its functions.

The Compromise agreement contains this provision utilizing the Senate phraseology.

The Committees note that while insufficient staff and resources have been made available to the National Center on Child Abuse and Neglect to enable it to carry out its functions, the support staff at the Assistant Secretary for Human Development's level has grown significantly over the past few years. The Committees expect that adequate staff and resources will promptly be made available at the program level to carry out this Act effectively.

The Committees would like to make clear that they expect that no funds appropriated under this Act would be utilized for research programs or activities which are not specifically authorized by this Act, nor would such funds be transferred to any office or other activity of the Department of H.E.W. which is not directly responsible to the Commissioner of the Administration for Children, Youth, and Families or other successor office or activity which performs substantially similar functions with respect to the child abuse and neglect programs. The Committees have been assured that no such diversion of research funds appropriated under this Act has been implemented with respect to fiscal year 1978 appropriations, and the Committees expect that this situation will continue hereafter.

SEC. 102—Definitions.

*Sexual exploitation*

The House bill would add "or exploitation" after "sexual abuse" in the definition of child abuse and neglect in section 3 of the Act.

The Senate amendment contained no comparable provision.

The compromise agreement contains the House provision.

*Failure to provide medical treatment*

The House bill would add to the definition of child abuse and neglect a provision excluding from the definition of child abuse and neglect a failure to arrange for medical treatment because of religious belief.

The Senate amendment contained no comparable provision.

The compromise agreement does not contain the House provision.

*Definition of age*

The Senate amendment would amend the definition of "child" to allow the age of the child to be defined by State law.

The House bill contained no comparable provision.

The compromise agreement contains the Senate provision.

SEC. 103—Demonstration or Service Programs and Projects.

*Service programs and projects*

The House bill would add "service" programs to the demonstration program authority. The Senate amendment would provide for special consideration to be given to continued federal funding of programs or projects of national or regional scope and demonstrated effectiveness.

The compromise agreement incorporates the provisions of both the House bill and the Senate amendment. The provisions of the House bill are included in section 103 and the provisions of the Senate amendment are included in section 104.

*Development and establishment of training programs*

The House bill would strike out "the development and establishment of" in the training authority for demonstration programs.

The Senate amendment contained no comparable provision.

The compromise agreement contains the House provision.

The Committees stress that this change is intended to clarify that funds may be utilized for maintenance of training programs and is not intended to eliminate the authority for development and establishment of training programs.

*Relocation of appropriations earmarking provisions*

The Senate amendment would move the provision earmarking the funds appropriated under the Act for programs or projects from section 4 to section 5.

The House bill contained no comparable provision.

The compromise agreement contains the Senate provision.

*Disbursement of State grant funds*

The House bill would add "(through the Center)" to the provisions dealing with disbursement of State grant money and strike out the phrase "for the payment of reasonable and necessary expenses" in the provisions dealing with reimbursement in the State grant program. The Senate amendment would also add "through the Center" to these provisions along with a conforming amendment to facilitate the movement of the earmarking provisions of the Act from section 4 to section 5.

The compromise agreement contains the Senate phraseology.

*Obligation of State grants*

The Senate amendment would require a reduction in grants awarded to a State which fails to obligate funds within 18 months after its award.

The House bill contained no comparable provision.

The compromise agreement contains the Senate provision.

SEC. 104—Authorization of Appropriations, Earmarking, and Sexual Abuse Treatment Programs.

*Authorization of appropriations*

The House bill would provide for a five-year extension of the authorization of appropriations at levels of $25 million for fiscal year 1978, $27.5 million for fiscal year 1979, and $30 million each for fiscal years 1980, 1981, and 1982. The Senate amendment would provide for a two-year extension at $25 million each for fiscal years 1978 and 1979.

The compromise agreement provides for a four-year extension at $25 million for fiscal year 1978, $27.5 million for fiscal year 1979, and $30 million each for fiscal years 1980 and 1981.

*Earmarking of appropriations*

The Senate amendment would move the earmarking provisions of the Act from section 4 to section 5 and would include research activities as among those (presently demonstration programs and projects) for which 50% of the funds are earmarked under existing law.

The House bill contained no comparable provision.

The compromise agreement contains the Senate provisions.

*Continued funding of national or regional projects of demonstrated effectiveness*

The House bill, the Senate amendment, and the compromise agreement, to extent previously described in section 103, provide for funding of service programs within the existing demonstration program authority and for special consideration for continued Federal funding of child abuse and neglect programs or projects, previously funded by the Department of H.E.W. of national or regional scope and demonstrated effectiveness.

*Earmarking of appropriations for State grant program*

The House bill would provide that not less than 30% of the funds appropriated shall be used for the State grant program. The Senate amendment would provide that not less than 20% of the funds appropriated shall be used for the State grant program.

The compromise agreement provides that not less than 25% of the funds appropriated for each of fiscal years 1978 and 1979 shall be used for the State grant and not less than 30% for each of fiscal years 1980 and 1981.

*Sexual Abuse Treatment Center, programs, and projects*

The House bill would provide for the establishment of not less than five centers for provision of treatment and other services to sexually-abused children and those who commit sexual abuse against children, and authorizes the appropriation of such sums as may be necessary. The Senate amendment would authorize the appropriation of $2 million each for fiscal year 1978, and 1979 for (1) research, (2) demonstration projects, and (3) State grants for programs and projects to prevent, identify, and treat sexual abuse of children, including the treatment of family units. The Senate amendment also would provide that not more than 20% of the sums appropriated each year may be spent on research.

The compromise agreement incorporates provisions from both versions to: (1) provide for authorizations of appropriations of $3 million for fiscal year 1978, $3.5 million for fiscal year 1979, and $4 million each for fiscal years 1980 and 1981; (2) provide for programs and projects (including the support of not less than three centers for the provision of treatment, personnel training, and other related services) designed to prevent, identify, and treat sexual abuse of children, including programs involving the treatment of family units, programs for the provision of treatment and other related services to persons who have committed acts of sexual abuse, and programs for the training of personnel, and (3) provide that not more than 10 per centum of the sums appro-

priated under this authority shall be expended for research.

*Definition of sexual abuse, utilization of funds by other programs or projects, and limitation upon appropriations for sexual abuse programs*

The Senate amendment would provide (1) a definition of sexual abuse for the purpose of funding programs and projects under the separate authorization of appropriation contained in section 5(b) of the Act; (2) that funds appropriated under section 5(a) authorization in the Act may also be used for the purposes specified in the section 5(b) authorization; (3) that programs and projects receiving funds under the section 5(a) authorization may also receive funds for activities under the section 5(b) authorization; and (4) that no funds may be spent for section 5(b) unless funds are appropriated under section 5(a) at least the fiscal year 1977 level.

The House bill contained no comparable provision.

The compromise agreement contains the Senate provision.

*Criminal penalties for sexual exploitation of children*

The House bill would establish criminal penalties for the sexual exploitation of children.

The Senate amendment contained no comparable provision.

The compromise agreement does not contain the House provision.

Sec. 105—Advisory Board.

*Elimination of Advisory Board report submission requirement*

The House bill would eliminate the provision in the Act (Sec. 6(b) & (c)) requiring the Advisory Board on Child Abuse and Neglect to prepare and submit, within eighteen months of the date of enactment, a report to Congress and the President on the programs, projects, and activities related to child abuse and neglect sponsored by other agencies. This report has already been submitted.

The Senate amendment contained no comparable provision.

The compromise agreement contains the House provision.

*Public members on advisory board*

The Senate amendment would add not less than three public members to the Advisory Board, and provide for compensation for public members while serving on the Advisory Board.

The House bill contained no comparable provision.

The compromise agreement contains the Senate provision.

*Activities of advisory board*

The Senate amendment would require the Advisory Board members to discuss planned activities as well as existing activities and would require the Board to review the comprehensive plan prepared by the National Center under the provisions of section 101 (1)(E) of the compromise agreement, and submit the plan to the President and Congress no later than eighteen months after the date of enactment of this provision.

The House bill contained no comparable provision.

The compromise agreement contains the Senate provision.

TITLE II—ADOPTION REFORM

The Senate amendment would provide for:

1. Appointment by the Secretary of HEW of an advisory panel to recommend model adoption legislation and procedures to facilitate interstate adoption of children;

2. Establishment of a national adoption and foster care information data gathering and analysis system and national adoption information exchange system;

3. Establishment of an appropriate administrative arrangement within HEW to provide centralized focus for planning and coordination of all departmental activities affecting adoption and foster care, including an education and training program on adoption, preparation, publication and dissemination of information and education and training materials regarding adoption and adoption assistance programs, and technical assistance in the planning, improving, developing, and carrying out of programs and activities related to adoption; and

4 A study of the nature, scope and effects of interstate (and to the extent feasible, intrastate) placement of children in adoptive homes by unlicensed persons or agencies.

5. An authorization of appropriation of $5 million each for fiscal years 1978, 1979, 1980, and 1981 for carrying out this title.

The House bill contained no comparable provisions.

The compromise agreement contains the Senate provision.●

## PROBLEMS WITH ERISA

### HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 11, 1978*

● Mr. STEERS. Mr. Speaker, the passage of the Employee Retirement Income Security Act of 1974, otherwise known as ERISA, marked yet another moment of governmental intruction into the private lives of American citizens. I welcome this opportunity to suggest to the Congress and to the audience of the CONGRESSIONAL RECORD some of the problems and obstacles imposed by this act.

The mandates in the Employee Retirement Income Security Act imposed at least five different sets of problems which have thus far been uncovered. They are:

First. Excessive paperwork;

Second. Mounds of bureaucratic redtape due to a division of responsibility for administration of the act ;

Third. Legal difficulties not previously dealt with, due to new and different words and phrases;

Fourth. Spouses working within the household end up being penalized due to their choice of jobs; and

Fifth. The impossibility of maintaining an individual and portable retirement fund at least equivalent to an IRA allowed amount, due to sometimes tenuous and only remotely possible, coverage of optional employer related retirement accounts.

Turning to the first problem, that of excessive paperwork, many constituents have spoken to me about the problems and burdens this act has precipitated. A large part of the problem lies in the fact that the forms to be filled out and filed bear only a marginal relationship to that which is the subject matter of the reports. For example, in the case of a small business with few employees, if there is a profit-sharing plan, it comes under the jurisdiction of the act. If the plan satisfies the scrutiny of the Internal Revenue Service, there must be forms filled out, of which the only connection with the act is that the profit sharing will occur later in life. In effect, there is a provision being made for possible future income and the label given it is profit sharing. In the case of one person businesses which have incorporated, the problem becomes especially apparent. While drawing a salary the profit sharing is not merely current income deferred until a later date, but an exercise of corporate power which is outside the bounds of any duty to compensate employees. Why this has to be reported separately (from records of the corporation) to the IRS is not entirely clear, but it does. What then happens to the report is only vaguely set forth. While it certainly contributes to the already overflowing files of memoranda on people in a similar situation in the Federal Government's files, that information may well be found to be less than valuable or useful. The answer to this problem may take the form of one of several options:

First. Repeal ERISA;

Second. Restrict the jurisdiction of ERISA to only employee contributed funded accounts and eliminate all other types of pension systems;

Third. Restrict the jurisdiction of ERISA to only deferred employee compensation systems; and

Fourth. Enact Senate bill S. 901 or House bill H.R. 4340.

The second problem area involves a division of responsibility which results in duplication of all employers' (or anyone who is required to file reports) efforts. The enactment of ERISA started the Departments of Labor's and Treasury's dual jurisdiction over the pension systems of ERISA. Having to deal with one Federal regulatory agency at a time can be a very trying situation. My constituents, however, tell me of the even greater difficulties in dealing with two independent Federal regulatory agencies. As we all know regulatory agencies answer to no constituency, nor are they elected into office. At the level of implementation of policy decisions, the levels of the agcncy are not even staffed with workers approved by the Congress. The problem then, lies not in the personnel of the agencies, but in the latitude given the agencies by Congress in how to go about implementing a Federal law. When all the activities of the Departments of Labor and Treasury are reviewed closely it can be seen that their primary function or duty is not to oversee pension administration, pension vesting abilities or pension systems in general. Rather, the passage of ERISA tacked onto their jobs something that neither was especially suited to do. In fact, a basic question is whether or not the Federal Government should be in the pension overseeing business at all. As most pensions amount to either employer contributed funds or deferred compensation or a combination of the two, the taxation consequences are readily apparent. Thus to have sections of the Internal Revenue Code spelling out deductions, allowed or disallowed, involving both personal and corporate income tax, makes sense. But to have anyone collecting mandated forms for the purpose of merely keeping an eye on pension systems in general, does not make a great deal of sense. In theory, and in fact, when the IRS reviews a tax form and notes that John Doe has reduced his taxable income by setting up an independent retirement account, they need only note that, and be aware of the

limitations that it involves, in terms of amounts, when it can be used, and so forth. It is my feeling that the Federal Government should not have to oversee pension systems as it now does. However, the next best solution of the problem may well be to set up an independent pension administration and assign to it the previously split authority of the Labor and Treasury Departments. Thus, the options for solutions are:

First. Repeal ERISA;

Second. Pass Senate bill S. 901 and/or House bill H.R. 4340;

Third. Give all responsibility for the administration of ERISA to either of the Departments of Labor or Treasury but not to both.

The third problem area which my constituents have addressed can generally be described as a problem of legally defining words and phrases which are new or used in a new context. This problem stems from the new act and its allowing regulatory agencies to define terms. For example, what number of hours worked is equal to a workweek? Many people would describe this as an easy question and 40 hours is a natural answer, Thus, a regulatory agency's civil servants may have as their standard, a 40-hour workweek. But these same people have divined that a 45-hour workweek is the standard of measurement. The importance of this one concept should not be underestimated. If a worker has to put in X amount of hours in order for rights to a retirement account or fund to either vest, accrue, or begin to pay out, then this issue is a fundamental one for Congress to decide. An industry standard may well be a 40-hour week. However, with an arbitrary assignment of 45 hours for every 7 days worked as opposed to industry's standard of 40 hours will not result in an accrued week of work as far as the pension fund is concerned. Thus, for every 53 weeks worked (or 1 week more than a year) there will be accrued for pension purposes, only 48 weeks (or 4 weeks less than a year). Thus, the loss is approximately a little more than 1 month per year in a retirement program. The problem sounded very simple but can turn into disaster when applied capriciously and inconsistently. Again, this is but one example of the defining of words and phrases which can wreak havoc on pension systems. The problem could call for independent and responsible pension fund overseers or an agency which will look to each different industry and to different companies within each industry. In the end, however, this may result in a certification of each and every pension system, which not only defeats the purpose of ERISA but might make Federal regulation in this area totally useless and superfluous. Thus, the options to solve this problem may be itemized as follows:

First. Repeal ERISA; and

Second. Pass S. 901 and/or H.R. 4340;

Third. Severely restrict the authority of a regulatory body from redefining words and phrases which already have a meaning within an industry or company and which are acceptable within a normal English language dictionary's meaning.

The fourth problem area raises a fundamental issue with which we are now faced in many of the complex problems confronting legislators and nonlegislators. Currently spouses working within the household end up being penalized, due to their choice of job. Clearly, this is a part of the pension system which discriminates against women, as so many of the spouses working within a household are women. While there are a great many women who do leave the household, a large percentage remain and are household workers. These household workers are generally not paid a wage or salary as they would have received had they worked as either a furniture cleaner in a different job, or a babysitter or a nanny in another household. Should these women, however, be set aside from other working men and women in what can be contributed to a retirement account in their name? I do not think so. I believe, and my constituents in their communications to me suggest, that the current situation is inequitable, unfair, discriminatory, and deplorable. These women eventually may be forced to live off of the retirement account in their name. Then they will be punished, as they could have saved more had they not been stigmatized and limited unequally as to how much they could save in a tax-free environment for the time when they would be totally out of the job market, or their spouse would be out of the job market, or if they wanted to work, were disabled and unable to work. This problem, while severe in nature, is the easiest to solve. All we have to do is allow homebound spouses to either contribute or have contributed in their name the same amount that they could have contributed were they in a job of their own. The methods which can accomplish this are as follows:

First. Enact H.R. 7587;

Second. Enact H.R. 4649; and

Third. Enact H.R. 2454.

The fifth, and last only on this list of problems, is another easy one to solve. Here is the situation of another John or Mary Doe. Suppose they work for a corporation which will vest rights to a retirement account in their names (and only the corporation can contribute to the account) but only after working at their jobs for at least 5 continuous years. And then the amount placed in their account is not as much as they would like or would place if they were allowed to add as much as an individual retirement account allows. When John or Mary leaves their job, they might have a vesting percentage. But then they might not. One acceptable minimum vesting standard for ERISA is one in which the nonforfeitable percentage of employer contributed amounts of 25 percent vests after 5 years. Thus, John and Mary have no alternative. They cannot open an individual retirement account because they are covered by a pension system of sorts. But, the one under which they are covered, is not nearly as valuable as an individual account they can add to at will and carry with them from job to job. To say that if John or Mary shifts jobs frequently that keeping records would be difficult or impossible is no real response. The IRS keeps track of all moneys coming in and out of individual's and corporate income streams already. Such mechanisms can be modified, transferred, or copied in a pension overseeing agency. To argue that if John or Mary are under 30 years of age and most likely will never bother to establish a retirement account were it not for their employer's actions, it also is not responsive to the problem at hand. I believe that many young people are now (or would be if allowed to) actively interested in preparing for their nonproductive and non-income-producing years. Even further, the demands of a family in later years, or just rising prices due to inflation and the increased cost of living, may be a strong incentive to start a retirement fund as soon as possible. Their Government would be doing them a tremendous disservice by not allowing them to choose or by making the choice for them. Thus, portability of a fund is one answer, and allowing an employee to have his own retirement account, regardless of what his employer may do, is another or additional solution of the problem. Here, then are the options suggested:

First. Enact H.R. 6551 or H.R. 114;

Second. Amend ERISA so as to raise a pension's vesting standard in such a way so fewer current pension systems will qualify as pensions and thus more people will be allowed to start individual retirement accounts;

Third. Establishment of a separate Pension Administration Agency which will be entrusted with overseeing all pension systems; and

Fourth. Allow anyone to establish an individual retirement account regardless of what other plan under which they might be covered.

In summary, as my constituents have indicated, many severe and complicated problems have come about due to the Federal Government's attempt at rules and regulations concerning retirement accounts. The simplest but perhaps least easy means to accomplish a resolution of these problems would be to leave entirely the area of pension administration.

The next best solution may be realized through the passage of H.R. 4340, which would have the President establish an Employee Benefit Administration within any department or agency of the United States. I heartily encourage my colleagues in the House of Representatives to pass this measure to amend the Employee Retirement Income Security Act of 1974 and thereby promote more efficient and satisfactory management of the Federal Government relating to employee and welfare pension plans. Certainly, the thrust here is that the establishment of such an Administration would not result in the expansion of the Federal bureaucracy—it would coordinate the efforts of two agencies into one by eliminating the present "dual jurisdiction."

I join my constituents in feeling that the time for an overhaul is now. In short, solutions to these problems are available and I urge the Congress to act swiftly and justly on behalf of every American who plans for his or her retirement.●

# SENATE—*Wednesday, April 12, 1978*

*(Legislative day of Monday, February 6, 1978)*

The Senate met at 10:30 a.m., on the expiration of the recess, in executive session, and was called to order by Hon. WILLIAM D. HATHAWAY, a Senator from the State of Maine.

## PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O Lord God, to whom the prayers of Thy children arise as incense from wistful souls, speak to our busy and burdened minds and bodies as we lift our lives to Thy searching gaze. Assess our thoughts, words, and deeds, not according to the values of our contemporaries, but against the transparent glory of the Master.

Grant that in these hard and dangerous days we may find peace in the midst of the storm, forgiveness for every sin, correction for every failure. May our sense of personal responsibility move us to lay our lives on the line—clean, strong, honest, and trustworthy in service to our fellow man.

We pray that we may not fail our own or coming generations in our dedication to justice and brotherhood. What we pray for ourselves, we pray for all others in the affairs of government. Unite us heart to heart, soul to soul, as we offer our petitions in the name of that One who taught us to pray that His radiant kingdom may come on Earth. Amen.

## APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).
